In Missouri, medical marijuana was legalized by Amendment 2 and took effect December 2018. As of June 10, 2019, 12 states have legalized recreational marijuana and 29 states have legalized medical marijuana. In a roadside 2013-2014 NHTSA roadside survey, 20% of the nighttime and weekend drivers tested positive for drugs. Interestingly, the number of daytime drugged drivers was approximately the same amount as night and weekend drugged drivers. A roadside study in Colorado and Washington, the first two states to legalize marijuana for recreational use, showed the primary increase of marijuana users happened to their daytime drivers. The percent of drivers that tested positive for marijuana during the day went from 8%, before recreational marijuana sales, to 23%, 6-12 months after marijuana was legalized. There was a 48% increase in weekend nighttime drivers testing positive for THC or 11-OH-THC (an active metabolite of THC) from 2007 to 2014.

Montana legalized medical marijuana in 2004 and from 2007-2010, the presence of marijuana in DUI suspects increased over 100%. Also, the number of DUI suspects who tested positive for alcohol and marijuana increased by over 180%.

Medical marijuana has been legal in the state of Colorado since 2000. On November 12, 2012, the state of Colorado passed Amendment 64, which legalized private use of marijuana. Per the Colorado State Patrol's driving under the influence statistics, marijuana DUI citations increased 25.5% from 2014 to 2018 and marijuana and alcohol citations increased 112% in the same time range. As marijuana becomes legalized, its use increases.

The three years after Colorado legalized marijuana for recreational use (2013-2015), its use increased in youth ages 12-17, by 12%, in young adults aged 18-25 by 16%, and adults 26 in older by 71%. By removing the recommended acceptable ages of use, zoning regulations, packaging, and advertising of cannabis/marijuana, the risk of use and abuse of marijuana by the youth of Missouri is substantially increased. This category of Missourians, who recent studies have shown significant long-term cognitive impairment when marijuana is ingested during the developmental years, would be affected.

2(7) The Patrol recommends replacing the word "specifically" with "which has, is or can be used in. . ." There are many items, products, and chemicals that can be used with marijuana, but are not developed specifically for marijuana. (page 14)

3(1)(d) The Patrol recommends replacing the word "intoxicated" with "impaired. (page 15)

3(3) The Patrol recommends replacing the word "intoxicated" with "impaired". (page 15)

4(24) The Patrol recommends addressing the need to prohibit the importation of marijuana from outside Missouri. (page 22)

9(1)(b) There is no definition for what qualifies as a non-violent crime. This information would be critical for the Department of Health and Senior Services in determining a disqualifying felony offense. In addition, there are no provisions for conducting criminal background checks under section nine. (page 25)

9(5) This section specifies the type of container the marijuana is required to be sold in, however, there are no provisions or requirements about the marijuana remaining in the same packaging one the sale to an individual has been made. The Patrol recommends language requiring marijuana to remain in its original packaging. For individuals who produce for themselves it is recommending having guidelines on the type of container or packaging if carried in public. (page 25)

The Patrol recommends a $75 fee, similar to the criminal history background check fee, be implemented for the cost of researching and reviewing criminal histories, as well as contacting various agencies associated with arrests (in researching other states with similar expungement requirements, they all charge a fee to offset the cost of the time required to process the expungements - their fees ranged from $50 to $450 per petition per arrest date).

This initiative provides specific employment protections for those who use Cannabis/Marijuana. Such use while serving in any law enforcement related position not only creates public safety concerns, but also quality control and security issues when working with highly sensitive material or information. Additionally, the Patrol receives federal grant funding, subject to audits, that require a drug free workplace policy. For these reasons, the Patrol feels it is essential that it be allowed to continue administering drug testing for new employees, as well as random tests, critical incident tests, etc.

Additionally, the initiative does not contain any language concerning the amount of marijuana an individual may transport, purchase or sell. Also, there is no language as to where the marijuana may be transported. A lack of guidance may allow for Missouri marijuana facilities to distribute marijuana outside of the state, or allow other states to distribute their marijuana in Missouri. A lack of such language could lead to Missouri being a distribution starting point for states where marijuana remains illegal.

Finally, if passed, the initiative petition will remove Cannabis/Marijuana from Missouri Revised Statutes and creating conflict with both several Federal and State laws, such as the use or possession of a firearm. As the Patrol has officers assigned to federal task forces that may be involved in a federal drug operation, there are concerns over potential civil litigation resulting from these types of operations, as marijuana is still classified as a Schedule I controlled substance, and illegal under federal law.

Officials from the **Department of Social Services** indicated they do not anticipate a fiscal impact from the initiative petition.

Officials from the **Governor's office** indicated there should be no added costs or savings to their office.

Officials from the **House of Representatives** indicated no fiscal impact to their office.

Officials from the **Department of Conservation** indicated that no adverse fiscal impact to their department would be expected as a result of this proposal.

Officials from the **Department of Transportation** indicated no fiscal impact to their department/Missouri Highways and Transportation Commission.

Officials from the **Office of Administration** indicated this proposal amends Article XIV, Section 1 of the Missouri Constitution that was voter approved in November 2018 and adds additional language in Section 2 for recreational marijuana.

Section 1.3 states that all public records produced or retained under Section 1 shall become subject to the Missouri Sunshine Law on December 2, 2020. Section 1.3 changes qualified patient identification cards from an annual renewal to every three years. The patient card fees remain $25 per year. Budget and Planning (B&P) notes that it is not clear if patients will pay $75 ($25 x 3 years) upon application and renewal or $25 each year the card is active. Section 1.3 also changes primary caregiver identification cards from an annual renewal to every three years; the card fee is also increased from $25 to $75. B&P defers to the Department of Health and Senior Services (DHSS) for the estimated impact from these provisions.

Section 1.5 would allow out-of-state medical patients to purchase medical marijuana within Missouri. B&P notes that this could increase funding to the Missouri Veterans' Health and Care Fund as well as state and local sales tax collections by an unknown amount if out-of-state patients subsequently purchase medical marijuana within Missouri.

Section 2.1 would legalize the use of recreational marijuana for individuals over the age of 21.

Section 2.4 states that the number of recreational marijuana facility licenses (cultivation, marijuana-infused products, and dispensaries) must equal the number of licenses granted under medical marijuana (Section 1). B&P notes that per Section 1, the minimum number of cultivation facility licenses is 60, dispensary licenses is 192, and marijuana-infused product facility licenses is 86. In addition, Section 2.4 creates a minimum number of microbusiness facility licenses granted over a period of time. Section 2.4 further details the amount of application and annual fees required. Table 1 lists the fees per facility type and the associated estimated minimum revenue. B&P defers to DHSS for a more detailed analysis of the estimated impacts from these provisions.

Table 1: Facility Fees

Facility Type	Application/ Renewal Fees		Annual Fee	# Min Licenses Allowed	Estimated Minimum Revenue		
	Years 1-3	Years 4+			Application Fee	Renewal Fee (Every 3 years)	Annual Fee
Cultivation Facility	$12,000	$5,000	$25,000	60	$720,000	$300,000	$1,500,000
Dispensary	$7,000	$3,000	$10,000	192	$1,344,000	$576,000	$1,920,000
Marijuana-Infused Product Facility	$7,000	$3,000	$10,000	86	$602,000	$258,000	$860,000
Microbusinesses *Note: Up to an additional 48 microbusiness licenses may be issued if DHSS determines there is a market.*	$1,500	$2,500	$2,500	96	$144,000	$240,000	$240,000

Section 2.5 allows local jurisdictions to prohibit the operation of non-medical marijuana facilities upon voter approval at a general election.

Section 2.6 establishes an excise tax rate of 15% upon the retail price of non-medical marijuana. Section 2.6 notes this is in addition to state and local sales taxes that apply to retail sales. B&P notes that the language refers to "general state and local sales and use taxes". For the purpose of this fiscal note, B&P assumes that general means all state and local sales taxes levied and not just those levies that are directed to the state (or local) general revenue fund.

Based on research, B&P was able to find forecasts for the U.S. legal market for cannabis[1]. According to such forecasts, the U.S. market for legal marijuana will be approximately $24.5 billion in calendar year 2021 and grow up to $47.3 billion by calendar year 2027. Based on information from the Substance Abuse and Mental Health Services Administration[2], from 2016-2017 approximately 13.95% of Missouri residents and 14.73% of all U.S. residents surveyed have used marijuana within the last year. Using the populations of Missouri residents age 18 and over compared to the U.S. population age 18 and over, B&P estimates that the market for legal marijuana in Missouri is 1.79% of the total U.S. market. Therefore, B&P estimates that the Missouri market for legal marijuana would be approximately $439.5 million in calendar year 2021 ($24.5 billion x 1.79%) and up to $848.4 million by calendar year 2027 ($47.3 billion x 1.79%).

Based on further research[3], B&P estimates that there could be between 61,700 to 122,500 medical marijuana users in Missouri. Using these estimates, and the estimates shown above, B&P estimates that the Missouri market for medical marijuana would be between

[1] https://cannabusinessplans.com/cannabis-legal-market-size-projections/
[2] https://www.samhsa.gov/data/report/comparison-2015-2016-and-2016-2017-nsduh-population-percentages-50-states-and-district
[3] https://www.stltoday.com/news/local/metro/plenty-of-pot-study-says-missouri-will-license-twice-as/article_e94469b0-e1c6-5893-bc2e-e1d7b24f4a73.html

0.17% and 0.34% of the total U.S. Market for legal marijuana. Therefore, B&P estimates that the total Missouri market for recreational marijuana would be 1.46% to 1.62% of the total U.S. market. Table 1 shows the estimated U.S. and Missouri markets for marijuana.

Table 2: Estimated Marijuana Market Size for the U.S. and Missouri

Calendar Year	Estimated U.S. Market Size	Estimated MO Market Size	Estimated MO Medical Market Size	Estimated MO Recreational Market Size
2021	$24,500,000,000	$439,465,251	$41,480,436	$ 397,984,815
2022	$28,300,000,000	$507,627,209	$61,066,553	$ 446,560,656
2023	$32,100,000,000	$575,789,166	$80,652,669	$ 495,136,497
2024	$35,900,000,000	$643,951,123	$100,238,785	$ 543,712,338
2025	$39,700,000,000	$712,113,081	$119,824,901	$ 592,288,179
2026	$43,500,000,000	$780,275,038	$139,411,018	$ 640,864,020
2027	$47,300,000,000	$848,436,996	$158,997,134	$ 689,439,861

B&P notes that Section 2.4 states that DHSS must begin accepting facility applications within 365 of December 3, 2020 (the effective date of Section 2) and must grant application approvals within one-hundred and eighty days of their submission. Therefore, B&P estimates that sales of recreational marijuana will not begin until June 2022.

Applying the excise tax rate of 15% plus the state sales tax rate of 4.225% and excluding the estimated market for medical marijuana, B&P estimates that this proposal may increase state revenues by $50.0 million in calendar year 2022. By calendar year 2027, B&P estimates that this proposal may increase state revenues by $132.5 million. This proposal could also increase local revenues by $10.2 million in calendar year 2021 and $27.1 million by calendar year 2027; these estimates assume that no local jurisdictions opt-out of recreational marijuana. Table 3 shows the estimated revenues generated by calendar year.

Table 3: Estimated Calendar Year Revenues

Fund	CY 2022*	CY 2023	CY 2024	CY 2025	CY 2026	CY 2027
GR (3.0% tax)	$7,814,811	$14,854,095	$16,311,370	$17,768,645	$19,225,921	$20,683,196
Education (1.0% tax)	$2,604,937	$4,951,365	$5,437,123	$5,922,882	$6,408,640	$6,894,399
Conservation (0.125% tax)	$325,617	$618,921	$679,640	$740,360	$801,080	$861,800
Parks, soil, water (0.1% tax)	$260,494	$495,136	$543,712	$592,288	$640,864	$689,440
Veterans, Infrastructure, and Health Fund (15.0% tax)	$39,074,057	$74,270,475	$81,556,851	$88,843,227	$96,129,603	$103,415,979
TSR (total 4.225% state sales tax)	**$50,079,057**	**$95,189,992**	**$104,528,697**	**$113,867,402**	**$123,206,108**	**$132,544,813**
Local Revenue (pop. weighted local rate 3.93%)	$10,237,403	$19,458,864	$21,367,895	$23,276,925	$25,185,956	$27,094,987

*Assumes 7 months of sales from June 2022 through December 2022.

However, B&P notes that sales would start one month before the end of FY 2022. Based on historical sales tax collection data, B&P adjusts calendar year collections 50% into the first fiscal year and 50% into the second fiscal year. Therefore, B&P estimates that this proposal will increase state revenues by $7.2 million in FY 2022. By FY 2028, this proposal may increase state revenues by $132.5 million. This proposal may also increase local revenues by $1.5 million in FY 2022 and up to $27.1 million by FY 2028, assuming no local jurisdictions opt out of recreational marijuana. Table 4 shows the estimated revenue generated by fiscal year.

Table 4: Estimated Fiscal Year Revenues

Fund	FY 2022	FY 2023	FY 2024	FY 2025	FY 2026	FY 2027	FY 2028
GR	$1,116,402	$14,125,457	$15,582,733	$17,040,008	$18,497,283	$19,954,558	$20,683,196
Education	$372,134	$4,708,486	$5,194,244	$5,680,003	$6,165,761	$6,651,519	$6,894,399
Conservation	$46,517	$588,561	$649,281	$710,000	$770,720	$831,440	$861,800
Parks, soil, water	$37,213	$470,849	$519,424	$568,000	$616,576	$665,152	$689,440
Veterans, Infrastructure, and Health Fund	$5,582,008	$70,627,287	$77,913,663	$85,200,039	$92,486,415	$99,772,791	$103,415,979
TSR	**$7,154,274**	**$90,520,639**	**$99,859,344**	**$109,198,050**	**$118,536,755**	**$127,875,461**	**$132,544,813**
Local Revenue	$1,462,486	$18,504,349	$20,413,380	$22,322,410	$24,231,441	$26,140,471	$27,094,987

Section 2.6 further states that the taxes and fees levied under Section 2 shall be deposited into the newly created Veterans, Infrastructure, and Health Fund. B&P notes that this would include all license application and renewal fees, annual facility fees, and the 15% excise tax. This would not include the 4.225% state sales tax.

Monies in the Veterans, Infrastructure, and Health Fund are to be distributed in the following manner:

1. Amounts necessary to cover any DHSS costs related to Section 2 administration.
2. Amounts necessary for the creation of a reserve fund within DHSS to ensure there is enough working cash balance to administer Section 2.
3. 3/15th of the remaining balance to any local jurisdiction with recreational marijuana sales.
4. Any remaining balance will then be distributed:
    a. 1/3 to the Missouri Veterans Commission
    b. 1/3 to the State Road Fund
    c. 1/3 to DHSS for grants to non-profits and other agencies in relation to drug addiction treatment.

B&P is unable to estimate the amount of revenues that would be required to meet DHSS administrative costs and reserve fund needs. Therefore, for the purpose of this fiscal note, B&P will show the maximum amount of sales tax related revenues that could be distributed if all administration fees and reserve fund needs were met by the facility licensing fees.

Table 5: Maximum Distribution Amounts Based on 15% Excise Tax Collections

	FY 2022	FY 2023	FY 2024	FY 2025	FY 2026	FY 2027	FY 2028
Veterans, Infrastructure, and Health Fund	$5,582,008	$70,627,287	$77,913,663	$85,200,039	$92,486,415	$99,772,791	$103,415,979
Estimated Maximum Distributions							
DHSS Administrative Costs*	Unknown	Unknown	Unknown	Unknown	Unknown	Unknown	Unknown
DHSS Reserve Fund*	Unknown	Unknown	Unknown	Unknown	Unknown	Unknown	Unknown
Local Jurisdictions**	$1,116,402	$14,125,457	$15,582,733	$17,040,008	$18,497,283	$19,954,558	$20,683,196
Missouri Veterans Commission	$1,488,536	$18,833,943	$20,776,977	$22,720,010	$24,663,044	$26,606,078	$27,577,594
State Road Fund	$1,488,536	$18,833,943	$20,776,977	$22,720,010	$24,663,044	$26,606,078	$27,577,594
DHSS Drug Treatment Grants	$1,488,536	$18,833,943	$20,776,977	$22,720,010	$24,663,044	$26,606,078	$27,577,594

*For the purpose of this fiscal note, B&P will assume that DHSS costs are fully met through the licensing fee collections. Actual distributions may be significantly different.
**Assumes no local jurisdictions opt-out.

B&P notes that depending on administrative and reserve fund needs, actual distributions may be significantly different from the estimates shown above.

Section 2.10 specifies that adult use of recreational marijuana is not unlawful and allows for individuals who have been arrested, charged, or found guilty for any offense that would no longer be illegal after the effective date of Section 2 to apply for and be granted expungement of their records pertaining to such offenses. B&P defers to the Department of Corrections and the State Public Defender's Office for the estimated impact from these provisions.

Officials from the **Office of State Courts Administrator** indicated the initiative petition proposes a constitutional amendment to Article XIV to modify the current provisions of the Missouri Constitution relating to legalization of marijuana.

The average of all marijuana related charge codes from 2012 to 2016 for Circuit case types is 11,537 per year. The average of all marijuana related charge codes from 2012 to 2016 for Associate case types is 8,765. We are unable to determine what number of these charges were for someone over the age of twenty-one.

The following Criminal Court Costs would be affected by this proposed legislation:

Criminal Court Costs		
Felony Case Costs	**Amount of Cost**	**Disburse to State/County**
Basic Civil Legal Services Fund surcharge	$10.00	State of Missouri - Basic Civil Legal Services Fund
Clerk Fee	$45.00	State of Missouri - General Revenue $36, County $9
County Fee	$75.00	County
Court Automation Fund Fee	$7.00	State of Missouri -Statewide Court Automation Fund
Court Reporter fee (All Circuit Division Cases)	$15.00	State of Missouri - General Revenue
Crime Victims' Compensation Fund surcharge	$7.50	State of Missouri - Crime Victims' Compensation Fund
DNA Profiling Analysis Fund surcharge	$30.00	State of Missouri - DNA Profiling Analysis Fund
Brain Injury Fund surcharge	$2.00	State of Missouri - Head Injury Fund
Independent Living Center Fund surcharge	$1.00	State of Missouri - Independent Living Center Fund
Motorcycle Safety Trust Fund surcharge	$1.00	State of Missouri - Motorcycle Safety Trust Fund
Peace Officer Standards & Training (POST) Commission surcharge	$1.00	State of Missouri - Peace Officer Standards & Training Fund
Prosecuting Attorney and Circuit Attorneys' Retirement Fund	$4.00	Pros. Attorney Retirement Fund
Prosecuting Attorney Training Fund surcharge	$1.00	State of Missouri - Prosecuting Attorney Training Fund
Sheriffs' Fee	$75.00	County
Sheriffs' Retirement Fund surcharge (except 21st Circuit)	$3.00	Sheriffs' Retirement Fund
Spinal Cord Injury Fund surcharge	$2.00	State of Missouri - Spinal Cord Injury Fund
Total	**$279.50**	
Misdemeanor Case Costs		

Basic Civil Legal Services Fund surcharge	$8.00	State of Missouri - Basic Civil Legal Services Fund
Clerk Fee	$15.00	$12 State of Missouri / $3 County
County Fee	$25.00	County
Court Automation Fund Fee	$7.00	State of Missouri - Court Automation Fund
Crime Victims' Compensation Fund surcharge	$7.50	State of Missouri - Crime Victims' Compensation Fund
DNA Profiling Analysis Fund surcharge	$15.00	State of Missouri - DNA Profiling Analysis Fund
Brain Injury Fund surcharge	$2.00	State of Missouri - Brain Injury Fund
Independent Living Center Fund surcharge	$1.00	State of Missouri - Independent Living Center Fund
Motorcycle Safety Trust Fund surcharge	$1.00	State of Missouri - Motorcycle Safety Trust Fund
Peace Officer Standards and Training (POST) Commission surcharge	$1.00	State of Missouri - Peace Officer Standards & Training Fund
Prosecuting Attorney and Circuit Attorneys' Retirement Fund	$4.00	Pros. Attorney Retirement Fund
Prosecuting Attorney Training Fund surcharge	$1.00	$0.50 State of Missouri / $0.50 County
Sheriffs' fee	$10.00	County
Sheriffs' Retirement Fund surcharge (except 21st Circuit)	$3.00	Sheriffs' Retirement fund
Spinal Cord Injury Fund Surcharge	$2.00	State of Missouri - Spinal Cord Injury Fund
Total	**$102.50**	
Municipal Case (Filed in Associate Division) Costs		
Clerk Fee	$15.00	$12 State of Missouri / $3 County
Court Automation Fund Fee	$7.00	State of Missouri - Court Automation Fund
Crime Victims' Compensation Fund surcharge	$7.50	State of Missouri - Crime Victims' Compensation Fund
Peace Officer Standards and Training (POST) Commission surcharge	$1.00	State of Missouri - Peace Officer Standards & Training Fund

Sheriffs' Retirement Fund surcharge	$3.00	Sheriffs' Retirement Fund
Total	**$33.50**	
Criminal Costs Not Included Above		
Drug Testing by a State Lab	$150.00	State of Missouri
Drug Testing by a Private Lab	Actual Costs	County Reimbursement
Law Enforcement Arrest Costs:		
Highway Patrol		Amt. Approved by the Court
Local (County)		Amt. Approved by the Court
Municipal		Amt. Approved by the Court

The decrease in the court fees, depending on the number of cases, will result in an unknown loss to the courts.

We also assume there will be an unknown decrease in caseload for the courts because the courts will no longer process these cases; however, at this time we are unable to calculate the decrease.

Any significant increase or decrease will be reflected in future budget requests.

Officials from the **Missouri Senate** indicated they anticipate no fiscal impact.

Officials from the **Secretary of State's office** indicated unless a special election is called for the purpose, Referendums are submitted to the people at the next general election. Article III section 52(b) of the Missouri Constitution authorizes the general assembly to order a special election for measures referred to the people. If a special election is called to submit a Referendum to a vote of the people, Section 115.063.2 RSMo. requires the state to pay the costs. The cost of the special election has been estimated to be $7.8 million based on the cost of the 2016 Presidential Preference Primary.

Their office is required to pay for publishing in local newspapers the full text of each statewide ballot measure as directed by Article XII, Section 2(b) of the Missouri Constitution and Section 116.230-116.290, RSMo. Funding for this item is adjusted each year depending upon the election cycle. A new decision item is requested in odd numbered fiscal years and the amount requested is dependent upon the estimated number of ballot measures that will be approved by the General Assembly and the initiative petitions certified for the ballot. In FY (fiscal year) 2014, the General Assembly changed the appropriation so that it was no longer an estimated appropriation.

In FY19, over $5.8 million was spent to publish the full text of the measures for the August and November elections. They estimate $65,000 per page for the costs of publications based on the actual cost incurred for the one referendum that was on the August 2018 ballot.

Their office will continue to assume, for the purposes of this fiscal note, that it should have the full appropriation authority it needs to meet the publishing requirements. Because these requirements are mandatory, they reserve the right to request funding to meet the cost of their publishing requirements if the Governor and the General Assembly again change the amount or continue to not designate it as an estimated appropriation.

Officials from the **Office of the State Public Defender** indicated if passed, this constitutional amendment would have a positive impact on the workload of the Missouri State Public Defender (MSPD), since possession, manufacture, distribution, etc. of cannabis would no longer be unlawful, offenses that the Public Defender currently uses resources to defend and no longer would need to.

The exact positive impact is difficult to predict because they track their cases by statutory offense and most drug offenses are not limited to marijuana.

However, their best estimate, using FY2019 MSPD data, is that this would reduce their caseload by 4,219 cases (3,102 C/D felonies, 144, misdemeanors, and 974 probation violations).

In *The Missouri Project: A Study of the Missouri Public Defender System and Attorney Workload Standards*, prepared by RubinBrown on behalf of the American Bar Association's Standing Committee on Legal Aid and Indigent Defendants, the relevant workload standards are: A/B felonies, 47.6 hours per case; C/D felonies, 25.0 hours per case; misdemeanors, 11.7 hours per case; and probation violations, 9.8 hours per case). (The workload standards include only case related tasks over which an attorney has some control (they exclude, for example, in court and travel time) and thereby reflect a conservative estimate.)

Applying those workload standards to the 4,219 cases, those cases require 88,765 attorney hours. With 2,080 hours per attorney available each year, that represents the work of 43 attorneys.

While in theory they might also handle fewer appeals of guilty verdicts after trial, the fact is that only a very small percentage of their cases proceed to trial and it's likely that only a small percentage of those cases are appeals from marijuana convictions. Therefore this minimal positive impact is not being taken into account in this estimate.

However, the Missouri State Public Defender already is significantly understaffed by 321 attorneys under the workload standards developed in *The Missouri Project*.

Therefore, despite the positive impact on the workload of the Missouri State Public Defender, because they are already understaffed that savings in attorney time would not

allow the Public Defender to reduce its workforce and therefore would not translate into an actual cost savings. However it does reduce by the cost of 43 attorneys how much money needs to be added to their budget in order to meet *The Missouri Project*'s workload standards.

Officials from the **State Treasurer's office** indicated there is a tax and a variety of fees imposed in this petition. Once in operation, marijuana businesses have had difficulties obtaining and maintaining bank accounts due Federal law and regulations. State Treasurer's office and Department of Revenue are currently exploring options to handle large amounts of cash from licensed Medical Marijuana businesses as Department of Revenue may see many of these taxes paid in cash. Changes in security measures and collection points are under review as Department of Revenue, Department of Health and Senior Services, and Department of Labor and Industrial Relations do not currently receive large amounts of cash.

The changes in this initiative petition may increase the potential amount of receipts in cash exponentially.

They are unable to determine the fiscal impact to their office.

Officials from **Greene County** indicated there is anticipated costs to the County of Greene for this initiative petition, per the following information concerning this initiative petition, https://static1.squarespace.com/static/5541a76ae4b0175cee8827d0/t/580684e5ff7c50adea98399e/1476822252561/Letter+to+CA+from+Denver+DA.jpgI provided by their County Prosecutor, Dan Patterson.

To fully understand the fiscal impact would require a very detailed study to give the best opportunity to understand the impact to law enforcement, prosecutors and the circuit courts within the proposed changes of this initiative petition, which the linked letter demonstrates occurred in Colorado after similar legislation passed.

County Prosecutor, Dan Patterson provided the following information:

DenverDA
Mitchell R. Morrissey, District Attorney - Second Judicial District

No on 64 Campaign and SAM Action

California voters are being told that they will see the crime rate go down if they vote to legalize marijuana commercially; this has not been the case in the state of Colorado or the city of Denver. Since the legalization of recreational marijuana in Colorado in 2013 traffic related marijuana deaths have increased 48%, marijuana related emergency room visits have increased 49%, and marijuana related calls to the poison center have increased 100%. According to the Colorado Bureau of Investigations in 2015 statewide homicides in Colorado rose 14.7 % over the previous year. Pueblo, Colorado had the highest homicide rate in the state with 11.1 killings per 100,000 residents. Aurora, Colorado's homicide rate more than doubled from 2014. Additionally more places in Colorado were robbed and more thefts occurred, especially cars, as 193,115 motor vehicles were reported stolen, up 27.7 % in 2015 from the previous year. In 2015, sexual assaults rose 10% in Colorado with Denver, Aurora, Lakewood, Westminster and Pueblo all reporting higher numbers as well.

In the city of Denver since the legalization of recreational marijuana the number of crimes in Denver has grown by about 44 %, according to annual figures the city reported to the National Incident Based Reporting System. In 2015 in Denver alone crime rose in every neighborhood in the city. The murder rate hit a decade high, 1059 more cars were broken into, there were 903 more auto thefts, 321 more aggravated assaults and 231 more homes were broken into compared to 2014.

California voters are also being told that legalizing recreational marijuana will free up law enforcement to work on other criminal activities. Again that has not been the case in Denver. Besides the overall increases in crime we have experience, the Denver police department is dealing with a 900% increase in the unlawful cultivation and manufacture of marihuana concentrate, and a 99% increase in the unlawful distribution of marijuana and marijuana concentrate. The quantity of illegal marijuana seized by the Denver police has increased 3,424% on average per case. The volume of marijuana seized per case has increased from an average of 162 pounds to 5724 pounds. In Denver unlawful public consumption of marijuana citations has increased over 300% per year since the legalization of recreational marijuana. The Denver police department is busier enforcing marijuana laws and investigating crimes directly related to marijuana, including murderers, robberies, and home invasions, than any other time in the history of the city.

Sincerely,

Mitchell R. Morrissey
Denver District Attorney

Officials from **St. Louis County** indicated this proposal would have minimal to no fiscal impact on the operations of St. Louis County Government.

Officials from the **City of Kansas City** indicated this initiative petition may have a positive fiscal impact on their city in an indeterminate amount as a result of increased sales tax revenues; however, such revenues could be offset by increased expenses in an indeterminate amount.

Officials from **Metropolitan Community College** indicated no fiscal impact.

Officials from the **Missouri Veterans Commission** indicated:

Michael L. Parson
Governor

Grace Link
Executive Director

MISSOURI VETERANS COMMISSION

205 Jefferson Street, P.O. Drawer 147, Jefferson City, MO 65102-0147
Telephone: (573) 751-3779 www.mvc.dps.mo.gov Fax: (573) 751-6836

November 15, 2019

The Honorable John R. Ashcroft
Secretary of State
600 W. Main Street
Jefferson City, MO 65101

Dear Secretary of State Ashcroft,

Initiative Petition 2020-128 (hereinafter, the Initiative) will have a disastrous fiscal impact upon the Missouri Veterans Commission. Under the existing medical marijuana program, we anticipate receiving $12,458 in FY20, $2,135,510 in FY21, $2,529,753 in FY22 and $2,929,271 in FY23 from the tax revenues generated from the retail sales of medical marijuana. The Initiative makes no significant changes to that program, but the adverse impact the Initiative poses to the Commission is in the creation of the non-medical marijuana program. The medical marijuana program is predicated on medical need and the physician certification that marijuana is the appropriate treatment for that medical need. Conversely, the non-medical marijuana program has no requirement for medical need or for physician certification. It is only common sense that those wishing to use marijuana products will forego the inconvenience of establishing medical need and obtaining a physician's certification and avail themselves of the non-medical program regardless of their reason for wanting to use marijuana products. Therefore, we anticipate a significant reduction in the tax revenues generated by the medical marijuana program, perhaps as high as a 90% reduction, should the Initiative become law.

Moreover, given the significantly different distribution of tax revenues provided for under the non-medical marijuana program, we do not anticipate that our portion of the tax revenues generated under the non-medical program will defray the reduction we would experience under the medical marijuana program. Specifically, the medical marijuana program establishes a 4% tax on all retail sales of medical marijuana and allocates to the Commission all of those proceeds minus 5% to the Department of Revenue and an amount to the Department of Health and Senior Services necessary to defray their costs in regulating the program. Conversely, the non-medical marijuana program establishes a 15% tax on all retail sales of non-medical marijuana and allocates to the Commission one-third of those proceeds minus 2% to the Department of Revenue, an amount to the Department of Health and Senior Services necessary to defray their costs in regulating the program, and 3/15 to the local jurisdiction in which the sale took place. Despite the increased tax rate under the non-medical program, we anticipate receiving a significantly smaller portion of the tax revenues collected given the smaller allocation amount dedicated to the Commission.

Finally, the purpose for which the Commission may use its portion of the tax proceeds will essentially eliminate our ability to initiate construction projects to improve our physical facilities. Specifically, the medical marijuana program allows the Commission to use those proceeds for "for health and care services for military veterans, including the following purposes: operations, *maintenance and capital improvements* of the Missouri veterans homes, the Missouri service officer's program, and other services for veterans approved by the commission, including, but not limited to, health care services, mental health services, drug rehabilitation services, housing assistance, job training, tuition assistance, and housing assistance to prevent homelessness." (Emphasis added) That is essentially everything that the Commission does and clearly affords the Commission the flexibility necessary to address the needs of Missouri's veterans as they change over time. Conversely, the non-medical marijuana program requires the Commission to use its significantly reduced portion of the tax revenues strictly for "*health care and other services* for military veterans and their dependent families". (Emphasis added) This language will severely limit our ability to adjust our facilities to meet the changing needs of Missouri's veterans.

In closing, Initiative Petition 2020-128 will adversely impact the ability of the Missouri Veterans Commission to serve the veterans of Missouri for the reasons set forth above. If I can be of any further assistance on this issue, please contact me at (573) 751-4066 at your convenience.

Sincerely,

Ryon A. Richmond
Deputy Director
Missouri Veterans Commission

Officials from the **Missouri Office of Prosecution Services** indicated there is no fiscal impact to their office. The enactment of a new crime [Section 2.10(6)(c)] creates additional responsibilities for county prosecutors which may in turn result in additional costs which are difficult to determine.

Proposed Statement of Fiscal Impact

Fiscal Impact Information Submitted Pursuant to Section 23.140.2

The amendment's estimated state revenue is $197.9 million when fully implemented, including $27.6 million each for veterans, infrastructure, and health programs. General revenue and other state funds benefit by $48.4 million, and $27.2 million in local revenue is estimated.

ESTIMATED NET EFFECT ON STATE FUNDS

Fund Affected	FY 2021	FY 2022	FY 2023	FY 2024	FY 2025	5-year Total
General Revenue	$0	$9,686,290	$20,993,899	$30,295,000	$38,826,867	$99,802,056
Veterans, Infrastructure, and Health Fund	$2,666,000	$4,472,000	$48,305,110	$81,685,223	$122,258,755	$259,387,089
Other State Dedicated Funds	$0	$540,584	$3,639,638	$6,365,681	$9,576,776	$20,122,678
Total Estimated Net Effect on All State Funds	$2,666,000	$14,698,874	$72,938,647	$118,345,903	$170,662,397	$376,645,822
Total Estimated Net Effect on All Local Funds	$0	$0	$10,244,526	$18,033,219	$27,207,776	$55,485,521
Total Estimated Net Effect on Federal Funds	$0	$0	$0	$0	$0	$0
Total All Funds	$2,666,000	$14,698,874	$83,183,173	$136,379,122	$197,870,174	$434,797,343

ANALYSIS OF FISCAL IMPACT OF MEDICAL MARIJUANA PETITION

The fiscal impact analysis contained herein focuses on estimating the fee and tax revenue resulting from the constitutional amendment proposed in the initiative petition. Table 1 summarizes the revenue and savings estimated by source and by fiscal year.

Table 1 - Summary of Tax, Application and License Fees, Revenue, and Savings by Fund

Purpose	FY 2021	FY 2022	FY 2023	FY 2024	FY 2025	5-year total
Marijuana Cultivation Facilities	$720,000	$1,500,000	$1,500,000	$1,500,000	$1,800,000	$7,020,000
Marijuana-Infused Products Manufacturing Facilities	$602,000	$860,000	$860,000	$860,000	$1,118,000	$4,300,000
Marijuana Dispensary Facilities	$1,344,000	$1,920,000	$1,920,000	$1,920,000	$2,496,000	$9,600,000
Marijuana Microbusiness Facilities	$0	$192,000	$120,000	$120,000	$240,000	$672,000
15% sales tax	$0	$0	$43,905,110	$77,285,223	$116,604,755	$237,795,089
subtotal Veterans, Infrastructure, and Health Fund	$2,666,000	$4,472,000	$48,305,110	$81,685,223	$122,258,755	$259,387,089
General Revenue sales tax	$0	$0	$8,781,022	$15,457,045	$23,320,951	$47,559,018
General Revenue budget savings	$0	$9,686,290	$12,212,877	$14,837,955	$15,505,916	$52,243,038
subtotal GR	$0	$9,686,290	$20,993,899	$30,295,000	$38,826,867	$99,802,056
Prop C sales tax	$0	$0	$2,927,007	$5,152,348	$7,773,650	$15,853,006
Conservation sales tax	$0	$0	$365,876	$644,044	$971,706	$1,981,626
Parks and Soils sales tax	$0	$0	$292,701	$515,235	$777,365	$1,585,301
Criminal Records System Fund	$0	$540,584	$54,054	$54,054	$54,054	$702,746
subtotal Other State Funds	$0	$540,584	$3,639,638	$6,365,681	$9,576,776	$20,122,678
subtotal all state funds	$2,666,000	$14,698,874	$72,938,647	$118,345,903	$170,662,397	$379,311,822
Local Sales Tax	$0	$0	$10,244,526	$18,033,219	$27,207,776	$55,485,521
Grand Total State and Local	$2,666,000	$14,698,874	$83,183,173	$136,379,122	$197,870,174	$434,797,343

This is the allocation table of the new Veterans, Infrastructure, and Health Fund. More explanation can be found on page 20.

Table 2 - Allocation of Veterans, Infrastructure, and Health Fund

	FY 2021	FY 2022	FY 2023	FY 2024	FY 2025	5-year total
Veterans, Infrastructure, and Health Fund						
Sales tax revenue - received	$0	$0	$43,905,110	$77,285,223	$116,604,755	$237,795,089
Application and license fees	$2,666,000	$4,472,000	$4,400,000	$4,400,000	$5,654,000	$21,592,000
Total VIH fund collections	$2,666,000	$4,472,000	$48,305,110	$81,685,223	$122,258,755	$259,387,089

Remainder to distribute to major purposes	$0	$0	$31,670,418	$64,069,557	$103,511,979	$199,251,954
Major Purposes						
Local governments (3/15ths of remainder)	$0	$0	$6,334,084	$12,813,911	$20,702,396	$39,850,391
Veterans (one-third after local govt.)	$0	$0	$8,445,445	$17,085,215	$27,603,194	$53,133,854
Infrastructure (one-third after local govt.)	$0	$0	$8,445,445	$17,085,215	$27,603,194	$53,133,854
Health (one-third after local govt.)	$0	$0	$8,445,445	$17,085,215	$27,603,194	$53,133,854
subtotal for major purposes	$0	$0	$31,670,418	$64,069,557	$103,511,979	$199,251,954
Total allocated	$2,666,000	$4,472,000	$48,305,110	$81,685,223	$122,258,755	$259,387,089

Implementation dates required by Petition 2020-128

Table 3 below identifies the implementation dates prescribed in the petition. All fiscal estimates in this analysis assume that the Department of Health and Senior Services, and all other state and local governments affected by this petition will meet the deadlines required by the petition.

TABLE 3 - Implementation Schedule	
11/3/2020	Election Day - Voter Approval
12/3/2020	30 days after election - effective date of constitutional amendment
2/1/2021	Prospective applicants shall notify DHSS of their intent to apply and prefile their application fee for Marijuana Cultivation Facilities, Marijuana Testing Facilities, Marijuana Dispensary Facilities, and Marijuana-Infused Products Manufacturing Facilities.
270 days after effective date of constitutional amendment	
8/30/2021	DHSS shall make available license application forms and application instructions for Marijuana Cultivation Facilities, Marijuana Testing Facilities, Marijuana Dispensary Facilities, Marijuana-Infused Products Manufacturing Facilities and Marijuana Microbusiness Facilities, and any other license types and certifications it deems necessary.
365 days after effective date of constitutional amendment	
12/3/2021	DHSS shall begin accepting application forms for Marijuana Cultivation Facilities, Marijuana Testing Facilities, Marijuana Dispensary Facilities, Marijuana-Infused Products Manufacturing Facilities, Marijuana Microbusiness Facilities, Seed-to-Sale tracking systems, and transportation of marijuana from medical marijuana facilities with similar licenses
180 days after DHSS begins accepting application forms it begins approving licenses	
6/1/2022	For any application submitted on the day required under the constitutional provisions, DHSS shall have approved or denied application forms for Marijuana Cultivation Facilities, Marijuana Testing Facilities, Marijuana Dispensary Facilities, Marijuana-Infused Products Manufacturing Facilities, and Marijuana Microbusiness Facilities. All applications must be approved or denied within 180 days of submission to DHSS thereafter.
First November national election date after initial statewide voter approval	
11/8/2022	Local governments can seek elections to prohibit operation of all or any category of marijuana facilities in their jurisdiction.
815 days after effective date of constitutional amendment	
2/26/2023	270 days after DHSS begins issuing licenses (6/1/22) DHSS may issue 6 additional microbusiness licenses per Congressional district.
1,093 days after effective date of constitutional amendment	
12/1/2023	548 days after DHSS begins issuing licenses (6/1/22) DHSS shall begin approving licenses for Marijuana Cultivation Facilities, Marijuana Testing Facilities, Marijuana Dispensary Facilities, Marijuana-Infused Products Manufacturing Facilities, Marijuana Microbusiness Facilities, Seed-to-Sale tracking systems, and transportation of marijuana from non-medical marijuana facility applicants. DHSS may issue 6 additional microbusiness licenses per Congressional district.

Cultivation Application and License fees

The proposal provides for the licensing of Marijuana Cultivation Facilities. The DHSS is required to charge a one-time non-refundable application fee of $12,000. Once granted, the DHSS is required to charge an annual license fee of $25,000. Renewal fees are $5,000 after three years.

As seen in Table 3, the DHSS is required to make application forms available no later than 270 days after the effective date of the new constitutional provisions – which will be August 30, 2021. The DHSS is required to begin accepting applications no later than 365 days after the effective date of the new constitutional provisions – which will be December 3, 2021. The proposal requires that prospective applicants shall notify DHSS of their intent to apply and prefile their application fee by February 1, 2021, in FY 2021. The proposal also provides that for the first 548 days after the DHSS begins to license facilities it may only accept applications for licensure from entities holding medical marijuana cultivation facility licenses. The first adult use marijuana licenses awarded to entities that are not medical marijuana licensees will begin December 1, 2023 (state fiscal year FY 2024).

Table 4 shows the calculation of the fee revenue estimated at $720,000 in FY 2021, $1.5 million from FY 2022 to FY 2024, and $1.8 million in FY 2025. Other assumptions include:

- The DHSS is expected to license 60 medical marijuana cultivation facilities in compliance with the medical marijuana constitutional provisions. These are the only facilities eligible for licensure for the first and second years after the election.
- Since the application award happens by June 2022, it is assumed that the licensees will pay the annual license fee in FY 2022 and the renewal license fee payment will occur in FY 2025.
- During the roll out of the medical marijuana process the department has expressed concern about the level of demand for medical marijuana and placed a University of Missouri market study on its website about the subject. Given the department's stated hesitancy, this analysis assumes no new additional facilities will be licensed during the period. Thus, the revenue estimate is conservative as the department moves slowly to license additional facilities. Only the renewal costs are included in the long-range forecast.

Table 4 shows:

- Application fees - $720,000 in FY 2021 and $0 in FY 2022-FY 2025.
- Renewal fees - $300,000 in FY 2025.
- Annual license fees - $1.5 million from FY 2022 to FY 2025.

Table 4 - Cultivation Facilities - Fee Revenues

	FY 2021	FY 2022	FY 2023	FY 2024	FY 2025
Non-refundable application fee	$12,000	$12,000	$12,000	$12,000	$12,000
Renewal fee					$5,000
Applicants					
Medical marijuana licenses eligible year 1	60	0	0	0	60
New additional licenses	0	0	0	0	0
subtotal Non-Refundable Fee revenues	$720,000	$0	$0	$0	$300,000
Annual license fee	$25,000	$25,000	$25,000	$25,000	$25,000
Licenses					
Medical marijuana licenses eligible year 1	0	60	60	60	60
New additional licenses	0	0	0	0	0
subtotal Annual License Fee revenues	$0	$1,500,000	$1,500,000	$1,500,000	$1,500,000
Total Cultivation license & fee revenues	$720,000	$1,500,000	$1,500,000	$1,500,000	$1,800,000

Marijuana-Infused Products Manufacturing Facilities Application and License fees

The proposal provides for the licensing of Marijuana-Infused Products Manufacturing Facilities. The DHSS is required to charge a one-time non-refundable application fee of $7,000. Once granted, the DHSS is required to charge an annual license fee of $10,000. Renewal fees are $3,000 after three years.

As seen in Table 3, the DHSS is required to make application forms available no later than 270 days after the effective date of the new constitutional provisions – which will be August 30, 2021. The DHSS is required to begin accepting applications no later than 365 days after the effective date of the new constitutional provisions – which will be December 3, 2021. The proposal requires that prospective applicants shall notify DHSS of their intent to apply and prefile their application fee by February 1, 2021, in FY 2021. The proposal also provides that for the first 548 days after the DHSS begins to license facilities it may only accept applications for licensure from entities holding medical marijuana infused products facility licenses. The first adult use marijuana licenses awarded to entities that are not medical marijuana licensees will begin December 1, 2023 (state fiscal year FY 2024).

Table 5 shows the calculation of the fee revenue estimated at $602,000 in FY 2021, $860,000 in FY 2022-FY 2024, and $1.1 million in FY 2025. Other assumptions include:

- The DHSS is expected to license 86 medical marijuana-infused products manufacturing facilities in compliance with the medical marijuana constitutional provisions. These are the only facilities eligible for licensure for the first and second years after the election.
- Since the application award happens by June 2022, it is assumed that the licensees will pay the annual license fee in FY 2022 and the renewal license fee payment will occur in FY 2025.
- During the roll out of the medical marijuana process the department has expressed concern about the level of demand for medical marijuana and placed a University of Missouri market study on its website about the subject. Given the department's stated hesitancy, this analysis assumes no new additional facilities will be licensed during the period. Thus, the revenue estimate is conservative as the department moves slowly to license additional facilities. Only the renewal costs are included in the long-range forecast.

Table 5 shows:

- Application fees - $602,000 in FY 2021 and $0 from FY 2022-FY 2025.
- Renewal fees - $258,000 in FY 2025.
- Annual license fees - $860,000 from FY 2022-FY 2025.

Table 5 - Infused Products Manufacturing Facilities - Fee Revenues

	FY 2021	FY 2022	FY 2023	FY 2024	FY 2025

Marijuana Dispensary Facilities Application and License fees

The proposal provides for the licensing of Marijuana Dispensary Facilities. The DHSS is required to charge a one-time non-refundable application fee of $7,000. Once granted, the DHSS is required to charge an annual license fee of $10,000. Renewal fees are $3,000 after three years.

As seen in Table 3, the DHSS is required to make application forms available no later than 270 days after the effective date of the new constitutional provisions – which will be August 30, 2021. The DHSS is required to begin accepting applications no later than 365 days after the effective date of the new constitutional provisions – which will be December 3, 2021. The proposal requires that prospective applicants shall notify DHSS of their intent to apply and prefile their application fee by February 1, 2021, in FY 2021. The proposal also provides that for the first 548 days after the DHSS begins to license facilities it may only accept applications for licensure from entities holding medical marijuana dispensary facility licenses. The first adult use marijuana licenses awarded to entities that are not medical marijuana licensees will begin December 1, 2023 (state fiscal year FY 2024).

Table 6 shows the calculation of the fee revenue estimated at $1.3 million in FY 2021 and $1.9 million in FY 2022-FY2024, and $2.5 million in FY 2025. Other assumptions include:

- The DHSS is expected to license 192 medical marijuana dispensary facilities in compliance with the medical marijuana constitutional provisions. These are the only facilities eligible for licensure for the first and second years after the election.

- Since the application award happens by June 2022, it is assumed that the licensees will pay the annual license fee in FY 2022 and the renewal license fee payment will occur in FY 2025.
- During the roll out of the medical marijuana process the department has expressed concern about the level of demand for medical marijuana and placed a University of Missouri market study on its website about the subject. Given the department's stated hesitancy, this analysis assumes no new additional facilities will be licensed during the period. Thus, the revenue estimate is conservative as the department moves slowly to license additional facilities. Only the renewal costs are included in the long-range forecast.

Table 6 shows:

- Application fees - $1,344,000 in FY 2021 and $0 from FY 2022-FY2025.
- Renewal fees: $576,000 in FY 2025.
- Annual license fees - $1.9 million from FY 2022-FY 2025.

Table 6 - Dispensary Facilities - Fee Revenues

	FY 2021	FY 2022	FY 2023	FY 2024	FY 2025
Non-refundable application fee	$7,000	$7,000	$7,000	$7,000	$7,000
Renewal fee					$3,000
Applicants					
Medical marijuana licenses eligible year 1	192	0	0	0	192
New additional licenses	0	0	0	0	0
subtotal Non-Refundable Fee revenues	$1,344,000	$0	$0	$0	$576,000
Annual license fee	$10,000	$10,000	$10,000	$10,000	$10,000
Licenses

New additional licenses	0	0	0	0	0
subtotal Annual License Fee revenues	$0	$1,920,000	$1,920,000	$1,920,000	$1,920,000
Total Dispensary license & fee revenues	$1,344,000	$1,920,000	$1,920,000	$1,920,000	$2,496,000

Marijuana Microbusiness Facilities Application and License fees

The proposal provides for the licensing of Marijuana Microbusiness Facilities. The DHSS is required to charge a one-time non-refundable application fee of $1,500. Once granted, the DHSS is required to charge an annual license fee of $2,500. Renewal fees are $2,500 after three years.

As seen in Table 3, the DHSS is required to make application forms available no later than 270 days after the effective date of the new constitutional provisions – which will be August 30, 2021. The DHSS is required to begin accepting applications no later than 365 days after the effective date of the new constitutional provisions – which will be December 3, 2021. Both deadlines are in FY 2022 of the Missouri state government budget. It is assumed that no revenues will be received before FY 2022. The proposal also provides that for the first 365 days after the DHSS may only accept applications for licensure from entities holding similar medical marijuana facility licenses.

Table 7 shows the calculation of the fee revenue estimated at $192,000 in FY 2022, $120,000 in FY 2023-FY 2024, and $240,000 in FY 2025. Other assumptions include:

- Marijuana Microbusiness Facilities are not included in the medical marijuana program.
- The proposal provides that a minimum of six such licenses be issued within each of Missouri's eight U.S. Congressional districts when licenses are first issued.
- Since the application periods open in the middle of the year it is assumed that the licensees will pay both the non-refundable application fee and the annual license fee in the same year.
- Since application fees are non-refundable additional revenue may be collected in FY 2023 from any applicant that is ultimately refused a license. This possible revenue is not calculated into this revenue estimate.
- During the roll out of the medical marijuana process the department has expressed concern about the level of demand for medical marijuana and placed a University of Missouri market study on its website about the subject. Given the department's stated hesitancy, this analysis assumes no new additional facilities will be licensed during the period. Thus, the revenue estimate is conservative as the department moves slowly to license additional facilities. Only the renewal costs are included in the long-range forecast.

Table 7 shows:

- Application fees - $72,000 in FY 2022 and $0 from FY 2023-2025.
- Renewal fees - $120,000 in FY 2025.
- Annual license fees - $120,000 from FY 2022-FY 2025.

Table 7 - Microbusiness Facilities - Fee Revenues

	FY 2022	FY 2023	FY 2024	FY 2025
Non-refundable application fee	$1,500	$1,500	$1,500	$1,500
Renewal fee				$2,500

States that have approved adult use marijuana

Ten states and Washington D.C. have approved adult use marijuana. Nine received approval from voters while Illinois passed legislation to do so. Table 8 shows that Colorado and Oregon were the first approve adult use marijuana in November 2012. The table also shows when sales started and the length of time in months from approval to first sales. At this point only Colorado, Washington, and Oregon have had sales of at least three years to provide the best data necessary to fully understand the longer-range revenue prospects for adult use marijuana. Alaska is close to having three years' experience. However, it took Alaska longer to implement its program. Alaska also has a small program and uses an excise tax that makes it less comparable to the first three which have similar taxes as that proposed in the Missouri initiative petition. This fiscal note will focus on data from Colorado, Washington, and Oregon in the analysis.

Table 8 - States with Adult Use Marijuana

State	Approved by voters or legislature	Month/year sales started or anticipated	Months from election to sales
Colorado	November 2012	January 2014	15
Washington	November 2012	July 2014	21
Oregon	November 2014	February 2016	15
Alaska	November 2014	October 2016	23
Nevada	November 2016	July 2017	9
California	November 2016	January 2018	15
Massachusetts	November 2016	November 2018	24
Maine	November 2016	March 2020	40
Michigan	November 2018	May 2020	18
Illinois	June 2019	January 2020	6
Missouri (if approved)	November 2020	July 2022	21

Many factors will influence the size of the adult use marijuana program. Having selected three states as the focus of the analysis, four factors in particular will be reviewed.

- Marijuana usage in the states – a review of how Missouri's reported marijuana usage compares to other states to help determine the possible base line for the initial years of the program.
- Initial sales and growth over time.
- Initial infrastructure for sales and its effect on sales.
- Tourism in the states to help determine the impact of sales in Missouri.

Marijuana Usage

Table 9 provides another way to think about the states that have approved adult use marijuana and its possible use in Missouri and revenue estimates. Table 9 shows the percent of those age 18 and over who indicate use of marijuana in the past year from 2012 to 2017 published by the U.S. Department of Health and Human Services, Substance Abuse and Mental Health Services Administration. The 2016-2017 data is the most recently published. The table is sorted by marijuana usage in 2012-2013 which is the last data before adult use marijuana was available in any state. The top 30 states and the national average are shown.

The states that have legalized adult use marijuana are highlighted in blue. All but Illinois, the last state that made it legal, were in the top 15 states for marijuana use in the past year in 2012-2013 and all were above the U.S. national average. Legal medical marijuana programs may be a factor in the higher percentage reported in some of these states. Missouri's 2012-2013 rate of 11.41% is substantially below all of the states that have started sales of adult use marijuana and in every year thereafter. Illinois and Missouri have nearly the same rate of use at the start and end of this timeline. The green boxes are the

last year for each state before adult use sales started which also highlights the fact that only a few states have three full years of experience with revenues.

Table 9. Marijuana Use in the Past Year, by Age Group and State: Percentages, Annual Averages Based on NSDUH

Rank	State	2012-2013 - 18 or Older Estimate	2013-2014 - 18 or Older Estimate	2014-2015 - 18 or Older Estimate	2015-2016 - 18 or Older Estimate	2016-2017 - 18 or Older Estimate
1	Rhode Island	20.21%	19.13%	19.04%	20.62%	21.24%

Source: SAMHSA, Center for Behavioral Health Statistics and Quality, National Survey on Drug Use and Health[i]

Table 10 compares Missouri's base year to Colorado, Washington, and Oregon. Missouri's 13.95% base year is between 3.63% to 5.64% lower than the three states.

Table 10 - Base Year 18 years or older % Marijuana Use in Past Year			
	Base Year Marijuana Usage	Base year rate	Difference in rate from MO
Missouri	2016-2017	13.95%	
Colorado	2012-2013	18.94%	4.99%
Washington	2012-2013	17.58%	3.63%
Oregon	2014-2015	19.59%	5.64%

Table 11 shows how the percentage of those age 18 and older reporting marijuana use changed in the first three years of adult use marijuana sales for Colorado, Washington, and Oregon. In each state the percentage went up over the three years. In the first year the Colorado rate increased 1.8%, Washington by slightly less at 1.48%, and Oregon by 3.6%. The percentage increase in use at the end of the three years compared to the base year percentage was substantially different in each state – Colorado (4.88%), Washington (1.87%), and Oregon (7.79%). Given the lower base year in Missouri shown in Table 10 it seems unlikely that it will increase to the levels shown in the other states in Table 11. Adding Washington's roughly 2.0% increase to Missouri's rate would bring it to 15.95% which is lower than where the other three states started.

Table 11 - Marijuana Use in the Past Year		
	% use age 18 and older	Change in rate
Colorado		
Base year (2012-2013)	18.94%	
Year 1	20.74%	1.80%
Year 2	23.57%	2.83%
Year 3	23.82%	0.25%
overall change base to year 3		4.88%
Washington		
Base year (2012-2013)	17.58%	
Year 1	19.06%	1.48%
Year 2	17.68%	-1.38%
Year 3	19.45%	1.77%
overall change base to year 3		1.87%

Initial infrastructure for adult use marijuana

Table 12 shows the number of retail stores over the first three years in Colorado, Washington, and Oregon. Colorado and Washington start with roughly the same number of retail outlets. Oregon data is unavailable because the program did not establish the statistical infrastructure to collect it in the early years. The Department of Health and Senior Services intends to license 192 medical marijuana dispensaries – the minimum required under that constitutional amendment. The proposed petition provides that for the first year and a half only the medical marijuana dispensaries can be permitted to provide adult use marijuana.

During the roll out of the medical marijuana process the department has expressed concern about the level of demand for medical marijuana. The department placed on its website a University of Missouri market study that estimates substantially fewer medical marijuana patients than estimated in the ballot language for voters in November 2018. The study reflects concern that oversupply will affect product price and thus the economic feasibility of the envisioned facilities throughout the state. The study also reflects concern about possible diversion of oversupply to the illegal market. In addition, we are aware of reports that Oregon has an oversupply of marijuana.

For these reasons, the estimates assume that the number of Missouri dispensaries will grow more slowly than those in the three states on which the analysis is based. Thus, both application and license fee revenue will be lower as will the likely spending per person in this analysis.

Table 12 - Retail Marijuana Dispensaries in Other States

	# of stores	Change in #	% change
Colorado			
January 2014	161		
January 2015	356	195	121.1%

FY 2017	N/A	0	#DIV/0!
change over 3 years		0	#DIV/0!

Marijuana sales over the first three years in other states

Table 13 shows data for the first three years of sales in Colorado[ii], Washington[iii], and Oregon[iv]. The population used for each year is from the estimates made by the U.S. Census Bureau.[v]

Colorado ($56.57/capita) and Washington ($37.24/capita) have year one sales lower than Oregon ($94.05/capita). Dividing the population of the three states into the total sales gives a first-year per capita sale of $57.74/capita. Washington had an unregulated medical marijuana program. Its lower per capita sales may be a function of the fact that it was harder to flip to adult use marijuana than in Oregon which had a regulated medical marijuana program.

By year three the Washington ($190.97) had grown dramatically from its low start. Oregon ($132.90) per capita sales which started as the highest per capita sales are the lowest by year three.

Table 13 - First 3 full-years of Marijuana Sales Retail Value for Colorado, Washington, and Oregon

State/year	Year of starting month	Population	Marijuana sales	$ per capita spent on Retail marijuana
Colorado				
Year 1	2014	5,351,218	$303,239,699	$56.67
Year 2	2015	5,452,107	$577,536,343	$105.93
Year 3	2016	5,540,921	$861,587,411	$155.50
Washington				
Year 1	2014	6,968,170	259,524,430.41	$37.24
Year 2	2015	7,061,410	786,404,467.45	$111.37
Year 3	2016	7,183,700	1,371,862,186.37	$190.97
Oregon				
Year 1	2016	4,091,404	$384,797,226	$94.05
Year 2	2017	4,146,592	$419,924,401	$101.27
Year 3	2018	4,190,713	$556,959,330	$132.90
Combined 3 state totals				
Year 1		16,410,792	947,561,355	$57.74
Year 2		16,660,109	1,783,865,211	$107.07
Year 3		16,915,334	2,790,408,928	$164.96

Table 14 shows the dollar per capita and percentage growth in the first three years of sales. Washington with its low start had very high growth in year 2. Colorado grew by 86.9%. In year two Oregon's growth slowed but it had dollar per capita sales very similar to Colorado. The combined 3 state totals are weighted by population and show 85.4% growth in the second year and 54.1% growth in the third year.

Table 14 - First 3 full-years of Marijuana Sales Retail Value for Colorado, Washington, and Oregon

State/year	$ per capita spent on Retail marijuana	$ Change in $/capita	% change in $/capita
Colorado			
Year 1	$56.67		
Year 2	$105.93	$49.26	86.9%
Year 3	$155.50	$49.57	46.8%
3-year change		$98.83	174.4%
Washington			
Year 1	$37.24		
Year 2	$111.37	$74.12	199.1%
Year 3	$190.97	$79.60	71.5%
3-year change		$153.72	412.8%
Oregon			
Year 1	$94.05

Year 3	$132.90	$31.63	31.2%
3-year change		$38.85	41.3%
Combined 3 state totals			
Year 1	$57.74		
Year 2	$107.07	$49.33	85.4%
Year 3	$164.96	$57.89	54.1%
3-year change		$107.22	185.7%

Tourism

A portion of adult use marijuana sales are the result of visitors to the states that have approved such sales. Table 15 provides tourism data for Colorado, Washington, Oregon, and Missouri[vi]. Both Colorado and Washington have more than twice the number of visitor nights compared to its population as Missouri. In addition, Missouri's spending by visitors compared to population is substantially less than that of Colorado and Washington. The Oregon and Missouri numbers are similar on visitor nights but Missouri lags behind the Oregon spending level. It has been estimated that tourism accounts for less than 10% of Colorado's sales.[vii]

While Missouri may see an uptick of travelers and tourist dollars as a result of adult use marijuana sales it is starting at a significantly lower base to make a dramatic impact on tax collections.

Table 15 - Tourism Visitors and Spending

	Colorado	Washington	Oregon	Missouri
Population estimate 2018	5,695,564	7,535,591	4,190,713	6,126,452
# of visitor nights	85,200,000	128,700,000	29,100,000	42,000,000
Visitors per population	14.96	17.08	6.94	6.86
$ spending of visitors	$22,300,000,000	$24,400,000,000	$12,300,000,000	$13,500,000,000
Spending per population	$3,915.33	$3,237.97	$2,935.06	$2,203.56

Adult Use Marijuana Sales in Missouri

Table 16 provides a range for possible adult use marijuana sales for the first three years of the program. The population calculations were calculated using data from the Office of Administration, Division of Budget and Planning.[viii]

High-end estimate - assumes the population weighted combined 3 state totals from Colorado, Oregon, and Washington shown in Table 14 above. Per capita sales start at $57.74 and grow by 85.4% and 54.1% respectively in years 2 and 3. However, Missouri's base year marijuana usage, as shown in Table 10 is 3.63% to 5.64% below the starting base year for these three states. The value of adult use marijuana sales starts at $375.6 million in year 1 and grows to $1,086 million in year 3.

Low-end estimate - begins at Washington's $37.24/capita starting point. Missouri's marijuana usage is lower. However, Missouri will have a regulated medical marijuana program that Washington did not have when the adult use program began. The low-end estimate assumes the growth in the combined 3 state totals shown in Table 14 of 85.4% and 54.1% respectively in years 2 and 3. The value of adult use marijuana sales starts at $242.2 million in year 1 and grows to $700.2 million in year 3.

Moderate estimate - starts at $45 per capita. This is $11.67/capita lower, about 20% lower, than Colorado. It's higher than Washington's level which was suppressed in year 1. The moderate estimate assumes growth of 75% in year 2 and 50% in year 3.

As noted in Table 14 the three states had different paths to their three-year sales levels. Washington started much lower but had the highest growth in years 2 and 3. Oregon started with high sales per capita but very little growth in year 2 and moderate growth in year 3. The value of adult use marijuana sales starts at $292.7 million in year 1 and grows to $774.4 million in year 3.

The moderate estimate is conservative based on the data reviewed in the pages above.

- Missouri's base year marijuana usage according to federal surveys is lower than the level in Colorado, Oregon, and Washington at the start of the adult use marijuana program.
- Missouri has fewer tourists that could boost sales.

- The department has expressed concern about demand and will likely move more slowly than the other states in adding dispensaries and other facilities.
- Prices for adult use marijuana are difficult to estimate and are likely to decrease over the first few years as supply increases as has happened in the other states.
- It also reflects the difficulty of estimating a new program with limited experience in the other states and the need to make conservative budget assumptions for a healthy program.

Table 16 – Adult Use Marijuana Sales in Missouri

			Low End Estimate		Moderate Estimate		High End Estimate	
	Fiscal Year	Missouri Population	Per capita	Value of Adult use Sales	Per capita	Value of Adult use Sales	Per capita	Value of Adult use Sales
Year 1	2023	6,504,461	$37.24	$242,226,120	$45.00	$292,700,736	$57.74	$375,567,567
Year 2	2024	6,542,664	$69.04	$451,724,916	$78.75	$515,234,822	$107.07	$700,523,077
Year 3	2025	6,580,868	$106.40	$700,172,776	$118.13	$777,365,033	$164.96	$1,085,579,985

Tax, License, and Fee Revenue Estimate

Table 17 uses the moderate estimate of sales to calculate the tax revenues for the new Veterans, Infrastructure, and Health Fund, state general revenue, other state funds, and local funds. The local funds calculation assumes a 3.5% median sales tax derived from the Department of Revenue's list of 2,361 local sales tax rates.[ix] The first licenses will be awarded by early June 2022. The estimates assume the department will issue the license and complete the department's final inspection and other tasks with tax revenue beginning in July 2022 (FY 2023).

Combined State and local tax, fee, and license collections:

- A total all state and local funds of $2.7 million in FY 2021 rising to $182.3 million in FY 2025.
- A five-year total of $381.9 million in all state and local funds.

State license and fee collections:

- Total state funds of $2.7 million in FY 2021 and $5.7 million in FY 2025.
- A five-year total of $21.6 million in state funds.

State tax collections:

- A total all state funds of $56.3 million in FY 2023 rising to $149.4 million in FY 2025.
- A five-year total of $304.8 million in all state funds.
- Veterans, Infrastructure, and Health Fund: $43.9 million in FY 2023 rising to $116.6 million in FY 2025.
- General Revenue Fund: $8.8 million in FY 2023 rising to $23.3 million in FY 2025.
- Prop C: $2.9 million in FY 2023 rising to $7.8 million in FY 2025.
- Conservation: $365,876 in FY 2023 rising to $971,706 in FY 2025.
- Parks and Soils: $292,701 in FY 2023 rising to $777,365 in FY 2025.

Local tax collections:

- Total local funds of $10.2 million in FY 2023 rising to $27.2 million in FY 2025.
- A five-year total of $55.5 million in local funds.

Table 17 - Missouri Tax, License, and Fee Revenue Estimate

	FY 2021	FY 2022	FY 2023	FY 2024	FY 2025	5-year total

Allocation of Veterans, Infrastructure, and Health Fund

The proposed petition establishes a number of purposes for which the revenue derived is to be used. First, the Department of Revenue (collection costs) and the Department of Health and Senior Services (administration) are to receive their funds before allocation to the other major purposes. Table 18 shows the distribution among the uses identified in the petition.

Assumptions for the allocation table below include:

- The Department of Revenue takes the maximum 2% it is allowed to take for collection costs.
- The Department of Health and Senior Services spends the same amount, including fringe benefit costs, for administration of the adult use marijuana program as it received in the FY 2020 budget for the medical marijuana program. It will either do so by shifting some medical marijuana staff to the adult use program or add additional staff. A two percent inflation factor is provided beginning in FY 2024. For FY 2022 it is assumed that the department's cost above the Veterans, Infrastructure, and Health Fund revenues, if any, will be paid with a transfer from general revenue as provided by the act.
- The remaining uses receive their share as detailed in the petition.

Allocations:

- Local government: $6.3 million in FY 2023 rising to $20.7 million in FY 2025. A 5-year total of $39.9 million.
- Veterans: $8.4 million in FY 2023 rising to $27.6 million in FY 2025. A 5-year total of $53.1 million.
- Infrastructure: $8.4 million in FY 2023 rising to $27.6 million in FY 2025. A 5-year total of $53.1 million.
- Health: $8.4 million in FY 2023 rising to $27.6 million in FY 2025. A 5-year total of $53.1 million.

Table 18 - Allocation of Veterans, Infrastructure, and Health Fund

	FY 2021	FY 2022	FY 2023	FY 2024	FY 2025	5-year total
Veterans, Infrastructure, and Health Fund						
Sales tax revenue - received	$0	$0	$43,905,110	$77,285,223	$116,604,755	$237,795,089

Department of Health and Senior Services (DHSS) - costs

DHSS has experience with implementing the medical marijuana program in accordance with Amendment 2 passed by Missouri voters in November 2018. Thus, the learning curve should be dramatically reduced for the department for a fully legal adult use marijuana program. Much of the language of the new petition mirrors the framework and language from voter-approved Amendment 2 to implement the new program. The tasks that DHSS has already completed or will complete for the medical marijuana program includes, but is not limited to creating:

- rules for the medical marijuana program;
- Advisory Committees;
- a robust website with information about the program;
- forms and applications;
- an online application portal;
- awarding and completing a contract to provide for blind scoring of the applications;
- FAQs;
- videos to help applicants understand the process

- a significant outreach program to businesses and organizations involved or interested in the medical marijuana program;
- reporting mechanisms available to show the distribution of applicants across the state;
- other resources for applicants and the public; and
- educating the Governor and legislature on its budgetary needs to successfully implement the program.

DHSS was successful in receiving $846,726, including 3.5 staff, in FY 2019 supplemental budget funding to begin implementation of the medical marijuana program. In addition, DHSS received $15.7 million, including 52 staff and fringe benefits, in full year FY 2020 funding to implement the program. The staff included:

- 40 health facilities consultants to process and verify applications, inspect facilities, provide technical assistance to the testing facilities to assist with obtaining and maintaining certification; monitor for compliance, and other duties as needed.
- 4 health and senior services managers to manage patient and caregiver applications while meeting application decision deadlines; manage licensing and/or certification of medical marijuana cultivation facilities, dispensary facilities, infused products manufacturing facilities, testing facilities, transportation entities, seed-to-sale tracking systems; and provide ongoing management responsibilities.
- 2 attorneys to provide legal support.
- 1 Planner IV to project manage and work in conjunction with the IT project manager to plan, monitor, and execute the implementation of a seed-to-sale tracking system
- 1 designated principal assistant.
- 4 clerical support staff

Table 19 provides budget information for Colorado[x], Washington, and Oregon to provide perspective on their administrative costs for the Department of Revenue and the relevant administrative agencies. Missouri's $15.7 million budget for medical marijuana administration appears to be larger than the programs in the other states.

Table 19 - Administrative costs in Oregon, Washington, and Colorado

	Total (in millions)	FTE
Oregon		
Adult use	$19.0	68.0
Medical	$5.6	23.0
Total	$24.6	91.0
Washington		
Adult use & medical	$24.2	
Colorado		
Adult use	$14.5	120.1
Medical	$2.4	1.3
Total	$16.9	121.4

All of this success and sizable budget should make the additional cost of regulating legal marijuana more easily accomplished and keep costs down. For example, DHSS has 40 health facility consultants to process and verify applications, provide technical assistance, monitor compliance, and other duties.

DHSS asked for such a sizable staff in part because it was unclear whether OA ITSD would supply a highly functional IT system to process applications during this first round of applications. DHSS received 2,163 medical marijuana applications yet is expected to issue just 348 licenses – the minimum required by the medical marijuana amendment. DHSS has thus received about 6 times more applicants than the number it will approve.

The current DHSS process and timetable is for the first medical marijuana licenses to be issued in late December 2019 or early January 2020. Providing the necessary construction phase for the medical marijuana facilities and the initial growing period, Missourians can expect that medical marijuana product becomes available during the summer or fall of 2020 with dispensaries being opened from then until the end of 2020. DHSS has indicated publicly that it intends to go slowly on issuing licenses during the first few years of medical marijuana implementation to ensure that the marketplace is sufficient to provide a healthy medical marijuana industry and prevent an oversupply of product. There is little expectation that DHSS will begin another round of medical marijuana facilities expansion before late 2022 – which is beyond the dates contained in this petition and required for implementation of a legal marijuana program. Thus, there is no conflict or doubling up of application processing between the two programs.

As noted earlier in this analysis, for the first 548 days of legal marijuana applications DHSS may only accept applications for licensure from entities holding similar medical marijuana facility licenses. The 40 health facility consultants will face a maximum of 348 marijuana facility applications in late 2021, 16% of what they faced in 2019. In addition, the health facility consultants and all of the staff only have to deal with facilities that they have already instructed, inspected, monitored for compliance, and reviewed. The owners and staff of the medical marijuana facilities will already be knowledgeable of all of the rules and regulations and will have developed a strong working relationship with DHSS.

It is assumed that there will be some costs required to process adult use marijuana facility applications. Costs for OA ITSD for IT services are included in the DHSS medical marijuana budget and can be used to provide additional functionality to reduce the amount of paperwork done by the health facilities consultants and clerical staff. Providing a more efficient, robust and user-friendly application portal will help the department. In addition, additional website development to improve reporting tools, update videos, and other functionality can be completed before the adult use program applications are announced. Blind scoring costs currently in the DHSS budget will not be needed for the first round of adult use marijuana application evaluation.

This analysis assumes that the department will spend the same $15.7 million for their administrative costs for adult use as it did for medical marijuana. It will either do so by shifting some medical marijuana staff to the adult use program or add additional staff. There likely will be significant cost savings in administrative costs when the medical and adult use programs are operational. As shown in Table 19, Colorado, Washington, and Oregon spend much less than the $32 million in administration for both programs that possible under the assumptions of this analysis. Those savings are not calculated herein and will be decided by the Governor and legislature as both programs proceed.

Department of Corrections Savings

In a fiscal note to HB 1448 (2018) the Department of Corrections laid out its estimate of savings to a bill that allowed adult use marijuana. It indicated substantial savings. The department reported that the annual number of persons admitted for cannabis offenses was expected to be 209 with an additional 986 sent to probation. It also reported that the average incarcerated offender spent one year in prison and three more years on parole.

https://house.mo.gov/billtracking/bills181/fiscal/fispdf/4952-01N.ORG.pdf

In its 2017 Annual Report the Missouri Board of Probation and Parole reported that the per diem cost of incarceration was $58.85 compared to $5.39 for probation or parole. Revised numbers have not been made available by the Department. However, the 2017 costs are included in the analysis below to identify the cost savings of the initiative petition to the Department. A two percent inflation factor is assumed for institutional and probation/parole costs.

The number of people normally incarcerated remains static in this analysis at 209 each year since a new cohort comes in and then leaves after one year. At $58.85/day ($21,480/year) the department will save $4.5 million in incarceration costs. The number of people normally expected to be under supervision grows until it peaks at year four. The 209 that normally serves three years of probation increases until it tops out at 627. The 986 people that normally serve three years of supervision tops out at 2,958. The number of people that will not be under supervision in year four is 3,794. The savings run from $6.4 million in year one to $12.2 million in year four.

Table 20 - Department of Corrections - Savings				
	FY 2022	FY 2023	FY 2024	FY 2025
Incarcerated	209	209	209	209
Parole		209	418	627
Probation	986	1,972	2,958	2,958
subtotal supervision	986	2,181	3,376	3,585
Total affected population	1,195	2,390	3,585	3,794
Institutional costs/day	$58.85	$60.03	$61.23	$62.45
Institutional costs/year	$21,480	$21,910	$22,348	$22,795
Probation/parole costs/day	$5.39	$5.50	$5.61	$5.72
Probation/parole costs/year	$1,967	$2,007	$2,047	$2,088
Savings institutional	$4,489,372	$4,579,160	$4,670,743	$4,764,158
Savings probation/parole	$1,939,807	$4,376,606	$6,910,101	$7,484,647
Total Savings	$6,429,179	$8,955,766	$11,580,844	$12,248,805

This measure will not result in an increase in crime as a result of the legalization of adult use marijuana. A recent study published by Reason Magazine[xi] concluded legalization reduced possession and other marijuana crimes and relieved the burden placed on courts, law enforcement and prisons, allowing for greater focus on violent crime. It also identified other studies that showed that opioid use and deaths decreased in states with adult use marijuana. It reports on studies that show reduction in property crime and others that suggest that marijuana use does not lead to an increase in violent crime. Some more recent studies suggest that legalization might reduce violent crime. The Reason study also reported on a recent study that found legalization of marijuana for recreational use in Colorado and Washington was associated with an improvement in the rate of clearance of cases relating to violent crimes.

A federally funded study[xii] of the experience in Colorado and Washington also concluded that marijuana legislation had minimal to no effect on major crimes in those states. The study found no statistically significant long-term effects of recreational cannabis laws or the initiation of retails sales on violent or property crimes in those states. The analysis was based on FBI data on violent, property, aggravated assault, auto theft, burglary, larceny, and robbery crime rates. The one trend that held was a decrease in the burglary rate in Washington. The study also called out some published research for bad research design and data for studies that purported to show increases in crime. The study found some immediate effect on crime in Colorado (property crime) and Washington (larceny) at the point of legalization but the trends suggest that if marijuana legalization influenced crime, it was short-lived.

Multiple analyses have concluded that medical marijuana laws are not causally linked with increases in violent crime or property crime.[xiii] RAND researchers found a negative and significant relationship between dispensary allowances and property crime rates.[xiv] A September 2019 study in Regional Science and Urban Economics reports reduction in crimes in areas around marijuana dispensaries.[xv]

The Cato Institute studied outcomes in Colorado and Washington, including crime rates in Denver and Seattle, and found no statistical relationship between passage of adult-use legalization and increased crime.[xvi] In a recent paper a University of Washington researcher used regression analysis on crime data from 1990 to 2017 and found that the legalization of marijuana, both recreational and medical, does not increase violent crime rates but could lead to a decline in violent crime such as homicide, robbery and aggravated assault.[xvii] A peer-reviewed study published in *The Economic Journal* indicates that legalizing marijuana is likely reducing crime in many states by displacing the illicit markets traditionally controlled by drug cartels.[xviii]

Other news reports also show a minimal impact of legal marijuana on crime[xix] and its effect on reducing opioid use and deaths.

Public Defender Savings

The State Public Defender's Office also estimated its savings in the same fiscal note to HB 1448 (2018). The Public Defender reported that the bill would save 52,230 attorney hours, or slightly more than 25 attorneys based on the state's 2,080-hour work year. The Public Defender assumed that 25% of drug cases relate to marijuana affecting about 2,472 cases. However, it did not convert the 52,230 hours savings into a dollar amount. It stated that it would not cut its budget because it is staffed substantially below the level it believes is necessary to meet its caseload standards.

Table 21 provides the conversion of hours saved into dollars using the FY 2020 budget request for 385 additional staff made by the Public Defender's Office. The FY 2020 budget request included a request for attorneys at a salary of $60,084 and a secretary for every three attorneys at a salary of $28,668. That provides a savings of $1.7 million in salaries if the Public Defender's budget was cut to keep its staffing levels at the level the General Assembly has been providing. The expense and equipment requests provided $10,500/attorney in travel and $6,380/FTE for all other expense and equipment leading to a savings of $475,145. Fringe benefit savings would add another $1 million. Total savings to the Public Defender's budget annually is estimated at $3.3 million. However, the petitioners do not recommend such cuts.

Table 21 - Public Defender possible savings			
Hours saved	52,230		
Yearly hours per FTE	2,080		
FTE saved	25.11		
	# staff	Avg. salary	Total
Public defenders	25	$60,084	$1,502,100
Secretary (1 for every 3 attorneys)	8.33	$28,668	$238,804
subtotal Personal Service Savings			$1,740,904
Expense & equipment			
Travel	25	$10,500	$262,500
Other items	33.33	$6,380	$212,645
subtotal E&E Savings			$475,145
Fringe benefits (59.8% of PS costs)			$1,041,061
Total savings for Public Defender			$3,257,110

Other department – costs, revenues, or savings

The Missouri State Highway Patrol (MSHP) should expect additional revenue as a result of this proposal. For HB 1448 (2018) the MSHP estimated income of $540,584 for the Criminal Records System Fund as a result of fingerprint and criminal record system checks in the first year and $54,054 annually thereafter.

The Office of Administration, Information Technology Systems Division provided IT support to DHSS. Possible additional costs to OA ITSD are included in the DHSS cost discussion of this analysis.

The Office of State Courts Administrator, the courts, the Department of Corrections, and the Public Defender may have additional costs to process expungement of marijuana convictions from criminal records. The petition provides that people with such convictions "may apply for expungement upon the

effective date of this section and such expungement shall be granted…". A search of the Missouri General Assembly's bill list for the past seven regular sessions found three bills filed by Rep. Ellington from 2014-2016 that included expungement of such records. It was not the same as the petition's provisions. The Oversight Division did not complete a fiscal note of the possible costs or savings.

Marijuana legalization is not linked with increased crime rates

"All those [marijuana] arrests do is make people hate us."
— Cathy Lanier, former police chief for Washington, D.C.

"Our state's efforts to regulate the sale of marijuana are succeeding. A few years ago, the illegal trafficking of marijuana lined the pockets of criminals everywhere. Now, in our state, illegal trafficking activity is being displaced by a closely regulated marijuana industry that pays hundreds of millions of dollars in taxes. This frees up significant law enforcement resources to protect our communities in other, more pressing ways."
— Washington State Gov. Jay Inslee and Attorney General Bob Ferguson

Government-published data, academic research, and the experiences of many law enforcement officials indicate that marijuana policy reform does not increase crime rates. Relying on statistics from the FBI's Uniform Crime Reports, peer-reviewed studies have analyzed changes after passage of both adult-use legalization and medical marijuana laws. Contrary to assertions made by some opponents of legalization, there is no compelling basis for claims that legalizing marijuana and establishing regulated markets undermines public safety.

For medical marijuana, multiple analyses have concluded that these laws are not linked with increases in violent crime or property crime.[1] In fact, researchers from RAND discovered a "negative and significant relationship between dispensary allowances and property crime rates."[2]

Similarly, available evidence suggests that legalizing marijuana for adults does not lead to increased crime of any variety either. In a 2018 study, scientists found "no statistically significant long-term effects of recreational cannabis laws or the initiation of retail sales on violent or property crime rates."[3] In a more recent paper using regression analysis, a University of Washington researcher wrote, "Results indicate that the legalization of marijuana, both recreational and medical, does not increase violent crime rates. In contrast, marijuana legalization could lead to a decline in violent crime such as homicide, robbery and aggravated assault."[4]

Other studies also point to marijuana policy reform as a public safety benefit. In a 2018 analysis, experts at Washington State University found that police solved significantly more violent and property crimes after passage of legalization laws in Colorado and Washington.[5] Another peer-reviewed paper in *The Economic Journal* supports the argument that legalizing marijuana reduces crime by displacing illicit markets traditionally controlled by drug cartels and illicit distributors.[6]

STATE AUDITORS OFFICE

RE: Petition approval request from Deirdre Hirner regarding a proposed constitutional amendment to Article XIV (2020-127)

Dear Auditor Galloway:

Enclosed please find an initiative petition sample sheet for a proposal to amend the Missouri Constitution filed by Deirdre Hirner on October 28, 2019.

We are referring the enclosed petition sample sheet to you for the purposes of preparing a fiscal note and fiscal note summary as required by Section 116.332, RSMo. Section 116.175.2, RSMo requires the state auditor to forward the fiscal note and fiscal note summary to the attorney general within twenty days of receipt of the petition sample sheet.

Thank you for your immediate consideration of this request.

Sincerely,

John R. Ashcroft

Be it resolved by the people of the state of Missouri that the Constitution be amended:

Article XIV is amended by amending Section 1 of Article XIV and enacting one new section to be known as Section 2 of Article XIV, to read as follows:

XIV Section 1. Right to access medical marijuana. — 1. Purposes.

This section is intended to permit state-licensed physicians to recommend marijuana for medical purposes to patients with serious illnesses and medical conditions. The section allows patients with qualifying medical conditions the right to discuss freely with their physicians the possible benefits of medical marijuana use, the right of their physicians to provide professional advice concerning the same, and the right to use medical marijuana for treatment under the supervision of a physician.

This section is intended to make only those changes to Missouri laws that are necessary to protect patients, their primary caregivers, and their physicians from civil and criminal penalties, and to allow for the limited legal production, distribution, sale and purchase of marijuana for medical use. This section is not intended to change current civil and criminal laws governing the use of marijuana for nonmedical purposes. The section does not allow for the public use of marijuana and driving under the influence of marijuana.

2. Definitions.

(1) **"Administer"** means the direct application of marijuana to a qualifying patient by way of any of the following methods:

(a) Ingestion of capsules, teas, oils, and other marijuana-infused products;

(b) Vaporization or smoking of dried flowers, buds, plant material, extracts, or oils;

(c) Application of ointments or balms;

(d) Transdermal patches and suppositories;

(e) Consuming marijuana-infused food products; or

(f) Any other method recommended by a qualifying patient's physician.

(2) **"Department"** means the department of health and senior services, or its successor agency.

(3) **"Entity"** means a natural person, corporation, professional corporation, nonprofit corporation, cooperative corporation, unincorporated association, business trust, limited liability company, general or limited partnership, limited liability partnership, joint venture, or any other legal entity.

(4) **"Flowering plant"** means a marijuana plant from the time it exhibits the first signs of sexual maturity through harvest.

(5) **"Marijuana"** or **"marihuana"** means *Cannabis indica*, *Cannabis sativa*, and *Cannabis ruderalis*, hybrids of such species, and any other strains commonly understood within the scientific community to constitute marijuana, as well as resin extracted from the plant and marijuana-infused products. "Marijuana" or "marihuana" do not include industrial hemp containing a cropwide average tetrahydrocannabinol concentration that does not exceed three-tenths of one percent on a dry weight basis, or commodities or products manufactured from industrial hemp.

(6) **"Marijuana-infused products"** means products that are infused with marijuana or an extract thereof and are intended for use or consumption other than by smoking, including, but not limited to, edible products, ointments, tinctures and concentrates.

(7) **"Medical marijuana cultivation facility"** means a facility licensed by the department to acquire, cultivate, process, store, transport, and sell marijuana to a medical marijuana dispensary facility, medical marijuana testing facility, or to a medical marijuana-infused products manufacturing facility.

(8) **"Medical marijuana dispensary facility"** means a facility licensed by the department to acquire, store, sell, transport, and deliver marijuana, marijuana-infused products, and drug paraphernalia used to administer marijuana as provided for in this section to a qualifying patient, a primary caregiver, another medical marijuana dispensary facility, a medical marijuana testing facility, or a medical marijuana-infused products manufacturing facility.

(9) **"Medical marijuana-infused products manufacturing facility"** means a facility licensed by the department to acquire, store, manufacture, transport, and sell marijuana-infused products to a medical marijuana dispensary facility, a medical marijuana testing facility, or to another medical marijuana-infused products manufacturing facility.

(10) **"Medical marijuana testing facility"** means a facility certified by the department to acquire, test, certify, and transport marijuana.

(11) **"Medical use"** means the production, possession, delivery, distribution, transportation, or administration of marijuana or a marijuana-infused product, or drug paraphernalia used to administer marijuana or a marijuana-infused product, for the benefit of a qualifying patient to mitigate the symptoms or effects of the patient's qualifying medical condition.

(12) **"Physician"** means an individual who is licensed and in good standing to practice medicine or osteopathy under Missouri law.

(13) **"Physician certification"** means a document, whether handwritten, electronic or in another commonly used format, signed by a physician and stating that, in the physician's professional opinion, the patient suffers from a qualifying medical condition.

(14) **"Primary caregiver"** means an individual twenty-one years of age or older who has significant responsibility for managing the well-being of a qualifying patient and who is designated as such on the primary caregiver's application for an identification card under this section or in other written notification to the department.

(15) **"Qualifying medical condition"** means the condition of, symptoms related to, or side-effects from the treatment of:

(a) Cancer;

(b) Epilepsy;

(c) Glaucoma;

(d) Intractable migraines unresponsive to other treatment;

(e) A chronic medical condition that causes severe, persistent pain or persistent muscle spasms, including but not limited to those associated with multiple sclerosis, seizures, Parkinson's disease, and Tourette's syndrome;

(f) Debilitating psychiatric disorders, including, but not limited to, posttraumatic stress disorder, if diagnosed by a state licensed psychiatrist;

(g) Human immunodeficiency virus or acquired immune deficiency syndrome;

(h) A chronic medical condition that is normally treated with a prescription medication that could lead to physical or psychological dependence, when a physician determines that medical use of marijuana could be effective in treating that condition and would serve as a safer alternative to the prescription medication;

(i) Any terminal illness; or

(j) In the professional judgment of a physician, any other chronic, debilitating or other medical condition, including, but not limited to, hepatitis C, amyotrophic lateral sclerosis, inflammatory bowel disease, Crohn's disease, Huntington's disease, autism, neuropathies, sickle cell anemia, agitation of Alzheimer's disease, cachexia, and wasting syndrome.

(16) **"Qualifying patient"** means a Missouri resident diagnosed with at least one qualifying medical condition.

3. Creating Patient Access to Medical Marijuana.

(1) In carrying out the implementation of this section, the department shall have the authority to:

(a) Grant or refuse state licenses and certifications for the cultivation, manufacture, dispensing, sale, testing, tracking, and transportation of marijuana for medical use as provided by law; suspend, fine, restrict, or revoke such licenses and certifications upon a violation of this section or a rule promulgated pursuant to this section; and impose any administrative penalty authorized by this section or any rule promulgated pursuant to this section.

(b) Promulgate rules and emergency rules necessary for the proper regulation and control of the cultivation, manufacture, dispensing, and sale of marijuana for medical use and for the enforcement of this section so long as patient access is not restricted unreasonably and such rules are reasonably necessary for patient safety or to restrict access to only licensees and qualifying patients.

(c) Develop such forms, certificates, licenses, identification cards, and applications as are necessary for, or reasonably related to, the administration of this section or any of the rules promulgated under this section;

(d) Require a seed-to-sale tracking system that tracks medical marijuana from either the seed or immature plant stage until the medical marijuana or medical marijuana-infused product is sold to a qualifying patient or primary caregiver to ensure that no medical marijuana grown by a medical marijuana cultivation facility or manufactured by a medical marijuana-infused products manufacturing facility is sold or otherwise transferred except by a medical marijuana dispensary facility. The department shall certify, if possible, at least two commercially available systems to licensees as compliant with its tracking standards and issue standards for the creation or use of other systems by licensees.

(e) Issue standards for the secure transportation of marijuana and marijuana-infused products. The department shall certify entities which demonstrate compliance with its transportation standards to transport marijuana and marijuana-infused products to a medical marijuana cultivation facility, a medical marijuana-infused products manufacturing facility, a medical marijuana dispensary facility, a medical marijuana testing facility, or another entity with a transportation certification. The department shall develop or adopt from any other governmental agency such safety and security standards as are reasonably necessary for the transportation of marijuana. Any entity licensed or certified pursuant to this section shall be allowed to transport cannabis.

(f) The department may charge a fee not to exceed $5,000 for any certification issued pursuant to this section.

(g) Prepare and transmit annually a publicly available report accounting to the governor for the efficient discharge of all responsibilities assigned to the department under this section;

(h) Establish a system to numerically score competing medical marijuana licensee and certificate applicants, only in cases where more applicants apply than the minimum number of licenses or certificates as calculated by this section, which scoring shall be limited to an analysis of the following:

(i) the character, veracity, background, qualifications, and relevant experience of principal officers or managers;

(ii) the business plan proposed by the applicant, which in the case of cultivation facilities and dispensaries shall include the ability to maintain an adequate supply of marijuana, plans to ensure safety and security of qualifying patients and the community, procedures to be used to prevent diversion, and any plan for making marijuana available to low-income qualifying patients;

(iii) site security;

(iv) experience in a legal cannabis market;

(v) in the case of medical marijuana testing facilities, the experience of their personnel with testing marijuana, food or drugs for toxins and/or potency and health care industry experience;

(vi) the potential for positive economic impact in the site community;

(vii) in the case of medical marijuana cultivation facilities, capacity or experience with agriculture, horticulture, and health care;

(viii) in the case of medical marijuana dispensary facilities, capacity or experience with health care, the suitability of the proposed location, and its accessibility for patients;

(ix) in the case of medical marijuana-infused products manufacturing facilities, capacity or experience with food and beverage manufacturing; and

(x) maintaining competitiveness in the marijuana for medical use marketplace.

In ranking applicants and awarding licenses and certificates, the department may consult or contract with other public agencies with relevant expertise regarding these factors. The department shall lift or ease any limit on the number of licensees or certificate holders in order to meet the demand for marijuana for medical use by qualifying patients.

(2) The department shall issue any rules or emergency rules necessary for the implementation and enforcement of this section and to ensure the right to, availability, and safe use of marijuana for medical use by qualifying patients. In developing such rules or emergency rules, the department may consult with other public agencies. In addition to any other rules or emergency rules necessary to carry out the mandates of this section, the department may issue rules or emergency rules relating to the following subjects:

(a) Compliance with, enforcement of, or violation of any provision of this section or any rule issued pursuant to this section, including procedures and grounds for denying, suspending, fining, restricting, or revoking a state license or certification issued pursuant to this section;

(b) Specifications of duties of officers and employees of the department;

(c) Instructions or guidance for local authorities and law enforcement officers;

(d) Requirements for inspections, investigations, searches, seizures, and such additional enforcement activities as may become necessary from time to time;

(e) Creation of a range of administrative penalties for use by the department;

(f) Prohibition of misrepresentation and unfair practices;

(g) Control of informational and product displays on licensed premises provided that the rules may not prevent or unreasonably restrict appropriate signs on the property of the medical marijuana dispensary facility, product display and examination by the qualifying patient and/or primary caregiver, listings in business directories including phone books, listings in marijuana-related or medical publications, or the sponsorship of health or not for profit charity or advocacy events;

(h) Development of individual identification cards for owners, officers, managers, contractors, employees, and other support staff of entities licensed or certified pursuant to this

section, including a fingerprint-based federal and state criminal record check in accordance with U.S. Public Law 92-544, or its successor provisions, as may be required by the department prior to issuing a card and procedures to ensure that cards for new applicants are issued within fourteen days. Applicants licensed pursuant to this section shall submit fingerprints to the Missouri state highway patrol for the purpose of conducting a state and federal fingerprint-based criminal background check. The Missouri state highway patrol, if necessary, shall forward the fingerprints to the Federal Bureau of Investigation (FBI) for the purpose of conducting a fingerprint-based criminal background check. Fingerprints shall be submitted pursuant to 43.543 and fees shall be paid pursuant to 43.530;

(i) Security requirements for any premises licensed or certified pursuant to this section, including, at a minimum, lighting, physical security, video, alarm requirements, and other minimum procedures for internal control as deemed necessary by the department to properly administer and enforce the provisions of this section, including reporting requirements for changes, alterations, or modifications to the premises;

(j) Regulation of the storage of, warehouses for, and transportation of marijuana for medical use;

(k) Sanitary requirements for, including, but not limited to, the preparation of medical marijuana-infused products;

(l) The specification of acceptable forms of picture identification that a medical marijuana dispensary facility may accept when verifying a sale;

(m) Labeling and packaging standards;

(n) Records to be kept by licensees and the required availability of the records;

(o) State licensing procedures, including procedures for renewals, reinstatements, initial licenses, and the payment of licensing fees;

(p) The reporting and transmittal of tax payments;

(q) Authorization for the department of revenue to have access to licensing information to ensure tax payment and the effective administration of this section; and

(r) Such other matters as are necessary for the fair, impartial, stringent, and comprehensive administration of this section.

(3) The department shall issue rules or emergency rules for a medical marijuana and medical marijuana-infused products independent testing and certification program for medical marijuana licensees and requiring licensees to test medical marijuana using one or more impartial, independent laboratories to ensure, at a minimum, that products sold for human consumption do not contain contaminants that are injurious to health, to ensure correct labeling and measure potency. The department shall not require any medical marijuana or medical marijuana-infused products to be tested more than once prior to sale.

(4) The department shall issue rules or emergency rules to provide for the certification of and standards for medical marijuana testing facilities, including the requirements for equipment and qualifications for personnel, but shall not require certificate holders to have any federal agency licensing or have any relationship with a federally licensed testing facility. The department shall certify, if possible, at least two entities as medical marijuana testing facilities. No medical marijuana testing facility shall be owned by an entity under substantially common control, ownership, or management as a medical marijuana cultivation facility, medical marijuana-infused product manufacturing facility, or medical marijuana dispensary facility.

(5) [The department shall maintain the confidentiality of reports or other information obtained from an applicant or licensee containing any individualized data, information, or records related to the licensee or its operation, including sales information, financial records, tax returns, credit reports, cultivation information, testing results, and security information and plans, or revealing any patient information, or any other records that are exempt from public inspection

pursuant to state or federal law. Such reports or other information may be used only for a purpose authorized by this section. Any information released related to patients may be used only for a purpose authorized by federal law and this section, including verifying that a person who presented a patient identification card to a state or local law enforcement official is lawfully in possession of such card.] Beginning December 2, 2020, all public records produced or retained pursuant to this section are subject to the general provisions of the Missouri Sunshine Law, as amended from time to time. Notwithstanding the foregoing, records containing proprietary business information obtained from an applicant or licensee are subject to closure. For documents submitted on or after December 2, 2020, the applicant or licensee shall label business information it believes to be proprietary prior to submitting it to the department. For documents submitted prior to December 2, 2020, the applicant or licensee may advise the department, through a department approved process, of any records previously submitted by the applicant or licensee it believes contain proprietary business information. Proprietary business information shall include sales information, financial records, tax returns, credit reports, cultivation information unrelated to product safety, testing results unrelated to product safety, site security information and plans, and individualized consumer information. The presence of proprietary business information shall not justify the closure of public records:

(a) identifying the applicant or licensee;

(b) relating to any citation, notice of violation, tax delinquency, or other enforcement action;

(c) relating to any public official's support or opposition relative to any applicant, licensee, or their proposed or actual operations;

(d) where disclosure is reasonably necessary for the protection of public health or safety; or

(e) that are otherwise subject to public inspection under other applicable law.

(6) Within one hundred eighty days of December 6, 2018, the department shall make available to the public license application forms and application instructions for medical marijuana cultivation facilities, medical marijuana testing facilities, medical marijuana dispensary facilities, and medical marijuana-infused products manufacturing facilities.

(7) Within one hundred eighty days of December 6, 2018, the department shall make available to the public application forms and application instructions for qualifying patient, qualifying patient cultivation, and primary caregiver identification cards. Within two hundred ten days of December 6, 2018, the department shall begin accepting applications for such identification cards.

(8) An entity may apply to the department for and obtain one or more licenses to grow marijuana as a medical marijuana cultivation facility. Each facility in operation shall require a separate license, but multiple licenses may be utilized in a single facility. Each indoor facility utilizing artificial lighting may be limited by the department to thirty thousand square feet of flowering plant canopy space. Each outdoor facility utilizing natural lighting may be limited by the department to two thousand eight hundred flowering plants. Each greenhouse facility using a combination of natural and artificial lighting may be limited by the department, at the election of the licensee, to two thousand eight hundred flowering plants or thirty thousand square feet of flowering plant canopy. The license shall be valid for three years from its date of issuance and shall be renewable, except for good cause. The department shall charge each applicant a nonrefundable fee of ten thousand dollars per license application or renewal for all applicants filing an application within three years of December 6, 2018, and shall charge each applicant a nonrefundable fee of five thousand dollars per license application or renewal thereafter. Once granted, the department shall charge each licensee an annual fee of twenty-five thousand dollars per facility license. Application and license fees shall be increased or decreased each year by the percentage of increase or decrease from the end of the previous calendar year of the Consumer Price Index, or successor index as published by the U.S. Department of Labor, or its successor agency. No more than three medical marijuana cultivation facility licenses shall be issued to any entity under substantially common control, ownership, or management.

(9) An entity may apply to the department for and obtain one or more licenses to operate a medical marijuana dispensary facility. Each facility in operation shall require a separate license. A license shall be valid for three years from its date of issuance and shall be renewable, except for good cause. The department shall charge each applicant a nonrefundable fee of six thousand dollars per license application or renewal for each applicant filing an application within three years of December 6, 2018, and shall charge each applicant a nonrefundable fee of three thousand dollars per license application or renewal thereafter. Once granted, the department shall charge each licensee an annual fee of ten thousand dollars per facility license. Application and license fees shall be increased or decreased each year by the percentage of increase or decrease from the end of the previous calendar year of the Consumer Price Index, or successor index as published by the U.S. Department of Labor, or its successor agency. No more than five medical marijuana dispensary facility licenses shall be issued to any entity under substantially common control, ownership, or management.

(10) An entity may apply to the department for and obtain one or more licenses to operate a medical marijuana-infused products manufacturing facility. Each facility in operation shall require a separate license. A license shall be valid for three years from its date of issuance and shall be renewable, except for good cause. The department shall charge each applicant a nonrefundable fee of six thousand dollars per license application or renewal for each applicant filing an application within three years of December 6, 2018, and shall charge each applicant a nonrefundable fee of three thousand dollars per license application or renewal thereafter. Once granted, the department shall charge each licensee an annual fee of ten thousand dollars per facility license. Application and license fees shall be increased or decreased each year by the percentage of increase or decrease from the end of the previous calendar year of the Consumer Price Index, or successor index as published by the U.S. Department of Labor, or its successor agency. No more than three medical marijuana-infused products manufacturing facility licenses shall be issued to any entity under substantially common control, ownership, or management.

(11) Any applicant for a license authorized by this section may prefile their application fee with the department beginning 30 days after December 6, 2018.

(12) Except for good cause, a qualifying patient or his or her primary caregiver may obtain an identification card from the department to cultivate up to six flowering marijuana plants for the exclusive use of that qualifying patient. The card shall be valid for twelve months from its date of issuance and shall be renewable with the annual submittal of a new or updated physician's certification. The department shall charge an annual fee for the card of one hundred dollars, with such rate to be increased or decreased each year by the percentage of increase or decrease from the end of the previous calendar year of the Consumer Price Index, or successor index as published by the U.S. Department of Labor, or its successor agency.

(13) The department may set a limit on the amount of marijuana that may be purchased by or on behalf of a single qualifying patient in a thirty-day period, provided that limit is not less than four ounces of dried, unprocessed marijuana, or its equivalent. Any such limit shall not apply to a qualifying patient with written certification from two independent physicians that there are compelling reasons why the qualifying patient needs a greater amount than the limit established by the department.

(14) The department may set a limit on the amount of marijuana that may be possessed by or on behalf of each qualifying patient, provided that limit is not less than a sixty-day supply of dried, unprocessed marijuana, or its equivalent. A primary caregiver may possess a separate legal limit for each qualifying patient under their care and a separate legal limit for themselves if they are a qualifying patient. Qualifying patients cultivating marijuana for medical use may possess up to a ninety-day supply, so long as the supply remains on property under their control. Any such limit shall not apply to a qualifying patient with written certification from two independent physicians that there are compelling reasons for additional amounts. Possession of between the legal limit and up to twice the legal limit shall subject the possessor to department sanctions, including an administrative penalty and loss of their patient identification card for up to a year. Purposefully possessing amounts in excess of twice the legal limit shall be punishable by imprisonment of up to one year and a fine of up to two thousand dollars.

(15) The department may restrict the aggregate number of licenses granted for medical marijuana cultivation facilities, provided, however, that the number may not be limited to fewer

than one license per every one hundred thousand inhabitants, or any portion thereof, of the state of Missouri, according to the most recent census of the United States. A decrease in the number of inhabitants in the state of Missouri shall have no impact.

(16) The department may restrict the aggregate number of licenses granted for marijuana-infused products manufacturing facilities, provided, however, that the number may not be limited to fewer than one license per every seventy thousand inhabitants, or any portion thereof, of the state of Missouri, according to the most recent census of the United States. A decrease in the number of inhabitants in the state of Missouri shall have no impact.

(17) The department may restrict the aggregate number of licenses granted for medical marijuana dispensary facilities, provided, however, that the number may not be limited to fewer than twenty-four licenses in each United States congressional district in the state of Missouri pursuant to the map of each of the eight congressional districts as drawn and effective on December 6, 2018. Future changes to the boundaries of or the number of congressional districts shall have no impact.

(18) The department shall begin accepting license and certification applications for medical marijuana dispensary facilities, medical marijuana testing facilities, medical marijuana cultivation facilities, medical marijuana-infused products manufacturing facilities, seed-to-sale tracking systems, and for transportation of marijuana no later than two hundred forty days after December 6, 2018. Applications for licenses and certifications under this section shall be approved or denied by the department no later than one hundred fifty days after their submission. If the department fails to carry out its nondiscretionary duty to approve or deny an application within one hundred fifty days of submission, an applicant may immediately seek a court order compelling the department to approve or deny the application.

(19) Qualifying patients under this section shall obtain [and annually renew] an identification card or cards from the department. The department shall charge a fee of twenty-five dollars per year per card with such fee to be increased or decreased each year by the percentage of increase or decrease from the end of the previous calendar year of the Consumer Price Index, or successor index as published by the U.S. Department of Labor or its successor agency. Cards shall be valid for three years and may be renewed with a new physician's certification. Upon receiving an application for a qualifying patient identification card or qualifying patient cultivation identification card, the department shall, within thirty days, either issue the card or provide a written explanation for its denial. If the department fails to deny and fails to issue a card to an eligible qualifying patient within thirty days, then their physician certification shall serve as their qualifying patient identification card or qualifying patient cultivation identification card for up to one year from the date of physician certification. All initial applications for or renewals of a qualifying patient identification card or qualifying patient cultivation identification card shall be accompanied by a physician certification that is less than thirty days old.

(20) Primary caregivers under this section shall obtain [and annually renew] an identification card from the department. Cards shall be valid for three years. The department shall charge a fee of [twenty-five] seventy-five dollars [per year], with such fee to be increased or decreased each year by the percentage of increase or decrease from the end of the previous calendar year of the Consumer Price Index, or successor index as published by the U.S. Department of Labor, or its successor agency. Upon receiving an application for a primary caregiver identification card, the department shall, within thirty days, either issue the card or provide a written explanation for its denial.

(21) All marijuana for medical use sold in Missouri shall be cultivated in a licensed medical marijuana cultivation facility located in Missouri.

(22) All marijuana-infused products for medical use sold in the state of Missouri shall be manufactured in a medical marijuana-infused products manufacturing facility.

(23) The denial of a license, license renewal, or identification card by the department shall be appealable to the administrative hearing commission, or its successor entity. Following the exhaustion of administrative review, denial of a license, license renewal, or identification card by the department shall be subject to judicial review as provided by law.

(24) No elected official shall interfere directly or indirectly with the department's obligations and activities under this section.

(25) The department shall not have the authority to apply or enforce any rule or regulation that would impose an undue burden on any one or more licensees or certificate holders, any qualifying patients, or act to undermine the purposes of this section.

4. Taxation and Reporting.

(1) A tax is levied upon the retail sale of marijuana for medical use sold at medical marijuana dispensary facilities within the state. The tax shall be at a rate of four percent of the retail price. The tax shall be collected by each licensed medical marijuana dispensary facility and paid to the department of revenue. After retaining no more than five percent for its actual collection costs, amounts generated by the tax levied in this section shall be deposited by the department of revenue into the Missouri veterans' health and care fund. Licensed entities making retail sales within the state shall be allowed approved credit for returns provided the tax was paid on the returned item and the purchaser was given the refund or credit.

(2) There is hereby created in the state treasury the "Missouri Veterans' Health and Care Fund", which shall consist of taxes and fees collected under this section. The state treasurer shall be custodian of the fund, and he or she shall invest monies in the fund in the same manner as other funds are invested. Any interest and monies earned on such investments shall be credited to the fund. Notwithstanding any other provision of law, any monies remaining in the fund at the end of a biennium shall not revert to the credit of the general revenue fund. The commissioner of administration is authorized to make cash operating transfers to the fund for purposes of meeting the cash requirements of the department in advance of it receiving annual application, licensing, and tax revenue, with any such transfers to be repaid as provided by law. The fund shall be a dedicated fund and shall stand appropriated without further legislative action as follows:

(a) First, to the department, an amount necessary for the department to carry out this section, including repayment of any cash operating transfers, payments made through contract or agreement with other state and public agencies necessary to carry out this section, and a reserve fund to maintain a reasonable working cash balance for the purpose of carrying out this section;

(b) Next, the remainder of such funds shall be transferred to the Missouri veterans commission for health and care services for military veterans, including the following purposes: operations, maintenance and capital improvements of the Missouri veterans homes, the Missouri service officer's program, and other services for veterans approved by the commission, including, but not limited to, health care services, mental health services, drug rehabilitation services, housing assistance, job training, tuition assistance, and housing assistance to prevent homelessness. The Missouri veterans commission shall contract with other public agencies for the delivery of services beyond its expertise.

(c) All monies from the taxes authorized under this subsection shall provide additional dedicated funding for the purposes enumerated above and shall not replace existing dedicated funding.

(3) For all retail sales of marijuana for medical use, a record shall be kept by the seller which identifies, by secure and encrypted patient number issued by the seller to the qualifying patient involved in the sale, all amounts and types of marijuana involved in the sale and the total amount of money involved in the sale, including itemizations, taxes collected and grand total sale amounts. All such records shall be kept on the premises in a readily available format and be made available for review by the department and the department of revenue upon request. Such records shall be retained for five years from the date of the sale.

(4) The tax levied pursuant to this subsection is separate from, and in addition to, any general state and local sales and use taxes that apply to retail sales, which shall continue to be collected and distributed as provided by general law.

(5) Except as authorized in this subsection, no additional taxes shall be imposed on the sale of marijuana for medical use.

(6) The fees and taxes provided for in this Article XIV, Section 1 shall be fully enforceable notwithstanding any other provision in this Constitution purportedly prohibiting or restricting the taxes and fees provided for herein.

(7) The unexpended balance existing in the fund shall be exempt from the provisions of section 33.080 relating to the transfer of unexpended balances to the general revenue fund.

5. Additional Patient, Physician, Caregiver and Provider Protections.

(1) Except as provided in this section, the possession of marijuana in quantities less than the limits of this section, or established by the department, and transportation of marijuana from a medical marijuana dispensary facility to the qualifying patient's residence shall not subject the possessor to arrest, criminal or civil liability, or sanctions under Missouri law, provided that the possessor produces on demand to the appropriate authority a valid qualifying patient identification card; a valid qualifying patient cultivation identification card; a valid physician certification while making application for an identification card; or a valid primary caregiver identification card. Production of the respective equivalent identification card or authorization issued by another state or political subdivision of another state shall also meet the requirements of this subdivision and shall allow for the purchase of marijuana for use by a non-resident patient from a medical marijuana dispensary facility as permitted by this section and in compliance with department regulations.

(2) No patient shall be denied access to or priority for an organ transplant because they hold a qualifying patient identification card or use marijuana for medical use.

(3) A physician shall not be subject to criminal or civil liability or sanctions under Missouri law or discipline by the Missouri state board of registration for the healing arts, or its successor agency, for owning, operating, investing in, being employed by, or contracting with any entity licensed or certified pursuant to this section or issuing a physician certification to a patient diagnosed with a qualifying medical condition in a manner consistent with this section and legal standards of professional conduct.

(4) A health care provider shall not be subject to civil or criminal prosecution under Missouri law, denial of any right or privilege, civil or administrative penalty or sanction, or disciplinary action by any accreditation or licensing board or commission for owning, operating, investing in, being employed by, or contracting with any entity licensed or certified pursuant to this section or providing health care services that involve the medical use of marijuana consistent with this section and legal standards of professional conduct.

(5) A medical marijuana testing facility shall not be subject to civil or criminal prosecution under Missouri law, denial of any right or privilege, civil or administrative penalty or sanction, or disciplinary action by any accreditation or licensing board or commission for providing laboratory testing services that relate to the medical use of marijuana consistent with this section and otherwise meeting legal standards of professional conduct.

(6) A health care provider shall not be subject to mandatory reporting requirements for the medical use of marijuana by nonemancipated qualifying patients under eighteen years of age in a manner consistent with this section and with consent of a parent or guardian.

(7) A primary caregiver shall not be subject to criminal or civil liability or sanctions under Missouri law for purchasing, transporting, or administering marijuana for medical use to a qualifying patient or participating in the patient cultivation of up to six flowering marijuana plants per patient in a manner consistent with this section and generally established legal standards of personal or professional conduct.

(8) An attorney shall not be subject to disciplinary action by the state bar association or other professional licensing body for owning, operating, investing in, being employed by, contracting with, or providing legal assistance to prospective or licensed medical marijuana testing facilities, medical marijuana cultivation facilities, medical marijuana dispensary facilities, medical marijuana-infused products manufacturing facilities, qualifying patients, primary caregivers, physicians, health care providers or others related to activity that is no longer subject to criminal penalties under state law pursuant to this section.

(9) Actions and conduct by qualifying patients, primary caregivers, medical marijuana testing facilities, medical marijuana cultivation facilities, medical marijuana-infused products manufacturing facilities, or medical marijuana dispensary facilities licensed or registered with the department, or their employees or agents, as permitted by this section and in compliance with department regulations and other standards of legal conduct, shall not be subject to criminal or civil liability or sanctions under Missouri law, except as provided for by this section.

(10) Nothing in this section shall provide immunity for negligence, either common law or statutorily created, nor criminal immunities for operating a vehicle, aircraft, dangerous device, or navigating a boat under the influence of marijuana.

(11) It is the public policy of the state of Missouri that contracts related to marijuana for medical use that are entered into by qualifying patients, primary caregivers, medical marijuana testing facilities, medical marijuana cultivation facilities, medical marijuana-infused products manufacturing facilities, or medical marijuana dispensary facilities and those who allow property to be used by those entities, should be enforceable. It is the public policy of the state of Missouri that no contract entered into by qualifying patients, primary caregivers, medical marijuana testing facilities, medical marijuana cultivation facilities, medical marijuana-infused products manufacturing facilities, or medical marijuana dispensary facilities, or by a person who allows property to be used for activities that are exempt from state criminal penalties by this section, shall be unenforceable on the basis that activities related to medical marijuana may be prohibited by federal law.

6. Legislation.

Nothing in this section shall limit the general assembly from enacting laws consistent with this section, or otherwise effectuating the patient rights of this section. The legislature shall not enact laws that hinder the right of qualifying patients to access marijuana for medical use as granted by this section.

7. Additional Provisions.

(1) Nothing in this section permits a person to:

(a) Consume marijuana for medical use in a jail or correctional facility;

(b) Undertake any task under the influence of marijuana when doing so would constitute negligence or professional malpractice; or

(c) Operate, navigate, or be in actual physical control of any dangerous device or motor vehicle, aircraft or motorboat while under the influence of marijuana; or

(d) Bring a claim against any employer, former employer, or prospective employer for wrongful discharge, discrimination, or any similar cause of action or remedy, based on the employer, former employer, or prospective employer prohibiting the employee, former employee, or prospective employee from being under the influence of marijuana while at work or disciplining the employee or former employee, up to and including termination from employment, for working or attempting to work while under the influence of marijuana.

(2) No medical marijuana cultivation facility, medical marijuana testing facility, medical marijuana dispensary facility, or medical marijuana-infused products manufacturing facility, or entity with a transportation certification shall be owned, in whole or in part, or have as an officer, director, board member, manager, or employee, any individual with a disqualifying felony offense. A "disqualifying felony offense" is a violation of, and conviction or guilty plea to, state or federal law that is, or would have been, a felony under Missouri law, regardless of the sentence imposed, unless the department determines that:

(a) The person's conviction was for the medical use of marijuana or assisting in the medical use of marijuana; or

(b) The person's conviction was for a nonviolent crime for which he or she was not incarcerated and that is more than five years old; or

(c) More than five years have passed since the person was released from parole or probation, and he or she has not been convicted of any subsequent criminal offenses.

The department may consult with and rely on the records, advice and recommendations of the attorney general and the department of public safety, or their successor entities, in applying this subdivision.

(3) All medical marijuana cultivation facility, medical marijuana dispensary facility, and medical marijuana-infused products manufacturing facility licenses, entities with medical marijuana testing facility certifications, and entities with transportation certifications shall be held by entities that are majority owned, directly or indirectly, by natural persons who have been citizens of the state of Missouri for at least one year prior to the application for such license or certification. Notwithstanding the foregoing, persons or entities outside the state of Missouri may own a minority stake, directly or indirectly, in such entities.

(4) No medical marijuana cultivation facility, medical marijuana dispensary facility, or medical marijuana-infused products manufacturing facility shall manufacture, package or label marijuana or marijuana-infused products in a false or misleading manner. No person shall sell any product in a manner designed to cause confusion between a marijuana or marijuana-infused product and any product not containing marijuana. A violation of this subdivision shall be punishable by an appropriate and proportional department sanction, up to and including loss of license.

(5) All edible marijuana-infused products shall be sold in individual, child-resistant containers that are labeled with dosage amounts, instructions for use, and estimated length of effectiveness. All marijuana and marijuana-infused products shall be sold in containers clearly and conspicuously labeled as mandated by the department [, in a font size at least as large as the largest other font size used on the package,] as containing "Marijuana", or a "Marijuana-Infused Product". Violation of this prohibition shall subject the violator to department sanctions, including an administrative penalty.

(6) No individual shall serve as the primary caregiver for more than three qualifying patients.

(7) No qualifying patient shall consume marijuana for medical use in a public place, unless provided by law. Violation of this prohibition shall subject the violator to sanctions as provided by general law.

(8) No person shall extract resins from marijuana using dangerous materials or combustible gases without a medical marijuana-infused products manufacturing facility license. Violation of this prohibition shall subject the violator to department sanctions, including an administrative penalty and, if applicable, loss of their identification card, certificate, or license for up to one year.

(9) All qualifying patient cultivation shall take place in an enclosed, locked facility that is equipped with security devices that permit access only by the qualifying patient or by such patient's primary caregiver. Two qualifying patients, who both hold valid qualifying patient cultivation identification cards, may share one enclosed, locked facility. No more than twelve qualifying patient or primary caregiver cultivated flowering marijuana plants may be cultivated in a single, enclosed locked facility, except when a primary caregiver also holds a qualifying patient cultivation identification card, in which case no more than eighteen flowering marijuana plants may be cultivated in a single, enclosed, locked facility.

(10) No medical marijuana cultivation facility, medical marijuana dispensary facility, medical marijuana-infused products manufacturing facility, medical marijuana testing facility, or entity with a transportation certification shall assign, sell, give, lease, sublicense, or otherwise transfer its license or certificate to any other entity without the express consent of the department, not to be unreasonably withheld.

(11) Unless allowed by the local government, no new medical marijuana cultivation facility, medical marijuana testing facility, medical marijuana dispensary facility, or medical marijuana-infused products manufacturing facility shall be initially sited within one thousand feet of any then-existing elementary or secondary school, child day-care center, or church. No local

government shall prohibit medical marijuana cultivation facilities, medical marijuana testing facilities, medical marijuana-infused products manufacturing facilities, or medical marijuana dispensary facilities, or entities with a transportation certification either expressly or through the enactment of ordinances or regulations that make their operation unduly burdensome in the jurisdiction. However, local governments may enact ordinances or regulations not in conflict with this section, or with regulations enacted pursuant to this section, governing the time, place, and manner of operation of such facilities in the locality. A local government may establish civil penalties for violation of an ordinance or regulations governing the time, place, and manner of operation of a medical marijuana cultivation facility, medical marijuana testing facility, medical marijuana-infused products manufacturing facility, medical marijuana dispensary facility, or entity holding a transportation certification that may operate in such locality. The only local government ordinances or regulations that are binding on a marijuana facility are those of the local government where the marijuana facility is located.

(12) Unless superseded by federal law or an amendment to this Constitution, a physician shall not certify a qualifying condition for a patient by any means other than providing a physician certification for the patient, whether handwritten, electronic, or in another commonly used format. [A qualifying patient must obtain a new physician certification at least annually.]

(13) A physician shall not issue a certification for the medical use of marijuana for a nonemancipated qualifying patient under the age of eighteen without the written consent of the qualifying patient's parent or legal guardian. The department shall not issue a qualifying patient identification card on behalf of a nonemancipated qualifying patient under the age of eighteen without the written consent of the qualifying patient's parent or legal guardian. Such card shall be issued to one of the parents or guardians and not directly to the patient. Only a parent or guardian may serve as a primary caregiver for a nonemancipated qualifying patient under the age of eighteen. Only the qualifying patient's parent or guardian shall purchase or possess medical marijuana for a nonemancipated qualifying patient under the age of eighteen. A parent or guardian shall supervise the administration of medical marijuana to a nonemancipated qualifying patient under the age of eighteen.

(14) Nothing in this section shall be construed as mandating health insurance coverage of medical marijuana for qualifying patient use.

(15) Real and personal property used in the cultivation, manufacture, transport, testing, distribution, sale, and administration of marijuana for medical use or for activities otherwise in compliance with this section shall not be subject to asset forfeiture solely because of that use.

8. Severability.

The provisions of this section are severable, and if any clause, sentence, paragraph or section of this measure, or an application thereof, is adjudged invalid by any court of competent jurisdiction, the other provisions shall continue to be in effect to the fullest extent possible.

9. Effective Date.

The provisions of this section shall become effective on December 6, 2018.

Section 2. Marijuana Legalization, Regulation, and Taxation

1. Purpose.

The purpose of this section is to make marijuana legal under state and local law for adults twenty-one years of age or older, and to control the commercial production and distribution of marijuana under a system that licenses, regulates, and taxes the businesses involved while protecting public health. The intent is to prevent arrest and penalty for personal possession and cultivation of limited amounts of marijuana by adults twenty-one years of age or older; remove the commercial production and distribution of marijuana from the illicit market; prevent revenue generated from commerce in marijuana from going to criminal enterprises; prevent the distribution of marijuana to persons under twenty-one years of age; prevent the diversion of marijuana to illicit markets; protect health by ensuring the safety of marijuana and products containing marijuana; and ensure the security of marijuana facilities. To the fullest extent

possible, this section shall be interpreted in accordance with the purpose and intent set forth in this section.

This section is not intended to allow for the public use of marijuana, driving while intoxicated by marijuana, the use of marijuana in the workplace, or the use of marijuana by persons under twenty-one years of age.

2. Definitions.

(1) "Commercial motor vehicle" means any self-propelled or towed motor vehicle used on a highway in interstate commerce to transport passengers or property when the vehicle has a gross vehicle weight rating or gross combination weight rating or gross vehicle weight or gross combination weight of greater than ten-thousand and one pounds, whichever is greater; or is designed or used to transport more than eight passengers, including the driver, for compensation; or is designed or used to transport more than fifteen passengers, including the driver, and is not used to transport passengers for compensation; or is used in transporting material found by the United States Secretary of Transportation to be hazardous under 49 U.S.C. 5103, or successor provisions, and transported in a quantity requiring placarding under regulations prescribed by the Secretary under 49 CFR, subtitle B, chapter I, subchapter C, or successor provisions.

(2) "Consumer" means a person who is at least twenty-one years of age.

(3) "Department" means the department of health and senior services, or its successor agency.

(4) "Entity" means a natural person, corporation, professional corporation, nonprofit corporation, cooperative corporation, unincorporated association, business trust, limited liability company, general or limited partnership, limited liability partnership, joint venture, or any other legal entity.

(5) "Flowering plant" means a marijuana plant from the time it exhibits the first signs of sexual maturity through harvest.

(6) "Local government" means, in the case of an incorporated area, a village, town, or city and, in the case of an unincorporated area, a county.

(7) "Marijuana" means *cannabis indica*, *cannabis sativa*, and *cannabis ruderalis*, hybrids of such species, and any other strains commonly understood within the scientific community to constitute marijuana or cannabis, as well as resin extracted from the plant and marijuana-infused products. "Marijuana" does not include industrial hemp, including any part of that plant, including the seeds thereof and all derivatives, extracts, cannabinoids, isomers, acids, salts, and salts of isomers, whether growing or not, with a delta-9 tetrahydrocannabinol concentration of not more than three-tenths of one percent on a dry weight basis, or commodities or products manufactured with industrial hemp, or any other ingredient combined with marijuana to prepare topical or oral administrations, food, drink, or other products.

(8) "Marijuana accessories" means any equipment, product, material, or combination of equipment, products, or materials, which is specifically designed for use in planting, propagating, cultivating, growing, harvesting, manufacturing, compounding, converting, producing, processing, preparing, testing, analyzing, packaging, repackaging, storing, containing, ingesting, inhaling, or otherwise introducing marijuana into the human body.

(9) "Marijuana Cultivation Facility" means an entity licensed by the department to acquire, cultivate, process, store, transport, and sell marijuana to a marijuana dispensary facility, marijuana testing facility, or to a marijuana-infused products manufacturing facility.

(10) "Marijuana Dispensary Facility" means an entity licensed by the department to acquire, store, sell, transport, and deliver marijuana, marijuana-infused products, and marijuana accessories as provided for in this section to consumers.

(11) "Marijuana Facility" means a marijuana cultivation facility, marijuana dispensary facility, marijuana testing facility, marijuana-infused products manufacturing facility, marijuana microbusiness facility, or any other type of marijuana-related facility or business licensed or certified by the department pursuant to this section.

(12) "Marijuana-Infused Products" means products that are infused with marijuana or an extract thereof and are intended for use or consumption other than by smoking, including, but not limited to, edible products, ointments, tinctures and concentrates.

(13) "Marijuana-Infused Products Manufacturing Facility" means an entity licensed by the department to acquire, store, manufacture, transport, and sell marijuana-infused products to a marijuana dispensary facility, a marijuana testing facility, or to another marijuana-infused products manufacturing facility.

(14) "Marijuana Microbusiness Facility" means an entity licensed to cultivate not more than one hundred and fifty flowering plants, process, store, transport, sell, and package the marijuana it cultivates or that it obtains from another marijuana microbusiness facility, and acquire, store, manufacture, transport, deliver, sell, or otherwise transfer marijuana and marijuana-infused products it cultivates and processes, or that it obtains from other marijuana microbusiness facilities, to marijuana dispensary facilities, marijuana testing facilities, other marijuana microbusiness facilities, or consumers.

(15) "Marijuana Testing Facility" means an entity certified by the department to acquire, test, certify, and transport marijuana.

(16) "Owner" means an officer, board member, or other individual who has a financial (other than a security interest, lien, or encumbrance) or voting interest in ten percent or greater of a marijuana facility.

(17) "Unduly burdensome" means that the measures necessary to comply with the rules or ordinances adopted pursuant to this section subject licensees or potential licensees to such a high investment of money, time, or any other resource or asset that a reasonably prudent businessperson would not operate the marijuana facility.

3. Limitations.

(1) Except as otherwise provided in this article, this section does not preclude, limit, or affect laws that assign liability relative to, prohibit, or otherwise regulate:

(a) Delivery or distribution of marijuana or marijuana accessories, with or without consideration, to a person younger than twenty-one years of age;

(b) Purchase, possession, use, or transport of marijuana or marijuana accessories by a person younger than twenty-one years of age;

(c) Consumption of marijuana by a person younger than twenty-one years of age;

(d) Operating or being in physical control of any motor vehicle, train, aircraft, motorboat, or other motorized form of transport while intoxicated by marijuana;

(e) Consumption of marijuana while operating or being in physical control of a motor vehicle, train, aircraft, motorboat, or other motorized form of transport while it is being operated;

(f) Smoking marijuana within a motor vehicle, train, aircraft, motorboat, or other motorized form of transport while it is being operated;

(g) Possession or consumption of marijuana or possession of marijuana accessories on the grounds of a public or private preschool, elementary or secondary school, institution of higher education, in a school bus, or on the grounds of any correctional facility;

(h) Smoking marijuana in a location where smoking tobacco is prohibited;

(i) Consumption of marijuana in a public place, other than in an area licensed by the department for consumption;

(j) Conduct that endangers others;

(k) Undertaking any task while under the influence of marijuana, if doing so would constitute negligence or professional malpractice; or

(l) Performing solvent-based extractions on marijuana using solvents other than water, glycerin, propylene glycol, vegetable oil, or food-grade ethanol, unless licensed for this activity by the department.

(2) This section does not limit any privileges, rights, immunities, or defenses of a person or entity as provided in section 1 of this article, or any other law of this state allowing for or regulating marijuana for medical use.

(3) This section does not require an employer to permit or accommodate conduct otherwise allowed by this section in any workplace or on the employer's property. This section does not prohibit an employer from disciplining an employee for violation of a workplace drug policy or for working while intoxicated by marijuana. This section does not prevent an employer from refusing to hire, discharging, disciplining, or otherwise taking an adverse employment action against a person with respect to hire, tenure, terms, conditions, or privileges of employment because of that person's violation of a workplace drug policy or because that person was working while intoxicated by marijuana.

(4) This section allows a person to prohibit or otherwise regulate the consumption, cultivation, distribution, processing, sale, or display of marijuana, marijuana-infused products, and marijuana accessories on private property the person owns, leases, occupies, or manages, except that a lease agreement executed after the enactment of this section may not prohibit a tenant from lawfully possessing and consuming marijuana by means other than smoking.

4. Regulation of Marijuana.

(1) In carrying out the implementation of this section, the department shall have the authority to:

(a) Grant or refuse state licenses for the cultivation, manufacture, dispensing, and sale of marijuana as provided by law; suspend, fine, restrict, or revoke such licenses upon a violation of this section or a rule promulgated pursuant to this section; and impose any reasonable administrative penalty authorized by this section or any rule promulgated pursuant to this section;

(b) Promulgate rules and emergency rules necessary for the proper regulation and control of the cultivation, manufacture, dispensing, and sale of marijuana and for the enforcement of this section so long as such rules are reasonable and not unduly burdensome;

(c) Develop such forms, certificates, licenses, identification cards, and applications as are necessary for, or reasonably related to, the administration of this section or any of the rules promulgated under this section;

(d) Require a seed-to-sale tracking system that tracks marijuana from either the seed or immature plant stage until the marijuana or marijuana-infused product is sold to a consumer to ensure that no marijuana grown by a marijuana cultivation facility or marijuana microbusiness facility or manufactured by a marijuana-infused products manufacturing facility or marijuana microbusiness facility is sold or otherwise transferred to a consumer except by a marijuana dispensary facility or a marijuana microbusiness facility. The department shall certify, if possible, at least two commercially available systems to licensees as compliant with its tracking standards and issue standards for the creation or use of other systems by licensees;

(e) Issue standards for the secure transportation of marijuana and marijuana-infused products. The department shall certify entities that demonstrate compliance with its transportation standards to transport marijuana and marijuana-infused products to a marijuana cultivation facility, marijuana-infused products manufacturing facility, marijuana dispensary facility, marijuana microbusiness facility, marijuana testing facility, or another entity with a transportation certification. The department shall develop or adopt from any other governmental agency such safety and security standards as are reasonably necessary for the transportation of marijuana. Any entity licensed or certified pursuant to this section shall be allowed to transport its own inventory and products in compliance with department transportation rules;

(f) Promulgate rules and emergency rules specific to the licensing, regulation, and oversight of marijuana microbusiness facilities;

(g) Provide for the issuance of additional types or classes of licenses to operate marijuana-related businesses that allow for only limited processing, transportation, delivery, or storage of marijuana, licenses that allow for the consumption of marijuana within designated, age-restricted areas, and licenses intended to facilitate scientific research or education;

(h) Prepare and transmit annually a publicly available report accounting to the governor, the general assembly, and the public for the efficient discharge of all responsibilities assigned to the department under this section;

(i) Establish a system to numerically score competing marijuana license and certificate applicants, including marijuana microbusiness applicants, only in cases where more applicants apply than the number of licenses available, in which scoring shall be limited to an analysis of the following:

(i) The character, veracity, background, qualifications, and relevant experience of principal officers or managers;

(ii) The business plan proposed by the applicant, which in the case of cultivation facilities and dispensaries shall include the ability to maintain an adequate supply of marijuana, and for all facilities shall include procedures to be used to prevent product diversion;

(iii) Site security;

(iv) In the case of licenses other than the microbusiness license, testing certification, or transport certification, experience as an owner or employee of a Missouri marijuana microbusiness facility;

(v) In the case of marijuana testing facilities, the experience of their personnel with testing marijuana, food or drugs for toxins and potency and health care industry experience;

(vi) The potential for positive economic impact in the site community;

(vii) In the case of marijuana cultivation facilities and marijuana microbusiness facilities, capacity or experience with agriculture and horticulture;

(viii) In the case of marijuana dispensary facilities, the suitability of the proposed location for consumer access, and experience as an owner or employee of a Missouri marijuana dispensary facility or Missouri medical marijuana dispensary facility;

(ix) In the case of marijuana-infused products manufacturing facilities, capacity or experience with food and beverage manufacturing or manufacturing marijuana-infused products;

(x) Maintaining competitiveness in the marijuana marketplace; and

(xi) Whether there is an over-concentration of marijuana facilities within the boundaries of any particular local government.

(j) In ranking applicants and awarding licenses and certificates, the department may consult or contract with other public agencies with relevant expertise regarding these factors.

(2) The department shall issue, at a minimum, the same number of marijuana cultivation facility licenses as are issued for medical marijuana cultivation facilities under section 1 of this article, the same number of marijuana-infused products manufacturing facility licenses as are issued for medical marijuana-infused products manufacturing facilities under section 1, the same number of marijuana dispensary facility licenses with the same congressional distribution requirements as are issued to medical marijuana dispensary facilities under section 1, in addition to the minimum number of marijuana microbusiness licenses as are required under this section. The department

may lift or ease any limit on the number of licensees or certificate holders in order to meet the demand for marijuana by consumers in the state and to ensure a competitive market while also preventing an over-concentration of marijuana facilities within the boundaries of any particular local government.

(3) If marijuana cultivation facility licenses, marijuana-infused products manufacturing facility licenses, or marijuana dispensary facility licenses become available so that the number of total licenses in any respective category falls below the minimum required under this article, section, and subsection, the department shall award at least fifty percent of new licenses available to satisfy the minimum requirement to applicants who are:

(a) Owners of a marijuana microbusiness facility that has been in operation for at least one year and is in good standing with the department;

(b) At least fifty percent owned by natural persons who qualified as economically disadvantaged owners or disabled veterans at the time they applied for and received the marijuana microbusiness facility license; and

(c) Otherwise qualified for the license.

(4) The department may issue any rules or emergency rules necessary for the implementation and enforcement of this section and to ensure the right to, availability, and safe use of marijuana by consumers. In developing such rules or emergency rules, the department may consult or contract with other public agencies. In addition to any other rules or emergency rules necessary to carry out the mandates of this section, the department shall issue rules or emergency rules relating to the following subjects:

(a) Procedures for issuing a license and for renewing, suspending, and revoking a license;

(b) Qualifications for licensure that are directly and demonstrably related to the operation of a marijuana facility;

(c) Requirements and standards for safe cultivation, processing, and distribution of marijuana and marijuana-infused products by marijuana facilities, including health standards to ensure the safe preparation of marijuana-infused products and prohibitions on pesticides that are not safe for use on marijuana;

(d) Testing, packaging, and labeling standards, procedures, and requirements for marijuana and marijuana-infused products and a requirement that a representative sample of marijuana be tested by a marijuana testing facility to ensure public health;

(e) Labeling standards that protect public health by requiring the listing of pharmacologically active ingredients, including, but not limited to, tetrahydrocannabinol (THC), cannabidiol (CBD), and other cannabinoid content, the THC and other cannabinoid amount in milligrams per serving, the number of servings per package, and quantity limits per sale to comply with the allowable possession amount;

(f) Requirements that packaging and labels shall not be made to be attractive to children, required warning labels, and that marijuana and marijuana-infused products be sold in resealable, child-resistant packaging to protect public health;

(g) Security requirements, including lighting, physical security, and alarm requirements, and requirements for securely transporting marijuana between marijuana facilities;

(h) Record keeping requirements for marijuana facilities and monitoring requirements to track the transfer of marijuana by licensees;

(i) Restrictions on advertising, marketing, and display of marijuana, marijuana-infused products, marijuana accessories, and marijuana facilities;

(j) A plan to promote and encourage ownership and employment in the marijuana industry by people from political subdivisions and districts that are economically distressed and to positively impact those political subdivisions and districts;

(k) Administrative penalties for failure to comply with any rule promulgated pursuant to this section or for any violation of rules and regulations adopted pursuant to this section by a licensee, including administrative fines and suspension, revocation, or restriction of a

license. The licensee may choose to challenge any penalties imposed by the department through the Administrative Hearing Commission, or its successor entity. Pursuant to § 536.100 R.S.Mo., or successor provisions, any licensee who has exhausted all administrative remedies provided by law and who is aggrieved by a final decision in a contested case is entitled to judicial review;

(l) Reporting and transmittal of tax payments required under this section;

(m) Authorization for the department of revenue to have access to licensing information to ensure tax payment and the effective administration of this section; and

(n) Such other matters as are necessary for the fair, impartial, stringent, and comprehensive administration of this section.

(5) The department shall issue rules or emergency rules for marijuana and marijuana-infused products independent testing and certification program for marijuana facility licensees and requiring licensees to test marijuana using one or more impartial, independent laboratory or laboratories to ensure, at a minimum, correct labeling, potency measurement, and that products sold for human consumption do not contain contaminants that are potentially injurious to public health.

(6) The department shall issue rules or emergency rules to provide for the certification of and standards for marijuana testing facilities, including the requirements for equipment and qualifications for personnel, but shall not require certificate holders to have any federal agency licensing or have any relationship with a federally licensed testing facility. The department shall certify, if possible, at least two entities as marijuana testing facilities. No marijuana testing facility shall be owned by an entity under substantially common control, ownership, or management as a marijuana cultivation facility, marijuana-infused products manufacturing facility, marijuana microbusiness facility, or marijuana dispensary facility.

(7) All public records produced or retained pursuant to this section are subject to the general provisions of the Missouri Sunshine Law, as amended from time to time. Notwithstanding the foregoing, public records containing proprietary business information obtained from an applicant or licensee are subject to closure. The applicant or licensee shall label business information it believes to be proprietary prior to submitting it to the department. Proprietary business information shall include sales information, financial records, tax returns, credit reports, cultivation information unrelated to product safety, testing results unrelated to product safety, site security information and plans, and individualized consumer information. The presence of proprietary business information shall not justify the closure of public records:

(a) Identifying the applicant or licensee;

(b) Relating to any citation, notice of violation, tax delinquency, or other enforcement action;

(c) Relating to any public official's support or opposition relative to any applicant, licensee, or their proposed or actual operations;

(d) Where disclosure is reasonably necessary for the protection of public health or safety; or

(e) That are otherwise subject to public inspection under applicable law.

(8) Within two hundred and seventy days of the effective date of this section, the department shall make available to the public license application forms and application instructions for marijuana cultivation facilities, marijuana testing facilities, marijuana dispensary facilities, marijuana microbusiness facilities, marijuana-infused products manufacturing facilities, and any other license types and certifications it deems necessary.

(9) An entity may apply to the department for and obtain one or more licenses to grow marijuana as a marijuana cultivation facility. Each facility in operation shall require a separate license, but multiple licenses may be utilized in a single facility. Each indoor facility utilizing artificial lighting may be limited by the department to thirty thousand square feet of flowering plant canopy space. Each outdoor facility utilizing natural lighting may be limited by the department

to two thousand eight hundred flowering plants. Each greenhouse facility using a combination of natural and artificial lighting may be limited by the department, at the election of the licensee, to two thousand eight hundred flowering plants or thirty thousand square feet of flowering plant canopy. The license shall be valid for three years from its date of issuance and shall be renewable, except for good cause. The department shall charge each applicant a non-refundable fee of twelve thousand dollars per license application or renewal for all applicants filing an application within three years of the effective date of this section and shall charge each applicant a non-refundable fee of five thousand dollars per license application or renewal thereafter. Once granted, the department shall charge each licensee an annual fee of twenty-five thousand dollars per facility license. Application and license fees shall be increased or decreased each year by the percentage of increase or decrease from the end of the previous calendar year of the Consumer Price Index, or successor index as published by the U.S. Department of Labor, or its successor agency. An entity may not be an owner of more than three marijuana cultivation facility licenses.

(10) An entity may apply to the department for and obtain one or more licenses to operate a marijuana dispensary facility. Each facility in operation shall require a separate license. A license shall be valid for three years from its date of issuance and shall be renewable, except for good cause. The department shall charge each applicant a non-refundable fee of seven thousand dollars per license application or renewal for each applicant filing an application within three years of the effective date of this section and shall charge each applicant a non-refundable fee of three thousand dollars per license application or renewal thereafter. Once granted, the department shall charge each licensee an annual fee of ten thousand dollars per facility license. Application and license fees shall be increased or decreased each year by the percentage of increase or decrease from the end of the previous calendar year of the Consumer Price Index, or successor index as published by the U.S. Department of Labor, or its successor agency. An entity may not be an owner of more than five marijuana dispensary facility licenses.

(11) An entity may apply to the department for and obtain one or more licenses to operate a marijuana-infused products manufacturing facility. Each facility in operation shall require a separate license. A license shall be valid for three years from its date of issuance and shall be renewable, except for good cause. The department shall charge each applicant a non-refundable fee of seven thousand dollars per license application or renewal for each applicant filing an application within three years of the effective date of this section and shall charge each applicant a non-refundable fee of three thousand dollars per license application or renewal thereafter. Once granted, the department shall charge each licensee an annual fee of ten thousand dollars per facility license. Application and license fees shall be increased or decreased each year by the percentage of increase or decrease from the end of the previous calendar year of the Consumer Price Index, or successor index as published by the U.S. Department of Labor, or its successor agency. An entity may not be an owner of more than three marijuana-infused products manufacturing facility licenses.

(12) An entity may apply to the department for and obtain only one license to operate a marijuana microbusiness facility. A marijuana microbusiness facility license shall allow the licensee to be vertically integrated. A marijuana microbusiness facility licensee may engage in all of the activities allowed under the license or it may apply for and engage in a subset of the activities allowed, if the applicant or license holder so chooses. A marijuana microbusiness facility licensee may sell marijuana it cultivates, processes, manufactures, and packages to any marijuana dispensary facility, any other marijuana microbusiness facility, or directly to consumers. A marijuana microbusiness facility may also process, manufacture, and sell to consumers marijuana and marijuana-infused products it obtains from another marijuana microbusiness facility. A license shall be valid for three years from its date of issuance and shall be renewable, except for good cause. The department shall charge each applicant a non-refundable fee of one thousand five hundred dollars per license application or renewal for each applicant filing an application within three years of the effective date of this section and shall charge each applicant a non-refundable fee of two thousand five hundred dollars per license application or renewal thereafter. Once granted, the department shall charge each licensee an annual fee of two thousand five hundred dollars per facility license. Application and license fees shall be increased or decreased each year by the percentage of increase or decrease from the end of the previous calendar year of the Consumer Price Index, or successor index as published by the U.S. Department of Labor, or its successor agency. An entity may not be an owner of more than one marijuana microbusiness facility license. An owner of a marijuana microbusiness facility may not also be an owner of another licensed marijuana facility or medical marijuana facility regulated under this article. However, the owner of a marijuana microbusiness facility

may apply for a license or licenses for other marijuana or medical marijuana facilities under this article. If granted one or more of these licenses, the marijuana microbusiness facility owner may transition to other licensed operations on a reasonably practical timetable established by the department. In addition to other requirements established by this section, a marijuana microbusiness facility must be majority-owned by natural persons who have been residents of the state of Missouri for at least one year prior to the application for such license. The majority owner or owners must be economically disadvantaged persons, as defined by the department, or disabled veterans, as defined by the department.

(13) The department may restrict the aggregate number of licenses granted for marijuana microbusiness facilities, provided, however, that the number may not be limited to fewer than the following number of licenses in each United States congressional district in the state of Missouri pursuant to the map of each of the eight congressional districts as drawn and effective on December 6, 2018:

(a) Six, once the department begins issuing licenses for marijuana facilities under this subsection;

(b) An additional six following the first two hundred and seventy days after the department begins issuing licenses for marijuana facilities under this subsection; and

(c) An additional six after the first five hundred and forty-eight days after the department begins issuing licenses for marijuana facilities under this subsection, but only after the department conducts an analysis and determines that there is a market for additional microbusiness licenses.

Future changes to the boundaries or the number of congressional districts shall have no impact.

(14) The department shall begin accepting license and certification applications for marijuana dispensary facilities, marijuana testing facilities, marijuana cultivation facilities, marijuana-infused products manufacturing facilities, marijuana microbusiness facilities, seed-to-sale tracking systems, and for transportation of marijuana no later than three hundred and sixty-five days after the effective date of this section. Applications for licenses under this section shall be approved or denied by the department no later than one hundred eighty days after their submission. If the department fails to carry out its non-discretionary duty to approve or deny an application within one hundred eighty days of submission, an applicant may immediately seek a court order compelling the department to approve or deny the application.

(15) With the exception of microbusiness licenses, and consistent with any limitations set forth in this section, for the first five hundred and forty-eight days after the department begins issuing licenses for marijuana facilities, the department may only issue a license:

(a) For a marijuana cultivation facility to an entity holding a medical marijuana cultivation facility license issued pursuant to section 1 of this article seeking licensure to operate a marijuana cultivation facility at the same location;

(b) For a marijuana dispensary facility to an entity holding a medical marijuana dispensary facility license issued pursuant to section 1 of this article seeking licensure to operate a marijuana dispensary facility at the same location;

(c) For a marijuana-infused products manufacturing facility to an entity holding a medical marijuana-infused products manufacturing facility license issued pursuant to section 1 of this article seeking licensure to operate a marijuana-infused products manufacturing facility at the same location; and

(d) For a marijuana testing facility to an entity holding a medical marijuana testing facility license issued pursuant to section 1 of this article seeking licensure to operate a marijuana testing facility at the same location.

(16) The department shall issue a license to each applicant for a marijuana facility pursuant to subdivision (15) of this subsection if the applicant is in good standing with the department and has reasonably complied with this article and all of the rules and regulations promulgated pursuant to this article.

(17) A prospective applicant for a license pursuant to subdivision (15) shall notify the department of their intent to apply and prefile their application fee with the department by February 1, 2021.

(18) Notwithstanding the provisions of section 1 of this article, if an existing medical marijuana dispensary facility is located in a jurisdiction that prohibits marijuana dispensary facilities under this section, or is otherwise prevented from operating a marijuana dispensary facility at the same location as the existing medical marijuana dispensary facility, the medical marijuana dispensary facility may apply to the department for a marijuana dispensary license pursuant to subdivision (15) of this subsection in a new location, and such application shall be granted so long as the applicant meets all the requirements of this section and department regulation. If an existing medical marijuana dispensary facility is located in a jurisdiction that temporarily prohibits non-medical retail marijuana facilities prior to November 3, 2020, and the medical marijuana dispensary facility does not apply to open a marijuana dispensary facility in a new location, the medical marijuana dispensary facility may apply to the department for a marijuana dispensary facility license after November 3, 2020, and if the temporary prohibition is not permanently enacted, such application shall be granted, so long as the applicant meets all the requirements of this section and department regulation.

(19) Notwithstanding the provisions of section 1 of this article, three years after receiving a marijuana dispensary facility license pursuant to subdivision (15), a marijuana dispensary facility may apply to the department for permission to relocate the marijuana dispensary facility to a new location.

(20) Notwithstanding the provisions of section 1 of this article, for the first five hundred and forty-eight days after the department begins issuing licenses for marijuana facilities under this section, the department shall issue licenses for marijuana microbusiness facilities to qualified applicants consistent with the qualifications and limitations set forth in this section.

(21) Notwithstanding the provisions of section 1 of this article, a medical marijuana cultivation facility that is issued a marijuana cultivation facility license pursuant to subdivision (15) of this subsection is limited under both licenses to a total of two thousand eight hundred flowering plants or thirty thousand square feet of flowering plant canopy space. An entity issued a license pursuant to subdivision (15) of this subsection may sell marijuana to medical marijuana facilities and marijuana facilities so long as the entity has both a medical marijuana cultivation facility license and a marijuana cultivation facility license consistent with any limitations set forth in this article or department regulation.

(22) In addition to the foregoing, the department shall not issue a non-medical license pursuant to this section to a medical marijuana cultivation facility, medical marijuana-infused products manufacturing facility, or medical marijuana dispensary facility, if the department determines that doing so will limit or restrict access by qualifying patients, as defined in section 1 of this article, to an adequate supply of marijuana and marijuana-infused products at a reasonable cost.

(23) The department may not promulgate a rule prohibiting a marijuana facility from operating at the same location as a medical marijuana facility of the same license type operating pursuant to section 1 of this article.

(24) Marijuana facilities licensed to distribute marijuana, marijuana-infused products, and marijuana accessories directly to consumers pursuant to this section may also distribute marijuana, marijuana-infused products, and marijuana accessories to qualifying patients and primary caregivers consistent with section 1 of this article and department regulation.

(25) The department may charge a fee not to exceed five thousand dollars for any certification issued pursuant to this section.

(26) Until such time that federal law permits otherwise, all marijuana sold in Missouri pursuant to this article shall be cultivated in Missouri. If allowed by federal law, marijuana may be exported from Missouri in accordance with department regulations. If allowed by federal law, the department may promulgate rules related to the import and export of marijuana and shall promulgate a rule requiring that all marijuana flower imported into Missouri be tested by a marijuana testing facility located in Missouri and comply with Missouri testing standards.

(27) Until such time that federal law permits otherwise, all marijuana-infused products sold in Missouri pursuant to this article shall be manufactured in Missouri. If allowed by federal law, marijuana-infused products may be exported from Missouri in accordance with department regulations. If allowed by federal law, the department may promulgate rules related to the import and export of marijuana-infused products.

(28) The denial of a license or license renewal by the department shall be appealable. The applicant may choose to challenge any denial by the department through the Administrative Hearing Commission, or successor entity. Pursuant to § 536.100 R.S.Mo., or successor provisions, any licensee who has exhausted all administrative remedies provided by law and who is aggrieved by a final decision in a contested case is entitled to judicial review.

(29) No elected official shall interfere directly or indirectly with the department's obligations and activities under this section.

(30) To minimize the potential for undue political influence in awarding licenses, the department shall review license applications using reasonable safeguards that ensure the identity of the applicant and its principal owners, officers, and managers are not identified to the application scorers.

(31) The department shall have the sole authority within the state of Missouri to issue licenses for marijuana facilities and certifications pursuant to this section.

(32) The department shall not have the authority to promulgate, apply, or enforce any rule or regulation that is unduly burdensome or act to undermine the purposes of this section.

5. Local Control.

(1) Except as provided in this subsection, a local government may prohibit the operation of all non-medical retail marijuana facilities regulated under this section from being located within its jurisdiction through voter approval of a ballot question submitted to the qualified voters of the local government, provided that any ballot measure shall be voted on only during the regularly scheduled general election held on the first Tuesday after the first Monday in November of an even-numbered year starting in 2022, thereby avoiding any additional local governmental cost or expense. Until the first general election following the general election held November 3, 2020, a local government may through local ordinance temporarily prohibit non-medical retail marijuana facilities regulated under this section from being located within its jurisdiction. When a ballot question prohibiting non-medical retail marijuana facilities regulated under this section is submitted to voters, the following question shall be presented to the voters in the area subject to the prohibition, "Shall (insert name of local government) ban all non-medical retail marijuana facilities from being located within (insert name of local government and, where applicable, its "unincorporated areas") and forgo any additional related local tax revenue? ( ) Yes ( ) No." If a majority of the votes cast on the question by the qualified voters voting thereon are in favor of the question, then the ban shall go into effect as provided by law. If a question receives less than the required majority, then the jurisdiction shall have no power to ban new non-medical retail marijuana facilities regulated under this section, unless voters at a subsequent election on the first Tuesday after the first Monday in November of an even-numbered year approve a ban on new non-medical retail marijuana facilities submitted to them by the governing body. A local government may repeal an existing ban by its own ordinance or by a vote of the people, either through referral of a ballot question to the voters by the governing body or through citizen petition. In the case of a referral of a ballot question by the governing body or citizen's petition to repeal an existing ban, the question shall be voted on only during the regularly scheduled general election held on the first Tuesday after the first Monday in November of an even-numbered year. A citizen's petition to repeal an existing ban shall be signed by at least five percent of the qualified voters in the area subject to the ban, determined on the basis of the number of votes cast for governor in such locale at the last gubernatorial election held prior to the filing of the petition. The local government shall count the petition signatures and give legal notice of the election as provided by applicable law. Denial of ballot access shall be subject to judicial review. Whether submitted by the governing body or by citizen's petition, the question shall be submitted in the following form: "Shall (insert name of local government) allow non-medical retail marijuana facilities to be located within (insert name of local government and where applicable, its "unincorporated areas") as regulated by state law? ( ) Yes ( ) No." If a

majority of the votes cast on the question by the qualified voters voting thereon are in favor of the question, then the ban shall be repealed.

(2) Unless allowed by the local government, no new marijuana facility shall be initially sited within one thousand feet of any then-existing elementary or secondary school, child day-care center, or church. The only local government ordinances and regulations that are binding on a marijuana facility are those of the local government where the marijuana facility is located. Except as otherwise provided in this subsection, no local government shall prohibit marijuana facilities or entities with a transportation certification either expressly or through the enactment of ordinances or regulations that make their operation unduly burdensome in the jurisdiction. However, local governments may enact ordinances or regulations not in conflict with this section, or with regulations enacted pursuant to this section, governing the time, place, and manner of operation of such facilities in the locality. A local government may establish civil penalties for violation of an ordinance or regulations governing the time, place, and manner of operation of a marijuana facility or entity holding a transportation certification that may operate in such locality.

6. Taxation and Reporting.

(1) A tax shall be levied upon the retail sale of non-medical marijuana sold to consumers at marijuana facilities licensed pursuant to this section within the state. The tax shall be at a rate of fifteen percent of the retail price. The tax shall be collected by each licensed non-medical retail marijuana facility and paid to the department of revenue. After retaining no more than two percent of the total tax collected or its actual collection costs, whichever is less, amounts generated by the tax levied in this section shall be deposited by the department of revenue into the "Veterans, Infrastructure, and Health Fund" created under this subsection. Licensed entities making non-medical retail sales within the state shall be allowed approved credit for returns provided the tax was paid on the returned item and the purchaser was given the refund or credit.

(2) There is hereby created in the state treasury the "Veterans, Infrastructure, and Health Fund" which shall consist of taxes and fees collected under this section. The state treasurer shall be custodian of the fund, and he or she shall invest monies in the fund in the same manner as other funds are invested. Any interest and moneys earned on such investments shall be credited to the fund. Notwithstanding any other provision of law, any monies remaining in the fund at the end of a biennium shall not revert to the credit of the general revenue fund. The commissioner of administration is authorized to make cash operating transfers to the fund for purposes of meeting the cash requirements of the department in advance of it receiving annual application, licensing, and tax revenue, with any such transfers to be repaid as provided by law. The fund shall be a dedicated fund and shall be distributed as follows:

(a) First, to the department, an amount necessary for the department to carry out this section, including repayment of any cash operating transfers, payments made through contract or agreement with other state and public agencies necessary to carry out this section, and a reserve fund to maintain a reasonable working cash balance for the purpose of carrying out this section;

(b) Next, distributed to the local government where the retail sale occurred, three-fifteenths of the remaining fund balance.

(c) After the distribution to the local government where the retail sale occurred, the remaining fund balance shall be distributed in thirds as follows:

(i) One-third of the remainder of the fund balance shall be transferred to the Missouri veterans commission and allied state agencies, as determined by appropriation, exclusively for health care and other services for military veterans and their dependent families;

(ii) One-third of the remainder of the fund balance to the State Road Fund created under article IV, section 30b of this Constitution for constructing and maintaining an adequate system of connected state highways; and

(iii) One-third of the remainder of the fund balance to the department to provide grants to existing agencies and not-for-profit organizations, whether

government or community-based, to increase access to evidence-based low-barrier drug addiction treatment, prioritizing medically proven treatment and overdose prevention and reversal methods and public or private treatment options with an emphasis on reintegrating recipients into their local communities, to support overdose prevention education, and to support job placement, housing, and counseling for those with substance use disorders. Agencies and organizations serving populations with the highest rates of drug-related overdose shall be prioritized to receive the grants.

(d) All monies from the taxes and fees authorized hereunder shall provide additional dedicated funding for the purposes enumerated above and shall not replace existing dedicated funding.

(3) For all retail sales of marijuana, a record shall be kept by the seller of all amounts and types of marijuana involved in the sale and the total amount of money involved in the sale, including itemizations, taxes collected, and grand total sale amounts. All such records shall be kept on the premises in a readily available format and be made available for review by the department and the department of revenue upon request. Such records shall be retained for five years from the date of the sale.

(4) The tax levied pursuant to this subsection is separate from and in addition to any general state and local sales and use taxes that apply to retail sales, which shall continue to be collected and distributed as provided by general law.

(5) Except as authorized in this subsection, no additional taxes shall be imposed on the sale of marijuana.

(6) The fees and taxes provided for in this section shall be fully enforceable notwithstanding any other provision in this Constitution purportedly prohibiting or restricting the taxes and fees provided for herein.

7. Additional Protections.

(1) A marijuana testing facility shall not be subject to civil or criminal prosecution, denial of any right or privilege, civil or administrative penalty or sanction, or disciplinary action by any accreditation or licensing board or commission for providing laboratory testing services that relate to marijuana consistent with this section and otherwise meeting legal standards of professional conduct.

(2) An attorney shall not be subject to disciplinary action by the state bar association or other professional licensing body for owning, operating, investing in, being employed by, contracting with, or providing legal assistance to any person related to activity that is no longer subject to criminal penalties under state law pursuant to this section.

(3) Actions and conduct by marijuana facilities licensed or otherwise certified by the department, or their employees or agents, as permitted by this section and in compliance with department regulations and other standards of legal conduct, shall not be subject to criminal or civil liability or sanctions under Missouri law, except as provided for by this section.

(4) The department may not promulgate a rule that requires a consumer to provide a marijuana facility with identifying information other than identification to determine the consumer's age.

(5) It is the public policy of the state of Missouri that contracts related to marijuana that are entered into by marijuana facilities and those who allow property to be used by those entities should be enforceable. It is the public policy of the state of Missouri that no contract entered into by marijuana facilities, or by a person who allows property to be used for activities that are exempt from state criminal penalties by this section, shall be unenforceable on the basis that activities related to marijuana may be prohibited by federal law.

8. Legislation.

Nothing in this section shall limit the general assembly from enacting laws consistent with the purposes of this section.

9. Additional Provisions.

(1) No owner of a marijuana facility or entity with a transportation certification shall be an individual with a disqualifying felony offense. A "disqualifying felony offense" is a violation of, and conviction or guilty plea to, state or federal law that is, or would have been, a felony under Missouri law, regardless of the sentence imposed, unless the department determines that:

(a) The person's conviction was for a marijuana offense, other than provision of marijuana to a minor; or

(b) The person's conviction was for a non-violent crime for which he or she was not incarcerated and that is more than five years old; or

(c) More than five years have passed since the person was released from parole or probation, and he or she has not been convicted of any subsequent criminal offenses.

The department may consult with and rely on the records, advice, and recommendations of the attorney general and the department of public safety, or their successor entities, in carrying out the provisions of this subdivision.

(2) All marijuana facilities and certificates shall be held by entities that are majority owned, directly or indirectly, by natural persons who have been residents of the state of Missouri for at least one year prior to the application for such license or certification. Notwithstanding the foregoing, persons or entities outside the state of Missouri may own a minority stake, directly or indirectly, in such entities. By rule, the department may adjust the percentage of ownership required by residents of the state of Missouri. Owners licensed pursuant to this section shall submit fingerprints to the Missouri state highway patrol for the purpose of conducting a state and federal fingerprint-based criminal background check. The Missouri state highway patrol, if necessary, shall forward the fingerprints to the Federal Bureau of Investigation (FBI) for the purpose of conducting a fingerprint-based criminal background check. Fingerprints shall be submitted pursuant to § 43.543 R.S.Mo., or successor provisions, and fees shall be paid pursuant to § 43.530 R.S.Mo., or successor provisions.

(3) No marijuana facility shall manufacture, package, or label marijuana or marijuana-infused products in a false or misleading manner. No person shall sell any product in a manner designed to cause confusion between marijuana or a marijuana-infused product and any product not containing marijuana. A violation of this subdivision shall be punishable by an appropriate and proportional department sanction, up to and including loss of license.

(4) No marijuana facility may sell edible marijuana-infused candy in shapes or packages that are attractive to children or that are easily confused with commercially sold candy that does not contain marijuana.

(5) All marijuana and marijuana-infused products shall be sold in individual, child-resistant containers that are labeled with serving amounts, instructions for use, and estimated length of effectiveness. All marijuana and marijuana-infused products shall be sold in containers clearly and conspicuously labeled, as mandated by the department, as containing "Marijuana" or a "Marijuana-Infused Product." Violation of this subdivision shall subject the violator to department sanctions, including an administrative penalty.

(6) A marijuana facility may not allow cultivation, manufacturing, sale, or display of marijuana, marijuana-infused products, or marijuana accessories to be visible from a public place outside of the marijuana facility without the use of binoculars, aircraft, or other optical aids.

(7) A marijuana facility may not cultivate, manufacture, test, sell, or store marijuana at any location other than a physical address approved by the department and within an enclosed area that is secured in a manner that prevents access by persons not permitted by the marijuana facility to access the area.

(8) A marijuana facility shall secure every entrance to the facility so that access to areas containing marijuana is restricted to employees and other persons permitted by the marijuana facility to access the area and to agents of the department or state and local law enforcement officers and emergency personnel and shall secure its inventory and equipment during and after

operating hours to deter and prevent theft of marijuana, marijuana-infused products, and marijuana accessories.

(9) No marijuana facility may refuse representatives of the department the right to inspect the licensed premises or to audit the books and records of the marijuana facility. A facility that holds licenses issued under sections 1 and 2 of this article shall comply with inspection regulations and standards issued pursuant to both sections.

(10) No marijuana facility may allow a person under twenty-one years of age to volunteer or work for the marijuana facility, unless permitted by department regulation.

(11) No marijuana facility, or entity with a certification, shall assign, sell, give, lease, sublicense, or otherwise transfer its license or certificate to any other entity without the express consent of the department, not to be unreasonably withheld.

(12) To the fullest extent allowed by the Constitution of the United States, the Constitution of Missouri, and federal law, no unsolicited internet pop-up advertisements, banners on mass-market websites, unsolicited leaflets or handbills, or unsolicited direct mail advertisements for marijuana, marijuana-infused products, or marijuana accessories are permitted, and no off-site advertisement or marketing for marijuana, marijuana-infused products, or marijuana accessories may be placed on any billboard within the state or in any location exposed to view from a public place within one thousand feet of an elementary or secondary school, child daycare center, or church.

(13) Real and personal property used in the cultivation, manufacture, transport, testing, distribution, sale, and administration of marijuana for activities otherwise in compliance with this section shall not be subject to asset forfeiture solely because of that use.

(14) No person shall extract resins from marijuana using dangerous materials or combustible gases without a marijuana-infused products manufacturing facility license or a marijuana microbusiness license that allows for this activity. Violation of this prohibition shall subject the violator to department sanctions, including an administrative penalty and, if applicable, loss of certificate or license for up to one year.

10. Personal Use of Marijuana.

(1) Subject to the limitations in subsection 3 of this section, the following acts by a person at least twenty-one years of age are not unlawful and shall not be an offense under state law or the laws of any local government within the state or be a basis to impose a civil fine, penalty, or sanction, or be a basis to detain, search, or arrest, or otherwise deny any right or privilege, or to seize or forfeit assets under state law or the laws of any local government:

(a) Purchasing, possessing, using, ingesting, inhaling, processing, transporting, delivering without consideration, or distributing without consideration one ounce or less of marijuana, except that not more than the equivalent of one ounce of marijuana, as determined by the department, may be in a concentrated form;

(b) Possessing, planting, cultivating, harvesting, drying, processing, or manufacturing one-half the number of plants a qualifying patient is permitted to cultivate pursuant to section 1 of this article and department regulation, provided:

a. The plants and any marijuana produced by the plants in excess of one ounce are kept at one private residence, are in a locked space, and are not visible by normal, unaided vision from a public place; and
b. Not more than twice the number of allowable plants under paragraph (b) of this subdivision are kept in or on the grounds of a private residence at one time.

(c) Assisting another person who is at least twenty-one years of age in, or allowing property to be used for, any of the acts permitted by this section; and

(d) Purchasing, possessing, using, delivering, distributing, manufacturing, transferring, or selling to persons twenty-one years of age or older marijuana accessories.

(2) A person who, pursuant to this section, cultivates marijuana plants that are visible by normal, unaided vision from a public place is subject to a civil penalty not exceeding two hundred and fifty dollars and forfeiture of the marijuana.

(3) A person who, pursuant to this section, cultivates marijuana plants that are not kept in a locked space is subject to a civil penalty not exceeding two hundred and fifty dollars and forfeiture of the marijuana.

(4) A person who smokes marijuana in a public place, other than in an area licensed for such activity by the department, is subject to a civil penalty not exceeding one hundred dollars.

(5) A person who is under twenty-one years of age who possesses, uses, ingests, inhales, transports, delivers without consideration or distributes without consideration one ounce or less of marijuana, or possesses, delivers without consideration, or distributes without consideration marijuana accessories is subject to a civil penalty not to exceed one hundred dollars and forfeiture of the marijuana. Any such person shall be provided the option of attending up to four hours of drug education or counseling in lieu of the fine.

(6) Subject to the limitations of this section, a person who possesses not more than twice the amount of marijuana allowed pursuant to this subsection, produces not more than twice the amount of marijuana allowed pursuant to this subsection, delivers without receiving any consideration or remuneration to a person who is at least twenty-one years of age not more than twice the amount of marijuana allowed by this subsection, or possesses with intent to deliver not more than twice the amount of marijuana allowed by this subsection:

(a) For a first violation, is subject to an infraction punishable by a civil penalty not exceeding two hundred and fifty dollars and forfeiture of the marijuana;

(b) For a second violation, is subject to an infraction punishable by a civil penalty not exceeding five hundred dollars and forfeiture of the marijuana;

(c) For a third or subsequent violation, is subject to a misdemeanor punishable by a fine not exceeding one-thousand dollars and forfeiture of the marijuana; and

(d) For a person under twenty-one years of age, is subject to a civil penalty not to exceed two hundred and fifty dollars. Any such person shall be provided the option of attending up to eight hours of drug education or counseling in lieu of the fine.

(7) Any person currently serving a sentence for a conviction, whether by trial or open or negotiated plea, who would not have been guilty of an adult or juvenile offense, or who would have been guilty of a lesser adult or juvenile offense had sections 1 and 2 of this article been in effect at the time of the offense, may petition for a recall or dismissal of sentence before the trial court that entered the judgement of conviction in the person's case to request resentencing or dismissal consistent with sections 1 and 2 of this article with credit for time and supervision period already served and such petition shall be granted. This shall not apply to offenses related to the transportation, possession, or unlawful use of marijuana while operating a commercial motor vehicle.

(8) A person arrested, charged, or found guilty, whether by trial or open or negotiated plea, for any offense that is no longer a crime after the effective dates of sections 1 and 2 of this article may apply for expungement upon the effective date of this section and such expungement shall be granted and the records expunged from all government records absent good cause for denial. The effect of such order shall be to restore such person to the status the person occupied prior to such arrest, plea or conviction and as if such event had never taken place. No person for whom such order has been entered shall be held thereafter under any provision of any law to be guilty of perjury or otherwise giving a false statement by reason of the person's failure to recite or acknowledge such arrest, plea, trial, conviction, or expungement in response to any inquiry made of the person for any purpose whatsoever, and no such inquiry shall be made for information relating to an expungement. This shall not apply to offenses related to the transportation, possession, or unlawful use of marijuana while operating a commercial motor vehicle.

(9) A person shall not be denied adoption, custody, or visitation rights relative to a minor solely for conduct that is permitted by this section, unless the person's behavior is such that granting the rights is not in the best interests of the child, as determined by other applicable law and procedures.

(10) No person shall be denied access to or priority for an organ transplant for conduct that is permitted by this section.

11. Severability.

The provisions of this section are severable, and if any clause, sentence, paragraph or section of this measure, or an application thereof, is adjudged invalid by any court of competent jurisdiction, the other provisions shall continue to be in effect to the fullest extent possible.

12. Effective Date.

The provisions of this section shall become effective on December 3, 2020, as provided by this Constitution.

MISSOURI STATE AUDITOR'S OFFICE
FISCAL NOTE (20-127)

Subject

Initiative petition from Deirdre Hirner regarding a proposed constitutional amendment to Article XIV of the Constitution of Missouri. (Received October 29, 2019)

Date

November 18, 2019

Description

This proposal would amend Article XIV of the Constitution of Missouri.

The amendment is to be voted on in November 2020.

Public comments and other input

The State Auditor's office requested input from the **Attorney General's office,** the **Department of Agriculture,** the **Department of Economic Development,** the **Department of Elementary and Secondary Education,** the **Department of Higher Education and Workforce Development,** the **Department of Health and Senior Services,** the **Department of Commerce and Insurance,** the **Department of Mental Health,** the **Department of Natural Resources,** the **Department of Corrections,** the **Department of Labor and Industrial Relations,** the **Department of Revenue,** the **Department of Public Safety,** the **Department of Social Services,** the **Governor's office,** the **Missouri House of Representatives,** the **Department of Conservation,** the **Department of Transportation,** the **Office of Administration,** the **Office of State Courts Administrator,** the **Missouri Senate,** the **Secretary of State's office,** the **Office of the State Public Defender,** the **State Treasurer's office, Adair County, Boone County, Callaway County, Cass County, Clay County, Cole County, Greene County, Jackson County, Jasper County, St. Charles County, St. Louis County, Taney County,** the **City of Cape Girardeau,** the **City of Columbia,** the **City of Jefferson,** the **City of Joplin,** the **City of Kansas City,** the **City of Kirksville,** the **City of Mexico,** the **City of Raymore,** the **City of St. Joseph,** the **City of St. Louis,** the **City of Springfield,** the **City of Union,** the **City of Wentzville,** the **City of West Plains, Cape Girardeau 63 School District, Hannibal 60 School District, Malta Bend R-V School District, Mehlville School District, Wellsville-Middletown R-1 School District, State Technical College of Missouri, Metropolitan Community College, University of Missouri, St. Louis Community College, Missouri Veterans Commission, Missouri Office of Prosecution Services, Kansas City Board of Police Commissioners, The Metropolitan Police Department - City of St. Louis, University of Central Missouri, Harris-Stowe State University, Lincoln University, Missouri State University, Missouri Southern**

State University, Missouri Western State University, Northwest Missouri State University, Southeast Missouri State University, and **Truman State University.**

Mark R. Reading provided information to the State Auditor's office.

Assumptions

Officials from the **Attorney General's office** indicated they expect that, to the extent that the enactment of this proposal would result in increased litigation, they expect that their office could absorb the costs associated with that increased litigation using existing resources. However, if the enactment of this proposal were to result in substantial additional litigation, their office may be required to request additional appropriations.

Officials from the **Department of Agriculture** indicated no fiscal impact on their department.

Officials from the **Department of Economic Development** indicated no impact to their department.

Officials from the **Department of Elementary and Secondary Education** indicated a total estimated net effect on all state funds of $0 for fiscal year 2020, $0 for fiscal year 2021, and $0 for fiscal year 2022.

Officials from the **Department of Higher Education and Workforce Development** indicated they report no fiscal impact as a result of this initiative petition.

Officials from the **Department of Health and Senior Services** indicated increased operating costs to the Veterans Infrastructure and Health Fund of $1,605,331 in fiscal year 2021, $5,541,694 in fiscal year 2022, and $14,219,361 in fiscal year 2023. Of these costs, $77,049 are one-time costs in fiscal year 2021 for office furniture and equipment, $508,624 are one-time costs in fiscal year 2022 for office furniture, equipment, and application scoring costs, and $6,483,964 are one-time costs in fiscal year 2023 for office furniture, equipment, contracted attorney fees, and application scoring costs.

Space for thirty-nine additional staff will be required by fiscal year (FY) 2023: 39 full-time employees (FTE) x 230 sq. ft. x &18.00 = $161,460. These staff will be located in Jefferson City. An additional thirty FTE are assumed to be telecommuters.

This will create new small business opportunities and all the costs associated with a new business, along with the associated licensing fees.

At the time of submission Office of Administration - Information Technology Services Division (ITSD) had not provided a response.

The proposed legislation amends Section 1 of Article XIV and enacts one new section to be known as Section 2 of Article XIV regarding adult use marijuana legalization,

regulation, and taxation. The new law stipulates the minimum number of facilities to be licensed and the application and operation fees associated with each type of facility. It is assumed sales of marijuana will begin in FY 2023, increasing state revenue through the collection of a fifteen percent sales tax levied on the retail sale of adult use marijuana sold to consumers.

Office of General Counsel:

The proposed changes to this legislation will require the Department of Health and Senior Services to aid the program in building all the rules, pre-licensing, preparing required forms, and litigation on any legal challenges for denial of licenses through the Missouri court system. Based on our experience with medical marijuana facility license applications, we assume a similar number of facility license applications will be received for potentially even fewer available licenses. To defend the denial of an estimated 2,000 licenses, the department will temporarily contract with attorneys and support staff for a period of approximately 18 – 24 months. The total estimated amount of these contracts is $5,300,000. In addition, the department would require the following staff:

Three full-time attorneys (average annual salary of $75,000) would be needed to assist in reviewing records and defending the department in anticipated trials from denied licenses due to the limited number allowed to be issued. Two Attorneys would be needed for fiscal year 2021 with a third FTE Attorney added in fiscal year 2022, and maintaining the three Attorneys for the third year of fiscal year 2023.
Additional duties include:

- Reviewing requests for records (sunshine and/or subpoenas)
- Coordinating and advising with Medical Marijuana staff to determine whether the Department has records responsive to requests
- Review of individual records
- Determining appropriate response
- Responding to requestor
- Drafting/filing motions to quash subpoenas when necessary
- Possible referrals to AGO
- Representing the department in any court room activities resulting from this change in legislation

In addition, one support staff would be required to assist the three attorneys in the paperwork required for these court cases.

For the purposes of this fiscal note, they assumed temporary contracts would be necessary for attorneys, paralegals, and support staff to defend the denial of an estimated 2,000 licenses. The length of these contracts is estimated for a period of approximately 18 – 24 months, at an estimated total cost of $5,300,000, to cover any litigation associated with these denials. The three full-time attorneys and one support staff needed to handle the on-going costs of this proposed legislation would indeed be on-going with no estimate of any end date. Within the parameters of the assumptions used for this response, at this time,

there are no other anticipated temporary or other costs for this proposed legislation from the Office of General Counsel.

Division of Regulation and Licensure (DRL):

Section 1 of Article XIV includes minor changes that will cause some adjustment to the operations of the Section for Medical Marijuana (SMMR), but those changes have no fiscal impact. Section 2 of Article XIV requires creation of a new program for the regulation of adult use marijuana. This new program will share some employees and resources with the current SMMR. For purposes of this fiscal note, the new, combined program will be called the Section for Marijuana Regulation (SMR).

Section 2 of Article XIV requires implementation of adult use marijuana in several phases over the course of three years. Much of the regulatory structure mandated in Section 2 mirrors that in Section 1; thus, some efficiencies can be captured by merging this new program with the existing SMMR. However, the regulations and businesses to be licensed for the new program are different enough from the SMMR regulations and businesses that some functions, particularly on the compliance side, will need to be expanded significantly. Furthermore, assuming similar licensing functions for the new program (initial applications with applications for changes to businesses following licensure), the licensing needs of the new program will double those of the existing program as several waves of new licensing processes will occur at regular intervals, including for a new class of marijuana businesses. With each new wave, facility agent application processing will increase.

In addition to staffing needs, the new program will necessitate new or amended contracts for IT solutions and application scoring. All new adult use businesses will have application requirements different from medical marijuana businesses, which must be built within the existing IT solution for Missouri marijuana regulation or through a new IT solution. While the bulk of the initial wave of licensing for adult use will not require scoring applications, microbusiness applications will likely require scoring at each stage of licensing, and in the third year, it appears scoring will be necessary for all new facilities of any type.

The following are the estimates of costs associate with the staffing and contractual needs outlined above.

YEAR 1

Between December 2020 and December 2021, the SMR will begin program build out, draft and file rules, draft and issue Request for Proposals (RFPs) or contract amendments for IT solutions, and begin pre-licensing functions, including public outreach/response.

To cover program implementation, pre-licensing, and public outreach/response in the first year, the SMR will require additional staff. The following positions will be hired as of January 2021:

- One Planner IV with an annual salary of $55,000, job duties will include oversight of contracts, procurement, and website and supervisory responsibilities;

- One Planner II with an annual salary of $45,000, job duties will be consistent with that of the Planner IV to a lesser degree;
- Four Special Assistant Professionals with an annual salary of $45,000, job duties will be to function as facility licensing specialists and process applications and renewals;
- Five Health Program Representative IIs with an annual salary of $40,000 job duties will be Facility Agent ID's and handle public assistant calls; and
- Two Administrative Office Support Assistants with an annual salary of $38,000, to provide support for the above staff.

Due to the increase supervisory and oversight responsibilities, salaries to existing staff will be studied and adjustments will be made when deemed appropriate.

The current contract for IT solutions will need to be continued and expanded. The estimated cost for year one is $769,000.

YEAR 2

The SMR will continue program build-out and begin accepting facility applications in December 2021 and will have 150 days to approve or deny all applications. For 348 licenses, applications will be reviewed for minimum qualifications, but no scoring will be necessary. For 48 licenses (the microbusiness licenses), applications will be reviewed for minimum qualifications and scoring will be necessary. Facilities may begin operating sometime after May 2022. Facility agent applications and oversight will increase when the new facilities begin operating. The SMR will also draft and issue RFPs or contract amendments for application scoring in Year 2.

To cover program implementation and oversight, public outreach/response, facility agent applications and oversight, and compliance/enforcement functions for a new regulatory structure with up to 396 new facility licenses (not counting additional, new license types added as needed), the SMR will require additional staff. The following positions will be hired as of July 2021:

- Three Investigation Managers with an annual salary of $65,000, job duties to include supervision of additional investigative staff;
- Three Investigator IIIs with an annual salary of $60,000, job duties to be to inspect and investigate facilities throughout the state and provide oversight to Investigator II's;
- Seventeen Investigators II with an annual salary of $50,000, job duties to include inspecting and investigating facilities across the state;
- One Planner II with an annual salary of $45,000, job duties to include oversight on additional contracts and regulations;
- Five Health Program Representatives II with an annual salary of $40,000, job duties to provide public assistance and facilitate increase activity for facility agent ID applications. and
- Two Administrative Office Support Assistants with an annual salary of $38,000, to provide support for the above additional staff.

The Investigators are assumed to be telecommuters and are expected to travel extensively; it is assumed that the travel cost will be $10,118 annually for all investigative staff.

It is assumed application scoring will cost approximately $200,000 in Year 2. This estimate is based on the current SMMR contract, assuming a new contract will be necessary and assuming there will be four times the number of applications received as there are licenses available for microbusinesses (based on experience in 2019).

The current contract for IT solutions will need to be continued and expanded. The estimated cost for year two is $518,599.

Section 6 (iii) requires the Department to provide grants to existing agencies and not-for-profit organizations to increase access to evidence-based low barrier drug addiction treatment, and to support reintegrating those with substance abuse disorders, by supporting job placement, housing and counseling. The Division of Regulation and Licensure's Financial Services Unit (FSU) will require additional personnel to oversee the grant processes, as well as provide overall support to the additional SMR staff. The FSU will require one Planner III at an annual salary of $60,000, one Executive II with an annual salary of $40,000, and one Senior Office Support Assistant with an annual salary of $27,851. All FSU staff are assumed to start in July 2021.

YEAR 3

The SMR will continue program build-out and receive applications for an additional 48 microbusinesses in January 2023, which will likely require both minimum qualification review and scoring. Licensing of new business of all types will begin in November 2023, requiring minimum qualification review and scoring. Facility agent applications and oversight will increase when new facilities begin operating.

To cover public outreach/response, facility agent applications and oversight, and additional increases in compliance/enforcement functions for new facility licenses, the SMR will require additional staff. The following positions will be hired as of July 2022:

- Two Investigator IIIs with an annual salary of $60,000;
- Eight Investigators II with an annual salary of $50,000;
- Four Special Assistant Professionals with an annual salary of $45,000;
- Three Health Program Representative IIs with an annual salary of $40,000; and
- One Administrative Office Support Assistant with an annual salary of $38,000.

All job duties consistent with previous staff.

The Investigators are assumed to be telecommuters and are expected to travel extensively; it is assumed that the travel cost will be $10,118 annually for all investigative staff.

It is assumed application scoring will cost approximately $2,200,000 in Year 3. This estimate is based on the current SMMR contract, assuming a new contract will be necessary and assuming there will be four times the number of applications received as there are licenses available for microbusinesses, and assuming the scoring expense for new

marijuana business applications of all types will be similar to 2019 SMMR experience for expenses.

The IP implies a duty to reopen application periods when licenses become available. There is also the option to issue additional licenses indefinitely. And whenever there are more applicants than licenses available, DRL will have to have them scored. DRL would assumes that the ongoing costs would be approximately $1,110,000 for application scoring. We do not have any other one-time costs except for the office furniture/equipment.

The current contract for IT solutions will need to be continued and expanded. The estimated cost for year three is $518,599.

Officials from the **Department of Commerce and Insurance** indicated this petition, if passed, will have no cost or savings to their department.

Officials from the **Department of Mental Health** indicated this proposal creates no direct obligations or requirements to their department that would result in a fiscal impact.

Officials from the **Department of Natural Resources** indicated their department would not anticipate a direct fiscal impact from this proposal.

Officials from the **Department of Corrections** indicated a fiscal impact of costs savings of $0 in fiscal year 2021, $192,382 in fiscal year 2022, $1,235,405 in fiscal year 2025, and $1,364,701 by fiscal year 2028.

The estimate of the impact of this amendment is determined by a standard response of looking at persons committed for marijuana-only offenses. In 2018, thirty people were incarcerated and 383 given probationary terms of cannabis-only violations. The average sentence is 7.0 years with 0.9 served before first release; the average probationary term is three years.

Passage of Initiative Petition (IP) 2020-127 is estimated to result in 30 fewer persons incarcerated and 383 fewer persons entering probationary supervision per year in their department. The full impact of the bill occurs in fiscal year (FY) 2028 with 90 fewer persons incarcerated and 1269 fewer persons on field supervision. This results in a reduction of 10 (Probation and Parole) P&P officers by FY2026. Their department cost of incarceration in $17.224 per day or an annual cost of $6,287 per offender. Their department cost of probation or parole is determined by the number of P&P Officer II positions that would be needed to cover the new caseload.

Officials from the **Department of Labor and Industrial Relations** indicated they anticipate no fiscal impact for this initiative petition.

Officials from the **Department of Revenue** indicated:

Section 1.3 states that all public records produced or retained pursuant to this section are subject to the general provisions of Missouri's Sunshine Law. Thus, information obtained from an applicant or licensee are subject to closure.

Section 1.3 also states that qualifying patients under this section shall obtain an identification card which shall be valid for three years and may be renewed with a new physician's certification. The Department recognizes that the fee of twenty-five dollars per year per card remains the same, and does not anticipate a fiscal impact.

Section 1.3 also states that primary caregiver's identification cards shall be valid for three years. Furthermore, the fee for a primary caregiver's identification card has been increased from twenty-five dollars to seventy-five dollars. The Department recognizes that the fee, as it is written today, reads that it shall be twenty-five dollars per year. This initiative petition increases the fee to seventy-five dollars every three years. The total revenue gained, in totality, then, should not change, but the state could recognize changes in cash flow with the fee being paid by primary caregivers every three years instead of one. The Department defers to the Department of Health and Senior Services to estimate the impact to state cash flows.

Section 1.5 awards non-resident of Missouri patients the ability to purchase marijuana for medical purposes from a medical marijuana dispensary facility as permitted by this section. The Department recognizes that if out of state residents purchase medical marijuana in Missouri that the Missouri Veterans' Health and Care fund could increase as well as state and local sales and use taxes. The Department provides an unknown impact for this section, though, as the number of outside residents purchasing marijuana in Missouri cannot truly be estimated.

Section 2.1 states that recreational marijuana shall be legal for individuals aged twenty one and above.

Section 2.3 states that this section shall not require any employer to permit or accommodate conduct otherwise allowed by this section in or on any workplace or employer's property.

Section 2.4 states the Department of Health and Senior Services shall issue, at a minimum, the same number of marijuana cultivation facilities under Section 1 (medical marijuana), the same number of marijuana-infused products manufacturing facilities licenses as are issued for medical marijuana infused products manufacturing facilities, the same number of marijuana dispensary facility licenses as are issued to medical marijuana dispensary facilities, and a minimum number of marijuana microbusiness licenses are allowed for medical marijuana; stating that marijuana microbusiness licenses may be awarded to applicants of marijuana microbusinesses that is at least fifty percent owned by natural persons who qualified as economically disadvantaged owners or disabled veterans at the time they applied and received their licenses.

The Department recognizes that Section 1 (medical marijuana) allows for a minimum of 60 cultivation facility licenses, 86 marijuana-infused product facilities, and 192 dispensary licenses. The number of marijuana microbusiness licenses would be issued over a period of time, as any other licenses allowed fall short of the minimum required.

The Department estimates the following minimum impact for Section 2.4:

Chart 1

Facility Type	Application Fee/Renewal Fee		Annual Fee	Minimum Number of Licenses	Estimated Revenue (Minimum)		
	Valid for 3 years	Year 4 and Thereafter			Application Fee	Renewal Fee	Annual Fee
Marijuana Cultivation Facility	$12,000	$5,000	$25,000	60	$720,000	$300,000	$1,500,000
Dispensary	$7,000	$3,000	$10,000	192	$1,344,000	$576,000	$1,920,000
Marijuana Infused Product Facility	$7,000	$3,000	$10,000	86	$602,000	$258,000	$860,000
Marijuana Microbusiness	$1,500	$2,500	$2,500	96	$144,000	$240,000	$240,000

Section 2.5 states that a local government may prohibit the operation of all non-medical retail marijuana facilities regulated under this section from being located within its jurisdiction through voter approval of a ballot question submitted to such voters of such local government.

Section 2.6 of this initiative petition states that a tax equal to 15% of the retail price of non-medical marijuana sold to consumers shall be levied. Furthermore, the Department recognizes that Section 2.6 states that the tax levied is separate from and in addition to any general state and local sales and use tax(es) that apply to retail sales – which will be collected upon the retail sales to consumers.

The Department observed data published by Marijuana Business Daily that projects U.S. retail marijuana sales to 2023, including both medical marijuana retail sales and recreational marijuana retail sales, shown separately (please see Chart 2).

Chart 2

Year	Medical U.S. Cannabis Retail Sales		Recreational U.S. Cannabis Retail Sales		Total U.S. Cannabis Retail Sales	
	Low	High	Low	High	Low	High
2018	$3,300,000,000	$3,800,000,000	$5,300,000,000	$6,200,000,000	$8,600,000,000	$10,000,000,000
2019	$4,200,000,000	$5,200,000,000	$7,000,000,000	$8,500,000,000	$11,200,000,000	$13,700,000,000
2020	$5,500,000,000	$6,800,000,000	$10,200,000,000	$12,200,000,000	$15,700,000,000	$19,000,000,000
2021	$6,400,000,000	$7,800,000,000	$13,000,000,000	$15,700,000,000	$19,400,000,000	$23,500,000,000
2022	$6,700,000,000	$8,300,000,000	$15,700,000,000	$19,100,000,000	$22,400,000,000	$27,400,000,000
2023	$6,900,000,000	$8,400,000,000	$18,100,000,000	$22,000,000,000	$25,000,000,000	$30,400,000,000

https://mjbizdaily.com/exclusive-us-retail-marijuana-sales-on-pace-to-rise-35-in-2019-and-near-30-billion-by-2023/

Using the "Total U.S. Cannabis Retail Sales column(s) from Chart 2, the Department calculated, for both high and low estimates, the estimated increase in total U.S. marijuana retail sales for each year in order to calculate an the average increase recognized each year so that the Department could estimate retail sales through Year 2030. The Department recognized the following estimated increases in U.S. marijuana retail sales, as they were estimated by Marijuana Business Daily, between 2018 and 2023:

Chart 3

Year	Percent Difference/Increase (Using Total U.S. Marijuana Retail Sales – Chart 2)	
	Low	High
2019	30.23%	37%
2020	40.18%	39%
2021	23.57%	24%
2022	15.46%	17%
2023	11.61%	11%
Average Percent Difference/Increase	**24%**	**25%**

The Department used the average percent difference (increase) calculated from Chart 3 to estimate the total U.S. marijuana retail sales through Year 2030:

Chart 4

Year	Total Estimated U.S. Cannabis Retail Sales 2018-2030	
	Low	High
2018	$8,600,000,000	$10,000,000,000
2019	$11,200,000,000	$13,700,000,000
2020	$15,700,000,000	$19,000,000,000
2021	$19,400,000,000	$23,500,000,000
2022	$22,400,000,000	$27,400,000,000
2023	$25,000,000,000	$30,400,000,000
2024	$31,052,453,447	$38,116,431,496
2025	$38,570,194,602	$47,791,524,670
2026	$47,907,966,892	$59,922,446,584
2027	$59,506,396,466	$75,132,560,206
2028	$73,912,784,241	$94,203,456,716
2029	$91,806,931,670	$118,115,118,571
2030	$114,033,218,871	$148,096,277,158

The Department, then, using Chart 2, calculated the estimated percent of medical marijuana retail sales (medical marijuana retail sales / total U.S. marijuana retail sales) and the estimated percent of recreational marijuana retail sales (recreational marijuana retail sales / total U.S. marijuana retail sales), for both low and high estimates:

Chart 5

Year	Percent of Medical Low	Percent of Medical High	Percent of Recreational Low	Percent of Recreational High
2018	38%	38%	62%	62%
2019	38%	38%	63%	62%
2020	35%	36%	65%	64%
2021	33%	33%	67%	67%
2023	30%	30%	70%	70%
2023	28%	28%	72%	72%
Average Percent	**34%**	**34%**	**66%**	**66%**

The Department recognized that the estimated medical marijuana retail sales results to 34 percent of the total U.S. marijuana retail sales and recreational marijuana retail sales results in 66 percent of the total U.S. marijuana retail sales.

The Department applied the percentages estimated in Chart 5 to Chart 4 to determine the U.S. Cannabis Retail Sales, from 2018 to 2030, separated by medical marijuana retail sales and recreational marijuana retail sales:

Chart 6

Year	Total Estimated U.S. Cannabis Retail Sales		Medical Sales (Low)	Recreational Sales (Low)	Medical Sales (High)	Recreational Sales (High)
	Low	High	34%	66%	34%	66%
2018	$8,600,000,000	$10,000,000,000	$2,924,000,000	$5,676,000,000	$3,400,000,000	$6,600,000,000
2019	$11,200,000,000	$13,700,000,000	$3,808,000,000	$7,392,000,000	$4,658,000,000	$9,042,000,000
2020	$15,700,000,000	$19,000,000,000	$5,338,000,000	$10,362,000,000	$6,460,000,000	$12,540,000,000
2021	$19,400,000,000	$23,500,000,000	$6,596,000,000	$12,804,000,000	$7,990,000,000	$15,510,000,000
2022	$22,400,000,000	$27,400,000,000	$7,616,000,000	$14,784,000,000	$9,316,000,000	$18,084,000,000
2023	$25,000,000,000	$30,400,000,000	$8,500,000,000	$16,500,000,000	$10,336,000,000	$20,064,000,000
2024	$31,052,453,447	$38,116,431,496	$10,557,834,172	$20,494,619,275	$12,959,586,708	$25,156,844,787
2025	$38,570,194,602	$47,791,524,670	$13,113,866,165	$25,456,328,437	$16,249,118,388	$31,542,406,282
2026	$47,907,966,892	$59,922,446,584	$16,288,708,743	$31,619,258,149	$20,373,631,838	$39,548,814,745
2027	$59,506,396,466	$75,132,560,206	$20,232,174,798	$39,274,221,667	$25,545,070,470	$49,587,489,736
2028	$73,912,784,241	$94,203,456,716	$25,130,346,642	$48,782,437,599	$32,029,175,283	$62,174,281,432
2029	$91,806,931,670	$118,115,118,571	$31,214,356,768	$60,592,574,902	$40,159,140,314	$77,955,978,257
2030	$114,033,218,871	$148,096,277,158	$38,771,294,416	$75,261,924,455	$50,352,734,234	$97,743,542,924

The Department recognizes that medical marijuana will be accounted for pursuant to the passage of Amendment 2 of 2018 and that this initiative petition states that a "tax shall be levied upon the retail sale of *non-medical marijuana*…" Thus, the Department has removed the medical marijuana retail sales from the projections moving forward:

Chart 7

Year	Total Estimated U.S. Cannabis Retail Sales		Recreational Sales (Low)	Recreational Sales (High)
	Low	High	66%	66%
2018	$8,600,000,000	$10,000,000,000	$5,676,000,000	$6,600,000,000
2019	$11,200,000,000	$13,700,000,000	$7,392,000,000	$9,042,000,000
2020	$15,700,000,000	$19,000,000,000	$10,362,000,000	$12,540,000,000
2021	$19,400,000,000	$23,500,000,000	$12,804,000,000	$15,510,000,000

2023	$25,000,000,000	$30,400,000,000	$16,500,000,000	$20,064,000,000
2024	$31,052,453,447	$38,116,431,496	$20,494,619,275	$25,156,844,787
2025	$38,570,194,602	$47,791,524,670	$25,456,328,437	$31,542,406,282
2026	$47,907,966,892	$59,922,446,584	$31,619,258,149	$39,548,814,745
2027	$59,506,396,466	$75,132,560,206	$39,274,221,667	$49,587,489,736
2028	$73,912,784,241	$94,203,456,716	$48,782,437,599	$62,174,281,432
2029	$91,806,931,670	$118,115,118,571	$60,592,574,902	$77,955,978,257
2030	$114,033,218,871	$148,096,277,158	$75,261,924,455	$97,743,542,924

Based on a report published by the Substance Abuse and Mental Health Services Administration, in 2018, 34.8 percent of individuals surveyed, within the United States, aged 18-25 used marijuana in the past year and 13.3 percent of individuals surveyed, within the United States, aged 26 and older used marijuana in the past year.

The Henry Kaiser Family Foundation (KFF) states that there are approximately 240,903,600 individuals in the United States aged 19 and above. Separating the population by age, there are approximately 28,348,600 individuals within the United States between the ages of 19 and 25 and approximately 212,555,000 individuals within the United States aged 26 or above.

Using the data published by the Substance Abuse and Mental Health Services Administration in conjunction with the age demographics published by the KFF, approximately 9,865,313 (28,348,600 x 34.8%) individuals in the United States aged between 19 and 25 and 28,269,815 (212,555,000 x 13.3%) individuals in the United States aged 26 and older that have used marijuana in the past year.

A data search with Missouri Census Data Center states that there are approximately 566,385 individuals in Missouri aged 18 -24 and approximately 4,183,237 individuals in Missouri aged 25 and older, with a total of 4,749,622 individuals aged 18 or above.

Using the data published by the Substance Abuse and Mental Health Services Administration in conjunction with the Missouri Census Data Center statistics, 197,102 (566,385 x 34.8%) Missourians aged 18-24 and 556,370 (4,183,237 x 13.3%) Missourians aged 25 and above have used marijuana in the past year.

*The Department notes that, due to the difference in the age groups defined between the Substance Abuse and Mental Health Services Administration and the Missouri Census Data Center, that the revenue forecasts for Missouri is understated slightly, as individuals aged 25 in Missouri are included within the projections using the lower percent of 13.3% and not 34.8% - whereas individuals aged 25 were included within the 34.8% stated by the Substance Abuse and Mental Health Services Administration. Also, due to the differences in the age groups defined between the Henry Kaiser Family Foundation and the Missouri Census Data Center, the revenue forecasts for Missouri is slightly overstated slightly, as individuals aged 18 are not included in the Henry Kaiser Family Foundation data but is included and accounted for in the Missouri Census Data Center data. The Department assumes, due to these acknowledgements just mentioned, that a "wash" could occur – reporting more accurate data than not.

Comparing the United States individuals to Missouri individuals who have used marijuana in the past year, the Department estimates Missouri's marijuana market share of total U.S. marijuana retail sales to be approximately 1.98% (estimated Missouri total population aged 18 and above using marijuana in the past year / total U.S. population aged 18 and above using marijuana in the past year percent of the total marijuana market within the United States – (197,102 + 556,370) / (9,865,313 + 28,269,815)).

Therefore, the Department refers back to the total Estimated U.S. Cannabis Retail Sales 2018-2030 from Chart 7, to forecast Missouri's recreational marijuana market/retail sales:

Chart 8

Missouri's Recreational Marijuana Market (1.98%)	
Low	**High**
$112,384,800	$130,680,000
$146,361,600	$179,031,600
$205,167,600	$248,292,000
$253,519,200	$307,098,000
$292,723,200	$358,063,200
$326,700,000	$397,267,200
$405,793,462	$498,105,527
$504,035,303	$624,539,644
$626,061,311	$783,066,532
$777,629,589	$981,832,297
$965,892,264	$1,231,050,772
$1,199,732,983	$1,543,528,369
$1,490,186,104	$1,935,322,150

The Department recognizes that Section 2.4 states that the Department of Health and Senior Services shall begin accepting facility applications within 365 days of December 3, 2020 (effective date of Section 2) and must allow application approvals within one-hundred eighty days after application submissions. The Department believes that the sale of recreational marijuana would not begin until June 2022.

When applying the state sales tax, the 15 percent excise tax, and weighted average local tax rate to Missouri's recreational marijuana market, as shown in Chart 7, the Department estimates the following increases, including both low and high estimates, for the following tax years:

Chart 9

The Department further recognizes that sales would begin one month before the end of Fiscal Year 2022. Based on historical sales tax collection data, the Department adjusts calendar year collections putting 50 percent into the first fiscal year and fifty percent into the second fiscal year. Thus, the Department estimates the following increases, including both low and high estimates, for the following fiscal years:

Chart 11

FY 30	$52,182,757.79	$17,394,252.60	$2,174,281.57	$1,739,425.26	$73,490,717	$260,913,788.95	$68,359,412.71

Section 2.6 further states that all revenues gained under Section 2 shall be deposited into the Veterans, Infrastructure, and Health Fund. The Department believes that this would include all license fees, application fees, renewal fees, annual fees, and the 15 percent tax levied. The Department does not believe this would include the 4.225% state sales tax.

The Department notes that monies in the Veterans, infrastructure, and Health Fund shall be distributed in the following manner:

a. Amounts necessary to cover any Department of Health and Senior Services costs related to the administration of Section 2.
b. Amounts necessary for the creation of a reserve fund within the Department of Health and Senior Services to ensure there is enough working capital to administer Section 2.
c. 3/15th of the remaining balance to any local jurisdiction with recreational marijuana sales.
d. Any remaining balance will then be distributed
    a. 1/3rd to the Missouri Veterans' Commission
    b. 1/3rd to the State Road Fund
    c. 1/3rd to the Department of Health and Senior Services for grants to non-profits and other agencies in relation to drug addiction treatment.

The Department is unable to determine the amounts necessary for the Department of Health and Senior Services to administer Section 2 and the amounts necessary for the reserve fund. The Department will show the maximum amount of sales tax related revenues that could be distributed if all administration fees and reserve fund needs were met by the facility licensing fees.

FY 30	$208,093,436	Unknown	Unknown	$41,618,687	$55,491,583	$55,491,583	$55,491,583

As a result of the Department's inability to determine or estimate the administrative costs of the Department of Health and Senior Services and the amounts necessary for the reserve fund, the distribution(s) shown above are subject to change significantly.

Section 10 states that the adult use of recreational marijuana is not unlawful and further allows individuals who have been arrested, charged, or found guilty for any offense that would no longer be illegal after the effective date of Section 2 to apply for and be granted an expungement of their records specific to the aforementioned offenses. The Department defers to the Department of Corrections and the State Public Defender's Office to estimate the impact of Section 10.

Officials from the **Department of Public Safety - Office of Director** indicated they see no fiscal impact due to this initiative petition. They also provided the following comments from Missouri State Highway Patrol officials.

Department of Public Safety - Division of Missouri State Highway Patrol indicated:

If this Amendment would be approved, it would result in a fiscal impact to the Criminal Record Systems Fund.

The Missouri Department of Health and Senior Services estimates that between 18,000 and 36,000 new fingerprint based criminal record checks will be performed in relation to the 348 medical marijuana facilities under Section 1 of Article XIV. The Patrol estimates that between $396,000.00 and $792,000.00 may be deposited in the Criminal Record System Fund as a result of the background check requirements in Section 2. For purposes of this response, the Patrol assumes it will perform 36,000 checks. Using these same figures for

the marijuana facilities licensed as identified in Section 2 of Article XIV, the Patrol estimates the following fiscal impact.

The state fee for a fingerprint based criminal record check is $20.00 per request.
The federal fee for a fingerprint based criminal record check is $13.25 per request, of which, the CJIS Division retains $2.00 of the federal fee. This equates to $22.00 of the total state and federal fingerprint background check fee that is retained in the Criminal Record System Fund per request.

State and Federal Fingerprint Fee Schedule
State Fee = $20.00
Federal Fee = $13.25
Total State and Federal fee = $33.25
Vendor Fee (if applicable) = $8.50
Total State and Federal with Vendor fee = $41.75
Total Retained in the Criminal Record System Fund = $22.00

Meanwhile, the Patrol's Criminal Justice Information Services Division (CJIS) processes all requests for expungements for criminal history records, and the requests are processed by a CJIS Technician. This person reviews criminal history records, contacts agencies associated with the arrests or convictions, and collects all necessary data for court orders.

As of September 2019, there were 234,808 marijuana related arrest charges in the Central Repository. The expungement process takes approximately 90 minutes, so 1 FTE could handle 1,243 expungements per year.

- 1,864 hours (average work hours per year) x 60 minutes per hour = 111,840 minutes per year.
- 111,840 minutes per year / 90 minutes per expungement = 1,243 expungements per year per FTE

- 234,808 records / 1,243 per FTE per year = 189 FTE

Additionally, the Patrol Records Division (PRD) processes all petitions and court orders relating to expungement of marijuana related traffic arrests.

There are currently 113,922 traffic arrest records in the system. The expungement process takes approximately 30 minutes, so 1 FTE could handle 3,728 expungements per year.

- 111,840 minutes per year / 30 minutes per expungement = 3,728 expungements per year per FTE

- 113,922 records / 3,728 per FTE per year = 31 FTE

The Patrol would also need to replace all 10 of its canines. The Patrol's canines are currently trained using Cannabis/Marijuana as one of the drugs to which they alert. If this initiative

were to pass, each canine would have to be retired and replaced. The purchase and initial training for a canine is approximately $22,000. Since the Patrol contracts its canine training, the time to train all 10 canines could take up to 3 years.

As a result, the anticipated total initial cost to the Patrol will be approximately **$13,476,898**, as follows:

$12,730,318	Salary and fringe benefits for 189 CJIS Technicians and 31 PRD Technicians
$1,318,580	Expense and Equipment, including rental space, janitorial for the 220 FTE
$220,000	Cost of replacing and training 10 canines
($792,000)	Fee collected from fingerprinting/added to CRS Fund
$13,476,898	Total Cost

With the time involved in hiring and training FTE and processing expungements the Patrol anticipates this being a 2-year project, after which time the FTE would be terminated.

Missouri State Highway Patrol - Comments and Concerns

While the Initiative Petition has the appropriate wording, the FBI does not recognize an Amendment to Missouri's Constitution by means of an Initiative Petition as meeting Public Law 92-544 criteria to authorize a federal fingerprint based criminal record check. If a Constitutional Amendment were to pass by means of the Initiative Petition process, the Patrol recommends that the Department of Health and Senior Services seek specific legislation to ensure the state and federal fingerprint based criminal record check is properly authorized.

In 2009, Colorado traffic fatalities involving drivers testing positive for marijuana represented 9% of the total traffic fatalities. Recreational marijuana use was legalized in 2012. By 2016, that number more than doubled to 21%.

Marijuana-related traffic deaths increased 66% in the four-year average (2013-2016) since Colorado legalized recreational marijuana compared to the four-year average (2009-2012) prior to legalization.

Marijuana-related deaths when a driver tested positive for marijuana more than doubled from 55 deaths in 2013 to 125 deaths in 2016.

The yearly number of marijuana related hospitalizations increased 72% after the legalization of marijuana, (2009-2012) vs. (2013-2016).

Colorado youth past month marijuana use for 2014/2015 was 55% higher than the national average.

The average THC levels in marijuana has increased significantly over the years: 1969-0.8%, 1995-4%, 2013-13%; 2017-20+%; Oil, 1995-13%, 2013-52%; highest Plant 38%, highest oil 95%+.

In Missouri, medical marijuana was legalized by Amendment 2 and took effect December 2018. As of June 10, 2019, 12 states have legalized recreational marijuana and 29 states have legalized medical marijuana. In a roadside 2013-2014 NHTSA roadside survey, 20% of the nighttime and weekend drivers tested positive for drugs. Interestingly, the number of daytime drugged drivers was approximately the same amount as night and weekend drugged drivers. A roadside study in Colorado and Washington, the first two states to legalize marijuana for recreational use, showed the primary increase of marijuana users happened to their daytime drivers. The percent of drivers that tested positive for marijuana during the day went from 8%, before recreational marijuana sales, to 23%, 6-12 months after marijuana was legalized. There was a 48% increase in weekend nighttime drivers testing positive for THC or 11-OH-THC (an active metabolite of THC) from 2007 to 2014.

Montana legalized medical marijuana in 2004 and from 2007-2010, the presence of marijuana in DUI suspects increased over 100%. Also, the number of DUI suspects who tested positive for alcohol and marijuana increased by over 180%.

Medical marijuana has been legal in the state of Colorado since 2000. On November 12, 2012, the state of Colorado passed Amendment 64, which legalized private use of marijuana. Per the Colorado State Patrol's driving under the influence statistics, marijuana DUI citations increased 25.5% from 2014 to 2018 and marijuana and alcohol citations increased 112% in the same time range. As marijuana becomes legalized, its use increases.

The three years after Colorado legalized marijuana for recreational use (2013-2015), its use increased in youth ages 12-17, by 12%, in young adults aged 18-25 by 16%, and adults 26 in older by 71%. By removing the recommended acceptable ages of use, zoning regulations, packaging, and advertising of cannabis/marijuana, the risk of use and abuse of marijuana by the youth of Missouri is substantially increased. This category of Missourians, who recent studies have shown significant long-term cognitive impairment when marijuana is ingested during the developmental years, would be affected.

2(7) The Patrol recommends replacing the word "specifically" with "which has, is or can be used in. . ." There are many items, products, and chemicals that can be used with marijuana, but are not developed specifically for marijuana. (page 14)

3(1)(d) The Patrol recommends replacing the word "intoxicated" with "impaired. (page 15)

3(3) The Patrol recommends replacing the word "intoxicated" with "impaired". (page 15)

4(24) The Patrol recommends addressing the need to prohibit the importation of marijuana from outside Missouri. (page 22)

9(1)(b) There is no definition for what qualifies as a non-violent crime. This information would be critical for the Department of Health and Senior Services in determining a disqualifying felony offense. In addition, there are no provisions for conducting criminal background checks under section nine. (page 25)

9(5) This section specifies the type of container the marijuana is required to be sold in, however, there are no provisions or requirements about the marijuana remaining in the same packaging one the sale to an individual has been made. The Patrol recommends language requiring marijuana to remain in its original packaging. For individuals who produce for themselves it is recommending having guidelines on the type of container or packaging if carried in public. (page 25)

The Patrol recommends a $75 fee, similar to the criminal history background check fee, be implemented for the cost of researching and reviewing criminal histories, as well as contacting various agencies associated with arrests (in researching other states with similar expungement requirements, they all charge a fee to offset the cost of the time required to process the expungements - their fees ranged from $50 to $450 per petition per arrest date).

This initiative provides specific employment protections for those who use Cannabis/Marijuana. Such use while serving in any law enforcement related position not only creates public safety concerns, but also quality control and security issues when working with highly sensitive material or information. Additionally, the Patrol receives federal grant funding, subject to audits, that require a drug free workplace policy. For these reasons, the Patrol feels it is essential that it be allowed to continue administering drug testing for new employees, as well as random tests, critical incident tests, etc.

Additionally, the initiative does not contain any language concerning the amount of marijuana an individual may transport, purchase or sell. Also, there is no language as to where the marijuana may be transported. A lack of guidance may allow for Missouri marijuana facilities to distribute marijuana outside of the state, or allow other states to distribute their marijuana in Missouri. A lack of such language could lead to Missouri being a distribution starting point for states where marijuana remains illegal.

Finally, if passed, the initiative petition will remove Cannabis/Marijuana from Missouri Revised Statutes and creating conflict with both several Federal and State laws, such as the use or possession of a firearm. As the Patrol has officers assigned to federal task forces that may be involved in a federal drug operation, there are concerns over potential civil litigation resulting from these types of operations, as marijuana is still classified as a Schedule I controlled substance, and illegal under federal law.

Officials from the **Department of Social Services** indicated they do not anticipate a fiscal impact from this initiative petition.

Officials from the **Governor's office** indicated there should be no added costs or savings to their office.

Officials from the **House of Representatives** indicated no fiscal impact to their office.

Officials from the **Department of Conservation** indicated that no adverse fiscal impact to their department would be expected as a result of this proposal.

Officials from the **Department of Transportation** indicated:

Prior versions of an initiative petition submitted by Deirdre Hirner contained issues pertaining to potential variances between Missouri and federal law. This issues could have impacted Missouri's eligibility for full Motor Carrier Safety Assistance Program funds if the petition were to enshrined in the Missouri Constitution as formerly written.

Those issues are **partially resolved** with the Petition on Adult Use of Marijuana with the designation 2020-127.

In order to receive the funding, Missouri must enforce Federal Motor Carrier Safety Regulations (FMCSRs) in whole. Language with respect to the expungement of marijuana convictions within the initiative petition would prevent enforcement of 49 CFR § Parts 391 and 392. These federal regulations relate to the transportation of and use of controlled substances by commercial motor vehicle drivers.

The new language, found in the petition in the section entitled *Personal Use of Marijuana* on page 28, 10-(7), states that expungement "shall **not** apply to offenses related to the transportation, possession or unlawful use of marijuana while operating a commercial motor vehicle (CMV)." This additional language preserves the ability of Missouri law enforcement agencies to continue full enforcement of FMCSRs pertaining to the use of disqualified drivers.

However, the definition of commercial motor vehicle found on Page 16 indicates the potential amendment would apply to interstate commerce only. Prior convictions occurring in a CMV by a driver in the furtherance of intrastate commerce would still be eligible for expungement, which creates a variance.

Penalty
Per 49 CFR § 350.215 – The penalty imposed upon States found to be in noncompliance can be as harsh as withholding all MCSAP funding; or
Withholding up to 5 percent of MCSAP funds during the fiscal year that the FMCSA notifies the State of its noncompliance;
Up to 10 percent of MCSAP funds for the first full fiscal year of noncompliance;
Up to 25 percent of MCSAP funds for the second full fiscal year of noncompliance; and
Not more than 50 percent of MCSAP funds for the third and any subsequent full fiscal year.

MCSAP funding, Using Missouri's MCSAP apportionment for Fiscal Year 2018 as a base, a **full withholding places $6,934,545** at risk. This is the steepest penalty possible.
If the less stringent withholding took effect, the results would be as follows:

- **5 percent - $346,727 – during the fiscal year that FMCSA notifies the State of noncompliance**;
- **10 percent** - $693,454 – during the first full fiscal year of non-compliance;
- **25 percent** - $1,733,636 – during the second full fiscal year of non-compliance; and
- **Not more than 50 percent** – or $3,467, 272 for the third and any subsequent full fiscal year of non-compliance.

Officials from the **Office of Administration** indicated this proposal amends Article XIV, Section 1 of the Missouri Constitution that was voter approved in November 2018 and adds additional language in Section 2 for recreational marijuana.

Section 1.3 states that all public records produced or retained under Section 1 shall become subject to the Missouri Sunshine Law on December 2, 2020. Section 1.3 changes qualified patient identification cards from an annual renewal to every three years. The patient card fees remain $25 per year. Budget and Planning (B&P) notes that it is not clear if patients will pay $75 ($25 x 3 years) upon application and renewal or $25 each year the card is active. Section 1.3 also changes primary caregiver identification cards from an annual renewal to every three years; the card fee is also increased from $25 to $75. B&P defers to the Department of Health and Senior Services (DHSS) for the estimated impact from these provisions.

Section 1.5 would allow out-of-state medical patients to purchase medical marijuana within Missouri. B&P notes that this could increase funding to the Missouri Veterans' Health and Care Fund as well as state and local sales tax collections by an unknown amount if out-of-state patients subsequently purchase medical marijuana within Missouri.

Section 2.1 would legalize the use of recreational marijuana for individuals over the age of 21.

Section 2.4 states that the number of recreational marijuana facility licenses (cultivation, marijuana-infused products, and dispensaries) must equal the number of licenses granted under medical marijuana (Section 1). B&P notes that per Section 1, the minimum number of cultivation facility licenses is 60, dispensary licenses is 192, and marijuana-infused product facility licenses is 86. In addition, Section 2.4 creates a minimum number of microbusiness facility licenses granted over a period of time. Section 2.4 further details the amount of application and annual fees required. Table 1 lists the fees per facility type and the associated estimated minimum revenue. B&P defers to DHSS for a more detailed analysis of the estimated impacts from these provisions.

Table 1: Facility Fees

Facility Type	Application/ Renewal Fees		Annual Fee	# Min Licenses Allowed	Estimated Minimum Revenue		
	Years 1-3	Years 4+			Application Fee	Renewal Fee (Every 3 years)	Annual Fee
Cultivation Facility	$12,000	$5,000	$25,000	60	$720,000	$300,000	$1,500,000
Dispensary	$7,000	$3,000	$10,000	192	$1,344,000	$576,000	$1,920,000
Marijuana-Infused Product Facility	$7,000	$3,000	$10,000	86	$602,000	$258,000	$860,000
Microbusinesses *Note: Up to an additional 48 microbusiness licenses may be issued if DHSS determines there is a market.*	$1,500	$2,500	$2,500	96	$144,000	$240,000	$240,000

Section 2.5 allows local jurisdictions to prohibit the operation of non-medical marijuana facilities upon voter approval at a general election.

Section 2.6 establishes an excise tax rate of 15% upon the retail price of non-medical marijuana. Section 2.6 notes this is in addition to state and local sales taxes that apply to retail sales. B&P notes that the language refers to "general state and local sales and use taxes". For the purpose of this fiscal note, B&P assumes that general means all state and local sales taxes levied and not just those levies that are directed to the state (or local) general revenue fund.

Based on research, B&P was able to find forecasts for the U.S. legal market for cannabis[1]. According to such forecasts, the U.S. market for legal marijuana will be approximately $24.5 billion in calendar year 2021 and grow up to $47.3 billion by calendar year 2027. Based on information from the Substance Abuse and Mental Health Services Administration[2], from 2016-2017 approximately 13.95% of Missouri residents and 14.73% of all U.S. residents surveyed have used marijuana within the last year. Using the populations of Missouri residents age 18 and over compared to the U.S. population age 18 and over, B&P estimates that the market for legal marijuana in Missouri is 1.79% of the total U.S. market. Therefore, B&P estimates that the Missouri market for legal marijuana would be approximately $439.5 million in calendar year 2021 ($24.5 billion x 1.79%) and up to $848.4 million by calendar year 2027 ($47.3 billion x 1.79%).

Based on further research[3], B&P estimates that there could be between 61,700 to 122,500 medical marijuana users in Missouri. Using these estimates, and the estimates shown above, B&P estimates that the Missouri market for medical marijuana would be between 0.17% and 0.34% of the total U.S. Market for legal marijuana. Therefore, B&P estimates

[1] https://cannabusinessplans.com/cannabis-legal-market-size-projections/
[2] https://www.samhsa.gov/data/report/comparison-2015-2016-and-2016-2017-nsduh-population-percentages-50-states-and-district
[3] https://www.stltoday.com/news/local/metro/plenty-of-pot-study-says-missouri-will-license-twice-as/article_e94469b0-e1c6-5893-bc2e-e1d7b24f4a73.html

that the total Missouri market for recreational marijuana would be 1.46% to 1.62% of the total U.S. market. Table 1 shows the estimated U.S. and Missouri markets for marijuana.

Table 2: Estimated Marijuana Market Size for the U.S. and Missouri

Calendar Year	Estimated U.S. Market Size	Estimated MO Market Size	Estimated MO Medical Market Size	Estimated MO Recreational Market Size
2021	$24,500,000,000	$439,465,251	$41,480,436	$ 397,984,815
2022	$28,300,000,000	$507,627,209	$61,066,553	$ 446,560,656
2023	$32,100,000,000	$575,789,166	$80,652,669	$ 495,136,497
2024	$35,900,000,000	$643,951,123	$100,238,785	$ 543,712,338
2025	$39,700,000,000	$712,113,081	$119,824,901	$ 592,288,179
2026	$43,500,000,000	$780,275,038	$139,411,018	$ 640,864,020
2027	$47,300,000,000	$848,436,996	$158,997,134	$ 689,439,861

B&P notes that Section 2.4 states that DHSS must begin accepting facility applications within 365 of December 3, 2020 (the effective date of Section 2) and must grant application approvals within one-hundred and eighty days of their submission. Therefore, B&P estimates that sales of recreational marijuana will not begin until June 2022.

Applying the excise tax rate of 15% plus the state sales tax rate of 4.225% and excluding the estimated market for medical marijuana, B&P estimates that this proposal may increase state revenues by $50.0 million in calendar year 2022. By calendar year 2027, B&P estimates that this proposal may increase state revenues by $132.5 million. This proposal could also increase local revenues by $10.2 million in calendar year 2021 and $27.1 million by calendar year 2027; these estimates assume that no local jurisdictions opt-out of recreational marijuana. Table 3 shows the estimated revenues generated by calendar year.

Table 3: Estimated Calendar Year Revenues

Fund	CY 2022*	CY 2023	CY 2024	CY 2025	CY 2026	CY 2027
GR (3.0% tax)	$7,814,811	$14,854,095	$16,311,370	$17,768,645	$19,225,921	$20,683,196
Education (1.0% tax)	$2,604,937	$4,951,365	$5,437,123	$5,922,882	$6,408,640	$6,894,399
Conservation (0.125% tax)	$325,617	$618,921	$679,640	$740,360	$801,080	$861,800
Parks, soil, water (0.1% tax)	$260,494	$495,136	$543,712	$592,288	$640,864	$689,440
Veterans, Infrastructure, and Health Fund (15.0% tax)	$39,074,057	$74,270,475	$81,556,851	$88,843,227	$96,129,603	$103,415,979
TSR (total 4.225% state sales tax)	**$50,079,057**	**$95,189,992**	**$104,528,697**	**$113,867,402**	**$123,206,108**	**$132,544,813**
Local Revenue (pop. weighted local rate 3.93%)	$10,237,403	$19,458,864	$21,367,895	$23,276,925	$25,185,956	$27,094,987

*Assumes 7 months of sales from June 2022 through December 2022.

However, B&P notes that sales would start one month before the end of FY 2022. Based on historical sales tax collection data, B&P adjusts calendar year collections 50% into the first fiscal year and 50% into the second fiscal year. Therefore, B&P estimates that this proposal will increase state revenues by $7.2million in FY 2022. By FY 2028, this proposal may increase state revenues by $132.5 million. This proposal may also increase local revenues by $1.5 million in FY 2022 and up to $27.1 million by FY 2028, assuming no local jurisdictions opt out of recreational marijuana. Table 4 shows the estimated revenue generated by fiscal year.

Table 4: Estimated Fiscal Year Revenues

Fund	FY 2022	FY 2023	FY 2024	FY 2025	FY 2026	FY 2027	FY 2028
GR	$1,116,402	$14,125,457	$15,582,733	$17,040,008	$18,497,283	$19,954,558	$20,683,196
Education	$372,134	$4,708,486	$5,194,244	$5,680,003	$6,165,761	$6,651,519	$6,894,399
Conservation	$46,517	$588,561	$649,281	$710,000	$770,720	$831,440	$861,800
Parks, soil, water	$37,213	$470,849	$519,424	$568,000	$616,576	$665,152	$689,440
Veterans, Infrastructure, and Health Fund	$5,582,008	$70,627,287	$77,913,663	$85,200,039	$92,486,415	$99,772,791	$103,415,979
TSR	**$7,154,274**	**$90,520,639**	**$99,859,344**	**$109,198,050**	**$118,536,755**	**$127,875,461**	**$132,544,813**
Local Revenue	$1,462,486	$18,504,349	$20,413,380	$22,322,410	$24,231,441	$26,140,471	$27,094,987

Section 2.6 further states that the taxes and fees levied under Section 2 shall be deposited into the newly created Veterans, Infrastructure, and Health Fund. B&P notes that this would include all license application and renewal fees, annual facility fees, and the 15% excise tax. This would not include the 4.225% state sales tax.

Monies in the Veterans, Infrastructure, and Health Fund are to be distributed in the following manner:

1. Amounts necessary to cover any DHSS costs related to Section 2 administration.
2. Amounts necessary for the creation of a reserve fund within DHSS to ensure there is enough working cash balance to administer Section 2.
3. $3/15^{th}$ of the remaining balance to any local jurisdiction with recreational marijuana sales.
4. Any remaining balance will then be distributed:
    a. 1/3 to the Missouri Veterans Commission
    b. 1/3 to the State Road Fund
    c. 1/3 to DHSS for grants to non-profits and other agencies in relation to drug addiction treatment.

B&P is unable to estimate the amount of revenues that would be required to meet DHSS administrative costs and reserve fund needs. Therefore, for the purpose of this fiscal note, B&P will show the maximum amount of sales tax related revenues that could be distributed if all administration fees and reserve fund needs were met by the facility licensing fees.

Table 5: Maximum Distribution Amounts Based on 15% Excise Tax Collections

	FY 2022	FY 2023	FY 2024	FY 2025	FY 2026	FY 2027	FY 2028
Veterans, Infrastructure, and Health Fund	$5,582,008	$70,627,287	$77,913,663	$85,200,039	$92,486,415	$99,772,791	$103,415,979
Estimated Maximum Distributions							
DHSS Administrative Costs*	Unknown	Unknown	Unknown	Unknown	Unknown	Unknown	Unknown
DHSS Reserve Fund*	Unknown	Unknown	Unknown	Unknown	Unknown	Unknown	Unknown
Local Jurisdictions**	$1,116,402	$14,125,457	$15,582,733	$17,040,008	$18,497,283	$19,954,558	$20,683,196
Missouri Veterans Commission	$1,488,536	$18,833,943	$20,776,977	$22,720,010	$24,663,044	$26,606,078	$27,577,594
State Road Fund	$1,488,536	$18,833,943	$20,776,977	$22,720,010	$24,663,044	$26,606,078	$27,577,594
DHSS Drug Treatment Grants	$1,488,536	$18,833,943	$20,776,977	$22,720,010	$24,663,044	$26,606,078	$27,577,594

*For the purpose of this fiscal note, B&P will assume that DHSS costs are fully met through the licensing fee collections. Actual distributions may be significantly different.

**Assumes no local jurisdictions opt-out.

B&P notes that depending on administrative and reserve fund needs, actual distributions may be significantly different from the estimates shown above.

Section 2.10 specifies that adult use of recreational marijuana is not unlawful and allows for individuals who have been arrested, charged, or found guilty for any offense that would no longer be illegal after the effective date of Section 2 to apply for and be granted expungement of their records pertaining to such offenses. B&P defers to the Department of Corrections and the State Public Defender's Office for the estimated impact from these provisions.

Officials from the **Office of State Courts Administrator** indicated the initiative petition proposes a constitutional amendment to Article XIV to modify the current provisions of the Missouri Constitution relating to legalization of marijuana.

The average of all marijuana related charge codes from 2012 to 2016 for Circuit case types is 11,537 per year. The average of all marijuana related charge codes from 2012 to 2016 for Associate case types is 8,765. We are unable to determine what number of these charges were for someone over the age of twenty-one.

The following Criminal Court Costs would be affected by this proposed legislation:

Criminal Court Costs		
Felony Case Costs	**Amount of Cost**	**Disburse to State/County**
Basic Civil Legal Services Fund surcharge	$10.00	State of Missouri - Basic Civil Legal Services Fund
Clerk Fee	$45.00	State of Missouri - General Revenue $36, County $9
County Fee	$75.00	County
Court Automation Fund Fee	$7.00	State of Missouri -Statewide Court Automation Fund
Court Reporter fee (All Circuit Division Cases)	$15.00	State of Missouri - General Revenue
Crime Victims' Compensation Fund surcharge	$7.50	State of Missouri - Crime Victims' Compensation Fund
DNA Profiling Analysis Fund surcharge	$30.00	State of Missouri - DNA Profiling Analysis Fund
Brain Injury Fund surcharge	$2.00	State of Missouri - Head Injury Fund
Independent Living Center Fund surcharge	$1.00	State of Missouri - Independent Living Center Fund
Motorcycle Safety Trust Fund surcharge	$1.00	State of Missouri - Motorcycle Safety Trust Fund
Peace Officer Standards & Training (POST) Commission surcharge	$1.00	State of Missouri - Peace Officer Standards & Training Fund
Prosecuting Attorney and Circuit Attorneys' Retirement Fund	$4.00	Pros. Attorney Retirement Fund
Prosecuting Attorney Training Fund surcharge	$1.00	State of Missouri - Prosecuting Attorney Training Fund
Sheriffs' Fee	$75.00	County
Sheriffs' Retirement Fund surcharge (except 21st Circuit)	$3.00	Sheriffs' Retirement Fund
Spinal Cord Injury Fund surcharge	$2.00	State of Missouri - Spinal Cord Injury Fund
Total	**$279.50**	
Misdemeanor Case Costs		

Basic Civil Legal Services Fund surcharge	$8.00	State of Missouri - Basic Civil Legal Services Fund
Clerk Fee	$15.00	$12 State of Missouri / $3 County
County Fee	$25.00	County
Court Automation Fund Fee	$7.00	State of Missouri - Court Automation Fund
Crime Victims' Compensation Fund surcharge	$7.50	State of Missouri - Crime Victims' Compensation Fund
DNA Profiling Analysis Fund surcharge	$15.00	State of Missouri - DNA Profiling Analysis Fund
Brain Injury Fund surcharge	$2.00	State of Missouri - Brain Injury Fund
Independent Living Center Fund surcharge	$1.00	State of Missouri - Independent Living Center Fund
Motorcycle Safety Trust Fund surcharge	$1.00	State of Missouri - Motorcycle Safety Trust Fund
Peace Officer Standards and Training (POST) Commission surcharge	$1.00	State of Missouri - Peace Officer Standards & Training Fund
Prosecuting Attorney and Circuit Attorneys' Retirement Fund	$4.00	Pros. Attorney Retirement Fund
Prosecuting Attorney Training Fund surcharge	$1.00	$0.50 State of Missouri / $0.50 County
Sheriffs' fee	$10.00	County
Sheriffs' Retirement Fund surcharge (except 21st Circuit)	$3.00	Sheriffs' Retirement fund
Spinal Cord Injury Fund Surcharge	$2.00	State of Missouri - Spinal Cord Injury Fund
Total	**$102.50**	
Municipal Case (Filed in Associate Division) Costs		
Clerk Fee	$15.00	$12 State of Missouri / $3 County
Court Automation Fund Fee	$7.00	State of Missouri - Court Automation Fund
Crime Victims' Compensation Fund surcharge	$7.50	State of Missouri - Crime Victims' Compensation Fund
Peace Officer Standards and Training (POST) Commission surcharge	$1.00	State of Missouri - Peace Officer Standards & Training Fund

Sheriffs' Retirement Fund surcharge	$3.00	Sheriffs' Retirement Fund
Total	**$33.50**	
Criminal Costs Not Included Above		
Drug Testing by a State Lab	$150.00	State of Missouri
Drug Testing by a Private Lab	Actual Costs	County Reimbursement
Law Enforcement Arrest Costs:		
Highway Patrol		Amt. Approved by the Court
Local (County)		Amt. Approved by the Court
Municipal		Amt. Approved by the Court

The decrease in the court fees, depending on the number of cases, will result in an unknown loss to the courts.

We also assume there will be an unknown decrease in caseload for the courts because the courts will no longer process these cases; however, at this time we are unable to calculate the decrease.

Any significant increase or decrease will be reflected in future budget requests.

Officials from the **Missouri Senate** indicated they anticipate no fiscal impact.

Officials from the **Secretary of State's office** indicated unless a special election is called for the purpose, Referendums are submitted to the people at the next general election. Article III section 52(b) of the Missouri Constitution authorizes the general assembly to order a special election for measures referred to the people. If a special election is called to submit a Referendum to a vote of the people, Section 115.063.2 RSMo. requires the state to pay the costs. The cost of the special election has been estimated to be $7.8 million based on the cost of the 2016 Presidential Preference Primary.

Their office is required to pay for publishing in local newspapers the full text of each statewide ballot measure as directed by Article XII, Section 2(b) of the Missouri Constitution and Section 116.230-116.290, RSMo. Funding for this item is adjusted each year depending upon the election cycle. A new decision item is requested in odd numbered fiscal years and the amount requested is dependent upon the estimated number of ballot measures that will be approved by the General Assembly and the initiative petitions certified for the ballot. In FY (fiscal year) 2014, the General Assembly changed the appropriation so that it was no longer an estimated appropriation.

In FY19, over $5.8 million was spent to publish the full text of the measures for the August and November elections. They estimate $65,000 per page for the costs of publications based on the actual cost incurred for the one referendum that was on the August 2018 ballot.

Their office will continue to assume, for the purposes of this fiscal note, that it should have the full appropriation authority it needs to meet the publishing requirements. Because these requirements are mandatory, they reserve the right to request funding to meet the cost of their publishing requirements if the Governor and the General Assembly again change the amount or continue to not designate it as an estimated appropriation.

Officials from the **Office of the State Public Defender** indicated if passed, this constitutional amendment would have a positive impact on the workload of the Missouri State Public Defender (MSPD), since possession, manufacture, distribution, etc. of cannabis would no longer be unlawful, offenses that the Public Defender currently uses resources to defend and no longer would need to.

The exact positive impact is difficult to predict because they track their cases by statutory offense and most drug offenses are not limited to marijuana.

However, their best estimate, using FY2019 MSPD data, is that this would reduce their caseload by 4,219 cases (3,102 C/D felonies, 144, misdemeanors, and 974 probation violations).

In *The Missouri Project: A Study of the Missouri Public Defender System and Attorney Workload Standards*, prepared by RubinBrown on behalf of the American Bar Association's Standing Committee on Legal Aid and Indigent Defendants, the relevant workload standards are: A/B felonies, 47.6 hours per case; C/D felonies, 25.0 hours per case; misdemeanors, 11.7 hours per case; and probation violations, 9.8 hours per case). (The workload standards include only case related tasks over which an attorney has some control (they exclude, for example, in court and travel time) and thereby reflect a conservative estimate.)

Applying those workload standards to the 4,219 cases, those cases require 88,765 attorney hours. With 2,080 hours per attorney available each year, that represents the work of 43 attorneys.

While in theory they might also handle fewer appeals of guilty verdicts after trial, the fact is that only a very small percentage of their cases proceed to trial and it's likely that only a small percentage of those cases are appeals from marijuana convictions. Therefore this minimal positive impact is not being taken into account in this estimate.

However, the Missouri State Public Defender already is significantly understaffed by 321 attorneys under the workload standards developed in *The Missouri Project*.

Therefore, despite the positive impact on the workload of the Missouri State Public Defender, because they are already understaffed that savings in attorney time would not

allow the Public Defender to reduce its workforce and therefore would not translate into an actual cost savings. However it does reduce by the cost of 43 attorneys how much money needs to be added to their budget in order to meet *The Missouri Project*'s workload standards.

Officials from the **State Treasurer's office** indicated no fiscal impact to their office.

Officials from **Greene County** indicated there is anticipated costs to the County of Greene for this initiative petition, per the following information concerning this initiative petition.: https://static1.squarespace.com/static/5541a76ae4b0175cee8827d0/t/580684e5ff7c50adea98399e/1476822252561/Letter+to+CA+from+Denver+DA.jpgI provided by their County Prosecutor, Dan Patterson.

To fully understand the fiscal impact would require a very detailed study to give the best opportunity to understand the impact to law enforcement, prosecutors and the circuit courts within the proposed changes of this initiative petition, which the linked letter demonstrates occurred in Colorado after similar legislation passed.

County Prosecutor, Dan Patterson provided the following information:

DenverDA
Mitchell R. Morrissey, District Attorney - Second Judicial District

Fax: 720-913-903

October 12, 2016

No on 64 Campaign and SAM Action

California voters are being told that they will see the crime rate go down if they vote to legalize marijuana commercially; this has not been the case in the state of Colorado or the city of Denver. Since the legalization of recreational marijuana in Colorado in 2013 traffic related marijuana deaths have increased 48%, marijuana related emergency room visits have increased 49%, and marijuana related calls to the poison center have increased 100%. According to the Colorado Bureau of Investigations in 2015 statewide homicides in Colorado rose 14.7 % over the previous year. Pueblo, Colorado had the highest homicide rate in the state with 11.1 killings per 100,000 residents. Aurora, Colorado's homicide rate more than doubled from 2014. Additionally more places in Colorado were robbed and more thefts occurred, especially cars, as 193,115 motor vehicles were reported stolen, up 27.7 % in 2015 from the previous year. In 2015, sexual assaults rose 10% in Colorado with Denver, Aurora, Lakewood, Westminster and Pueblo all reporting higher numbers as well.

In the city of Denver since the legalization of recreational marijuana the number of crimes in Denver has grown by about 44 %, according to annual figures the city reported to the National Incident Based Reporting System. In 2015 in Denver alone crime rose in every neighborhood in the city. The murder rate hit a decade high, 1059 more cars were broken into, there were 903 more auto thefts, 321 more aggravated assaults and 231 more homes were broken into compared to 2014.

California voters are also being told that legalizing recreational marijuana will free up law enforcement to work on other criminal activities. Again that has not been the case in Denver. Besides the overall increases in crime we have experience, the Denver police department is dealing with a 900% increase in the unlawful cultivation and manufacture of marihuana concentrate, and a 99% increase in the unlawful distribution of marijuana and marijuana concentrate. The quantity of illegal marijuana seized by the Denver police has increased 3,424% on average per case. The volume of marijuana seized per case has increased from an average of 162 pounds to 5724 pounds. In Denver unlawful public consumption of marijuana citations has increased over 300% per year since the legalization of recreational marijuana. The Denver police department is busier enforcing marijuana laws and investigating crimes directly related to marijuana, including murderers, robberies, and home invasions, than any other time in the history of the city.

Sincerely,

Mitchell R. Morrissey
Denver District Attorney

Officials from **St. Louis County** indicated this amendment, if adopted, would have very minimal to no fiscal impact on the operations of St. Louis County Government. The only foreseeable impact would be in the County determined or was required by initiative petition to hold an election for opting out of the legalization. The costs of a November election due to such a measure would be minimal and not continuing.

Officials from the **City of Kansas City** indicated this initiative petition may have a positive fiscal impact on their city in an indeterminate amount as a result of increased sales tax revenues; however, such revenues could be offset by increased expenses in an indeterminate amount.

Officials from the **Wellsville-Middletown R-1 School District** indicated they do not see a specific direct fiscal impact of this proposed petition on their school. Time will tell if it costs them in terms of students or staff who can't function properly due to being under the influence of the substance, whether they have to expend resources on substitute staff or spend additional time reteaching. Hopefully this will not be an issue.

Officials from **Metropolitan Community College** indicated no fiscal impact.

Officials from the **Missouri Veterans Commission** indicated:

Michael L. Parson
Governor

Grace Link
Executive Director

MISSOURI VETERANS COMMISSION

205 Jefferson Street, P.O. Drawer 147, Jefferson City, MO 65102-0147
Telephone: (573) 751-3779 www.mvc.dps.mo.gov Fax: (573) 751-6836

November 12, 2019

The Honorable John R. Ashcroft
Secretary of State
600 W. Main Street
Jefferson City, MO 65101

Dear Secretary of State Ashcroft,

Initiative Petition 2020-127 (hereinafter, the Initiative) will have a disastrous fiscal impact upon the Missouri Veterans Commission. Under the existing medical marijuana program, we anticipate receiving $12,458 in FY20, $2,135,510 in FY21, $2,529,753 in FY22 and $2,929,271 in FY23 from the tax revenues generated from the retail sales of medical marijuana. The Initiative makes no significant changes to that program, but the adverse impact the Initiative poses to the Commission is in the creation of the non-medical marijuana program. The medical marijuana program is predicated on medical need and the physician certification that marijuana is the appropriate treatment for that medical need. Conversely, the non-medical marijuana program has no requirement for medical need or for physician certification. It is only common sense that those wishing to use marijuana products will forego the inconvenience of establishing medical need and obtaining a physician's certification and avail themselves of the non-medical program regardless of their reason for wanting to use marijuana products. Therefore, we anticipate a significant reduction in the tax revenues generated by the medical marijuana program, perhaps as high as a 90% reduction, should the Initiative become law.

Moreover, given the significantly different distribution of tax revenues provided for under the non-medical marijuana program, we do not anticipate that our portion of the tax revenues generated under the non-medical program will defray the reduction we would experience under the medical marijuana program. Specifically, the medical marijuana program establishes a 4% tax on all retail sales of medical marijuana and allocates to the Commission all of those proceeds minus 5% to the Department of Revenue and an amount to the Department of Health and Senior Services necessary to defray their costs in regulating the program. Conversely, the non-medical marijuana program establishes a 15% tax on all retail sales of non-medical marijuana and allocates to the Commission one-third of those proceeds minus 2% to the Department of Revenue, an amount to the Department of Health and Senior Services necessary to defray their costs in regulating the program, and 3/15 to the local jurisdiction in which the sale took place. Despite the increased tax rate under the non-medical program, we anticipate receiving a significantly smaller portion of the tax revenues collected given the smaller allocation amount dedicated to the Commission.

Finally, the purpose for which the Commission may use its portion of the tax proceeds will essentially eliminate our ability to initiate construction projects to improve our physical facilities. Specifically, the medical marijuana program allows the Commission to use those proceeds for "for health and care services for military veterans, including the following purposes: operations, *maintenance and capital improvements* of the Missouri veterans homes, the Missouri service officer's program, and other services for veterans approved by the commission, including, but not limited to, health care services, mental health services, drug rehabilitation services, housing assistance, job training, tuition assistance, and housing assistance to prevent homelessness." (Emphasis added) That is essentially everything that the Commission does and clearly affords the Commission the flexibility necessary to address the needs of Missouri's veterans as they change over time. Conversely, the non-medical marijuana program requires the Commission to use its significantly reduced portion of the tax revenues strictly for "*health care and other services* for military veterans and their dependent families". (Emphasis added) This language will severely limit our ability to adjust our facilities to meet the changing needs of Missouri's veterans.

In closing, Initiative Petition 2020-127 will adversely impact the ability of the Missouri Veterans Commission to serve the veterans of Missouri for the reasons set forth above. If I can be of any further assistance on this issue, please contact me at (573) 751-4066 at your convenience.

Sincerely,

Ryon A. Richmond
Deputy Director
Missouri Veterans Commission

Officials from the **Missouri Office of Prosecution Services** indicated there is no fiscal impact to their office. The enactment of a new crime [Section 2.10(6)(c)] creates additional responsibilities for county prosecutors which may in turn result in additional costs which are difficult to determine.

Marijuana Legalization, Regulation, and Taxation

Proposed Statement of Fiscal Impact

Fiscal Impact Information Submitted Pursuant to Section 23.140.2

The amendment's estimated state revenue is $197.9 million when fully implemented, including $27.6 million each for veterans, infrastructure, and health programs. General revenue and other state funds benefit by $48.4 million, and $27.2 million in local revenue is estimated.

ESTIMATED NET EFFECT ON STATE FUNDS

Fund Affected	FY 2021	FY 2022	FY 2023	FY 2024	FY 2025	5-year Total
General Revenue	$0	$9,686,290	$20,993,899	$30,295,000	$38,826,867	$99,802,056
Veterans, Infrastructure, and Health Fund	$2,666,000	$4,472,000	$48,305,110	$81,685,223	$122,258,755	$259,387,089

ANALYSIS OF FISCAL IMPACT OF MEDICAL MARIJUANA PETITION

The fiscal impact analysis contained herein focuses on estimating the fee and tax revenue resulting from the constitutional amendment proposed in the initiative petition. Table 1 summarizes the revenue and savings estimated by source and by fiscal year.

Table 1 - Summary of Tax, Application and License Fees, Revenue, and Savings by Fund

Purpose	FY 2021	FY 2022	FY 2023	FY 2024	FY 2025	5-year total
Marijuana Cultivation Facilities	$720,000	$1,500,000	$1,500,000	$1,500,000	$1,800,000	$7,020,000
Marijuana-Infused Products Manufacturing Facilities	$602,000	$860,000	$860,000	$860,000	$1,118,000	$4,300,000
Marijuana Dispensary Facilities	$1,344,000	$1,920,000	$1,920,000	$1,920,000	$2,496,000	$9,600,000
Marijuana Microbusiness Facilities	$0	$192,000	$120,000	$120,000	$240,000	$672,000
15% sales tax	$0	$0	$43,905,110	$77,285,223	$116,604,755	$237,795,089
subtotal Veterans, Infrastructure, and Health Fund	$2,666,000	$4,472,000	$48,305,110	$81,685,223	$122,258,755	$259,387,089
General Revenue sales tax	$0	$0	$8,781,022	$15,457,045	$23,320,951	$47,559,018
General Revenue budget savings	$0	$9,686,290	$12,212,877	$14,837,955	$15,505,916	$52,243,038
subtotal GR	$0	$9,686,290	$20,993,899	$30,295,000	$38,826,867	$99,802,056
Prop C sales tax	$0	$0	$2,927,007	$5,152,348	$7,773,650	$15,853,006
Conservation sales tax	$0	$0	$365,876	$644,044	$971,706	$1,981,626
Parks and Soils sales tax	$0	$0	$292,701	$515,235	$777,365	$1,585,301
Criminal Records System Fund	$0	$540,584	$54,054	$54,054	$54,054	$702,746
subtotal Other State Funds	$0	$540,584	$3,639,638	$6,365,681	$9,576,776	$20,122,678
subtotal all state funds	$2,666,000	$14,698,874	$72,938,647	$118,345,903	$170,662,397	$379,311,822
Local Sales Tax	$0	$0	$10,244,526	$18,033,219	$27,207,776	$55,485,521
Grand Total State and Local	$2,666,000	$14,698,874	$83,183,173	$136,379,122	$197,870,174	$434,797,343

This is the allocation table of the new Veterans, Infrastructure, and Health Fund. More explanation can be found on page 20.

Table 2 - Allocation of Veterans, Infrastructure, and Health Fund

	FY 2021	FY 2022	FY 2023	FY 2024	FY 2025	5-year total
Veterans, Infrastructure, and Health Fund						
Sales tax revenue - received	$0	$0	$43,905,110	$77,285,223	$116,604,755	$237,795,089
Application and license fees	$2,666,000	$4,472,000	$4,400,000	$4,400,000	$5,654,000	$21,592,000
Total VIH fund collections	$2,666,000	$4,472,000	$48,305,110	$81,685,223	$122,258,755	$259,387,089
Administration of tax and program

Major Purposes						
Local governments (3/15ths of remainder)	$0	$0	$6,334,084	$12,813,911	$20,702,396	$39,850,391
Veterans (one-third after local govt.)	$0	$0	$8,445,445	$17,085,215	$27,603,194	$53,133,854
Infrastructure (one-third after local govt.)	$0	$0	$8,445,445	$17,085,215	$27,603,194	$53,133,854
Health (one-third after local govt.)	$0	$0	$8,445,445	$17,085,215	$27,603,194	$53,133,854
subtotal for major purposes	$0	$0	$31,670,418	$64,069,557	$103,511,979	$199,251,954
Total allocated	$2,666,000	$4,472,000	$48,305,110	$81,685,223	$122,258,755	$259,387,089

Implementation dates required by Petition 2020-127

Table 3 below identifies the implementation dates prescribed in the petition. All fiscal estimates in this analysis assume that the Department of Health and Senior Services, and all other state and local governments affected by this petition will meet the deadlines required by the petition.

TABLE 3 - Implementation Schedule	
11/3/2020	Election Day - Voter Approval
12/3/2020	30 days after election - effective date of constitutional amendment
2/1/2021	Prospective applicants shall notify DHSS of their intent to apply and prefile their application fee for Marijuana Cultivation Facilities, Marijuana Testing Facilities, Marijuana Dispensary Facilities, and Marijuana-Infused Products Manufacturing Facilities.
270 days after effective date of constitutional amendment	
8/30/2021	DHSS shall make available license application forms and application instructions for Marijuana Cultivation Facilities, Marijuana Testing Facilities, Marijuana Dispensary Facilities, Marijuana-Infused Products Manufacturing Facilities and Marijuana Microbusiness Facilities, and any other license types and certifications it deems necessary.
365 days after effective date of constitutional amendment	
12/3/2021	DHSS shall begin accepting application forms for Marijuana Cultivation Facilities, Marijuana Testing Facilities, Marijuana Dispensary Facilities, Marijuana-Infused Products Manufacturing Facilities, Marijuana Microbusiness Facilities, Seed-to-Sale tracking systems, and transportation of marijuana from medical marijuana facilities with similar licenses
180 days after DHSS begins accepting application forms it begins approving licenses	
6/1/2022	For any application submitted on the day required under the constitutional provisions, DHSS shall have approved or denied application forms for Marijuana Cultivation Facilities, Marijuana Testing Facilities, Marijuana Dispensary Facilities, Marijuana-Infused Products Manufacturing Facilities, and Marijuana Microbusiness Facilities. All applications must be approved or denied within 180 days of submission to DHSS thereafter.
First November national election date after initial statewide voter approval	
11/8/2022	Local governments can seek elections to prohibit operation of all or any category of marijuana facilities in their jurisdiction.
815 days after effective date of constitutional amendment	
2/26/2023	270 days after DHSS begins issuing licenses (6/1/22) DHSS may issue 6 additional microbusiness licenses per Congressional district.
1,093 days after effective date of constitutional amendment	
12/1/2023	548 days after DHSS begins issuing licenses (6/1/22) DHSS shall begin approving licenses for Marijuana Cultivation Facilities, Marijuana Testing Facilities, Marijuana Dispensary Facilities, Marijuana-Infused Products Manufacturing Facilities, Marijuana Microbusiness Facilities, Seed-to-Sale tracking systems, and transportation of marijuana from non-medical marijuana facility applicants. DHSS may issue 6 additional microbusiness licenses per Congressional district.

Cultivation Application and License fees

The proposal provides for the licensing of Marijuana Cultivation Facilities. The DHSS is required to charge a one-time non-refundable application fee of $12,000. Once granted, the DHSS is required to charge an annual license fee of $25,000. Renewal fees are $5,000 after three years.

As seen in Table 3, the DHSS is required to make application forms available no later than 270 days after the effective date of the new constitutional provisions – which will be August 30, 2021. The DHSS is required to begin accepting applications no later than 365 days after the effective date of the new constitutional provisions – which will be December 3, 2021. The proposal requires that prospective applicants shall notify DHSS of their intent to apply and prefile their application fee by February 1, 2021, in FY 2021. The proposal also provides that for the first 548 days after the DHSS begins to license facilities it may only accept applications for licensure from entities holding medical marijuana cultivation facility licenses. The first adult use marijuana licenses awarded to entities that are not medical marijuana licensees will begin December 1, 2023 (state fiscal year FY 2024).

Table 4 shows the calculation of the fee revenue estimated at $720,000 in FY 2021, $1.5 million from FY 2022 to FY 2024, and $1.8 million in FY 2025. Other assumptions include:

- The DHSS is expected to license 60 medical marijuana cultivation facilities in compliance with the medical marijuana constitutional provisions. These are the only facilities eligible for licensure for the first and second years after the election.
- Since the application award happens by June 2022, it is assumed that the licensees will pay the annual license fee in FY 2022 and the renewal license fee payment will occur in FY 2025.
- During the roll out of the medical marijuana process the department has expressed concern about the level of demand for medical marijuana and placed a University of Missouri market study on its website about the subject. Given the department's stated hesitancy, this analysis assumes no new additional facilities will be licensed during the period. Thus, the revenue estimate is conservative as the department moves slowly to license additional facilities. Only the renewal costs are included in the long-range forecast.

Table 4 shows:

- Application fees - $720,000 in FY 2021 and $0 in FY 2022-FY 2025.
- Renewal fees - $300,000 in FY 2025.
- Annual license fees - $1.5 million from FY 2022 to FY 2025.

Table 4 - Cultivation Facilities - Fee Revenues

	FY 2021	FY 2022	FY 2023	FY 2024	FY 2025
Non-refundable application fee	$12,000	$12,000	$12,000	$12,000	$12,000
Renewal fee					$5,000
Applicants					
Medical marijuana licenses eligible year 1	60	0	0	0	60
New additional licenses	0	0	0	0	0
subtotal Non-Refundable Fee revenues	$720,000	$0	$0	$0	$300,000
Annual license fee	$25,000	$25,000	$25,000	$25,000	$25,000
Licenses					
Medical marijuana licenses eligible year 1	0	60	60	60	60
New additional licenses	0	0	0	0	0
subtotal Annual License Fee revenues	$0	$1,500,000	$1,500,000	$1,500,000	$1,500,000
Total Cultivation license & fee revenues	$720,000	$1,500,000	$1,500,000	$1,500,000	$1,800,000

Marijuana-Infused Products Manufacturing Facilities Application and License fees

The proposal provides for the licensing of Marijuana-Infused Products Manufacturing Facilities. The DHSS is required to charge a one-time non-refundable application fee of $7,000. Once granted, the DHSS is required to charge an annual license fee of $10,000. Renewal fees are $3,000 after three years.

As seen in Table 3, the DHSS is required to make application forms available no later than 270 days after the effective date of the new constitutional provisions – which will be August 30, 2021. The DHSS is required to begin accepting applications no later than 365 days after the effective date of the new constitutional provisions – which will be December 3, 2021. The proposal requires that prospective applicants shall notify DHSS of their intent to apply and prefile their application fee by February 1, 2021, in FY 2021. The proposal also provides that for the first 548 days after the DHSS begins to license facilities it may only accept applications for licensure from entities holding medical marijuana infused products facility licenses. The first adult use marijuana licenses awarded to entities that are not medical marijuana licensees will begin December 1, 2023 (state fiscal year FY 2024).

Table 5 shows the calculation of the fee revenue estimated at $602,000 in FY 2021, $860,000 in FY 2022-FY 2024, and $1.1 million in FY 2025. Other assumptions include:

- The DHSS is expected to license 86 medical marijuana-infused products manufacturing facilities in compliance with the medical marijuana constitutional provisions. These are the only facilities eligible for licensure for the first and second years after the election.
- Since the application award happens by June 2022, it is assumed that the licensees will pay the annual license fee in FY 2022 and the renewal license fee payment will occur in FY 2025.
- During the roll out of the medical marijuana process the department has expressed concern about the level of demand for medical marijuana and placed a University of Missouri market study on its website about the subject. Given the department's stated hesitancy, this analysis assumes no new additional facilities will be licensed during the period. Thus, the revenue estimate is conservative as the department moves slowly to license additional facilities. Only the renewal costs are included in the long-range forecast.

Table 5 shows:

- Application fees - $602,000 in FY 2021 and $0 from FY 2022-FY 2025.
- Renewal fees - $258,000 in FY 2025.
- Annual license fees - $860,000 from FY 2022-FY 2025.

Table 5 - Infused Products Manufacturing Facilities - Fee Revenues

	FY 2021	FY 2022	FY 2023	FY 2024	FY 2025
Non-refundable application fee	$7,000	$7,000	$7,000	$7,000	$7,000
Renewal fee					$3,000
Applicants					
Medical marijuana licenses eligible year 1	86	0	0	0	86
New additional licenses	0	0	0	0	0
subtotal Non-Refundable Fee revenues	$602,000	$0	$0	$0	$258,000
Annual license fee	$10,000	$10,000	$10,000	$10,000	$10,000
Licenses					
Medical marijuana licenses eligible year 1	0	86	86	86	86
New additional licenses	0	0	0	0	0
subtotal Annual License Fee revenues	$0	$860,000	$860,000	$860,000	$860,000
Total Infused Product Manufacturing license & fee revenues	$602,000	$860,000	$860,000	$860,000	$1,118,000

Marijuana Dispensary Facilities Application and License fees

The proposal provides for the licensing of Marijuana Dispensary Facilities. The DHSS is required to charge a one-time non-refundable application fee of $7,000. Once granted, the DHSS is required to charge an annual license fee of $10,000. Renewal fees are $3,000 after three years.

As seen in Table 3, the DHSS is required to make application forms available no later than 270 days after the effective date of the new constitutional provisions – which will be August 30, 2021. The DHSS is required to begin accepting applications no later than 365 days after the effective date of the new constitutional provisions – which will be December 3, 2021. The proposal requires that prospective applicants shall notify DHSS of their intent to apply and prefile their application fee by February 1, 2021, in FY 2021. The proposal also provides that for the first 548 days after the DHSS begins to license facilities it may only accept applications for licensure from entities holding medical marijuana dispensary facility licenses. The first adult use marijuana licenses awarded to entities that are not medical marijuana licensees will begin December 1, 2023 (state fiscal year FY 2024).

Table 6 shows the calculation of the fee revenue estimated at $1.3 million in FY 2021 and $1.9 million in FY 2022-FY2024, and $2.5 million in FY 2025. Other assumptions include:

- The DHSS is expected to license 192 medical marijuana dispensary facilities in compliance with the medical marijuana constitutional provisions. These are the only facilities eligible for licensure for the first and second years after the election.

- Since the application award happens by June 2022, it is assumed that the licensees will pay the annual license fee in FY 2022 and the renewal license fee payment will occur in FY 2025.
- During the roll out of the medical marijuana process the department has expressed concern about the level of demand for medical marijuana and placed a University of Missouri market study on its website about the subject. Given the department's stated hesitancy, this analysis assumes no new additional facilities will be licensed during the period. Thus, the revenue estimate is conservative as the department moves slowly to license additional facilities. Only the renewal costs are included in the long-range forecast.

Table 6 shows:

- Application fees - $1,344,000 in FY 2021 and $0 from FY 2022-FY2025.
- Renewal fees: $576,000 in FY 2025.
- Annual license fees - $1.9 million from FY 2022-FY 2025.

Table 6 - Dispensary Facilities - Fee Revenues

	FY 2021	FY 2022	FY 2023	FY 2024	FY 2025
Non-refundable application fee	$7,000	$7,000	$7,000	$7,000	$7,000
Renewal fee					$3,000
Applicants					
Medical marijuana licenses eligible year 1	192	0	0	0	192
New additional licenses	0	0	0	0	0
subtotal Non-Refundable Fee revenues	$1,344,000	$0	$0	$0	$576,000
Annual license fee	$10,000	$10,000	$10,000	$10,000	$10,000
Licenses					
Medical marijuana licenses eligible year 1	0	192	192	192	192
New additional licenses	0	0	0	0	0
subtotal Annual License Fee revenues	$0	$1,920,000	$1,920,000	$1,920,000	$1,920,000
Total Dispensary license & fee revenues	$1,344,000	$1,920,000	$1,920,000	$1,920,000	$2,496,000

Marijuana Microbusiness Facilities Application and License fees

The proposal provides for the licensing of Marijuana Microbusiness Facilities. The DHSS is required to charge a one-time non-refundable application fee of $1,500. Once granted, the DHSS is required to charge an annual license fee of $2,500. Renewal fees are $2,500 after three years.

As seen in Table 3, the DHSS is required to make application forms available no later than 270 days after the effective date of the new constitutional provisions – which will be August 30, 2021. The DHSS is required to begin accepting applications no later than 365 days after the effective date of the new constitutional provisions – which will be December 3, 2021. Both deadlines are in FY 2022 of the Missouri state government budget. It is assumed that no revenues will be received before FY 2022. The proposal also provides that for the first 365 days after the DHSS may only accept applications for licensure from entities holding similar medical marijuana facility licenses.

Table 7 shows the calculation of the fee revenue estimated at $192,000 in FY 2022, $120,000 in FY 2023-FY 2024, and $240,000 in FY 2025. Other assumptions include:

- Marijuana Microbusiness Facilities are not included in the medical marijuana program.
- The proposal provides that a minimum of six such licenses be issued within each of Missouri's eight U.S. Congressional districts when licenses are first issued.
- Since the application periods open in the middle of the year it is assumed that the licensees will pay both the non-refundable application fee and the annual license fee in the same year.
- Since application fees are non-refundable additional revenue may be collected in FY 2023 from any applicant that is ultimately refused a license. This possible revenue is not calculated into this revenue estimate.
- During the roll out of the medical marijuana process the department has expressed concern about the level of demand for medical marijuana and placed a University of Missouri market study on its website about the subject. Given the department's stated hesitancy, this analysis assumes no new additional facilities will be licensed during the period. Thus, the revenue estimate is conservative as the department moves slowly to license additional facilities. Only the renewal costs are included in the long-range forecast.

Table 7 shows:

- Application fees - $72,000 in FY 2022 and $0 from FY 2023-2025.
- Renewal fees - $120,000 in FY 2025.
- Annual license fees - $120,000 from FY 2022-FY 2025.

Table 7 - Microbusiness Facilities - Fee Revenues

	FY 2022	FY 2023	FY 2024	FY 2025
Non-refundable application fee	$1,500	$1,500	$1,500	$1,500
Renewal fee				$2,500
Licenses				
Year 1 - estimate (minimum 6/Congressional Dist.)	48			48
New additional licenses	0	0	0	0
subtotal Non-Refundable Fee revenues	$72,000	$0	$0	$120,000
Annual license fee	$2,500	$2,500	$2,500	$2,500
Licenses

New additional licenses	0	0	0	0
subtotal Annual License Fee revenues	$120,000	$120,000	$120,000	$120,000
Total Microbusiness license & fee revenues	$192,000	$120,000	$120,000	$240,000

States that have approved adult use marijuana

Ten states and Washington D.C. have approved adult use marijuana. Nine received approval from voters while Illinois passed legislation to do so. Table 8 shows that Colorado and Oregon were the first approve adult use marijuana in November 2012. The table also shows when sales started and the length of time in months from approval to first sales. At this point only Colorado, Washington, and Oregon have had sales of at least three years to provide the best data necessary to fully understand the longer-range revenue prospects for adult use marijuana. Alaska is close to having three years' experience. However, it took Alaska longer to implement its program. Alaska also has a small program and uses an excise tax that makes it less comparable to the first three which have similar taxes as that proposed in the Missouri initiative petition. This fiscal note will focus on data from Colorado, Washington, and Oregon in the analysis.

Table 8 - States with Adult Use Marijuana

State	Approved by voters or legislature	Month/year sales started or anticipated	Months from election to sales
Colorado	November 2012	January 2014	15
Washington	November 2012	July 2014	21
Oregon	November 2014	February 2016	15
Alaska	November 2014	October 2016	23
Nevada	November 2016	July 2017	9
California	November 2016	January 2018	15
Massachusetts	November 2016	November 2018	24
Maine	November 2016	March 2020	40
Michigan	November 2018	May 2020	18
Illinois	June 2019	January 2020	6
Missouri (if approved)	November 2020	July 2022	21

Many factors will influence the size of the adult use marijuana program. Having selected three states as the focus of the analysis, four factors in particular will be reviewed.

- Marijuana usage in the states – a review of how Missouri's reported marijuana usage compares to other states to help determine the possible base line for the initial years of the program.
- Initial sales and growth over time.
- Initial infrastructure for sales and its effect on sales.
- Tourism in the states to help determine the impact of sales in Missouri.

Marijuana Usage

Table 9 provides another way to think about the states that have approved adult use marijuana and its possible use in Missouri and revenue estimates. Table 9 shows the percent of those age 18 and over who indicate use of marijuana in the past year from 2012 to 2017 published by the U.S. Department of Health and Human Services, Substance Abuse and Mental Health Services Administration. The 2016-2017 data is the most recently published. The table is sorted by marijuana usage in 2012-2013 which is the last data before adult use marijuana was available in any state. The top 30 states and the national average are shown.

The states that have legalized adult use marijuana are highlighted in blue. All but Illinois, the last state that made it legal, were in the top 15 states for marijuana use in the past year in 2012-2013 and all were above the U.S. national average. Legal medical marijuana programs may be a factor in the higher percentage reported in some of these states. Missouri's 2012-2013 rate of 11.41% is substantially below all of the states that have started sales of adult use marijuana and in every year thereafter. Illinois and Missouri have nearly the same rate of use at the start and end of this timeline. The green boxes are the

last year for each state before adult use sales started which also highlights the fact that only a few states have three full years of experience with revenues.

Table 9. Marijuana Use in the Past Year, by Age Group and State: Percentages, Annual Averages Based on NSDUH

Rank	State	2012-2013 - 18 or Older Estimate	2013-2014 - 18 or Older Estimate	2014-2015 - 18 or Older Estimate	2015-2016 - 18 or Older Estimate	2016-2017 - 18 or Older Estimate
1	Rhode Island	20.21%	19.13%	19.04%	20.62%	21.24%

Source: SAMHSA, Center for Behavioral Health Statistics and Quality, National Survey on Drug Use and Health[i]

Table 10 compares Missouri's base year to Colorado, Washington, and Oregon. Missouri's 13.95% base year is between 3.63% to 5.64% lower than the three states.

Table 10 - Base Year 18 years or older % Marijuana Use in Past Year			
	Base Year Marijuana Usage	Base year rate	Difference in rate from MO
Missouri	2016-2017	13.95%	
Colorado	2012-2013	18.94%	4.99%
Washington	2012-2013	17.58%	3.63%
Oregon	2014-2015	19.59%	5.64%

Table 11 shows how the percentage of those age 18 and older reporting marijuana use changed in the first three years of adult use marijuana sales for Colorado, Washington, and Oregon. In each state the percentage went up over the three years. In the first year the Colorado rate increased 1.8%, Washington by slightly less at 1.48%, and Oregon by 3.6%. The percentage increase in use at the end of the three years compared to the base year percentage was substantially different in each state – Colorado (4.88%), Washington (1.87%), and Oregon (7.79%). Given the lower base year in Missouri shown in Table 10 it seems unlikely that it will increase to the levels shown in the other states in Table 11. Adding Washington's roughly 2.0% increase to Missouri's rate would bring it to 15.95% which is lower than where the other three states started.

Table 11 - Marijuana Use in the Past Year		
	% use age 18 and older	Change in rate
Colorado		
Base year (2012-2013)	18.94%

Washington		
Base year (2012-2013)	17.58%	
Year 1	19.06%	1.48%
Year 2	17.68%	-1.38%
Year 3	19.45%	1.77%
overall change base to year 3		1.87%

Initial infrastructure for adult use marijuana

Table 12 shows the number of retail stores over the first three years in Colorado, Washington, and Oregon. Colorado and Washington start with roughly the same number of retail outlets. Oregon data is unavailable because the program did not establish the statistical infrastructure to collect it in the early years. The Department of Health and Senior Services intends to license 192 medical marijuana dispensaries – the minimum required under that constitutional amendment. The proposed petition provides that for the first year and a half only the medical marijuana dispensaries can be permitted to provide adult use marijuana.

During the roll out of the medical marijuana process the department has expressed concern about the level of demand for medical marijuana. The department placed on its website a University of Missouri market study that estimates substantially fewer medical marijuana patients than estimated in the ballot language for voters in November 2018. The study reflects concern that oversupply will affect product price and thus the economic feasibility of the envisioned facilities throughout the state. The study also reflects concern about possible diversion of oversupply to the illegal market. In addition, we are aware of reports that Oregon has an oversupply of marijuana.

For these reasons, the estimates assume that the number of Missouri dispensaries will grow more slowly than those in the three states on which the analysis is based. Thus, both application and license fee revenue will be lower as will the likely spending per person in this analysis.

Table 12 - Retail Marijuana Dispensaries in Other States

	# of stores	Change in #	% change
Colorado			
January 2014	161

Marijuana sales over the first three years in other states

Table 13 shows data for the first three years of sales in Colorado[ii], Washington[iii], and Oregon[iv]. The population used for each year is from the estimates made by the U.S. Census Bureau.[v]

Colorado ($56.57/capita) and Washington ($37.24/capita) have year one sales lower than Oregon ($94.05/capita). Dividing the population of the three states into the total sales gives a first-year per capita sale of $57.74/capita. Washington had an unregulated medical marijuana program. Its lower per capita sales may be a function of the fact that it was harder to flip to adult use marijuana than in Oregon which had a regulated medical marijuana program.

By year three the Washington ($190.97) had grown dramatically from its low start. Oregon ($132.90) per capita sales which started as the highest per capita sales are the lowest by year three.

Table 13 - First 3 full-years of Marijuana Sales Retail Value for Colorado, Washington, and Oregon

State/year	Year of starting month	Population	Marijuana sales	$ per capita spent on Retail marijuana
Colorado				
Year 1	2014	5,351,218	$303,239,699	$56.67
Year 2	2015	5,452,107	$577,536,343	$105.93
Year 3	2016	5,540,921	$861,587,411	$155.50
Washington				
Year 1	2014	6,968,170	259,524,430.41	$37.24
Year 2	2015	7,061,410	786,404,467.45	$111.37
Year 3	2016	7,183,700	1,371,862,186.37	$190.97
Oregon				
Year 1	2016	4,091,404	$384,797,226	$94.05
Year 2	2017	4,146,592	$419,924,401	$101.27
Year 3	2018	4,190,713	$556,959,330	$132.90
Combined 3 state totals				
Year 1		16,410,792	947,561,355	$57.74
Year 2		16,660,109	1,783,865,211	$107.07
Year 3		16,915,334	2,790,408,928	$164.96

Table 14 shows the dollar per capita and percentage growth in the first three years of sales. Washington with its low start had very high growth in year 2. Colorado grew by 86.9%. In year two Oregon's growth slowed but it had dollar per capita sales very similar to Colorado. The combined 3 state totals are weighted by population and show 85.4% growth in the second year and 54.1% growth in the third year.

Table 14 - First 3 full-years of Marijuana Sales Retail Value for Colorado, Washington, and Oregon

State/year	$ per capita spent on Retail marijuana	$ Change in $/capita	% change in $/capita
Colorado			
Year 1	$56.67		
Year 2	$105.93	$49.26	86.9%
Year 3	$155.50	$49.57	46.8%
3-year change		$98.83	174.4%
Washington			
Year 1	$37.24		
Year 2	$111.37	$74.12	199.1%

Year 3	$164.96	$57.89	54.1%
3-year change		$107.22	185.7%

Tourism

A portion of adult use marijuana sales are the result of visitors to the states that have approved such sales. Table 15 provides tourism data for Colorado, Washington, Oregon, and Missouri[vi]. Both Colorado and Washington have more than twice the number of visitor nights compared to its population as Missouri. In addition, Missouri's spending by visitors compared to population is substantially less than that of Colorado and Washington. The Oregon and Missouri numbers are similar on visitor nights but Missouri lags behind the Oregon spending level. It has been estimated that tourism accounts for less than 10% of Colorado's sales.[vii]

While Missouri may see an uptick of travelers and tourist dollars as a result of adult use marijuana sales it is starting at a significantly lower base to make a dramatic impact on tax collections.

Table 15 - Tourism Visitors and Spending

	Colorado	Washington	Oregon	Missouri
Population estimate 2018	5,695,564	7,535,591	4,190,713	6,126,452
# of visitor nights	85,200,000	128,700,000	29,100,000	42,000,000
Visitors per population	14.96	17.08	6.94	6.86
$ spending of visitors	$22,300,000,000	$24,400,000,000	$12,300,000,000	$13,500,000,000
Spending per population	$3,915.33	$3,237.97	$2,935.06	$2,203.56

Adult Use Marijuana Sales in Missouri

Table 16 provides a range for possible adult use marijuana sales for the first three years of the program. The population calculations were calculated using data from the Office of Administration, Division of Budget and Planning.[viii]

High-end estimate - assumes the population weighted combined 3 state totals from Colorado, Oregon, and Washington shown in Table 14 above. Per capita sales start at $57.74 and grow by 85.4% and 54.1% respectively in years 2 and 3. However, Missouri's base year marijuana usage, as shown in Table 10 is 3.63% to 5.64% below the starting base year for these three states. The value of adult use marijuana sales starts at $375.6 million in year 1 and grows to $1,086 million in year 3.

Low-end estimate - begins at Washington's $37.24/capita starting point. Missouri's marijuana usage is lower. However, Missouri will have a regulated medical marijuana program that Washington did not have when the adult use program began. The low-end estimate assumes the growth in the combined 3 state totals shown in Table 14 of 85.4% and 54.1% respectively in years 2 and 3. The value of adult use marijuana sales starts at $242.2 million in year 1 and grows to $700.2 million in year 3.

Moderate estimate - starts at $45 per capita. This is $11.67/capita lower, about 20% lower, than Colorado. It's higher than Washington's level which was suppressed in year 1. The moderate estimate assumes growth of 75% in year 2 and 50% in year 3.

As noted in Table 14 the three states had different paths to their three-year sales levels. Washington started much lower but had the highest growth in years 2 and 3. Oregon started with high sales per capita but very little growth in year 2 and moderate growth in year 3. The value of adult use marijuana sales starts at $292.7 million in year 1 and grows to $774.4 million in year 3.

The moderate estimate is conservative based on the data reviewed in the pages above.

- Missouri's base year marijuana usage according to federal surveys is lower than the level in Colorado, Oregon, and Washington at the start of the adult use marijuana program.
- Missouri has fewer tourists that could boost sales.

- The department has expressed concern about demand and will likely move more slowly than the other states in adding dispensaries and other facilities.
- Prices for adult use marijuana are difficult to estimate and are likely to decrease over the first few years as supply increases as has happened in the other states.
- It also reflects the difficulty of estimating a new program with limited experience in the other states and the need to make conservative budget assumptions for a healthy program.

Table 16 – Adult Use Marijuana Sales in Missouri

			Low End Estimate		Moderate Estimate		High End Estimate	
	Fiscal Year	Missouri Population	Per capita	Value of Adult use Sales	Per capita	Value of Adult use Sales	Per capita	Value of Adult use Sales
Year 1	2023	6,504,461	$37.24	$242,226,120	$45.00	$292,700,736	$57.74	$375,567,567
Year 2	2024	6,542,664	$69.04	$451,724,916	$78.75	$515,234,822	$107.07	$700,523,077
Year 3	2025	6,580,868	$106.40	$700,172,776	$118.13	$777,365,033	$164.96	$1,085,579,985

Tax, License, and Fee Revenue Estimate

Table 17 uses the moderate estimate of sales to calculate the tax revenues for the new Veterans, Infrastructure, and Health Fund, state general revenue, other state funds, and local funds. The local funds calculation assumes a 3.5% median sales tax derived from the Department of Revenue's list of 2,361 local sales tax rates.[ix] The first licenses will be awarded by early June 2022. The estimates assume the department will issue the license and complete the department's final inspection and other tasks with tax revenue beginning in July 2022 (FY 2023).

Combined State and local tax, fee, and license collections:

- A total all state and local funds of $2.7 million in FY 2021 rising to $182.3 million in FY 2025.
- A five-year total of $381.9 million in all state and local funds.

State license and fee collections:

- Total state funds of $2.7 million in FY 2021 and $5.7 million in FY 2025.
- A five-year total of $21.6 million in state funds.

State tax collections:

- A total all state funds of $56.3 million in FY 2023 rising to $149.4 million in FY 2025.
- A five-year total of $304.8 million in all state funds.
- Veterans, Infrastructure, and Health Fund: $43.9 million in FY 2023 rising to $116.6 million in FY 2025.
- General Revenue Fund: $8.8 million in FY 2023 rising to $23.3 million in FY 2025.
- Prop C: $2.9 million in FY 2023 rising to $7.8 million in FY 2025.
- Conservation: $365,876 in FY 2023 rising to $971,706 in FY 2025.
- Parks and Soils: $292,701 in FY 2023 rising to $777,365 in FY 2025.

Local tax collections:

- Total local funds of $10.2 million in FY 2023 rising to $27.2 million in FY 2025.
- A five-year total of $55.5 million in local funds.

Table 17 - Missouri Tax, License, and Fee Revenue Estimate

	FY 2021	FY 2022	FY 2023	FY 2024	FY 2025	5-year total

Allocation of Veterans, Infrastructure, and Health Fund

The proposed petition establishes a number of purposes for which the revenue derived is to be used. First, the Department of Revenue (collection costs) and the Department of Health and Senior Services (administration) are to receive their funds before allocation to the other major purposes. Table 18 shows the distribution among the uses identified in the petition.

Assumptions for the allocation table below include:

- The Department of Revenue takes the maximum 2% it is allowed to take for collection costs.
- The Department of Health and Senior Services spends the same amount, including fringe benefit costs, for administration of the adult use marijuana program as it received in the FY 2020 budget for the medical marijuana program. It will either do so by shifting some medical marijuana staff to the adult use program or add additional staff. A two percent inflation factor is provided beginning in FY 2024. For FY 2022 it is assumed that the department's cost above the Veterans, Infrastructure, and Health Fund revenues, if any, will be paid with a transfer from general revenue as provided by the act.
- The remaining uses receive their share as detailed in the petition.

Allocations:

- Local government: $6.3 million in FY 2023 rising to $20.7 million in FY 2025. A 5-year total of $39.9 million.
- Veterans: $8.4 million in FY 2023 rising to $27.6 million in FY 2025. A 5-year total of $53.1 million.
- Infrastructure: $8.4 million in FY 2023 rising to $27.6 million in FY 2025. A 5-year total of $53.1 million.
- Health: $8.4 million in FY 2023 rising to $27.6 million in FY 2025. A 5-year total of $53.1 million.

Department of Health and Senior Services (DHSS) - costs

DHSS has experience with implementing the medical marijuana program in accordance with Amendment 2 passed by Missouri voters in November 2018. Thus, the learning curve should be dramatically reduced for the department for a fully legal adult use marijuana program. Much of the language of the new petition mirrors the framework and language from voter-approved Amendment 2 to implement the new program. The tasks that DHSS has already completed or will complete for the medical marijuana program includes, but is not limited to creating:

- rules for the medical marijuana program;
- Advisory Committees;
- a robust website with information about the program;
- forms and applications;
- an online application portal;
- awarding and completing a contract to provide for blind scoring of the applications;
- FAQs;
- videos to help applicants understand the process

- a significant outreach program to businesses and organizations involved or interested in the medical marijuana program;
- reporting mechanisms available to show the distribution of applicants across the state;
- other resources for applicants and the public; and
- educating the Governor and legislature on its budgetary needs to successfully implement the program.

DHSS was successful in receiving $846,726, including 3.5 staff, in FY 2019 supplemental budget funding to begin implementation of the medical marijuana program. In addition, DHSS received $15.7 million, including 52 staff and fringe benefits, in full year FY 2020 funding to implement the program. The staff included:

- 40 health facilities consultants to process and verify applications, inspect facilities, provide technical assistance to the testing facilities to assist with obtaining and maintaining certification; monitor for compliance, and other duties as needed.
- 4 health and senior services managers to manage patient and caregiver applications while meeting application decision deadlines; manage licensing and/or certification of medical marijuana cultivation facilities, dispensary facilities, infused products manufacturing facilities, testing facilities, transportation entities, seed-to-sale tracking systems; and provide ongoing management responsibilities.
- 2 attorneys to provide legal support.
- 1 Planner IV to project manage and work in conjunction with the IT project manager to plan, monitor, and execute the implementation of a seed-to-sale tracking system
- 1 designated principal assistant.
- 4 clerical support staff

Table 19 provides budget information for Colorado[x], Washington, and Oregon to provide perspective on their administrative costs for the Department of Revenue and the relevant administrative agencies. Missouri's $15.7 million budget for medical marijuana administration appears to be larger than the programs in the other states.

Table 19 - Administrative costs in Oregon, Washington, and Colorado

	Total (in millions)	FTE
Oregon		
Adult use	$19.0	68.0
Medical	$5.6	23.0
Total	$24.6	91.0
Washington		
Adult use & medical	$24.2	
Colorado		
Adult use	$14.5	120.1
Medical	$2.4	1.3
Total	$16.9	121.4

All of this success and sizable budget should make the additional cost of regulating legal marijuana more easily accomplished and keep costs down. For example, DHSS has 40 health facility consultants to process and verify applications, provide technical assistance, monitor compliance, and other duties.

DHSS asked for such a sizable staff in part because it was unclear whether OA ITSD would supply a highly functional IT system to process applications during this first round of applications. DHSS received 2,163 medical marijuana applications yet is expected to issue just 348 licenses – the minimum required by the medical marijuana amendment. DHSS has thus received about 6 times more applicants than the number it will approve.

The current DHSS process and timetable is for the first medical marijuana licenses to be issued in late December 2019 or early January 2020. Providing the necessary construction phase for the medical marijuana facilities and the initial growing period, Missourians can expect that medical marijuana product becomes available during the summer or fall of 2020 with dispensaries being opened from then until the end of 2020. DHSS has indicated publicly that it intends to go slowly on issuing licenses during the first few years of medical marijuana implementation to ensure that the marketplace is sufficient to provide a healthy medical marijuana industry and prevent an oversupply of product. There is little expectation that DHSS will begin another round of medical marijuana facilities expansion before late 2022 – which is beyond the dates contained in this petition and required for implementation of a legal marijuana program. Thus, there is no conflict or doubling up of application processing between the two programs.

As noted earlier in this analysis, for the first 548 days of legal marijuana applications DHSS may only accept applications for licensure from entities holding similar medical marijuana facility licenses. The 40 health facility consultants will face a maximum of 348 marijuana facility applications in late 2021, 16% of what they faced in 2019. In addition, the health facility consultants and all of the staff only have to deal with facilities that they have already instructed, inspected, monitored for compliance, and reviewed. The owners and staff of the medical marijuana facilities will already be knowledgeable of all of the rules and regulations and will have developed a strong working relationship with DHSS.

It is assumed that there will be some costs required to process adult use marijuana facility applications. Costs for OA ITSD for IT services are included in the DHSS medical marijuana budget and can be used to provide additional functionality to reduce the amount of paperwork done by the health facilities consultants and clerical staff. Providing a more efficient, robust and user-friendly application portal will help the department. In addition, additional website development to improve reporting tools, update videos, and other functionality can be completed before the adult use program applications are announced. Blind scoring costs currently in the DHSS budget will not be needed for the first round of adult use marijuana application evaluation.

This analysis assumes that the department will spend the same $15.7 million for their administrative costs for adult use as it did for medical marijuana. It will either do so by shifting some medical marijuana staff to the adult use program or add additional staff. There likely will be significant cost savings in administrative costs when the medical and adult use programs are operational. As shown in Table 19, Colorado, Washington, and Oregon spend much less than the $32 million in administration for both programs that possible under the assumptions of this analysis. Those savings are not calculated herein and will be decided by the Governor and legislature as both programs proceed.

Department of Corrections Savings

In a fiscal note to HB 1448 (2018) the Department of Corrections laid out its estimate of savings to a bill that allowed adult use marijuana. It indicated substantial savings. The department reported that the annual number of persons admitted for cannabis offenses was expected to be 209 with an additional 986 sent to probation. It also reported that the average incarcerated offender spent one year in prison and three more years on parole.

https://house.mo.gov/billtracking/bills181/fiscal/fispdf/4952-01N.ORG.pdf

In its 2017 Annual Report the Missouri Board of Probation and Parole reported that the per diem cost of incarceration was $58.85 compared to $5.39 for probation or parole. Revised numbers have not been made available by the Department. However, the 2017 costs are included in the analysis below to identify the cost savings of the initiative petition to the Department. A two percent inflation factor is assumed for institutional and probation/parole costs.

The number of people normally incarcerated remains static in this analysis at 209 each year since a new cohort comes in and then leaves after one year. At $58.85/day ($21,480/year) the department will save $4.5 million in incarceration costs. The number of people normally expected to be under supervision grows until it peaks at year four. The 209 that normally serves three years of probation increases until it tops out at 627. The 986 people that normally serve three years of supervision tops out at 2,958. The number of people that will not be under supervision in year four is 3,794. The savings run from $6.4 million in year one to $12.2 million in year four.

Table 20 - Department of Corrections - Savings				
	FY 2022	FY 2023	FY 2024	FY 2025
Incarcerated	209	209	209	209
Parole		209	418	627
Probation	986	1,972	2,958	2,958
subtotal supervision	986	2,181	3,376	3,585
Total affected population	1,195	2,390	3,585	3,794
Institutional costs/day	$58.85	$60.03	$61.23	$62.45
Institutional costs/year	$21,480	$21,910	$22,348	$22,795
Probation/parole costs/day	$5.39	$5.50	$5.61	$5.72
Probation/parole costs/year	$1,967	$2,007	$2,047	$2,088
Savings institutional	$4,489,372	$4,579,160	$4,670,743	$4,764,158
Savings probation/parole	$1,939,807	$4,376,606	$6,910,101	$7,484,647
Total Savings	$6,429,179	$8,955,766	$11,580,844	$12,248,805

This measure will not result in an increase in crime as a result of the legalization of adult use marijuana. A recent study published by Reason Magazine[xi] concluded legalization reduced possession and other marijuana crimes and relieved the burden placed on courts, law enforcement and prisons, allowing for greater focus on violent crime. It also identified other studies that showed that opioid use and deaths decreased in states with adult use marijuana. It reports on studies that show reduction in property crime and others that suggest that marijuana use does not lead to an increase in violent crime. Some more recent studies suggest that legalization might reduce violent crime. The Reason study also reported on a recent study that found legalization of marijuana for recreational use in Colorado and Washington was associated with an improvement in the rate of clearance of cases relating to violent crimes.

A federally funded study[xii] of the experience in Colorado and Washington also concluded that marijuana legislation had minimal to no effect on major crimes in those states. The study found no statistically significant long-term effects of recreational cannabis laws or the initiation of retails sales on violent or property crimes in those states. The analysis was based on FBI data on violent, property, aggravated assault, auto theft, burglary, larceny, and robbery crime rates. The one trend that held was a decrease in the burglary rate in Washington. The study also called out some published research for bad research design and data for studies that purported to show increases in crime. The study found some immediate effect on crime in Colorado (property crime) and Washington (larceny) at the point of legalization but the trends suggest that if marijuana legalization influenced crime, it was short-lived.

Multiple analyses have concluded that medical marijuana laws are not causally linked with increases in violent crime or property crime.[xiii] RAND researchers found a negative and significant relationship between dispensary allowances and property crime rates.[xiv] A September 2019 study in Regional Science and Urban Economics reports reduction in crimes in areas around marijuana dispensaries.[xv]

The Cato Institute studied outcomes in Colorado and Washington, including crime rates in Denver and Seattle, and found no statistical relationship between passage of adult-use legalization and increased crime.[xvi] In a recent paper a University of Washington researcher used regression analysis on crime data from 1990 to 2017 and found that the legalization of marijuana, both recreational and medical, does not increase violent crime rates but could lead to a decline in violent crime such as homicide, robbery and aggravated assault.[xvii] A peer-reviewed study published in *The Economic Journal* indicates that legalizing marijuana is likely reducing crime in many states by displacing the illicit markets traditionally controlled by drug cartels.[xviii]

Other news reports also show a minimal impact of legal marijuana on crime[xix] and its effect on reducing opioid use and deaths.

Public Defender Savings

The State Public Defender's Office also estimated its savings in the same fiscal note to HB 1448 (2018). The Public Defender reported that the bill would save 52,230 attorney hours, or slightly more than 25 attorneys based on the state's 2,080-hour work year. The Public Defender assumed that 25% of drug cases relate to marijuana affecting about 2,472 cases. However, it did not convert the 52,230 hours savings into a dollar amount. It stated that it would not cut its budget because it is staffed substantially below the level it believes is necessary to meet its caseload standards.

Table 21 provides the conversion of hours saved into dollars using the FY 2020 budget request for 385 additional staff made by the Public Defender's Office. The FY 2020 budget request included a request for attorneys at a salary of $60,084 and a secretary for every three attorneys at a salary of $28,668. That provides a savings of $1.7 million in salaries if the Public Defender's budget was cut to keep its staffing levels at the level the General Assembly has been providing. The expense and equipment requests provided $10,500/attorney in travel and $6,380/FTE for all other expense and equipment leading to a savings of $475,145. Fringe benefit savings would add another $1 million. Total savings to the Public Defender's budget annually is estimated at $3.3 million. However, the petitioners do not recommend such cuts.

Table 21 - Public Defender possible savings			
Hours saved	52,230		
Yearly hours per FTE	2,080		
FTE saved	25.11		
	# staff	Avg. salary	Total
Public defenders	25	$60,084	$1,502,100
Secretary (1 for every 3 attorneys)	8.33	$28,668	$238,804
subtotal Personal Service Savings			$1,740,904
Expense & equipment			
Travel	25	$10,500	$262,500
Other items	33.33	$6,380	$212,645
subtotal E&E Savings			$475,145
Fringe benefits (59.8% of PS costs)			$1,041,061
Total savings for Public Defender			$3,257,110

Other department – costs, revenues, or savings

The Missouri State Highway Patrol (MSHP) should expect additional revenue as a result of this proposal. For HB 1448 (2018) the MSHP estimated income of $540,584 for the Criminal Records System Fund as a result of fingerprint and criminal record system checks in the first year and $54,054 annually thereafter.

The Office of Administration, Information Technology Systems Division provided IT support to DHSS. Possible additional costs to OA ITSD are included in the DHSS cost discussion of this analysis.

The Office of State Courts Administrator, the courts, the Department of Corrections, and the Public Defender may have additional costs to process expungement of marijuana convictions from criminal records. The petition provides that people with such convictions "may apply for expungement upon the

effective date of this section and such expungement shall be granted…". A search of the Missouri General Assembly's bill list for the past seven regular sessions found three bills filed by Rep. Ellington from 2014-2016 that included expungement of such records. It was not the same as the petition's provisions. The Oversight Division did not complete a fiscal note of the possible costs or savings.

Fiscal Note Summary

State government entities are expected to have one-time costs of $21 million, annual costs of up to $6 million, and annual revenues from $86 million to $155 million by 2025. Local governments estimate unknown costs and are expected to have annual revenues from $17 million to $27 million by 2025.

STATE AUDITORS OFFICE

The Honorable Nicole Galloway
State Auditor
State Capitol Building
Jefferson City, MO 65101

RE: Petition approval request from Deirdre Hirner regarding a proposed constitutional amendment to Article XIV (2020-126)

Dear Auditor Galloway:

Enclosed please find an initiative petition sample sheet for a proposal to amend the Missouri Constitution filed by Deirdre Hirner on October 18, 2019.

We are referring the enclosed petition sample sheet to you for the purposes of preparing a fiscal note and fiscal note summary as required by Section 116.332, RSMo. Section 116.175.2, RSMo requires the state auditor to forward the fiscal note and fiscal note summary to the attorney general within twenty days of receipt of the petition sample sheet.

Thank you for your immediate consideration of this request.

Sincerely,

John R. Ashcroft

20-126

Be it resolved by the people of the state of Missouri that the Constitution be amended:

Article XIV is amended by amending Section 1 of Article XIV and enacting one new section to be known as Section 2 of Article XIV, to read as follows:

XIV Section 1. Right to access medical marijuana. — 1. Purposes.

This section is intended to permit state-licensed physicians to recommend marijuana for medical purposes to patients with serious illnesses and medical conditions. The section allows patients with qualifying medical conditions the right to discuss freely with their physicians the possible benefits of medical marijuana use, the right of their physicians to provide professional advice concerning the same, and the right to use medical marijuana for treatment under the supervision of a physician.

This section is intended to make only those changes to Missouri laws that are necessary to protect patients, their primary caregivers, and their physicians from civil and criminal penalties, and to allow for the limited legal production, distribution, sale and purchase of marijuana for medical use. This section is not intended to change current civil and criminal laws governing the use of marijuana for nonmedical purposes. The section does not allow for the public use of marijuana and driving under the influence of marijuana.

2. Definitions.

(1) **"Administer"** means the direct application of marijuana to a qualifying patient by way of any of the following methods:

(a) Ingestion of capsules, teas, oils, and other marijuana-infused products;

(b) Vaporization or smoking of dried flowers, buds, plant material, extracts, or oils;

(c) Application of ointments or balms;

(d) Transdermal patches and suppositories;

(e) Consuming marijuana-infused food products; or

(f) Any other method recommended by a qualifying patient's physician.

(2) **"Department"** means the department of health and senior services, or its successor agency.

(3) **"Entity"** means a natural person, corporation, professional corporation, nonprofit corporation, cooperative corporation, unincorporated association, business trust, limited liability company, general or limited partnership, limited liability partnership, joint venture, or any other legal entity.

(4) **"Flowering plant"** means a marijuana plant from the time it exhibits the first signs of sexual maturity through harvest.

(5) **"Marijuana"** or **"marihuana"** means *Cannabis indica*, *Cannabis sativa*, and *Cannabis ruderalis*, hybrids of such species, and any other strains commonly understood within the scientific community to constitute marijuana, as well as resin extracted from the plant and marijuana-infused products. "Marijuana" or "marihuana" do not include industrial hemp containing a cropwide average tetrahydrocannabinol concentration that does not exceed three-tenths of one percent on a dry weight basis, or commodities or products manufactured from industrial hemp.

(6) **"Marijuana-infused products"** means products that are infused with marijuana or an extract thereof and are intended for use or consumption other than by smoking, including, but not limited to, edible products, ointments, tinctures and concentrates.

(7) **"Medical marijuana cultivation facility"** means a facility licensed by the department to acquire, cultivate, process, store, transport, and sell marijuana to a medical marijuana dispensary facility, medical marijuana testing facility, or to a medical marijuana-infused products manufacturing facility.

(8) **"Medical marijuana dispensary facility"** means a facility licensed by the department to acquire, store, sell, transport, and deliver marijuana, marijuana-infused products, and drug paraphernalia used to administer marijuana as provided for in this section to a qualifying patient, a primary caregiver, another medical marijuana dispensary facility, a medical marijuana testing facility, or a medical marijuana-infused products manufacturing facility.

(9) **"Medical marijuana-infused products manufacturing facility"** means a facility licensed by the department to acquire, store, manufacture, transport, and sell marijuana-infused products to a medical marijuana dispensary facility, a medical marijuana testing facility, or to another medical marijuana-infused products manufacturing facility.

(10) **"Medical marijuana testing facility"** means a facility certified by the department to acquire, test, certify, and transport marijuana.

(11) **"Medical use"** means the production, possession, delivery, distribution, transportation, or administration of marijuana or a marijuana-infused product, or drug paraphernalia used to administer marijuana or a marijuana-infused product, for the benefit of a qualifying patient to mitigate the symptoms or effects of the patient's qualifying medical condition.

(12) **"Physician"** means an individual who is licensed and in good standing to practice medicine or osteopathy under Missouri law.

(13) **"Physician certification"** means a document, whether handwritten, electronic or in another commonly used format, signed by a physician and stating that, in the physician's professional opinion, the patient suffers from a qualifying medical condition.

(14) **"Primary caregiver"** means an individual twenty-one years of age or older who has significant responsibility for managing the well-being of a qualifying patient and who is designated as such on the primary caregiver's application for an identification card under this section or in other written notification to the department.

(15) **"Qualifying medical condition"** means the condition of, symptoms related to, or side-effects from the treatment of:

(a) Cancer;

(b) Epilepsy;

(c) Glaucoma;

(d) Intractable migraines unresponsive to other treatment;

(e) A chronic medical condition that causes severe, persistent pain or persistent muscle spasms, including but not limited to those associated with multiple sclerosis, seizures, Parkinson's disease, and Tourette's syndrome;

(f) Debilitating psychiatric disorders, including, but not limited to, posttraumatic stress disorder, if diagnosed by a state licensed psychiatrist;

(g) Human immunodeficiency virus or acquired immune deficiency syndrome;

(h) A chronic medical condition that is normally treated with a prescription medication that could lead to physical or psychological dependence, when a physician determines that medical use of marijuana could be effective in treating that condition and would serve as a safer alternative to the prescription medication;

(i) Any terminal illness; or

(j) In the professional judgment of a physician, any other chronic, debilitating or other medical condition, including, but not limited to, hepatitis C, amyotrophic lateral sclerosis, inflammatory bowel disease, Crohn's disease, Huntington's disease, autism, neuropathies, sickle cell anemia, agitation of Alzheimer's disease, cachexia, and wasting syndrome.

(16) **"Qualifying patient"** means a Missouri resident diagnosed with at least one qualifying medical condition.

3. Creating Patient Access to Medical Marijuana.

(1) In carrying out the implementation of this section, the department shall have the authority to:

(a) Grant or refuse state licenses and certifications for the cultivation, manufacture, dispensing, sale, testing, tracking, and transportation of marijuana for medical use as provided by law; suspend, fine, restrict, or revoke such licenses and certifications upon a violation of this section or a rule promulgated pursuant to this section; and impose any administrative penalty authorized by this section or any rule promulgated pursuant to this section.

(b) Promulgate rules and emergency rules necessary for the proper regulation and control of the cultivation, manufacture, dispensing, and sale of marijuana for medical use and for the enforcement of this section so long as patient access is not restricted unreasonably and such rules are reasonably necessary for patient safety or to restrict access to only licensees and qualifying patients.

(c) Develop such forms, certificates, licenses, identification cards, and applications as are necessary for, or reasonably related to, the administration of this section or any of the rules promulgated under this section;

(d) Require a seed-to-sale tracking system that tracks medical marijuana from either the seed or immature plant stage until the medical marijuana or medical marijuana-infused product is sold to a qualifying patient or primary caregiver to ensure that no medical marijuana grown by a medical marijuana cultivation facility or manufactured by a medical marijuana-infused products manufacturing facility is sold or otherwise transferred except by a medical marijuana dispensary facility. The department shall certify, if possible, at least two commercially available systems to licensees as compliant with its tracking standards and issue standards for the creation or use of other systems by licensees.

(e) Issue standards for the secure transportation of marijuana and marijuana-infused products. The department shall certify entities which demonstrate compliance with its transportation standards to transport marijuana and marijuana-infused products to a medical marijuana cultivation facility, a medical marijuana-infused products manufacturing facility, a medical marijuana dispensary facility, a medical marijuana testing facility, or another entity with a transportation certification. The department shall develop or adopt from any other governmental agency such safety and security standards as are reasonably necessary for the transportation of marijuana. Any entity licensed or certified pursuant to this section shall be allowed to transport cannabis.

(f) The department may charge a fee not to exceed $5,000 for any certification issued pursuant to this section.

(g) Prepare and transmit annually a publicly available report accounting to the governor for the efficient discharge of all responsibilities assigned to the department under this section;

(h) Establish a system to numerically score competing medical marijuana licensee and certificate applicants, only in cases where more applicants apply than the minimum number of licenses or certificates as calculated by this section, which scoring shall be limited to an analysis of the following:

(i) the character, veracity, background, qualifications, and relevant experience of principal officers or managers;

(ii) the business plan proposed by the applicant, which in the case of cultivation facilities and dispensaries shall include the ability to maintain an adequate supply of marijuana, plans to ensure safety and security of qualifying patients and the community, procedures to be used to prevent diversion, and any plan for making marijuana available to low-income qualifying patients;

(iii) site security;

(iv) experience in a legal cannabis market;

(v) in the case of medical marijuana testing facilities, the experience of their personnel with testing marijuana, food or drugs for toxins and/or potency and health care industry experience;

(vi) the potential for positive economic impact in the site community;

(vii) in the case of medical marijuana cultivation facilities, capacity or experience with agriculture, horticulture, and health care;

(viii) in the case of medical marijuana dispensary facilities, capacity or experience with health care, the suitability of the proposed location, and its accessibility for patients;

(ix) in the case of medical marijuana-infused products manufacturing facilities, capacity or experience with food and beverage manufacturing; and

(x) maintaining competitiveness in the marijuana for medical use marketplace.

In ranking applicants and awarding licenses and certificates, the department may consult or contract with other public agencies with relevant expertise regarding these factors. The department shall lift or ease any limit on the number of licensees or certificate holders in order to meet the demand for marijuana for medical use by qualifying patients.

(2) The department shall issue any rules or emergency rules necessary for the implementation and enforcement of this section and to ensure the right to, availability, and safe use of marijuana for medical use by qualifying patients. In developing such rules or emergency rules, the department may consult with other public agencies. In addition to any other rules or emergency rules necessary to carry out the mandates of this section, the department may issue rules or emergency rules relating to the following subjects:

(a) Compliance with, enforcement of, or violation of any provision of this section or any rule issued pursuant to this section, including procedures and grounds for denying, suspending, fining, restricting, or revoking a state license or certification issued pursuant to this section;

(b) Specifications of duties of officers and employees of the department;

(c) Instructions or guidance for local authorities and law enforcement officers;

(d) Requirements for inspections, investigations, searches, seizures, and such additional enforcement activities as may become necessary from time to time;

(e) Creation of a range of administrative penalties for use by the department;

(f) Prohibition of misrepresentation and unfair practices;

(g) Control of informational and product displays on licensed premises provided that the rules may not prevent or unreasonably restrict appropriate signs on the property of the medical marijuana dispensary facility, product display and examination by the qualifying patient and/or primary caregiver, listings in business directories including phone books, listings in marijuana-related or medical publications, or the sponsorship of health or not for profit charity or advocacy events;

(h) Development of individual identification cards for owners, officers, managers, contractors, employees, and other support staff of entities licensed or certified pursuant to this

section, including a fingerprint-based federal and state criminal record check in accordance with U.S. Public Law 92-544, or its successor provisions, as may be required by the department prior to issuing a card and procedures to ensure that cards for new applicants are issued within fourteen days. Applicants licensed pursuant to this section shall submit fingerprints to the Missouri state highway patrol for the purpose of conducting a state and federal fingerprint-based criminal background check. The Missouri state highway patrol, if necessary, shall forward the fingerprints to the Federal Bureau of Investigation (FBI) for the purpose of conducting a fingerprint-based criminal background check. Fingerprints shall be submitted pursuant to 43.543 and fees shall be paid pursuant to 43.530;

(i) Security requirements for any premises licensed or certified pursuant to this section, including, at a minimum, lighting, physical security, video, alarm requirements, and other minimum procedures for internal control as deemed necessary by the department to properly administer and enforce the provisions of this section, including reporting requirements for changes, alterations, or modifications to the premises;

(j) Regulation of the storage of, warehouses for, and transportation of marijuana for medical use;

(k) Sanitary requirements for, including, but not limited to, the preparation of medical marijuana-infused products;

(l) The specification of acceptable forms of picture identification that a medical marijuana dispensary facility may accept when verifying a sale;

(m) Labeling and packaging standards;

(n) Records to be kept by licensees and the required availability of the records;

(o) State licensing procedures, including procedures for renewals, reinstatements, initial licenses, and the payment of licensing fees;

(p) The reporting and transmittal of tax payments;

(q) Authorization for the department of revenue to have access to licensing information to ensure tax payment and the effective administration of this section; and

(r) Such other matters as are necessary for the fair, impartial, stringent, and comprehensive administration of this section.

(3) The department shall issue rules or emergency rules for a medical marijuana and medical marijuana-infused products independent testing and certification program for medical marijuana licensees and requiring licensees to test medical marijuana using one or more impartial, independent laboratories to ensure, at a minimum, that products sold for human consumption do not contain contaminants that are injurious to health, to ensure correct labeling and measure potency. The department shall not require any medical marijuana or medical marijuana-infused products to be tested more than once prior to sale.

(4) The department shall issue rules or emergency rules to provide for the certification of and standards for medical marijuana testing facilities, including the requirements for equipment and qualifications for personnel, but shall not require certificate holders to have any federal agency licensing or have any relationship with a federally licensed testing facility. The department shall certify, if possible, at least two entities as medical marijuana testing facilities. No medical marijuana testing facility shall be owned by an entity under substantially common control, ownership, or management as a medical marijuana cultivation facility, medical marijuana-infused product manufacturing facility, or medical marijuana dispensary facility.

(5) [The department shall maintain the confidentiality of reports or other information obtained from an applicant or licensee containing any individualized data, information, or records related to the licensee or its operation, including sales information, financial records, tax returns, credit reports, cultivation information, testing results, and security information and plans, or revealing any patient information, or any other records that are exempt from public inspection

pursuant to state or federal law. Such reports or other information may be used only for a purpose authorized by this section. Any information released related to patients may be used only for a purpose authorized by federal law and this section, including verifying that a person who presented a patient identification card to a state or local law enforcement official is lawfully in possession of such card.] Beginning December 2, 2020, all public records produced or retained pursuant to this section are subject to the general provisions of the Missouri Sunshine Law, as amended from time to time. Notwithstanding the foregoing, records containing proprietary business information obtained from an applicant or licensee are subject to closure. For documents submitted on or after December 2, 2020, the applicant or licensee shall label business information it believes to be proprietary prior to submitting it to the department. For documents submitted prior to December 2, 2020, the applicant or licensee may advise the department, through a department approved process, of any records previously submitted by the applicant or licensee it believes contain proprietary business information. Proprietary business information shall include sales information, financial records, tax returns, credit reports, cultivation information unrelated to product safety, testing results unrelated to product safety, site security information and plans, and individualized consumer information. The presence of proprietary business information shall not justify the closure of public records:

(a) identifying the applicant or licensee;

(b) relating to any citation, notice of violation, tax delinquency, or other enforcement action;

(c) relating to any public official's support or opposition relative to any applicant, licensee, or their proposed or actual operations;

(d) where disclosure is reasonably necessary for the protection of public health or safety; or

(e) that are otherwise subject to public inspection under other applicable law.

(6) Within one hundred eighty days of December 6, 2018, the department shall make available to the public license application forms and application instructions for medical marijuana cultivation facilities, medical marijuana testing facilities, medical marijuana dispensary facilities, and medical marijuana-infused products manufacturing facilities.

(7) Within one hundred eighty days of December 6, 2018, the department shall make available to the public application forms and application instructions for qualifying patient, qualifying patient cultivation, and primary caregiver identification cards. Within two hundred ten days of December 6, 2018, the department shall begin accepting applications for such identification cards.

(8) An entity may apply to the department for and obtain one or more licenses to grow marijuana as a medical marijuana cultivation facility. Each facility in operation shall require a separate license, but multiple licenses may be utilized in a single facility. Each indoor facility utilizing artificial lighting may be limited by the department to thirty thousand square feet of flowering plant canopy space. Each outdoor facility utilizing natural lighting may be limited by the department to two thousand eight hundred flowering plants. Each greenhouse facility using a combination of natural and artificial lighting may be limited by the department, at the election of the licensee, to two thousand eight hundred flowering plants or thirty thousand square feet of flowering plant canopy. The license shall be valid for three years from its date of issuance and shall be renewable, except for good cause. The department shall charge each applicant a nonrefundable fee of ten thousand dollars per license application or renewal for all applicants filing an application within three years of December 6, 2018, and shall charge each applicant a nonrefundable fee of five thousand dollars per license application or renewal thereafter. Once granted, the department shall charge each licensee an annual fee of twenty-five thousand dollars per facility license. Application and license fees shall be increased or decreased each year by the percentage of increase or decrease from the end of the previous calendar year of the Consumer Price Index, or successor index as published by the U.S. Department of Labor, or its successor agency. No more than three medical marijuana cultivation facility licenses shall be issued to any entity under substantially common control, ownership, or management.

(9) An entity may apply to the department for and obtain one or more licenses to operate a medical marijuana dispensary facility. Each facility in operation shall require a separate license. A license shall be valid for three years from its date of issuance and shall be renewable, except for good cause. The department shall charge each applicant a nonrefundable fee of six thousand dollars per license application or renewal for each applicant filing an application within three years of December 6, 2018, and shall charge each applicant a nonrefundable fee of three thousand dollars per license application or renewal thereafter. Once granted, the department shall charge each licensee an annual fee of ten thousand dollars per facility license. Application and license fees shall be increased or decreased each year by the percentage of increase or decrease from the end of the previous calendar year of the Consumer Price Index, or successor index as published by the U.S. Department of Labor, or its successor agency. No more than five medical marijuana dispensary facility licenses shall be issued to any entity under substantially common control, ownership, or management.

(10) An entity may apply to the department for and obtain one or more licenses to operate a medical marijuana-infused products manufacturing facility. Each facility in operation shall require a separate license. A license shall be valid for three years from its date of issuance and shall be renewable, except for good cause. The department shall charge each applicant a nonrefundable fee of six thousand dollars per license application or renewal for each applicant filing an application within three years of December 6, 2018, and shall charge each applicant a nonrefundable fee of three thousand dollars per license application or renewal thereafter. Once granted, the department shall charge each licensee an annual fee of ten thousand dollars per facility license. Application and license fees shall be increased or decreased each year by the percentage of increase or decrease from the end of the previous calendar year of the Consumer Price Index, or successor index as published by the U.S. Department of Labor, or its successor agency. No more than three medical marijuana-infused products manufacturing facility licenses shall be issued to any entity under substantially common control, ownership, or management.

(11) Any applicant for a license authorized by this section may prefile their application fee with the department beginning 30 days after December 6, 2018.

(12) Except for good cause, a qualifying patient or his or her primary caregiver may obtain an identification card from the department to cultivate up to six flowering marijuana plants for the exclusive use of that qualifying patient. The card shall be valid for twelve months from its date of issuance and shall be renewable with the annual submittal of a new or updated physician's certification. The department shall charge an annual fee for the card of one hundred dollars, with such rate to be increased or decreased each year by the percentage of increase or decrease from the end of the previous calendar year of the Consumer Price Index, or successor index as published by the U.S. Department of Labor, or its successor agency.

(13) The department may set a limit on the amount of marijuana that may be purchased by or on behalf of a single qualifying patient in a thirty-day period, provided that limit is not less than four ounces of dried, unprocessed marijuana, or its equivalent. Any such limit shall not apply to a qualifying patient with written certification from two independent physicians that there are compelling reasons why the qualifying patient needs a greater amount than the limit established by the department.

(14) The department may set a limit on the amount of marijuana that may be possessed by or on behalf of each qualifying patient, provided that limit is not less than a sixty-day supply of dried, unprocessed marijuana, or its equivalent. A primary caregiver may possess a separate legal limit for each qualifying patient under their care and a separate legal limit for themselves if they are a qualifying patient. Qualifying patients cultivating marijuana for medical use may possess up to a ninety-day supply, so long as the supply remains on property under their control. Any such limit shall not apply to a qualifying patient with written certification from two independent physicians that there are compelling reasons for additional amounts. Possession of between the legal limit and up to twice the legal limit shall subject the possessor to department sanctions, including an administrative penalty and loss of their patient identification card for up to a year. Purposefully possessing amounts in excess of twice the legal limit shall be punishable by imprisonment of up to one year and a fine of up to two thousand dollars.

(15) The department may restrict the aggregate number of licenses granted for medical marijuana cultivation facilities, provided, however, that the number may not be limited to fewer

than one license per every one hundred thousand inhabitants, or any portion thereof, of the state of Missouri, according to the most recent census of the United States. A decrease in the number of inhabitants in the state of Missouri shall have no impact.

(16) The department may restrict the aggregate number of licenses granted for marijuana-infused products manufacturing facilities, provided, however, that the number may not be limited to fewer than one license per every seventy thousand inhabitants, or any portion thereof, of the state of Missouri, according to the most recent census of the United States. A decrease in the number of inhabitants in the state of Missouri shall have no impact.

(17) The department may restrict the aggregate number of licenses granted for medical marijuana dispensary facilities, provided, however, that the number may not be limited to fewer than twenty-four licenses in each United States congressional district in the state of Missouri pursuant to the map of each of the eight congressional districts as drawn and effective on December 6, 2018. Future changes to the boundaries of or the number of congressional districts shall have no impact.

(18) The department shall begin accepting license and certification applications for medical marijuana dispensary facilities, medical marijuana testing facilities, medical marijuana cultivation facilities, medical marijuana-infused products manufacturing facilities, seed-to-sale tracking systems, and for transportation of marijuana no later than two hundred forty days after December 6, 2018. Applications for licenses and certifications under this section shall be approved or denied by the department no later than one hundred fifty days after their submission. If the department fails to carry out its nondiscretionary duty to approve or deny an application within one hundred fifty days of submission, an applicant may immediately seek a court order compelling the department to approve or deny the application.

(19) Qualifying patients under this section shall obtain [and annually renew] an identification card or cards from the department. The department shall charge a fee of twenty-five dollars per year per card with such fee to be increased or decreased each year by the percentage of increase or decrease from the end of the previous calendar year of the Consumer Price Index, or successor index as published by the U.S. Department of Labor or its successor agency. Cards shall be valid for three years and may be renewed with a new physician's certification. Upon receiving an application for a qualifying patient identification card or qualifying patient cultivation identification card, the department shall, within thirty days, either issue the card or provide a written explanation for its denial. If the department fails to deny and fails to issue a card to an eligible qualifying patient within thirty days, then their physician certification shall serve as their qualifying patient identification card or qualifying patient cultivation identification card for up to one year from the date of physician certification. All initial applications for or renewals of a qualifying patient identification card or qualifying patient cultivation identification card shall be accompanied by a physician certification that is less than thirty days old.

(20) Primary caregivers under this section shall obtain [and annually renew] an identification card from the department. Cards shall be valid for three years. The department shall charge a fee of [twenty-five] seventy-five dollars [per year], with such fee to be increased or decreased each year by the percentage of increase or decrease from the end of the previous calendar year of the Consumer Price Index, or successor index as published by the U.S. Department of Labor, or its successor agency. Upon receiving an application for a primary caregiver identification card, the department shall, within thirty days, either issue the card or provide a written explanation for its denial.

(21) All marijuana for medical use sold in Missouri shall be cultivated in a licensed medical marijuana cultivation facility located in Missouri.

(22) All marijuana-infused products for medical use sold in the state of Missouri shall be manufactured in a medical marijuana-infused products manufacturing facility.

(23) The denial of a license, license renewal, or identification card by the department shall be appealable to the administrative hearing commission, or its successor entity. Following the exhaustion of administrative review, denial of a license, license renewal, or identification card by the department shall be subject to judicial review as provided by law.

(24) No elected official shall interfere directly or indirectly with the department's obligations and activities under this section.

(25) The department shall not have the authority to apply or enforce any rule or regulation that would impose an undue burden on any one or more licensees or certificate holders, any qualifying patients, or act to undermine the purposes of this section.

4. Taxation and Reporting.

(1) A tax is levied upon the retail sale of marijuana for medical use sold at medical marijuana dispensary facilities within the state. The tax shall be at a rate of four percent of the retail price. The tax shall be collected by each licensed medical marijuana dispensary facility and paid to the department of revenue. After retaining no more than five percent for its actual collection costs, amounts generated by the tax levied in this section shall be deposited by the department of revenue into the Missouri veterans' health and care fund. Licensed entities making retail sales within the state shall be allowed approved credit for returns provided the tax was paid on the returned item and the purchaser was given the refund or credit.

(2) There is hereby created in the state treasury the "Missouri Veterans' Health and Care Fund", which shall consist of taxes and fees collected under this section. The state treasurer shall be custodian of the fund, and he or she shall invest monies in the fund in the same manner as other funds are invested. Any interest and monies earned on such investments shall be credited to the fund. Notwithstanding any other provision of law, any monies remaining in the fund at the end of a biennium shall not revert to the credit of the general revenue fund. The commissioner of administration is authorized to make cash operating transfers to the fund for purposes of meeting the cash requirements of the department in advance of it receiving annual application, licensing, and tax revenue, with any such transfers to be repaid as provided by law. The fund shall be a dedicated fund and shall stand appropriated without further legislative action as follows:

(a) First, to the department, an amount necessary for the department to carry out this section, including repayment of any cash operating transfers, payments made through contract or agreement with other state and public agencies necessary to carry out this section, and a reserve fund to maintain a reasonable working cash balance for the purpose of carrying out this section;

(b) Next, the remainder of such funds shall be transferred to the Missouri veterans commission for health and care services for military veterans, including the following purposes: operations, maintenance and capital improvements of the Missouri veterans homes, the Missouri service officer's program, and other services for veterans approved by the commission, including, but not limited to, health care services, mental health services, drug rehabilitation services, housing assistance, job training, tuition assistance, and housing assistance to prevent homelessness. The Missouri veterans commission shall contract with other public agencies for the delivery of services beyond its expertise.

(c) All monies from the taxes authorized under this subsection shall provide additional dedicated funding for the purposes enumerated above and shall not replace existing dedicated funding.

(3) For all retail sales of marijuana for medical use, a record shall be kept by the seller which identifies, by secure and encrypted patient number issued by the seller to the qualifying patient involved in the sale, all amounts and types of marijuana involved in the sale and the total amount of money involved in the sale, including itemizations, taxes collected and grand total sale amounts. All such records shall be kept on the premises in a readily available format and be made available for review by the department and the department of revenue upon request. Such records shall be retained for five years from the date of the sale.

(4) The tax levied pursuant to this subsection is separate from, and in addition to, any general state and local sales and use taxes that apply to retail sales, which shall continue to be collected and distributed as provided by general law.

(5) Except as authorized in this subsection, no additional taxes shall be imposed on the sale of marijuana for medical use.

(6) The fees and taxes provided for in this Article XIV, Section 1 shall be fully enforceable notwithstanding any other provision in this Constitution purportedly prohibiting or restricting the taxes and fees provided for herein.

(7) The unexpended balance existing in the fund shall be exempt from the provisions of section 33.080 relating to the transfer of unexpended balances to the general revenue fund.

5. Additional Patient, Physician, Caregiver and Provider Protections.

(1) Except as provided in this section, the possession of marijuana in quantities less than the limits of this section, or established by the department, and transportation of marijuana from a medical marijuana dispensary facility to the qualifying patient's residence shall not subject the possessor to arrest, criminal or civil liability, or sanctions under Missouri law, provided that the possessor produces on demand to the appropriate authority a valid qualifying patient identification card; a valid qualifying patient cultivation identification card; a valid physician certification while making application for an identification card; or a valid primary caregiver identification card. Production of the respective equivalent identification card or authorization issued by another state or political subdivision of another state shall also meet the requirements of this subdivision and shall allow for the purchase of marijuana for use by a non-resident patient from a medical marijuana dispensary facility as permitted by this section and in compliance with department regulations.

(2) No patient shall be denied access to or priority for an organ transplant because they hold a qualifying patient identification card or use marijuana for medical use.

(3) A physician shall not be subject to criminal or civil liability or sanctions under Missouri law or discipline by the Missouri state board of registration for the healing arts, or its successor agency, for owning, operating, investing in, being employed by, or contracting with any entity licensed or certified pursuant to this section or issuing a physician certification to a patient diagnosed with a qualifying medical condition in a manner consistent with this section and legal standards of professional conduct.

(4) A health care provider shall not be subject to civil or criminal prosecution under Missouri law, denial of any right or privilege, civil or administrative penalty or sanction, or disciplinary action by any accreditation or licensing board or commission for owning, operating, investing in, being employed by, or contracting with any entity licensed or certified pursuant to this section or providing health care services that involve the medical use of marijuana consistent with this section and legal standards of professional conduct.

(5) A medical marijuana testing facility shall not be subject to civil or criminal prosecution under Missouri law, denial of any right or privilege, civil or administrative penalty or sanction, or disciplinary action by any accreditation or licensing board or commission for providing laboratory testing services that relate to the medical use of marijuana consistent with this section and otherwise meeting legal standards of professional conduct.

(6) A health care provider shall not be subject to mandatory reporting requirements for the medical use of marijuana by nonemancipated qualifying patients under eighteen years of age in a manner consistent with this section and with consent of a parent or guardian.

(7) A primary caregiver shall not be subject to criminal or civil liability or sanctions under Missouri law for purchasing, transporting, or administering marijuana for medical use to a qualifying patient or participating in the patient cultivation of up to six flowering marijuana plants per patient in a manner consistent with this section and generally established legal standards of personal or professional conduct.

(8) An attorney shall not be subject to disciplinary action by the state bar association or other professional licensing body for owning, operating, investing in, being employed by, contracting with, or providing legal assistance to prospective or licensed medical marijuana testing facilities, medical marijuana cultivation facilities, medical marijuana dispensary facilities, medical marijuana-infused products manufacturing facilities, qualifying patients, primary caregivers, physicians, health care providers or others related to activity that is no longer subject to criminal penalties under state law pursuant to this section.

(9) Actions and conduct by qualifying patients, primary caregivers, medical marijuana testing facilities, medical marijuana cultivation facilities, medical marijuana-infused products manufacturing facilities, or medical marijuana dispensary facilities licensed or registered with the department, or their employees or agents, as permitted by this section and in compliance with department regulations and other standards of legal conduct, shall not be subject to criminal or civil liability or sanctions under Missouri law, except as provided for by this section.

(10) Nothing in this section shall provide immunity for negligence, either common law or statutorily created, nor criminal immunities for operating a vehicle, aircraft, dangerous device, or navigating a boat under the influence of marijuana.

(11) It is the public policy of the state of Missouri that contracts related to marijuana for medical use that are entered into by qualifying patients, primary caregivers, medical marijuana testing facilities, medical marijuana cultivation facilities, medical marijuana-infused products manufacturing facilities, or medical marijuana dispensary facilities and those who allow property to be used by those entities, should be enforceable. It is the public policy of the state of Missouri that no contract entered into by qualifying patients, primary caregivers, medical marijuana testing facilities, medical marijuana cultivation facilities, medical marijuana-infused products manufacturing facilities, or medical marijuana dispensary facilities, or by a person who allows property to be used for activities that are exempt from state criminal penalties by this section, shall be unenforceable on the basis that activities related to medical marijuana may be prohibited by federal law.

6. Legislation.

Nothing in this section shall limit the general assembly from enacting laws consistent with this section, or otherwise effectuating the patient rights of this section. The legislature shall not enact laws that hinder the right of qualifying patients to access marijuana for medical use as granted by this section.

7. Additional Provisions.

(1) Nothing in this section permits a person to:

(a) Consume marijuana for medical use in a jail or correctional facility;

(b) Undertake any task under the influence of marijuana when doing so would constitute negligence or professional malpractice; or

(c) Operate, navigate, or be in actual physical control of any dangerous device or motor vehicle, aircraft or motorboat while under the influence of marijuana; or

(d) Bring a claim against any employer, former employer, or prospective employer for wrongful discharge, discrimination, or any similar cause of action or remedy, based on the employer, former employer, or prospective employer prohibiting the employee, former employee, or prospective employee from being under the influence of marijuana while at work or disciplining the employee or former employee, up to and including termination from employment, for working or attempting to work while under the influence of marijuana.

(2) No medical marijuana cultivation facility, medical marijuana testing facility, medical marijuana dispensary facility, or medical marijuana-infused products manufacturing facility, or entity with a transportation certification shall be owned, in whole or in part, or have as an officer, director, board member, manager, or employee, any individual with a disqualifying felony offense. A "disqualifying felony offense" is a violation of, and conviction or guilty plea to, state or federal law that is, or would have been, a felony under Missouri law, regardless of the sentence imposed, unless the department determines that:

(a) The person's conviction was for the medical use of marijuana or assisting in the medical use of marijuana; or

(b) The person's conviction was for a nonviolent crime for which he or she was not incarcerated and that is more than five years old; or

(c) More than five years have passed since the person was released from parole or probation, and he or she has not been convicted of any subsequent criminal offenses.

The department may consult with and rely on the records, advice and recommendations of the attorney general and the department of public safety, or their successor entities, in applying this subdivision.

(3) All medical marijuana cultivation facility, medical marijuana dispensary facility, and medical marijuana-infused products manufacturing facility licenses, entities with medical marijuana testing facility certifications, and entities with transportation certifications shall be held by entities that are majority owned, directly or indirectly, by natural persons who have been citizens of the state of Missouri for at least one year prior to the application for such license or certification. Notwithstanding the foregoing, persons or entities outside the state of Missouri may own a minority stake, directly or indirectly, in such entities.

(4) No medical marijuana cultivation facility, medical marijuana dispensary facility, or medical marijuana-infused products manufacturing facility shall manufacture, package or label marijuana or marijuana-infused products in a false or misleading manner. No person shall sell any product in a manner designed to cause confusion between a marijuana or marijuana-infused product and any product not containing marijuana. A violation of this subdivision shall be punishable by an appropriate and proportional department sanction, up to and including loss of license.

(5) All edible marijuana-infused products shall be sold in individual, child-resistant containers that are labeled with dosage amounts, instructions for use, and estimated length of effectiveness. All marijuana and marijuana-infused products shall be sold in containers clearly and conspicuously labeled as mandated by the department [, in a font size at least as large as the largest other font size used on the package,] as containing "Marijuana", or a "Marijuana-Infused Product". Violation of this prohibition shall subject the violator to department sanctions, including an administrative penalty.

(6) No individual shall serve as the primary caregiver for more than three qualifying patients.

(7) No qualifying patient shall consume marijuana for medical use in a public place, unless provided by law. Violation of this prohibition shall subject the violator to sanctions as provided by general law.

(8) No person shall extract resins from marijuana using dangerous materials or combustible gases without a medical marijuana-infused products manufacturing facility license. Violation of this prohibition shall subject the violator to department sanctions, including an administrative penalty and, if applicable, loss of their identification card, certificate, or license for up to one year.

(9) All qualifying patient cultivation shall take place in an enclosed, locked facility that is equipped with security devices that permit access only by the qualifying patient or by such patient's primary caregiver. Two qualifying patients, who both hold valid qualifying patient cultivation identification cards, may share one enclosed, locked facility. No more than twelve qualifying patient or primary caregiver cultivated flowering marijuana plants may be cultivated in a single, enclosed locked facility, except when a primary caregiver also holds a qualifying patient cultivation identification card, in which case no more than eighteen flowering marijuana plants may be cultivated in a single, enclosed, locked facility.

(10) No medical marijuana cultivation facility, medical marijuana dispensary facility, medical marijuana-infused products manufacturing facility, medical marijuana testing facility, or entity with a transportation certification shall assign, sell, give, lease, sublicense, or otherwise transfer its license or certificate to any other entity without the express consent of the department, not to be unreasonably withheld.

(11) Unless allowed by the local government, no new medical marijuana cultivation facility, medical marijuana testing facility, medical marijuana dispensary facility, or medical marijuana-infused products manufacturing facility shall be initially sited within one thousand feet of any then-existing elementary or secondary school, child day-care center, or church. No local

government shall prohibit medical marijuana cultivation facilities, medical marijuana testing facilities, medical marijuana-infused products manufacturing facilities, or medical marijuana dispensary facilities, or entities with a transportation certification either expressly or through the enactment of ordinances or regulations that make their operation unduly burdensome in the jurisdiction. However, local governments may enact ordinances or regulations not in conflict with this section, or with regulations enacted pursuant to this section, governing the time, place, and manner of operation of such facilities in the locality. A local government may establish civil penalties for violation of an ordinance or regulations governing the time, place, and manner of operation of a medical marijuana cultivation facility, medical marijuana testing facility, medical marijuana-infused products manufacturing facility, medical marijuana dispensary facility, or entity holding a transportation certification that may operate in such locality. The only local government ordinances or regulations that are binding on a marijuana facility are those of the local government where the marijuana facility is located.

(12) Unless superseded by federal law or an amendment to this Constitution, a physician shall not certify a qualifying condition for a patient by any means other than providing a physician certification for the patient, whether handwritten, electronic, or in another commonly used format. [A qualifying patient must obtain a new physician certification at least annually.]

(13) A physician shall not issue a certification for the medical use of marijuana for a nonemancipated qualifying patient under the age of eighteen without the written consent of the qualifying patient's parent or legal guardian. The department shall not issue a qualifying patient identification card on behalf of a nonemancipated qualifying patient under the age of eighteen without the written consent of the qualifying patient's parent or legal guardian. Such card shall be issued to one of the parents or guardians and not directly to the patient. Only a parent or guardian may serve as a primary caregiver for a nonemancipated qualifying patient under the age of eighteen. Only the qualifying patient's parent or guardian shall purchase or possess medical marijuana for a nonemancipated qualifying patient under the age of eighteen. A parent or guardian shall supervise the administration of medical marijuana to a nonemancipated qualifying patient under the age of eighteen.

(14) Nothing in this section shall be construed as mandating health insurance coverage of medical marijuana for qualifying patient use.

(15) Real and personal property used in the cultivation, manufacture, transport, testing, distribution, sale, and administration of marijuana for medical use or for activities otherwise in compliance with this section shall not be subject to asset forfeiture solely because of that use.

8. Severability.

The provisions of this section are severable, and if any clause, sentence, paragraph or section of this measure, or an application thereof, is adjudged invalid by any court of competent jurisdiction, the other provisions shall continue to be in effect to the fullest extent possible.

9. Effective Date.

The provisions of this section shall become effective on December 6, 2018.

Section 2. Marijuana Legalization, Regulation, and Taxation

1. Purpose.

The purpose of this section is to make marijuana legal under state and local law for adults twenty-one years of age or older, and to control the commercial production and distribution of marijuana under a system that licenses, regulates, and taxes the businesses involved while protecting public health. The intent is to prevent arrest and penalty for personal possession and cultivation of limited amounts of marijuana by adults twenty-one years of age or older; remove the commercial production and distribution of marijuana from the illicit market; prevent revenue generated from commerce in marijuana from going to criminal enterprises; prevent the distribution of marijuana to persons under twenty-one years of age; prevent the diversion of marijuana to illicit markets; protect health by ensuring the safety of marijuana and products containing marijuana; and ensure the security of marijuana facilities. To the fullest extent

possible, this section shall be interpreted in accordance with the purpose and intent set forth in this section.

This section is not intended to allow for the public use of marijuana, driving while intoxicated by marijuana, the use of marijuana in the workplace, or the use of marijuana by persons under twenty-one years of age.

2. Definitions.

(1) "Consumer" means a person who is at least twenty-one years of age.

(2) "Department" means the department of health and senior services, or its successor agency.

(3) "Entity" means a natural person, corporation, professional corporation, nonprofit corporation, cooperative corporation, unincorporated association, business trust, limited liability company, general or limited partnership, limited liability partnership, joint venture, or any other legal entity.

(4) "Flowering plant" means a marijuana plant from the time it exhibits the first signs of sexual maturity through harvest.

(5) "Local government" means, in the case of an incorporated area, a village, town, or city and, in the case of an unincorporated area, a county.

(6) "Marijuana" means *cannabis indica*, *cannabis sativa*, and *cannabis ruderalis*, hybrids of such species, and any other strains commonly understood within the scientific community to constitute marijuana or cannabis, as well as resin extracted from the plant and marijuana-infused products. "Marijuana" does not include industrial hemp, including any part of that plant, including the seeds thereof and all derivatives, extracts, cannabinoids, isomers, acids, salts, and salts of isomers, whether growing or not, with a delta-9 tetrahydrocannabinol concentration of not more than three-tenths of one percent on a dry weight basis, or commodities or products manufactured with industrial hemp, or any other ingredient combined with marijuana to prepare topical or oral administrations, food, drink, or other products.

(7) "Marijuana accessories" means any equipment, product, material, or combination of equipment, products, or materials, which is specifically designed for use in planting, propagating, cultivating, growing, harvesting, manufacturing, compounding, converting, producing, processing, preparing, testing, analyzing, packaging, repackaging, storing, containing, ingesting, inhaling, or otherwise introducing marijuana into the human body.

(8) "Marijuana Cultivation Facility" means an entity licensed by the department to acquire, cultivate, process, store, transport, and sell marijuana to a marijuana dispensary facility, marijuana testing facility, or to a marijuana-infused products manufacturing facility.

(9) "Marijuana Dispensary Facility" means an entity licensed by the department to acquire, store, sell, transport, and deliver marijuana, marijuana-infused products, and marijuana accessories as provided for in this section to consumers.

(10) "Marijuana Facility" means a marijuana cultivation facility, marijuana dispensary facility, marijuana testing facility, marijuana-infused products manufacturing facility, marijuana microbusiness facility, or any other type of marijuana-related facility or business licensed or certified by the department pursuant to this section.

(11) "Marijuana-Infused Products" means products that are infused with marijuana or an extract thereof and are intended for use or consumption other than by smoking, including, but not limited to, edible products, ointments, tinctures and concentrates.

(12) "Marijuana-Infused Products Manufacturing Facility" means an entity licensed by the department to acquire, store, manufacture, transport, and sell marijuana-infused products to a marijuana dispensary facility, a marijuana testing facility, or to another marijuana-infused products manufacturing facility.

(13) "Marijuana Microbusiness Facility" means an entity licensed to cultivate not more than one hundred and fifty flowering plants, process, store, transport, sell, and package the marijuana it cultivates or that it obtains from another marijuana microbusiness facility, and acquire, store, manufacture, transport, deliver, sell, or otherwise transfer marijuana and marijuana-infused products it cultivates and processes, or that it obtains from other marijuana microbusiness

facilities, to marijuana dispensary facilities, marijuana testing facilities, other marijuana microbusiness facilities, or consumers.

(14) "Marijuana Testing Facility" means an entity certified by the department to acquire, test, certify, and transport marijuana.

(15) "Owner" means an officer, board member, or other individual who has a financial (other than a security interest, lien, or encumbrance) or voting interest in ten percent or greater of a marijuana facility.

(16) "Unduly burdensome" means that the measures necessary to comply with the rules or ordinances adopted pursuant to this section subject licensees or potential licensees to such a high investment of money, time, or any other resource or asset that a reasonably prudent businessperson would not operate the marijuana facility.

3. Limitations.

(1) Except as otherwise provided in this article, this section does not preclude, limit, or affect laws that assign liability relative to, prohibit, or otherwise regulate:

(a) Delivery or distribution of marijuana or marijuana accessories, with or without consideration, to a person younger than twenty-one years of age;

(b) Purchase, possession, use, or transport of marijuana or marijuana accessories by a person younger than twenty-one years of age;

(c) Consumption of marijuana by a person younger than twenty-one years of age;

(d) Operating or being in physical control of any motor vehicle, train, aircraft, motorboat, or other motorized form of transport while intoxicated by marijuana;

(e) Consumption of marijuana while operating or being in physical control of a motor vehicle, train, aircraft, motorboat, or other motorized form of transport while it is being operated;

(f) Smoking marijuana within a motor vehicle, train, aircraft, motorboat, or other motorized form of transport while it is being operated;

(g) Possession or consumption of marijuana or possession of marijuana accessories on the grounds of a public or private preschool, elementary or secondary school, institution of higher education, in a school bus, or on the grounds of any correctional facility;

(h) Smoking marijuana in a location where smoking tobacco is prohibited;

(i) Consumption of marijuana in a public place, other than in an area licensed by the department for consumption;

(j) Conduct that endangers others;

(k) Undertaking any task while under the influence of marijuana, if doing so would constitute negligence or professional malpractice; or

(l) Performing solvent-based extractions on marijuana using solvents other than water, glycerin, propylene glycol, vegetable oil, or food-grade ethanol, unless licensed for this activity by the department.

(2) This section does not limit any privileges, rights, immunities, or defenses of a person or entity as provided in section 1 of this article, or any other law of this state allowing for or regulating marijuana for medical use.

(3) This section does not require an employer to permit or accommodate conduct otherwise allowed by this section in any workplace or on the employer's property. This section does not prohibit an employer from disciplining an employee for violation of a workplace drug policy or for working while intoxicated by marijuana. This section does not prevent an employer from refusing to hire, discharging, disciplining, or otherwise taking an adverse employment action

against a person with respect to hire, tenure, terms, conditions, or privileges of employment because of that person's violation of a workplace drug policy or because that person was working while intoxicated by marijuana.

(4) This section allows a person to prohibit or otherwise regulate the consumption, cultivation, distribution, processing, sale, or display of marijuana, marijuana-infused products, and marijuana accessories on private property the person owns, leases, occupies, or manages, except that a lease agreement executed after the enactment of this section may not prohibit a tenant from lawfully possessing and consuming marijuana by means other than smoking.

4. Regulation of Marijuana.

(1) In carrying out the implementation of this section, the department shall have the authority to:

(a) Grant or refuse state licenses for the cultivation, manufacture, dispensing, and sale of marijuana as provided by law; suspend, fine, restrict, or revoke such licenses upon a violation of this section or a rule promulgated pursuant to this section; and impose any reasonable administrative penalty authorized by this section or any rule promulgated pursuant to this section;

(b) Promulgate rules and emergency rules necessary for the proper regulation and control of the cultivation, manufacture, dispensing, and sale of marijuana and for the enforcement of this section so long as such rules are reasonable and not unduly burdensome;

(c) Develop such forms, certificates, licenses, identification cards, and applications as are necessary for, or reasonably related to, the administration of this section or any of the rules promulgated under this section;

(d) Require a seed-to-sale tracking system that tracks marijuana from either the seed or immature plant stage until the marijuana or marijuana-infused product is sold to a consumer to ensure that no marijuana grown by a marijuana cultivation facility or marijuana microbusiness facility or manufactured by a marijuana-infused products manufacturing facility or marijuana microbusiness facility is sold or otherwise transferred to a consumer except by a marijuana dispensary facility or a marijuana microbusiness facility. The department shall certify, if possible, at least two commercially available systems to licensees as compliant with its tracking standards and issue standards for the creation or use of other systems by licensees;

(e) Issue standards for the secure transportation of marijuana and marijuana-infused products. The department shall certify entities that demonstrate compliance with its transportation standards to transport marijuana and marijuana-infused products to a marijuana cultivation facility, marijuana-infused products manufacturing facility, marijuana dispensary facility, marijuana microbusiness facility, marijuana testing facility, or another entity with a transportation certification. The department shall develop or adopt from any other governmental agency such safety and security standards as are reasonably necessary for the transportation of marijuana. Any entity licensed or certified pursuant to this section shall be allowed to transport its own inventory and products in compliance with department transportation rules;

(f) Promulgate rules and emergency rules specific to the licensing, regulation, and oversight of marijuana microbusiness facilities;

(g) Provide for the issuance of additional types or classes of licenses to operate marijuana-related businesses that allow for only limited processing, transportation, delivery, or storage of marijuana, licenses that allow for the consumption of marijuana within designated, age-restricted areas, and licenses intended to facilitate scientific research or education;

(h) Prepare and transmit annually a publicly available report accounting to the governor, the general assembly, and the public for the efficient discharge of all responsibilities assigned to the department under this section;

(i) Establish a system to numerically score competing marijuana license and certificate applicants, including marijuana microbusiness applicants, only in cases where more applicants apply than the number of licenses available, in which scoring shall be limited to an analysis of the following:

(i) The character, veracity, background, qualifications, and relevant experience of principal officers or managers;

(ii) The business plan proposed by the applicant, which in the case of cultivation facilities and dispensaries shall include the ability to maintain an adequate supply of marijuana, and for all facilities shall include procedures to be used to prevent product diversion;

(iii) Site security;

(iv) In the case of licenses other than the microbusiness license, testing certification, or transport certification, experience as an owner or employee of a Missouri marijuana microbusiness facility;

(v) In the case of marijuana testing facilities, the experience of their personnel with testing marijuana, food or drugs for toxins and potency and health care industry experience;

(vi) The potential for positive economic impact in the site community;

(vii) In the case of marijuana cultivation facilities and marijuana microbusiness facilities, capacity or experience with agriculture and horticulture;

(viii) In the case of marijuana dispensary facilities, the suitability of the proposed location for consumer access, and experience as an owner or employee of a Missouri marijuana dispensary facility or Missouri medical marijuana dispensary facility;

(ix) In the case of marijuana-infused products manufacturing facilities, capacity or experience with food and beverage manufacturing or manufacturing marijuana-infused products;

(x) Maintaining competitiveness in the marijuana marketplace; and

(xi) Whether there is an over-concentration of marijuana facilities within the boundaries of any particular local government.

(j) In ranking applicants and awarding licenses and certificates, the department may consult or contract with other public agencies with relevant expertise regarding these factors.

(2) The department shall issue, at a minimum, the same number of marijuana cultivation facility licenses as are issued for medical marijuana cultivation facilities under section 1 of this article, the same number of marijuana-infused products manufacturing facility licenses as are issued for medical marijuana-infused products manufacturing facilities under section 1, the same number of marijuana dispensary facility licenses with the same congressional distribution requirements as are issued to medical marijuana dispensary facilities under section 1, in addition to the minimum number of marijuana microbusiness licenses as are required under this section. The department may lift or ease any limit on the number of licensees or certificate holders in order to meet the demand for marijuana by consumers in the state and to ensure a competitive market while also preventing an over-concentration of marijuana facilities within the boundaries of any particular local government.

(3) If marijuana cultivation facility licenses, marijuana-infused products manufacturing facility licenses, or marijuana dispensary facility licenses become available so that the number of total licenses in any respective category falls below the minimum required under this article, section, and subsection, the department shall award at least fifty percent of new licenses available to satisfy the minimum requirement to applicants who are:

(a) Owners of a marijuana microbusiness facility that has been in operation for at least one year and is in good standing with the department;

(b) At least fifty percent owned by natural persons who qualified as economically disadvantaged owners or disabled veterans at the time they applied for and received the marijuana microbusiness facility license; and

(c) Otherwise qualified for the license.

(4) The department may issue any rules or emergency rules necessary for the implementation and enforcement of this section and to ensure the right to, availability, and safe use of marijuana by consumers. In developing such rules or emergency rules, the department may consult or contract with other public agencies. In addition to any other rules or emergency rules necessary to carry out the mandates of this section, the department shall issue rules or emergency rules relating to the following subjects:

(a) Procedures for issuing a license and for renewing, suspending, and revoking a license;

(b) Qualifications for licensure that are directly and demonstrably related to the operation of a marijuana facility;

(c) Requirements and standards for safe cultivation, processing, and distribution of marijuana and marijuana-infused products by marijuana facilities, including health standards to ensure the safe preparation of marijuana-infused products and prohibitions on pesticides that are not safe for use on marijuana;

(d) Testing, packaging, and labeling standards, procedures, and requirements for marijuana and marijuana-infused products and a requirement that a representative sample of marijuana be tested by a marijuana testing facility to ensure public health;

(e) Labeling standards that protect public health by requiring the listing of pharmacologically active ingredients, including, but not limited to, tetrahydrocannabinol (THC), cannabidiol (CBD), and other cannabinoid content, the THC and other cannabinoid amount in milligrams per serving, the number of servings per package, and quantity limits per sale to comply with the allowable possession amount;

(f) Requirements that packaging and labels shall not be made to be attractive to children, required warning labels, and that marijuana and marijuana-infused products be sold in resealable, child-resistant packaging to protect public health;

(g) Security requirements, including lighting, physical security, and alarm requirements, and requirements for securely transporting marijuana between marijuana facilities;

(h) Record keeping requirements for marijuana facilities and monitoring requirements to track the transfer of marijuana by licensees;

(i) Restrictions on advertising, marketing, and display of marijuana, marijuana-infused products, marijuana accessories, and marijuana facilities;

(j) A plan to promote and encourage ownership and employment in the marijuana industry by people from political subdivisions and districts that are economically distressed and to positively impact those political subdivisions and districts;

(k) Administrative penalties for failure to comply with any rule promulgated pursuant to this section or for any violation of rules and regulations adopted pursuant to this section by a licensee, including administrative fines and suspension, revocation, or restriction of a license. The licensee may choose to challenge any penalties imposed by the department through the Administrative Hearing Commission, or its successor entity. Pursuant to § 536.100 R.S.Mo., or successor provisions, any licensee who has exhausted all administrative remedies provided by law and who is aggrieved by a final decision in a contested case is entitled to judicial review;

(l) Reporting and transmittal of tax payments required under this section;

(m) Authorization for the department of revenue to have access to licensing information to ensure tax payment and the effective administration of this section; and

(n) Such other matters as are necessary for the fair, impartial, stringent, and comprehensive administration of this section.

(5) The department shall issue rules or emergency rules for marijuana and marijuana-infused products independent testing and certification program for marijuana facility licensees and requiring licensees to test marijuana using one or more impartial, independent laboratory or laboratories to ensure, at a minimum, correct labeling, potency measurement, and that products sold for human consumption do not contain contaminants that are potentially injurious to public health.

(6) The department shall issue rules or emergency rules to provide for the certification of and standards for marijuana testing facilities, including the requirements for equipment and qualifications for personnel, but shall not require certificate holders to have any federal agency licensing or have any relationship with a federally licensed testing facility. The department shall certify, if possible, at least two entities as marijuana testing facilities. No marijuana testing facility shall be owned by an entity under substantially common control, ownership, or management as a marijuana cultivation facility, marijuana-infused products manufacturing facility, marijuana microbusiness facility, or marijuana dispensary facility.

(7) All public records produced or retained pursuant to this section are subject to the general provisions of the Missouri Sunshine Law, as amended from time to time. Notwithstanding the foregoing, public records containing proprietary business information obtained from an applicant or licensee are subject to closure. The applicant or licensee shall label business information it believes to be proprietary prior to submitting it to the department. Proprietary business information shall include sales information, financial records, tax returns, credit reports, cultivation information unrelated to product safety, testing results unrelated to product safety, site security information and plans, and individualized consumer information. The presence of proprietary business information shall not justify the closure of public records:

(a) Identifying the applicant or licensee;

(b) Relating to any citation, notice of violation, tax delinquency, or other enforcement action;

(c) Relating to any public official's support or opposition relative to any applicant, licensee, or their proposed or actual operations;

(d) Where disclosure is reasonably necessary for the protection of public health or safety; or

(e) That are otherwise subject to public inspection under applicable law.

(8) Within two hundred and seventy days of the effective date of this section, the department shall make available to the public license application forms and application instructions for marijuana cultivation facilities, marijuana testing facilities, marijuana dispensary facilities, marijuana microbusiness facilities, marijuana-infused products manufacturing facilities, and any other license types and certifications it deems necessary.

(9) An entity may apply to the department for and obtain one or more licenses to grow marijuana as a marijuana cultivation facility. Each facility in operation shall require a separate license, but multiple licenses may be utilized in a single facility. Each indoor facility utilizing artificial lighting may be limited by the department to thirty thousand square feet of flowering plant canopy space. Each outdoor facility utilizing natural lighting may be limited by the department to two thousand eight hundred flowering plants. Each greenhouse facility using a combination of natural and artificial lighting may be limited by the department, at the election of the licensee, to two thousand eight hundred flowering plants or thirty thousand square feet of flowering plant canopy. The license shall be valid for three years from its date of issuance and shall be renewable, except for good cause. The department shall charge each applicant a non-refundable fee of twelve thousand dollars per license application or renewal for all applicants filing an application within three years of the effective date of this section and shall charge each applicant a non-refundable fee of five thousand dollars per license application or renewal thereafter. Once granted, the department shall charge each licensee an annual fee of twenty-five thousand dollars per facility license. Application and license fees shall be increased or decreased each year by the

percentage of increase or decrease from the end of the previous calendar year of the Consumer Price Index, or successor index as published by the U.S. Department of Labor, or its successor agency. An entity may not be an owner of more than three marijuana cultivation facility licenses.

(10) An entity may apply to the department for and obtain one or more licenses to operate a marijuana dispensary facility. Each facility in operation shall require a separate license. A license shall be valid for three years from its date of issuance and shall be renewable, except for good cause. The department shall charge each applicant a non-refundable fee of seven thousand dollars per license application or renewal for each applicant filing an application within three years of the effective date of this section and shall charge each applicant a non-refundable fee of three thousand dollars per license application or renewal thereafter. Once granted, the department shall charge each licensee an annual fee of ten thousand dollars per facility license. Application and license fees shall be increased or decreased each year by the percentage of increase or decrease from the end of the previous calendar year of the Consumer Price Index, or successor index as published by the U.S. Department of Labor, or its successor agency. An entity may not be an owner of more than five marijuana dispensary facility licenses.

(11) An entity may apply to the department for and obtain one or more licenses to operate a marijuana-infused products manufacturing facility. Each facility in operation shall require a separate license. A license shall be valid for three years from its date of issuance and shall be renewable, except for good cause. The department shall charge each applicant a non-refundable fee of seven thousand dollars per license application or renewal for each applicant filing an application within three years of the effective date of this section and shall charge each applicant a non-refundable fee of three thousand dollars per license application or renewal thereafter. Once granted, the department shall charge each licensee an annual fee of ten thousand dollars per facility license. Application and license fees shall be increased or decreased each year by the percentage of increase or decrease from the end of the previous calendar year of the Consumer Price Index, or successor index as published by the U.S. Department of Labor, or its successor agency. An entity may not be an owner of more than three marijuana-infused products manufacturing facility licenses.

(12) An entity may apply to the department for and obtain only one license to operate a marijuana microbusiness facility. A marijuana microbusiness facility license shall allow the licensee to be vertically integrated. A marijuana microbusiness facility licensee may engage in all of the activities allowed under the license or it may apply for and engage in a subset of the activities allowed, if the applicant or license holder so chooses. A marijuana microbusiness facility licensee may sell marijuana it cultivates, processes, manufactures, and packages to any marijuana dispensary facility, any other marijuana microbusiness facility, or directly to consumers. A marijuana microbusiness facility may also process, manufacture, and sell to consumers marijuana and marijuana-infused products it obtains from another marijuana microbusiness facility. A license shall be valid for three years from its date of issuance and shall be renewable, except for good cause. The department shall charge each applicant a non-refundable fee of one thousand five hundred dollars per license application or renewal for each applicant filing an application within three years of the effective date of this section and shall charge each applicant a non-refundable fee of two thousand five hundred dollars per license application or renewal thereafter. Once granted, the department shall charge each licensee an annual fee of two thousand five hundred dollars per facility license. Application and license fees shall be increased or decreased each year by the percentage of increase or decrease from the end of the previous calendar year of the Consumer Price Index, or successor index as published by the U.S. Department of Labor, or its successor agency. An entity may not be an owner of more than one marijuana microbusiness facility license. An owner of a marijuana microbusiness facility may not also be an owner of another licensed marijuana facility or medical marijuana facility regulated under this article. However, the owner of a marijuana microbusiness facility may apply for a license or licenses for other marijuana or medical marijuana facilities under this article. If granted one or more of these licenses, the marijuana microbusiness facility owner may transition to other licensed operations on a reasonably practical timetable established by the department. In addition to other requirements established by this section, a marijuana microbusiness facility must be majority-owned by natural persons who have been residents of the state of Missouri for at least one year prior to the application for such license. The majority owner or owners must be economically disadvantaged persons, as defined by the department, or disabled veterans, as defined by the department.

(13) The department may restrict the aggregate number of licenses granted for marijuana microbusiness facilities, provided, however, that the number may not be limited to fewer than the following number of licenses in each United States congressional district in the state of Missouri pursuant to the map of each of the eight congressional districts as drawn and effective on December 6, 2018:

(a) Six, once the department begins issuing licenses for marijuana facilities under this subsection;

(b) An additional six following the first two hundred and seventy days after the department begins issuing licenses for marijuana facilities under this subsection; and

(c) An additional six after the first five hundred and forty-eight days after the department begins issuing licenses for marijuana facilities under this subsection, but only after the department conducts an analysis and determines that there is a market for additional microbusiness licenses.

Future changes to the boundaries or the number of congressional districts shall have no impact.

(14) The department shall begin accepting license and certification applications for marijuana dispensary facilities, marijuana testing facilities, marijuana cultivation facilities, marijuana-infused products manufacturing facilities, marijuana microbusiness facilities, seed-to-sale tracking systems, and for transportation of marijuana no later than three hundred and sixty-five days after the effective date of this section. Applications for licenses under this section shall be approved or denied by the department no later than one hundred eighty days after their submission. If the department fails to carry out its non-discretionary duty to approve or deny an application within one hundred eighty days of submission, an applicant may immediately seek a court order compelling the department to approve or deny the application.

(15) With the exception of microbusiness licenses, and consistent with any limitations set forth in this section, for the first five hundred and forty-eight days after the department begins issuing licenses for marijuana facilities, the department may only issue a license:

(a) For a marijuana cultivation facility to an entity holding a medical marijuana cultivation facility license issued pursuant to section 1 of this article seeking licensure to operate a marijuana cultivation facility at the same location;

(b) For a marijuana dispensary facility to an entity holding a medical marijuana dispensary facility license issued pursuant to section 1 of this article seeking licensure to operate a marijuana dispensary facility at the same location;

(c) For a marijuana-infused products manufacturing facility to an entity holding a medical marijuana-infused products manufacturing facility license issued pursuant to section 1 of this article seeking licensure to operate a marijuana-infused products manufacturing facility at the same location; and

(d) For a marijuana testing facility to an entity holding a medical marijuana testing facility license issued pursuant to section 1 of this article seeking licensure to operate a marijuana testing facility at the same location.

(16) The department shall issue a license to each applicant for a marijuana facility pursuant to subdivision (15) of this subsection if the applicant is in good standing with the department and has reasonably complied with this article and all of the rules and regulations promulgated pursuant to this article.

(17) A prospective applicant for a license pursuant to subdivision (15) shall notify the department of their intent to apply and prefile their application fee with the department by February 1, 2021.

(18) Notwithstanding the provisions of section 1 of this article, if an existing medical marijuana dispensary facility is located in a jurisdiction that prohibits marijuana dispensary facilities under this section, or is otherwise prevented from operating a marijuana dispensary facility at the same location as the existing medical marijuana dispensary facility, the medical marijuana dispensary

facility may apply to the department for a marijuana dispensary license pursuant to subdivision (15) of this subsection in a new location, and such application shall be granted so long as the applicant meets all the requirements of this section and department regulation. If an existing medical marijuana dispensary facility is located in a jurisdiction that temporarily prohibits non-medical retail marijuana facilities prior to November 3, 2020, and the medical marijuana dispensary facility does not apply to open a marijuana dispensary facility in a new location, the medical marijuana dispensary facility may apply to the department for a marijuana dispensary facility license after November 3, 2020, and if the temporary prohibition is not permanently enacted, such application shall be granted, so long as the applicant meets all the requirements of this section and department regulation.

(19) Notwithstanding the provisions of section 1 of this article, three years after receiving a marijuana dispensary facility license pursuant to subdivision (15), a marijuana dispensary facility may apply to the department for permission to relocate the marijuana dispensary facility to a new location.

(20) Notwithstanding the provisions of section 1 of this article, for the first five hundred and forty-eight days after the department begins issuing licenses for marijuana facilities under this section, the department shall issue licenses for marijuana microbusiness facilities to qualified applicants consistent with the qualifications and limitations set forth in this section.

(21) Notwithstanding the provisions of section 1 of this article, a medical marijuana cultivation facility that is issued a marijuana cultivation facility license pursuant to subdivision (15) of this subsection is limited under both licenses to a total of two thousand eight hundred flowering plants or thirty thousand square feet of flowering plant canopy space. An entity issued a license pursuant to subdivision (15) of this subsection may sell marijuana to medical marijuana facilities and marijuana facilities so long as the entity has both a medical marijuana cultivation facility license and a marijuana cultivation facility license consistent with any limitations set forth in this article or department regulation.

(22) In addition to the foregoing, the department shall not issue a non-medical license pursuant to this section to a medical marijuana cultivation facility, medical marijuana-infused products manufacturing facility, or medical marijuana dispensary facility, if the department determines that doing so will limit or restrict access by qualifying patients, as defined in section 1 of this article, to an adequate supply of marijuana and marijuana-infused products at a reasonable cost.

(23) The department may not promulgate a rule prohibiting a marijuana facility from operating at the same location as a medical marijuana facility of the same license type operating pursuant to section 1 of this article.

(24) Marijuana facilities licensed to distribute marijuana, marijuana-infused products, and marijuana accessories directly to consumers pursuant to this section may also distribute marijuana, marijuana-infused products, and marijuana accessories to qualifying patients and primary caregivers consistent with section 1 of this article and department regulation.

(25) The department may charge a fee not to exceed five thousand dollars for any certification issued pursuant to this section.

(26) Until such time that federal law permits otherwise, all marijuana sold in Missouri pursuant to this article shall be cultivated in Missouri. If allowed by federal law, marijuana may be exported from Missouri in accordance with department regulations. If allowed by federal law, the department may promulgate rules related to the import and export of marijuana and shall promulgate a rule requiring that all marijuana flower imported into Missouri be tested by a marijuana testing facility located in Missouri and comply with Missouri testing standards.

(27) Until such time that federal law permits otherwise, all marijuana-infused products sold in Missouri pursuant to this article shall be manufactured in Missouri. If allowed by federal law, marijuana-infused products may be exported from Missouri in accordance with department regulations. If allowed by federal law, the department may promulgate rules related to the import and export of marijuana-infused products.

(28) The denial of a license or license renewal by the department shall be appealable. The applicant may choose to challenge any denial by the department through the Administrative Hearing

Commission, or successor entity. Pursuant to § 536.100 R.S.Mo., or successor provisions, any licensee who has exhausted all administrative remedies provided by law and who is aggrieved by a final decision in a contested case is entitled to judicial review.

(29) No elected official shall interfere directly or indirectly with the department's obligations and activities under this section.

(30) To minimize the potential for undue political influence in awarding licenses, the department shall review license applications using reasonable safeguards that ensure the identity of the applicant and its principal owners, officers, and managers are not identified to the application scorers.

(31) The department shall have the sole authority within the state of Missouri to issue licenses for marijuana facilities and certifications pursuant to this section.

(32) The department shall not have the authority to promulgate, apply, or enforce any rule or regulation that is unduly burdensome or act to undermine the purposes of this section.

5. Local Control.

(1) Except as provided in this subsection, a local government may prohibit the operation of all non-medical retail marijuana facilities regulated under this section from being located within its jurisdiction through voter approval of a ballot question submitted to the qualified voters of the local government, provided that any ballot measure shall be voted on only during the regularly scheduled general election held on the first Tuesday after the first Monday in November of an even-numbered year starting in 2022, thereby avoiding any additional local governmental cost or expense. Until the first general election following the general election held November 3, 2020, a local government may through local ordinance temporarily prohibit non-medical retail marijuana facilities regulated under this section from being located within its jurisdiction. When a ballot question prohibiting non-medical retail marijuana facilities regulated under this section is submitted to voters, the following question shall be presented to the voters in the area subject to the prohibition, "Shall (insert name of local government) ban all non-medical retail marijuana facilities from being located within (insert name of local government and, where applicable, its "unincorporated areas") and forgo any additional related local tax revenue? ( ) Yes ( ) No." If a majority of the votes cast on the question by the qualified voters voting thereon are in favor of the question, then the ban shall go into effect as provided by law. If a question receives less than the required majority, then the jurisdiction shall have no power to ban new non-medical retail marijuana facilities regulated under this section, unless voters at a subsequent election on the first Tuesday after the first Monday in November of an even-numbered year approve a ban on new non-medical retail marijuana facilities submitted to them by the governing body. A local government may repeal an existing ban by its own ordinance or by a vote of the people, either through referral of a ballot question to the voters by the governing body or through citizen petition. In the case of a referral of a ballot question by the governing body or citizen's petition to repeal an existing ban, the question shall be voted on only during the regularly scheduled general election held on the first Tuesday after the first Monday in November of an even-numbered year. A citizen's petition to repeal an existing ban shall be signed by at least five percent of the qualified voters in the area subject to the ban, determined on the basis of the number of votes cast for governor in such locale at the last gubernatorial election held prior to the filing of the petition. The local government shall count the petition signatures and give legal notice of the election as provided by applicable law. Denial of ballot access shall be subject to judicial review. Whether submitted by the governing body or by citizen's petition, the question shall be submitted in the following form: "Shall (insert name of local government) allow non-medical retail marijuana facilities to be located within (insert name of local government and where applicable, its "unincorporated areas") as regulated by state law? ( ) Yes ( ) No." If a majority of the votes cast on the question by the qualified voters voting thereon are in favor of the question, then the ban shall be repealed.

(2) Unless allowed by the local government, no new marijuana facility shall be initially sited within one thousand feet of any then-existing elementary or secondary school, child day-care center, or church. The only local government ordinances and regulations that are binding on a marijuana facility are those of the local government where the marijuana facility is located. Except as otherwise provided in this subsection, no local government shall prohibit marijuana

facilities or entities with a transportation certification either expressly or through the enactment of ordinances or regulations that make their operation unduly burdensome in the jurisdiction. However, local governments may enact ordinances or regulations not in conflict with this section, or with regulations enacted pursuant to this section, governing the time, place, and manner of operation of such facilities in the locality. A local government may establish civil penalties for violation of an ordinance or regulations governing the time, place, and manner of operation of a marijuana facility or entity holding a transportation certification that may operate in such locality.

6. Taxation and Reporting.

(1) A tax shall be levied upon the retail sale of non-medical marijuana sold to consumers at marijuana facilities licensed pursuant to this section within the state. The tax shall be at a rate of fifteen percent of the retail price. The tax shall be collected by each licensed non-medical retail marijuana facility and paid to the department of revenue. After retaining no more than two percent of the total tax collected or its actual collection costs, whichever is less, amounts generated by the tax levied in this section shall be deposited by the department of revenue into the "Veterans, Infrastructure, and Health Fund" created under this subsection. Licensed entities making non-medical retail sales within the state shall be allowed approved credit for returns provided the tax was paid on the returned item and the purchaser was given the refund or credit.

(2) There is hereby created in the state treasury the "Veterans, Infrastructure, and Health Fund" which shall consist of taxes and fees collected under this section. The state treasurer shall be custodian of the fund, and he or she shall invest monies in the fund in the same manner as other funds are invested. Any interest and moneys earned on such investments shall be credited to the fund. Notwithstanding any other provision of law, any monies remaining in the fund at the end of a biennium shall not revert to the credit of the general revenue fund. The commissioner of administration is authorized to make cash operating transfers to the fund for purposes of meeting the cash requirements of the department in advance of it receiving annual application, licensing, and tax revenue, with any such transfers to be repaid as provided by law. The fund shall be a dedicated fund and shall be distributed as follows:

(a) First, to the department, an amount necessary for the department to carry out this section, including repayment of any cash operating transfers, payments made through contract or agreement with other state and public agencies necessary to carry out this section, and a reserve fund to maintain a reasonable working cash balance for the purpose of carrying out this section;

(b) Next, distributed to the local government where the retail sale occurred, three-fifteenths of the remaining fund balance.

(c) After the distribution to the local government where the retail sale occurred, the remaining fund balance shall be distributed in thirds as follows:

(i) One-third of the remainder of the fund balance shall be transferred to the Missouri veterans commission and allied state agencies, as determined by appropriation, exclusively for health care and other services for military veterans and their dependent families;

(ii) One-third of the remainder of the fund balance to the State Road Fund created under article IV, section 30b of this Constitution for constructing and maintaining an adequate system of connected state highways; and

(iii) One-third of the remainder of the fund balance to the department to provide grants to existing agencies and not-for-profit organizations, whether government or community-based, to increase access to evidence-based low-barrier drug addiction treatment, prioritizing medically proven treatment and overdose prevention and reversal methods and public or private treatment options with an emphasis on reintegrating recipients into their local communities, to support overdose prevention education, and to support job placement, housing, and counseling for those with substance use disorders. Agencies and organizations serving populations with the highest rates of drug-related overdose shall be prioritized to receive the grants.

(d) All monies from the taxes and fees authorized hereunder shall provide additional dedicated funding for the purposes enumerated above and shall not replace existing dedicated funding.

(3) For all retail sales of marijuana, a record shall be kept by the seller of all amounts and types of marijuana involved in the sale and the total amount of money involved in the sale, including itemizations, taxes collected, and grand total sale amounts. All such records shall be kept on the premises in a readily available format and be made available for review by the department and the department of revenue upon request. Such records shall be retained for five years from the date of the sale.

(4) The tax levied pursuant to this subsection is separate from and in addition to any general state and local sales and use taxes that apply to retail sales, which shall continue to be collected and distributed as provided by general law.

(5) Except as authorized in this subsection, no additional taxes shall be imposed on the sale of marijuana.

(6) The fees and taxes provided for in this section shall be fully enforceable notwithstanding any other provision in this Constitution purportedly prohibiting or restricting the taxes and fees provided for herein.

7. Additional Protections.

(1) A marijuana testing facility shall not be subject to civil or criminal prosecution, denial of any right or privilege, civil or administrative penalty or sanction, or disciplinary action by any accreditation or licensing board or commission for providing laboratory testing services that relate to marijuana consistent with this section and otherwise meeting legal standards of professional conduct.

(2) An attorney shall not be subject to disciplinary action by the state bar association or other professional licensing body for owning, operating, investing in, being employed by, contracting with, or providing legal assistance to any person related to activity that is no longer subject to criminal penalties under state law pursuant to this section.

(3) Actions and conduct by marijuana facilities licensed or otherwise certified by the department, or their employees or agents, as permitted by this section and in compliance with department regulations and other standards of legal conduct, shall not be subject to criminal or civil liability or sanctions under Missouri law, except as provided for by this section.

(4) The department may not promulgate a rule that requires a consumer to provide a marijuana facility with identifying information other than identification to determine the consumer's age.

(5) It is the public policy of the state of Missouri that contracts related to marijuana that are entered into by marijuana facilities and those who allow property to be used by those entities should be enforceable. It is the public policy of the state of Missouri that no contract entered into by marijuana facilities, or by a person who allows property to be used for activities that are exempt from state criminal penalties by this section, shall be unenforceable on the basis that activities related to marijuana may be prohibited by federal law.

8. Legislation.

Nothing in this section shall limit the general assembly from enacting laws consistent with the purposes of this section.

9. Additional Provisions.

(1) No owner of a marijuana facility or entity with a transportation certification shall be an individual with a disqualifying felony offense. A "disqualifying felony offense" is a violation of, and conviction or guilty plea to, state or federal law that is, or would have been, a felony under Missouri law, regardless of the sentence imposed, unless the department determines that:

(a) The person's conviction was for a marijuana offense, other than provision of marijuana to a minor; or

(b) The person's conviction was for a non-violent crime for which he or she was not incarcerated and that is more than five years old; or

(c) More than five years have passed since the person was released from parole or probation, and he or she has not been convicted of any subsequent criminal offenses.

The department may consult with and rely on the records, advice, and recommendations of the attorney general and the department of public safety, or their successor entities, in carrying out the provisions of this subdivision.

(2) All marijuana facilities and certificates shall be held by entities that are majority owned, directly or indirectly, by natural persons who have been residents of the state of Missouri for at least one year prior to the application for such license or certification. Notwithstanding the foregoing, persons or entities outside the state of Missouri may own a minority stake, directly or indirectly, in such entities. By rule, the department may adjust the percentage of ownership required by residents of the state of Missouri. Owners licensed pursuant to this section shall submit fingerprints to the Missouri state highway patrol for the purpose of conducting a state and federal fingerprint-based criminal background check. The Missouri state highway patrol, if necessary, shall forward the fingerprints to the Federal Bureau of Investigation (FBI) for the purpose of conducting a fingerprint-based criminal background check. Fingerprints shall be submitted pursuant to § 43.543 R.S.Mo., or successor provisions, and fees shall be paid pursuant to § 43.530 R.S.Mo., or successor provisions.

(3) No marijuana facility shall manufacture, package, or label marijuana or marijuana-infused products in a false or misleading manner. No person shall sell any product in a manner designed to cause confusion between marijuana or a marijuana-infused product and any product not containing marijuana. A violation of this subdivision shall be punishable by an appropriate and proportional department sanction, up to and including loss of license.

(4) No marijuana facility may sell edible marijuana-infused candy in shapes or packages that are attractive to children or that are easily confused with commercially sold candy that does not contain marijuana.

(5) All marijuana and marijuana-infused products shall be sold in individual, child-resistant containers that are labeled with serving amounts, instructions for use, and estimated length of effectiveness. All marijuana and marijuana-infused products shall be sold in containers clearly and conspicuously labeled, as mandated by the department, as containing "Marijuana" or a "Marijuana-Infused Product." Violation of this subdivision shall subject the violator to department sanctions, including an administrative penalty.

(6) A marijuana facility may not allow cultivation, manufacturing, sale, or display of marijuana, marijuana-infused products, or marijuana accessories to be visible from a public place outside of the marijuana facility without the use of binoculars, aircraft, or other optical aids.

(7) A marijuana facility may not cultivate, manufacture, test, sell, or store marijuana at any location other than a physical address approved by the department and within an enclosed area that is secured in a manner that prevents access by persons not permitted by the marijuana facility to access the area.

(8) A marijuana facility shall secure every entrance to the facility so that access to areas containing marijuana is restricted to employees and other persons permitted by the marijuana facility to access the area and to agents of the department or state and local law enforcement officers and emergency personnel and shall secure its inventory and equipment during and after operating hours to deter and prevent theft of marijuana, marijuana-infused products, and marijuana accessories.

(9) No marijuana facility may refuse representatives of the department the right to inspect the licensed premises or to audit the books and records of the marijuana facility. A facility that holds licenses issued under sections 1 and 2 of this article shall comply with inspection regulations and standards issued pursuant to both sections.

(10) No marijuana facility may allow a person under twenty-one years of age to volunteer or work for the marijuana facility, unless permitted by department regulation.

(11) No marijuana facility, or entity with a certification, shall assign, sell, give, lease, sublicense, or otherwise transfer its license or certificate to any other entity without the express consent of the department, not to be unreasonably withheld.

(12) To the fullest extent allowed by the Constitution of the United States, the Constitution of Missouri, and federal law, no unsolicited internet pop-up advertisements, banners on mass-market websites, unsolicited leaflets or handbills, or unsolicited direct mail advertisements for marijuana, marijuana-infused products, or marijuana accessories are permitted, and no off-site advertisement or marketing for marijuana, marijuana-infused products, or marijuana accessories may be placed on any billboard within the state or in any location exposed to view from a public place within one thousand feet of an elementary or secondary school, child daycare center, or church.

(13) Real and personal property used in the cultivation, manufacture, transport, testing, distribution, sale, and administration of marijuana for activities otherwise in compliance with this section shall not be subject to asset forfeiture solely because of that use.

(14) No person shall extract resins from marijuana using dangerous materials or combustible gases without a marijuana-infused products manufacturing facility license or a marijuana microbusiness license that allows for this activity. Violation of this prohibition shall subject the violator to department sanctions, including an administrative penalty and, if applicable, loss of certificate or license for up to one year.

10. Personal Use of Marijuana.

(1) Subject to the limitations in subsection 3 of this section, the following acts by a person at least twenty-one years of age are not unlawful and shall not be an offense under state law or the laws of any local government within the state or be a basis to impose a civil fine, penalty, or sanction, or be a basis to detain, search, or arrest, or otherwise deny any right or privilege, or to seize or forfeit assets under state law or the laws of any local government:

(a) Possessing, using, ingesting, inhaling, processing, transporting, delivering without consideration, or distributing without consideration one ounce or less of marijuana, except that not more than the equivalent of one ounce of marijuana, as determined by the department, may be in a concentrated form;

(b) Possessing, planting, cultivating, harvesting, drying, processing, or manufacturing one-half the number of plants a qualifying patient is permitted to cultivate pursuant to section 1 of this article and department regulation, provided:

a. The plants and any marijuana produced by the plants in excess of one ounce are kept at one private residence, are in a locked space, and are not visible by normal, unaided vision from a public place; and
b. Not more than twice the number of allowable plants under paragraph (b) of this subdivision are kept in or on the grounds of a private residence at one time.

(c) Assisting another person who is at least twenty-one years of age in, or allowing property to be used for, any of the acts permitted by this section; and

(d) Possessing, using, delivering, distributing, manufacturing, transferring, or selling to persons twenty-one years of age or older marijuana accessories.

(2) A person who, pursuant to this section, cultivates marijuana plants that are visible by normal, unaided vision from a public place is subject to a civil penalty not exceeding two hundred and fifty dollars and forfeiture of the marijuana.

(3) A person who, pursuant to this section, cultivates marijuana plants that are not kept in a locked space is subject to a civil penalty not exceeding two hundred and fifty dollars and forfeiture of the marijuana.

(4) A person who smokes marijuana in a public place, other than in an area licensed for such activity by the department, is subject to a civil penalty not exceeding one hundred dollars.

(5) A person who is under twenty-one years of age who possesses, uses, ingests, inhales, transports, delivers without consideration or distributes without consideration one ounce or less of marijuana, or possesses, delivers without consideration, or distributes without consideration marijuana accessories is subject to a civil penalty not to exceed one hundred dollars and

forfeiture of the marijuana. Any such person shall be provided the option of attending up to four hours of drug education or counseling in lieu of the fine.

(6) Subject to the limitations of this section, a person who possesses not more than twice the amount of marijuana allowed pursuant to this subsection, produces not more than twice the amount of marijuana allowed pursuant to this subsection, delivers without receiving any consideration or remuneration to a person who is at least twenty-one years of age not more than twice the amount of marijuana allowed by this subsection, or possesses with intent to deliver not more than twice the amount of marijuana allowed by this subsection:

(a) For a first violation, is subject to an infraction punishable by a civil penalty not exceeding two hundred and fifty dollars and forfeiture of the marijuana;

(b) For a second violation, is subject to an infraction punishable by a civil penalty not exceeding five hundred dollars and forfeiture of the marijuana;

(c) For a third or subsequent violation, is subject to a misdemeanor punishable by a fine not exceeding one-thousand dollars and forfeiture of the marijuana; and

(d) For a person under twenty-one years of age, is subject to a civil penalty not to exceed two hundred and fifty dollars. Any such person shall be provided the option of attending up to eight hours of drug education or counseling in lieu of the fine.

(7) Any person currently serving a sentence for a conviction, whether by trial or open or negotiated plea, who would not have been guilty of an adult or juvenile offense, or who would have been guilty of a lesser adult or juvenile offense had sections 1 and 2 of this article been in effect at the time of the offense, may petition for a recall or dismissal of sentence before the trial court that entered the judgement of conviction in the person's case to request resentencing or dismissal consistent with sections 1 and 2 of this article with credit for time and supervision period already served and such petition shall be granted.

(8) A person arrested, charged, or found guilty, whether by trial or open or negotiated plea, for any offense that is no longer a crime after the effective dates of sections 1 and 2 of this article may apply for expungement upon the effective date of this section and such expungement shall be granted and the records expunged from all government records absent good cause for denial. The effect of such order shall be to restore such person to the status the person occupied prior to such arrest, plea or conviction and as if such event had never taken place. No person for whom such order has been entered shall be held thereafter under any provision of any law to be guilty of perjury or otherwise giving a false statement by reason of the person's failure to recite or acknowledge such arrest, plea, trial, conviction, or expungement in response to any inquiry made of the person for any purpose whatsoever, and no such inquiry shall be made for information relating to an expungement.

(9) A person shall not be denied adoption, custody, or visitation rights relative to a minor solely for conduct that is permitted by this section, unless the person's behavior is such that granting the rights is not in the best interests of the child, as determined by other applicable law and procedures.

(10) No person shall be denied access to or priority for an organ transplant for conduct that is permitted by this section.

11. Severability.

The provisions of this section are severable, and if any clause, sentence, paragraph or section of this measure, or an application thereof, is adjudged invalid by any court of competent jurisdiction, the other provisions shall continue to be in effect to the fullest extent possible.

12. Effective Date.

The provisions of this section shall become effective on December 3, 2020, as provided by this Constitution.

MISSOURI STATE AUDITOR'S OFFICE
FISCAL NOTE (20-126)

Subject

Initiative petition from Deirdre Hirner regarding a proposed constitutional amendment to Article XIV of the Constitution of Missouri. (Received October 21, 2019)

Date

November 8, 2019

Description

This proposal would amend Article XIV of the Constitution of Missouri.

The amendment is to be voted on in November 2020.

Public comments and other input

The State Auditor's office requested input from the **Attorney General's office,** the **Department of Agriculture,** the **Department of Economic Development,** the **Department of Elementary and Secondary Education,** the **Department of Higher Education and Workforce Development,** the **Department of Health and Senior Services,** the **Department of Commerce and Insurance,** the **Department of Mental Health,** the **Department of Natural Resources,** the **Department of Corrections,** the **Department of Labor and Industrial Relations,** the **Department of Revenue,** the **Department of Public Safety,** the **Department of Social Services,** the **Governor's office,** the **Missouri House of Representatives,** the **Department of Conservation,** the **Department of Transportation,** the **Office of Administration,** the **Office of State Courts Administrator,** the **Missouri Senate,** the **Secretary of State's office,** the **Office of the State Public Defender,** the **State Treasurer's office, Adair County, Boone County, Callaway County, Cass County, Clay County, Cole County, Greene County, Jackson County, Jasper County, St. Charles County, St. Louis County, Taney County,** the **City of Cape Girardeau,** the **City of Columbia,** the **City of Jefferson,** the **City of Joplin,** the **City of Kansas City,** the **City of Kirksville,** the **City of Mexico,** the **City of Raymore,** the **City of St. Joseph,** the **City of St. Louis,** the **City of Springfield,** the **City of Union,** the **City of Wentzville,** the **City of West Plains, Cape Girardeau 63 School District, Hannibal 60 School District, Malta Bend R-V School District, Mehlville School District, Wellsville-Middletown R-1 School District, State Technical College of Missouri, Metropolitan Community College, University of Missouri, St. Louis Community College, Missouri Veterans Commission, Missouri Office of Prosecution Services, Kansas City Board of Police Commissioners, The Metropolitan Police Department - City of St. Louis, University of Central Missouri, Harris-Stowe State University, Lincoln University, Missouri State University, Missouri Southern**

State University, Missouri Western State University, Northwest Missouri State University, Southeast Missouri State University, and **Truman State University.**

Mark R. Reading provided information to the State Auditor's office.

David R. Usher provided information to the State Auditor's office.

Assumptions

Officials from the **Attorney General's office** indicated they expect that, to the extent that the enactment of this proposal would result in increased litigation, they expect that their office could absorb the costs associated with that increased litigation using existing resources. However, if the enactment of this proposal were to result in substantial additional litigation, their office may be required to request additional appropriations.

Officials from the **Department of Agriculture** indicated no fiscal impact on their department.

Officials from the **Department of Economic Development** indicated no impact to their department.

Officials from the **Department of Elementary and Secondary Education** indicated a total estimated net effect on all state funds of $0 for fiscal year 2020, $0 for fiscal year 2021, and $0 for fiscal year 2022.

Officials from the **Department of Health and Senior Services** indicated increased operating costs to the Veterans Infrastructure and Health Fund of $1,605,331 in fiscal year 2021, $5,541,694 in fiscal year 2022, and $14,219,361 in fiscal year 2023. Of these costs, $77,049 are one-time costs in fiscal year 2021 for office furniture and equipment, $508,624 are one-time costs in fiscal year 2022 for office furniture, equipment, and application scoring costs, and $6,483,964 are one-time costs in fiscal year 2023 for office furniture, equipment, contracted attorney fees, and application scoring costs.

Space for thirty-nine additional staff will be required by fiscal year (FY) 2023: 39 full-time employees (FTE) x 230 sq. ft. x &18.00 = $161,460. These staff will be located in Jefferson City. An additional thirty FTE are assumed to be telecommuters.

This will create new small business opportunities and all the costs associated with a new business, along with the associated licensing fees.

At the time of submission Office of Administration - Information Technology Services Division (ITSD) had not provided a response.

The proposed legislation amends Section 1 of Article XIV and enacts one new section to be known as Section 2 of Article XIV regarding adult use marijuana legalization, regulation, and taxation. The new law stipulates the minimum number of facilities to be

licensed and the application and operation fees associated with each type of facility. It is assumed sales of marijuana will begin in FY 2023, increasing state revenue through the collection of a fifteen percent sales tax levied on the retail sale of adult use marijuana sold to consumers.

Office of General Counsel:

The proposed changes to this legislation will require the Department of Health and Senior Services to aid the program in building all the rules, pre-licensing, preparing required forms, and litigation on any legal challenges for denial of licenses through the Missouri court system. Based on our experience with medical marijuana facility license applications, we assume a similar number of facility license applications will be received for potentially even fewer available licenses. To defend the denial of an estimated 2,000 licenses, the department will temporarily contract with attorneys and support staff for a period of approximately 18 – 24 months. The total estimated amount of these contracts is $5,300,000. In addition, the department would require the following staff:

Three full-time attorneys (average annual salary of $75,000) would be needed to assist in reviewing records and defending the department in anticipated trials from denied licenses due to the limited number allowed to be issued. Two Attorneys would be needed for fiscal year 2021 with a third FTE Attorney added in fiscal year 2022, and maintaining the three Attorneys for the third year of fiscal year 2023.
Additional duties include:

- Reviewing requests for records (sunshine and/or subpoenas)
- Coordinating and advising with Medical Marijuana staff to determine whether the Department has records responsive to requests
- Review of individual records
- Determining appropriate response
- Responding to requestor
- Drafting/filing motions to quash subpoenas when necessary
- Possible referrals to AGO
- Representing the department in any court room activities resulting from this change in legislation

In addition, one support staff would be required to assist the three attorneys in the paperwork required for these court cases.

For the purposes of this fiscal note, they assumed temporary contracts would be necessary for attorneys, paralegals, and support staff to defend the denial of an estimated 2,000 licenses. The length of these contracts is estimated for a period of approximately 18 – 24 months, at an estimated total cost of $5,300,000, to cover any litigation associated with these denials. The three full-time attorneys and one support staff needed to handle the on-going costs of this proposed legislation would indeed be on-going with no estimate of any end date. Within the parameters of the assumptions used for this response, at this time, there are no other anticipated temporary or other costs for this proposed legislation from the Office of General Counsel.

Division of Regulation and Licensure (DRL):

Section 1 of Article XIV includes minor changes that will cause some adjustment to the operations of the Section for Medical Marijuana (SMMR), but those changes have no fiscal impact. Section 2 of Article XIV requires creation of a new program for the regulation of adult use marijuana. This new program will share some employees and resources with the current SMMR. For purposes of this fiscal note, the new, combined program will be called the Section for Marijuana Regulation (SMR).

Section 2 of Article XIV requires implementation of adult use marijuana in several phases over the course of three years. Much of the regulatory structure mandated in Section 2 mirrors that in Section 1; thus, some efficiencies can be captured by merging this new program with the existing SMMR. However, the regulations and businesses to be licensed for the new program are different enough from the SMMR regulations and businesses that some functions, particularly on the compliance side, will need to be expanded significantly. Furthermore, assuming similar licensing functions for the new program (initial applications with applications for changes to businesses following licensure), the licensing needs of the new program will double those of the existing program as several waves of new licensing processes will occur at regular intervals, including for a new class of marijuana businesses. With each new wave, facility agent application processing will increase.

In addition to staffing needs, the new program will necessitate new or amended contracts for IT solutions and application scoring. All new adult use businesses will have application requirements different from medical marijuana businesses, which must be built within the existing IT solution for Missouri marijuana regulation or through a new IT solution. While the bulk of the initial wave of licensing for adult use will not require scoring applications, microbusiness applications will likely require scoring at each stage of licensing, and in the third year, it appears scoring will be necessary for all new facilities of any type.

The following are the estimates of costs associate with the staffing and contractual needs outlined above.

YEAR 1

Between December 2020 and December 2021, the SMR will begin program build out, draft and file rules, draft and issue Request for Proposals (RFPs) or contract amendments for IT solutions, and begin pre-licensing functions, including public outreach/response.

To cover program implementation, pre-licensing, and public outreach/response in the first year, the SMR will require additional staff. The following positions will be hired as of January 2021:

- One Planner IV with an annual salary of $55,000, job duties will include oversight of contracts, procurement, and website and supervisory responsibilities;

- One Planner II with an annual salary of $45,000, job duties will be consistent with that of the Planner IV to a lesser degree;
- Four Special Assistant Professionals with an annual salary of $45,000, job duties will be to function as facility licensing specialists and process applications and renewals;
- Five Health Program Representative IIs with an annual salary of $40,000 job duties will be Facility Agent ID's and handle public assistant calls; and
- Two Administrative Office Support Assistants with an annual salary of $38,000, to provide support for the above staff.

Due to the increase supervisory and oversight responsibilities, salaries to existing staff will be studied and adjustments will be made when deemed appropriate.

The current contract for IT solutions will need to be continued and expanded. The estimated cost for year one is $769,000.

YEAR 2

The SMR will continue program build-out and begin accepting facility applications in December 2021 and will have 150 days to approve or deny all applications. For 348 licenses, applications will be reviewed for minimum qualifications, but no scoring will be necessary. For 48 licenses (the microbusiness licenses), applications will be reviewed for minimum qualifications and scoring will be necessary. Facilities may begin operating sometime after May 2022. Facility agent applications and oversight will increase when the new facilities begin operating. The SMR will also draft and issue RFPs or contract amendments for application scoring in Year 2.

To cover program implementation and oversight, public outreach/response, facility agent applications and oversight, and compliance/enforcement functions for a new regulatory structure with up to 396 new facility licenses (not counting additional, new license types added as needed), the SMR will require additional staff. The following positions will be hired as of July 2021:

- Three Investigation Managers with an annual salary of $65,000, job duties to include supervision of additional investigative staff;
- Three Investigator IIIs with an annual salary of $60,000, job duties to be to inspect and investigate facilities throughout the state and provide oversight to Investigator II's;
- Seventeen Investigators II with an annual salary of $50,000, job duties to include inspecting and investigating facilities across the state;
- One Planner II with an annual salary of $45,000, job duties to include oversight on additional contracts and regulations;
- Five Health Program Representatives II with an annual salary of $40,000, job duties to provide public assistance and facilitate increase activity for facility agent ID applications. and
- Two Administrative Office Support Assistants with an annual salary of $38,000, to provide support for the above additional staff.

The Investigators are assumed to be telecommuters and are expected to travel extensively; it is assumed that the travel cost will be $10,118 annually for all investigative staff.

It is assumed application scoring will cost approximately $200,000 in Year 2. This estimate is based on the current SMMR contract, assuming a new contract will be necessary and assuming there will be four times the number of applications received as there are licenses available for microbusinesses (based on experience in 2019).

The current contract for IT solutions will need to be continued and expanded. The estimated cost for year two is $518,599.

Section 6 (iii) requires the Department to provide grants to existing agencies and not-for-profit organizations to increase access to evidence-based low barrier drug addiction treatment, and to support reintegrating those with substance abuse disorders, by supporting job placement, housing and counseling. The Division of Regulation and Licensure's Financial Services Unit (FSU) will require additional personnel to oversee the grant processes, as well as provide overall support to the additional SMR staff. The FSU will require one Planner III at an annual salary of $60,000, one Executive II with an annual salary of $40,000, and one Senior Office Support Assistant with an annual salary of $27,851. All FSU staff are assumed to start in July 2021.

YEAR 3

The SMR will continue program build-out and receive applications for an additional 48 microbusinesses in January 2023, which will likely require both minimum qualification review and scoring. Licensing of new business of all types will begin in November 2023, requiring minimum qualification review and scoring. Facility agent applications and oversight will increase when new facilities begin operating.

To cover public outreach/response, facility agent applications and oversight, and additional increases in compliance/enforcement functions for new facility licenses, the SMR will require additional staff. The following positions will be hired as of July 2022:

- Two Investigator IIIs with an annual salary of $60,000;
- Eight Investigators II with an annual salary of $50,000;
- Four Special Assistant Professionals with an annual salary of $45,000;
- Three Health Program Representative IIs with an annual salary of $40,000; and
- One Administrative Office Support Assistant with an annual salary of $38,000.

All job duties consistent with previous staff.

The Investigators are assumed to be telecommuters and are expected to travel extensively; it is assumed that the travel cost will be $10,118 annually for all investigative staff.

It is assumed application scoring will cost approximately $2,200,000 in Year 3. This estimate is based on the current SMMR contract, assuming a new contract will be necessary and assuming there will be four times the number of applications received as there are

licenses available for microbusinesses, and assuming the scoring expense for new marijuana business applications of all types will be similar to 2019 SMMR experience for expenses.

The IP implies a duty to reopen application periods when licenses become available. There is also the option to issue additional licenses indefinitely. And whenever there are more applicants than licenses available, DRL will have to have them scored. DRL would assumes that the ongoing costs would be approximately $1,110,000 for application scoring. We do not have any other one-time costs except for the office furniture/equipment.

The current contract for IT solutions will need to be continued and expanded. The estimated cost for year three is $518,599.

Officials from the **Department of Commerce and Insurance** indicated this petition, if passed, will have no cost or savings to their department.

Officials from the **Department of Mental Health** indicated this proposal creates no direct obligations or requirements to their department that would result in a fiscal impact.

Officials from the **Department of Natural Resources** indicated their department would not anticipate a direct fiscal impact from this proposal.

Officials from the **Department of Corrections** indicated a fiscal impact of costs savings of $0 in fiscal year 2020, $192,382 in fiscal year 2021, $1,364,701 in fiscal year 2027.

The estimate of the impact of this amendment is determined by a standard response of looking at persons committed for marijuana-only offenses. In 2018, thirty people were incarcerated and 383 given probationary terms of cannabis-only violations. The average sentence is 7.0 years with 0.9 served before first release; the average probationary term is three years.

Passage of Initiative Petition (IP) 2020-126 is estimated to result in 30 fewer persons incarcerated and 383 fewer persons entering probationary supervision per year in their department. The full impact of the bill occurs in fiscal year (FY) 2028 with 90 fewer persons incarcerated and 1,269 fewer persons on field supervision. This results in a reduction of 10 (Probation and Parole) P&P officers by FY2026. Their department cost of incarceration in $17.224 per day or an annual cost of $6,287 per offender. Their department cost of probation or parole is determined by the number of P&P Officer II positions that would be needed to cover the new caseload.

Officials from the **Department of Labor and Industrial Relations** indicated they anticipate no fiscal impact for this proposal.

Officials from the **Department of Revenue** indicated:

Section 1.3 states that all public records produced or retained pursuant to this section are subject to the general provisions of Missouri's Sunshine Law. Thus, information obtained from an applicant or licensee are subject to closure.

Section 1.3 also states that qualifying patients under this section shall obtain an identification card which shall be valid for three years and may be renewed with a new physician's certification. The Department recognizes that the fee of twenty-five dollars per year per card remains the same, and does not anticipate a fiscal impact.

Section 1.3 also states that primary caregiver's identification cards shall be valid for three years. Furthermore, the fee for a primary caregiver's identification card has been increased from twenty-five dollars to seventy-five dollars. The Department recognizes that the fee, as it is written today, reads that it shall be twenty-five dollars per year. This initiative petition increases the fee to seventy-five dollars every three years. The total revenue gained, in totality, then, should not change, but the state could recognize changes in cash flow with the fee being paid by primary caregivers every three years instead of one. The Department defers to the Department of Health and Senior Services to estimate the impact to state cash flows.

Section 1.5 awards non-resident of Missouri patients the ability to purchase marijuana for medical purposes from a medical marijuana dispensary facility as permitted by this section. The Department recognizes that if out of state residents purchase medical marijuana in Missouri that the Missouri Veterans' Health and Care fund could increase as well as state and local sales and use taxes. The Department provides an unknown impact for this section, though, as the number of outside residents purchasing marijuana in Missouri cannot truly be estimated.

Section 2.1 states that recreational marijuana shall be legal for individuals aged twenty one and above.

Section 2.3 states that this section shall not require any employer to permit or accommodate conduct otherwise allowed by this section in or on any workplace or employer's property.

Section 2.4 states the Department of Health and Senior Services shall issue, at a minimum, the same number of marijuana cultivation facilities under Section 1 (medical marijuana), the same number of marijuana-infused products manufacturing facilities licenses as are issued for medical marijuana infused products manufacturing facilities, the same number of marijuana dispensary facility licenses as are issued to medical marijuana dispensary facilities, and a minimum number of marijuana microbusiness licenses are allowed for medical marijuana; stating that marijuana microbusiness licenses may be awarded to applicants of marijuana microbusinesses that is at least fifty percent owned by natural persons who qualified as economically disadvantaged owners or disabled veterans at the time they applied and received their licenses.

The Department recognizes that Section 1 (medical marijuana) allows for a minimum of 60 cultivation facility licenses, 86 marijuana-infused product facilities, and 192 dispensary

licenses. The number of marijuana microbusiness licenses would be issued over a period of time, as any other licenses allowed fall short of the minimum required.

The Department estimates the following minimum impact for Section 2.4:

Chart 1

Facility Type	Application Fee/Renewal Fee		Annual Fee	Minimum Number of Licenses	Estimated Revenue (Minimum)		
	Valid for 3 years	Year 4 and Thereafter			Application Fee	Renewal Fee	Annual Fee
Marijuana Cultivation Facility	$12,000	$5,000	$25,000	60	$720,000	$300,000	$1,500,000
Dispensary	$7,000	$3,000	$10,000	192	$1,344,000	$576,000	$1,920,000
Marijuana Infused Product Facility	$7,000	$3,000	$10,000	86	$602,000	$258,000	$860,000
Marijuana Microbusiness	$1,500	$2,500	$2,500	96	$144,000	$240,000	$240,000

Section 2.5 states that a local government may prohibit the operation of all non-medical retail marijuana facilities regulated under this section from being located within its jurisdiction through voter approval of a ballot question submitted to such voters of such local government.

Section 2.6 of this initiative petition states that a tax equal to 15% of the retail price of non-medical marijuana sold to consumers shall be levied. Furthermore, the Department recognizes that Section 2.6 states that the tax levied is separate from and in addition to any general state and local sales and use tax(es) that apply to retail sales – which will be collected upon the retail sales to consumers.

The Department observed data published by Marijuana Business Daily that projects U.S. retail marijuana sales to 2023, including both medical marijuana retail sales and recreational marijuana retail sales, shown separately (please see Chart 2).

Chart 2

Year	Medical U.S. Cannabis Retail Sales		Recreational U.S. Cannabis Retail Sales		Total U.S. Cannabis Retail Sales	
	Low	High	Low	High	Low	High
2018	$3,300,000,000	$3,800,000,000	$5,300,000,000	$6,200,000,000	$8,600,000,000	$10,000,000,000
2019	$4,200,000,000	$5,200,000,000	$7,000,000,000	$8,500,000,000	$11,200,000,000	$13,700,000,000
2020	$5,500,000,000	$6,800,000,000	$10,200,000,000	$12,200,000,000	$15,700,000,000	$19,000,000,000
2021	$6,400,000,000	$7,800,000,000	$13,000,000,000	$15,700,000,000	$19,400,000,000	$23,500,000,000
2022	$6,700,000,000	$8,300,000,000	$15,700,000,000	$19,100,000,000	$22,400,000,000	$27,400,000,000
2023	$6,900,000,000	$8,400,000,000	$18,100,000,000	$22,000,000,000	$25,000,000,000	$30,400,000,000

https://mjbizdaily.com/exclusive-us-retail-marijuana-sales-on-pace-to-rise-35-in-2019-and-near-30-billion-by-2023/

Using the "Total U.S. Cannabis Retail Sales column(s) from Chart 2, the Department calculated, for both high and low estimates, the estimated increase in total U.S. marijuana retail sales for each year in order to calculate an the average increase recognized each year

so that the Department could estimate retail sales through Year 2030. The Department recognized the following estimated increases in U.S. marijuana retail sales, as they were estimated by Marijuana Business Daily, between 2018 and 2023:

Chart 3

Year	Percent Difference/Increase (Using Total U.S. Marijuana Retail Sales – Chart 2)	
	Low	High
2019	30.23%	37%
2020	40.18%	39%
2021	23.57%	24%
2022	15.46%	17%
2023	11.61%	11%
Average Percent Difference/Increase	**24%**	**25%**

The Department used the average percent difference (increase) calculated from Chart 3 to estimate the total U.S. marijuana retail sales through Year 2030:

Chart 4

Year	Total Estimated U.S. Cannabis Retail Sales 2018-2030	
	Low	High
2018	$8,600,000,000	$10,000,000,000
2019	$11,200,000,000	$13,700,000,000
2020	$15,700,000,000	$19,000,000,000
2021	$19,400,000,000	$23,500,000,000
2022	$22,400,000,000	$27,400,000,000
2023	$25,000,000,000	$30,400,000,000
2024	$31,052,453,447	$38,116,431,496
2025	$38,570,194,602	$47,791,524,670
2026	$47,907,966,892	$59,922,446,584
2027	$59,506,396,466	$75,132,560,206
2028	$73,912,784,241	$94,203,456,716
2029	$91,806,931,670	$118,115,118,571
2030	$114,033,218,871	$148,096,277,158

The Department, then, using Chart 2, calculated the estimated percent of medical marijuana retail sales (medical marijuana retail sales / total U.S. marijuana retail sales) and the estimated percent of recreational marijuana retail sales (recreational marijuana retail sales / total U.S. marijuana retail sales), for both low and high estimates:

Chart 5

Year	Percent of Medical Low	Percent of Medical High	Percent of Recreational Low	Percent of Recreational High
2018	38%	38%	62%	62%
2019	38%	38%	63%	62%
2020	35%	36%	65%	64%
2021	33%	33%	67%	67%
2023	30%	30%	70%	70%
2023	28%	28%	72%	72%
Average Percent	**34%**	**34%**	**66%**	**66%**

The Department recognized that the estimated medical marijuana retail sales results to 34 percent of the total U.S. marijuana retail sales and recreational marijuana retail sales results in 66 percent of the total U.S. marijuana retail sales.

The Department applied the percentages estimated in Chart 5 to Chart 4 to determine the U.S. Cannabis Retail Sales, from 2018 to 2030, separated by medical marijuana retail sales and recreational marijuana retail sales:

Chart 6

Year	Total Estimated U.S. Cannabis Retail Sales		Medical Sales (Low)	Recreational Sales (Low)	Medical Sales (High)	Recreational Sales (High)
	Low	High	34%	66%	34%	66%
2018	$8,600,000,000	$10,000,000,000	$2,924,000,000	$5,676,000,000	$3,400,000,000	$6,600,000,000
2019	$11,200,000,000	$13,700,000,000	$3,808,000,000	$7,392,000,000	$4,658,000,000	$9,042,000,000
2020	$15,700,000,000	$19,000,000,000	$5,338,000,000	$10,362,000,000	$6,460,000,000	$12,540,000,000
2021	$19,400,000,000	$23,500,000,000	$6,596,000,000	$12,804,000,000	$7,990,000,000	$15,510,000,000
2022	$22,400,000,000	$27,400,000,000	$7,616,000,000	$14,784,000,000	$9,316,000,000	$18,084,000,000
2023	$25,000,000,000	$30,400,000,000	$8,500,000,000	$16,500,000,000	$10,336,000,000	$20,064,000,000
2024	$31,052,453,447	$38,116,431,496	$10,557,834,172	$20,494,619,275	$12,959,586,708	$25,156,844,787
2025	$38,570,194,602	$47,791,524,670	$13,113,866,165	$25,456,328,437	$16,249,118,388	$31,542,406,282
2026	$47,907,966,892	$59,922,446,584	$16,288,708,743	$31,619,258,149	$20,373,631,838	$39,548,814,745
2027	$59,506,396,466	$75,132,560,206	$20,232,174,798	$39,274,221,667	$25,545,070,470	$49,587,489,736
2028	$73,912,784,241	$94,203,456,716	$25,130,346,642	$48,782,437,599	$32,029,175,283	$62,174,281,432
2029	$91,806,931,670	$118,115,118,571	$31,214,356,768	$60,592,574,902	$40,159,140,314	$77,955,978,257
2030	$114,033,218,871	$148,096,277,158	$38,771,294,416	$75,261,924,455	$50,352,734,234	$97,743,542,924

The Department recognizes that medical marijuana will be accounted for pursuant to the passage of Amendment 2 of 2018 and that this initiative petition states that a "tax shall be levied upon the retail sale of *non-medical marijuana*…" Thus, the Department has removed the medical marijuana retail sales from the projections moving forward:

Chart 7

Year	Total Estimated U.S. Cannabis Retail Sales		Recreational Sales (Low)	Recreational Sales (High)
	Low	High	66%	66%
2018	$8,600,000,000	$10,000,000,000	$5,676,000,000	$6,600,000,000
2019	$11,200,000,000	$13,700,000,000	$7,392,000,000	$9,042,000,000
2020	$15,700,000,000	$19,000,000,000	$10,362,000,000	$12,540,000,000
2021	$19,400,000,000	$23,500,000,000	$12,804,000,000	$15,510,000,000
2022	$22,400,000,000	$27,400,000,000	$14,784,000,000	$18,084,000,000
2023	$25,000,000,000	$30,400,000,000	$16,500,000,000	$20,064,000,000
2024	$31,052,453,447	$38,116,431,496	$20,494,619,275	$25,156,844,787
2025	$38,570,194,602	$47,791,524,670	$25,456,328,437	$31,542,406,282
2026	$47,907,966,892	$59,922,446,584	$31,619,258,149	$39,548,814,745
2027	$59,506,396,466	$75,132,560,206	$39,274,221,667	$49,587,489,736
2028	$73,912,784,241	$94,203,456,716	$48,782,437,599	$62,174,281,432
2029	$91,806,931,670	$118,115,118,571	$60,592,574,902	$77,955,978,257
2030	$114,033,218,871	$148,096,277,158	$75,261,924,455	$97,743,542,924

Based on a report published by the Substance Abuse and Mental Health Services Administration, in 2018, 34.8 percent of individuals surveyed, within the United States, aged 18-25 used marijuana in the past year and 13.3 percent of individuals surveyed, within the United States, aged 26 and older used marijuana in the past year.

The Henry Kaiser Family Foundation (KFF) states that there are approximately 240,903,600 individuals in the United States aged 19 and above. Separating the population by age, there are approximately 28,348,600 individuals within the United States between the ages of 19 and 25 and approximately 212,555,000 individuals within the United States aged 26 or above.

Using the data published by the Substance Abuse and Mental Health Services Administration in conjunction with the age demographics published by the KFF, approximately 9,865,313 (28,348,600 x 34.8%) individuals in the United States aged between 19 and 25 and 28,269,815 (212,555,000 x 13.3%) individuals in the United States aged 26 and older that have used marijuana in the past year.

A data search with Missouri Census Data Center states that there are approximately 566,385 individuals in Missouri aged 18 -24 and approximately 4,183,237 individuals in Missouri aged 25 and older, with a total of 4,749,622 individuals aged 18 or above.

Using the data published by the Substance Abuse and Mental Health Services Administration in conjunction with the Missouri Census Data Center statistics, 197,102 (566,385 x 34.8%) Missourians aged 18-24 and 556,370 (4,183,237 x 13.3%) Missourians aged 25 and above have used marijuana in the past year.

*The Department notes that, due to the difference in the age groups defined between the Substance Abuse and Mental Health Services Administration and the Missouri Census Data Center, that the revenue forecasts for Missouri is understated slightly, as individuals aged 25 in Missouri are included within the projections using the lower percent of 13.3% and not 34.8% - whereas individuals aged 25 were included within the 34.8% stated by the Substance Abuse and Mental Health Services Administration. Also, due to the differences in the age groups defined between the Henry Kaiser Family Foundation and the Missouri Census Data Center, the revenue forecasts for Missouri is slightly overstated slightly, as individuals aged 18 are not included in the Henry Kaiser Family Foundation data but is included and accounted for in the Missouri Census Data Center data. The Department assumes, due to these acknowledgements just mentioned, that a "wash" could occur – reporting more accurate data than not.

Comparing the United States individuals to Missouri individuals who have used marijuana in the past year, the Department estimates Missouri's marijuana market share of total U.S. marijuana retail sales to be approximately 1.98% (estimated Missouri total population aged 18 and above using marijuana in the past year / total U.S. population aged 18 and above using marijuana in the past year percent of the total marijuana market within the United States – (197,102 + 556,370) / (9,865,313 + 28,269,815)).
Therefore, the Department refers back to the total Estimated U.S. Cannabis Retail Sales 2018-2030 from Chart 7, to forecast Missouri's recreational marijuana market/retail sales:

Chart 8

Missouri's Recreational Marijuana Market (1.98%)	
Low	**High**
$112,384,800	$130,680,000
$146,361,600	$179,031,600
$205,167,600	$248,292,000
$253,519,200	$307,098,000
$292,723,200	$358,063,200
$326,700,000	$397,267,200
$405,793,462	$498,105,527
$504,035,303	$624,539,644
$626,061,311	$783,066,532
$777,629,589	$981,832,297
$965,892,264	$1,231,050,772
$1,199,732,983	$1,543,528,369
$1,490,186,104	$1,935,322,150

The Department recognizes that Section 2.4 states that the Department of Health and Senior Services shall begin accepting facility applications within 365 days of December 3, 2020 (effective date of Section 2) and must allow application approvals within one-hundred eighty days after application submissions. The Department believes that the sale of recreational marijuana would not begin until June 2022.

When applying the state sales tax, the 15 percent excise tax, and weighted average local tax rate to Missouri's recreational marijuana market, as shown in Chart 7, the Department estimates the following increases, including both low and high estimates, for the following tax years:

The Department further recognizes that sales would begin one month before the end of Fiscal Year 2022. Based on historical sales tax collection data, the Department adjusts calendar year collections putting 50 percent into the first fiscal year and fifty percent into the second fiscal year. Thus, the Department estimates the following increases, including both low and high estimates, for the following fiscal years:

Chart 11

FY 30	$52,182,757.79	$17,394,252.60	$2,174,281.57	$1,739,425.26	$73,490,717	$260,913,788.95	$68,359,412.71

Section 2.6 further states that all revenues gained under Section 2 shall be deposited into the Veterans, Infrastructure, and Health Fund. The Department believes that this would include all license fees, application fees, renewal fees, annual fees, and the 15 percent tax levied. The Department does not believe this would include the 4.225% state sales tax. The Department notes that monies in the Veterans, infrastructure, and Health Fund shall be distributed in the following manner:

a. Amounts necessary to cover any Department of Health and Senior Services costs related to the administration of Section 2.
b. Amounts necessary for the creation of a reserve fund within the Department of Health and Senior Services to ensure there is enough working capital to administer Section 2.
c. 3/15th of the remaining balance to any local jurisdiction with recreational marijuana sales.
d. Any remaining balance will then be distributed
    a. 1/3rd to the Missouri Veterans' Commission
    b. 1/3rd to the State Road Fund
    c. 1/3rd to the Department of Health and Senior Services for grants to non-profits and other agencies in relation to drug addiction treatment.

The Department is unable to determine the amounts necessary for the Department of Health and Senior Services to administer Section 2 and the amounts necessary for the reserve fund. The Department will show the maximum amount of sales tax related revenues that could be distributed if all administration fees and reserve fund needs were met by the facility licensing fees.

As a result of the Department's inability to determine or estimate the administrative costs of the Department of Health and Senior Services and the amounts necessary for the reserve fund, the distribution(s) shown above are subject to change significantly.

Section 10 states that the adult use of recreational marijuana is not unlawful and further allows individuals who have been arrested, charged, or found guilty for any offense that would no longer be illegal after the effective date of Section 2 to apply for and be granted an expungement of their records specific to the aforementioned offenses. The Department defers to the Department of Corrections and the State Public Defender's Office to estimate the impact of Section 10.

Officials from the **Department of Public Safety - Office of Director** indicated they see no fiscal impact due to this initiative petition. They also provided the following comments from Missouri State Highway Patrol officials.

Department of Public Safety - Division of Missouri State Highway Patrol indicated:

If this Amendment would be approved, it would result in a fiscal impact to the Criminal Record Systems Fund.

The Missouri Department of Health and Senior Services estimates that between 18,000 and 36,000 new fingerprint based criminal record checks will be performed in relation to the 348 medical marijuana facilities under Section 1 of Article XIV. The Patrol estimates that between $396,000.00 and $792,000.00 may be deposited in the Criminal Record System Fund as a result of the background check requirements in Section 2. For purposes of this response, the Patrol assumes it will perform 36,000 checks. Using these same figures for

the marijuana facilities licensed as identified in Section 2 of Article XIV, the Patrol estimates the following fiscal impact.

The state fee for a fingerprint based criminal record check is $20.00 per request.
The federal fee for a fingerprint based criminal record check is $13.25 per request, of which, the CJIS Division retains $2.00 of the federal fee. This equates to $22.00 of the total state and federal fingerprint background check fee that is retained in the Criminal Record System Fund per request.

State and Federal Fingerprint Fee Schedule
State Fee = $20.00
Federal Fee = $13.25
Total State and Federal fee = $33.25
Vendor Fee (if applicable) = $8.50
Total State and Federal with Vendor fee = $41.75
Total Retained in the Criminal Record System Fund = $22.00

Meanwhile, the Patrol's Criminal Justice Information Services Division (CJIS) processes all requests for expungements for criminal history records, and the requests are processed by a CJIS Technician. This person reviews criminal history records, contacts agencies associated with the arrests or convictions, and collects all necessary data for court orders.

As of September 2019, there were 234,808 marijuana related arrest charges in the Central Repository. The expungement process takes approximately 90 minutes, so 1 FTE could handle 1,243 expungements per year.

- 1,864 hours (average work hours per year) x 60 minutes per hour = 111,840 minutes per year.

- 111,840 minutes per year / 90 minutes per expungement = 1,243 expungements per year per FTE

- 234,808 records / 1,243 per FTE per year = 189 FTE

Additionally, the Patrol Records Division (PRD) processes all petitions and court orders relating to expungement of marijuana related traffic arrests.

There are currently 113,922 traffic arrest records in the system. The expungement process takes approximately 30 minutes, so 1 FTE could handle 3,728 expungements per year.

- 111,840 minutes per year / 30 minutes per expungement = 3,728 expungements per year per FTE

- 113,922 records / 3,728 per FTE per year = 31 FTE

The Patrol would also need to replace all 10 of its canines. The Patrol's canines are currently trained using Cannabis/Marijuana as one of the drugs to which they alert. If this initiative were to pass, each canine would have to be retired and replaced. The purchase and initial training for a canine is approximately $22,000. Since the Patrol contracts its canine training, the time to train all 10 canines could take up to 3 years.

As a result, the anticipated total initial cost to the Patrol will be approximately **$13,476,898**, as follows:

$12,730,318	Salary and fringe benefits for 189 CJIS Technicians and 31 PRD Technicians
$1,318,580	Expense and Equipment, including rental space, janitorial for the 220 FTE
$220,000	Cost of replacing and training 10 canines
($792,000)	Fee collected from fingerprinting/added to CRS Fund
$13,476,898	Total Cost

With the time involved in hiring and training FTE and processing expungements the Patrol anticipates this being a 2-year project, after which time the FTE would be terminated.

Missouri State Highway Patrol - Comments and Concerns

While the Initiative Petition has the appropriate wording, the FBI does not recognize an Amendment to Missouri's Constitution by means of an Initiative Petition as meeting Public Law 92-544 criteria to authorize a federal fingerprint based criminal record check. If a Constitutional Amendment were to pass by means of the Initiative Petition process, the Patrol recommends that the Department of Health and Senior Services seek specific legislation to ensure the state and federal fingerprint based criminal record check is properly authorized.

In 2009, Colorado traffic fatalities involving drivers testing positive for marijuana represented 9% of the total traffic fatalities. Recreational marijuana use was legalized in 2012. By 2016, that number more than doubled to 21%.

Marijuana-related traffic deaths increased 66% in the four-year average (2013-2016) since Colorado legalized recreational marijuana compared to the four-year average (2009-2012) prior to legalization.

Marijuana-related deaths when a driver tested positive for marijuana more than doubled from 55 deaths in 2013 to 125 deaths in 2016.

The yearly number of marijuana related hospitalizations increased 72% after the legalization of marijuana, (2009-2012) vs. (2013-2016).

Colorado youth past month marijuana use for 2014/2015 was 55% higher than the national average.

The average THC levels in marijuana has increased significantly over the years: 1969-0.8%, 1995-4%, 2013-13%; 2017-20+%; Oil, 1995-13%, 2013-52%; highest Plant 38%, highest oil 95%+.

In Missouri, medical marijuana was legalized by Amendment 2 and took effect December 2018. As of June 10, 2019, 12 states have legalized recreational marijuana and 29 states have legalized medical marijuana. In a roadside 2013-2014 NHTSA roadside survey, 20% of the nighttime and weekend drivers tested positive for drugs. Interestingly, the number of daytime drugged drivers was approximately the same amount as night and weekend drugged drivers. A roadside study in Colorado and Washington, the first two states to legalize marijuana for recreational use, showed the primary increase of marijuana users happened to their daytime drivers. The percent of drivers that tested positive for marijuana during the day went from 8%, before recreational marijuana sales, to 23%, 6-12 months after marijuana was legalized. There was a 48% increase in weekend nighttime drivers testing positive for THC or 11-OH-THC (an active metabolite of THC) from 2007 to 2014.

Montana legalized medical marijuana in 2004 and from 2007-2010, the presence of marijuana in DUI suspects increased over 100%. Also, the number of DUI suspects who tested positive for alcohol and marijuana increased by over 180%.

Medical marijuana has been legal in the state of Colorado since 2000. On November 12, 2012, the state of Colorado passed Amendment 64, which legalized private use of marijuana. Per the Colorado State Patrol's driving under the influence statistics, marijuana DUI citations increased 25.5% from 2014 to 2018 and marijuana and alcohol citations increased 112% in the same time range. As marijuana becomes legalized, its use increases.

The three years after Colorado legalized marijuana for recreational use (2013-2015), its use increased in youth ages 12-17, by 12%, in young adults aged 18-25 by 16%, and adults 26 in older by 71%. By removing the recommended acceptable ages of use, zoning regulations, packaging, and advertising of cannabis/marijuana, the risk of use and abuse of marijuana by the youth of Missouri is substantially increased. This category of Missourians, who recent studies have shown significant long-term cognitive impairment when marijuana is ingested during the developmental years, would be affected.

2(7) The Patrol recommends replacing the word "specifically" with "which has, is or can be used in. . ." There are many items, products, and chemicals that can be used with marijuana, but are not developed specifically for marijuana. (page 14)

3(1)(d) The Patrol recommends replacing the word "intoxicated" with "impaired. (page 15)

3(3) The Patrol recommends replacing the word "intoxicated" with "impaired". (page 15)

4(24) The Patrol recommends addressing the need to prohibit the importation of marijuana from outside Missouri. (page 22)

9(1)(b) There is no definition for what qualifies as a non-violent crime. This information would be critical for the Department of Health and Senior Services in determining a disqualifying felony offense. In addition, there are no provisions for conducting criminal background checks under section nine. (page 25)

9(5) This section specifies the type of container the marijuana is required to be sold in, however, there are no provisions or requirements about the marijuana remaining in the same packaging one the sale to an individual has been made. The Patrol recommends language requiring marijuana to remain in its original packaging. For individuals who produce for themselves it is recommending having guidelines on the type of container or packaging if carried in public. (page 25)

The Patrol recommends a $75 fee, similar to the criminal history background check fee, be implemented for the cost of researching and reviewing criminal histories, as well as contacting various agencies associated with arrests (in researching other states with similar expungement requirements, they all charge a fee to offset the cost of the time required to process the expungements - their fees ranged from $50 to $450 per petition per arrest date).

This initiative provides specific employment protections for those who use Cannabis/Marijuana. Such use while serving in any law enforcement related position not only creates public safety concerns, but also quality control and security issues when working with highly sensitive material or information. Additionally, the Patrol receives federal grant funding, subject to audits, that require a drug free workplace policy. For these reasons, the Patrol feels it is essential that it be allowed to continue administering drug testing for new employees, as well as random tests, critical incident tests, etc.

Additionally, the initiative does not contain any language concerning the amount of marijuana an individual may transport, purchase or sell. Also, there is no language as to where the marijuana may be transported. A lack of guidance may allow for Missouri marijuana facilities to distribute marijuana outside of the state, or allow other states to distribute their marijuana in Missouri. A lack of such language could lead to Missouri being a distribution starting point for states where marijuana remains illegal.

Finally, if passed, the initiative petition will remove Cannabis/Marijuana from Missouri Revised Statutes and creating conflict with both several Federal and State laws, such as the use or possession of a firearm. As the Patrol has officers assigned to federal task forces that may be involved in a federal drug operation, there are concerns over potential civil litigation resulting from these types of operations, as marijuana is still classified as a Schedule I controlled substance, and illegal under federal law.

Officials from the **Department of Social Services** indicated they do not anticipate a fiscal impact from the initiative petition.

Officials from the **Governor's office** indicated there should be no added costs or savings to their office.

Officials from the **House of Representatives** indicated no fiscal impact to their office.

Officials from the **Department of Conservation** indicated that no adverse fiscal impact to their department would be expected as a result of this proposal.

Officials from the **Department of Transportation** indicated this initiative petition (IP) has the same federal compliance issues as previous IPs 20-123 and 20-125.

Summary
Elements within the initiative petition submitted by Deirdre Hirner present a variance of state law with the Federal Motor Carrier Safety Regulations (FMCSRs). Should this petition pass a vote of the People and become state law, Missouri's share of federal Motor Carrier Safety Assistance Program (MCSAP) funding is at risk. The fiscal impact ranges from approximately $350,000 to $7 million.

Background
MCSAP funding is received and distributed by the Missouri Department of Transportation to fund commercial vehicle safety and enforcement activities performed by the MoDOT Motor Carrier Services and Highway Safety and Traffic divisions; the Missouri State Highway Patrol; and the commercial vehicle enforcement police teams of St. Louis City, Kansas City and St. Louis County.

In order to receive the funding, Missouri must enforce FMCSRs in whole. Language with respect to the expungement of marijuana convictions within the initiative petition would prevent enforcement of 49 CFR § Parts 391 and 392. These federal regulations relate to the transportation of and use of controlled substances by commercial motor vehicle drivers.

The expungement language, found in the petition in the section entitled *Personal Use of Marijuana* on page 27, 10-(7) and (8), would keep the marijuana-related convictions of commercial motor vehicle (CMV) drivers from appearing in their criminal records and force Missouri agencies to forgo enforcement of FMCSRs pertaining to the use of disqualified drivers.

Penalty
Per 49 CFR § 350.215 – The penalty imposed upon States found to be in noncompliance can be as harsh as withholding all MCSAP funding; or
Withholding up to 5 percent of MCSAP funds during the fiscal year that the FMCSA notifies the State of its noncompliance;
Up to 10 percent of MCSAP funds for the first full fiscal year of noncompliance;
Up to 25 percent of MCSAP funds for the second full fiscal year of noncompliance; and
Not more than 50 percent of MCSAP funds for the third and any subsequent full fiscal year.

MCSAP funding, Using Missouri's MCSAP apportionment for Fiscal Year 2018 as a base, a **full withholding places $6,934,545** at risk. This is the steepest penalty possible.
If the less stringent withholding took effect, the results would be as follows:

- **5 percent** - $346,727 – during the fiscal year that FMCSA notifies the State of noncompliance;
- **10 percent** - $693,454 – during the first full fiscal year of non-compliance;
- **25 percent** - $1,733,636 – during the second full fiscal year of non-compliance; and
- **Not more than 50 percent** – or $3,467, 272 for the third and any subsequent full fiscal year of non-compliance.

BASIS FOR A POSSIBLE FISCAL IMPACT

Federal Motor Carrier Safety Regulations and Their Adoption in Missouri
Regardless of Missouri's legal status on cannabis, marijuana remains a controlled substance at the federal level and is illegal to possess, use or transport across state lines – whether it is intended for medicinal or recreational use.

The U.S. Department of Transportation prohibits the use of cannabis by commercial motor vehicle drivers as the U.S. Drug Enforcement Administration currently considers THC, or tetrahydrocannabinol, the principal psychoactive compound in marijuana, to be a Schedule I controlled substance.
The following DOT regulations in Title 49 CFR prohibit the use and possession of marijuana.

§382.213 Controlled substance use.

> ***(a) No driver shall report for duty or remain on duty requiring the performance of safety sensitive functions when the driver uses any drug or substance identified in 21 CFR 1308.11 Schedule I.***

§392.4 Drugs and other substances.

> ***(a) No driver shall be on duty and possess, be under the influence of, or use, any of the following drugs or other substances:***
> ***(1) Any 21 CFR 1308.11 Schedule I substance;***

Part 382 applies to drivers operating in both interstate and intrastate commerce.

Part 392 is specific to interstate transportation.

Though Part 392 is specific to interstate transportation, by virtue of Missouri's adoption of the FMCSRs through 307.400 RSMo, the regulation applies to intrastate transportation as well. No intrastate commercial motor vehicle driver can possess, be under the influence of, or use marijuana.

Disqualification of a CMV Driver
Title 49 CFR Part 391.15 – Disqualification of Drivers, addresses disqualification of commercial motor vehicle drivers. A driver, convicted of a disqualifying offense is disqualified for one year from the date of conviction for first offenders and three years after

the date of conviction if, during the previous three years preceding the conviction date, the driver was convicted of a disqualifying offense.

One of the disqualifying offenses referenced is transporting, possessing or using a Schedule 1 substance while on duty:

49 CFR 391.15(c)(2)(iii) Transportation, possession, or unlawful use of a 21 CFR 1308.11 Schedule I identified controlled substance, amphetamines, narcotic drugs, formulations of an amphetamine, or derivatives of narcotic drugs while the driver is on duty, as the term on-duty time is defined in § 395.2 of this subchapter;

A CMV driver convicted of any of the above offenses specific to marijuana while on duty is a disqualified driver. The disqualification applies even if the marijuana offense occurred in a state where the disqualifying conviction was for an act/condition that later became legal.

If prior marijuana convictions are wholly expunged from criminal records, the records of CMV drivers who had been convicted of marijuana-related offences would not retain this information, yet the driver is technically not qualified to operate a CMV. Further, neither MoDOT Motor Carrier Services nor other motor carrier enforcement agencies could know of the convictions when making enforcement determinations.

Officials from the **Office of Administration** indicated this proposal amends Article XIV, Section 1 of the Missouri Constitution that was voter approved in November 2018 and adds additional language in Section 2 for recreational marijuana.

Section 1.3 states that all public records produced or retained under Section 1 shall become subject to the Missouri Sunshine Law on December 2, 2020. Section 1.3 changes qualified patient identification cards from an annual renewal to every three years. The patient card fees remain $25 per year. Budget and Planning (B&P) notes that it is not clear if patients will pay $75 ($25 x 3 years) upon application and renewal or $25 each year the card is active. Section 1.3 also changes primary caregiver identification cards from an annual renewal to every three years; the card fee is also increased from $25 to $75. B&P defers to the Department of Health and Senior Services (DHSS) for the estimated impact from these provisions.

Section 1.5 would allow out-of-state medical patients to purchase medical marijuana within Missouri. B&P notes that this could increase funding to the Missouri Veterans' Health and Care Fund as well as state and local sales tax collections by an unknown amount if out-of-state patients subsequently purchase medical marijuana within Missouri.

Section 2.1 would legalize the use of recreational marijuana for individuals over the age of 21.

Section 2.4 states that the number of recreational marijuana facility licenses (cultivation, marijuana-infused products, and dispensaries) must equal the number of licenses granted

under medical marijuana (Section 1). B&P notes that per Section 1, the minimum number of cultivation facility licenses is 60, dispensary licenses is 192, and marijuana-infused product facility licenses is 86. In addition, Section 2.4 creates a minimum number of microbusiness facility licenses granted over a period of time. Section 2.4 further details the amount of application and annual fees required. Table 1 lists the fees per facility type and the associated estimated minimum revenue. B&P defers to DHSS for a more detailed analysis of the estimated impacts from these provisions.

Table 1: Facility Fees

Facility Type	Application/ Renewal Fees		Annual Fee	# Min Licenses Allowed	Estimated Minimum Revenue		
	Years 1-3	Years 4+			Application Fee	Renewal Fee (Every 3 years)	Annual Fee
Cultivation Facility	$12,000	$5,000	$25,000	60	$720,000	$300,000	$1,500,000
Dispensary	$7,000	$3,000	$10,000	192	$1,344,000	$576,000	$1,920,000
Marijuana-Infused Product Facility	$7,000	$3,000	$10,000	86	$602,000	$258,000	$860,000
Microbusinesses *Note: Up to an additional 48 microbusiness licenses may be issued if DHSS determines there is a market.*	$1,500	$2,500	$2,500	96	$144,000	$240,000	$240,000

Section 2.5 allows local jurisdictions to prohibit the operation of non-medical marijuana facilities upon voter approval at a general election.

Section 2.6 establishes an excise tax rate of 15% upon the retail price of non-medical marijuana. Section 2.6 notes this is in addition to state and local sales taxes that apply to retail sales. B&P notes that the language refers to "general state and local sales and use taxes". For the purpose of this fiscal note, B&P assumes that general means all state and local sales taxes levied and not just those levies that are directed to the state (or local) general revenue fund.

Based on research, B&P was able to find forecasts for the U.S. legal market for cannabis[1]. According to such forecasts, the U.S. market for legal marijuana will be approximately $24.5 billion in calendar year 2021 and grow up to $47.3 billion by calendar year 2027. Based on information from the Substance Abuse and Mental Health Services Administration[2], from 2016-2017 approximately 13.95% of Missouri residents and 14.73% of all U.S. residents surveyed have used marijuana within the last year. Using the populations of Missouri residents age 18 and over compared to the U.S. population age 18 and over, B&P estimates that the market for legal marijuana in Missouri is 1.79% of the total U.S. market. Therefore, B&P estimates that the Missouri market for legal marijuana

[1] https://cannabusinessplans.com/cannabis-legal-market-size-projections/
[2] https://www.samhsa.gov/data/report/comparison-2015-2016-and-2016-2017-nsduh-population-percentages-50-states-and-district

would be approximately $439.5 million in calendar year 2021 ($24.5 billion x 1.79%) and up to $848.4 million by calendar year 2027 ($47.3 billion x 1.79%).

Based on further research[3], B&P estimates that there could be between 61,700 to 122,500 medical marijuana users in Missouri. Using these estimates, and the estimates shown above, B&P estimates that the Missouri market for medical marijuana would be between 0.17% and 0.34% of the total U.S. Market for legal marijuana. Therefore, B&P estimates that the total Missouri market for recreational marijuana would be 1.46% to 1.62% of the total U.S. market. Table 1 shows the estimated U.S. and Missouri markets for marijuana.

Table 2: Estimated Marijuana Market Size for the U.S. and Missouri

Calendar Year	Estimated U.S. Market Size	Estimated MO Market Size	Estimated MO Medical Market Size	Estimated MO Recreational Market Size
2021	$24,500,000,000	$439,465,251	$41,480,436	$ 397,984,815
2022	$28,300,000,000	$507,627,209	$61,066,553	$ 446,560,656
2023	$32,100,000,000	$575,789,166	$80,652,669	$ 495,136,497
2024	$35,900,000,000	$643,951,123	$100,238,785	$ 543,712,338
2025	$39,700,000,000	$712,113,081	$119,824,901	$ 592,288,179
2026	$43,500,000,000	$780,275,038	$139,411,018	$ 640,864,020
2027	$47,300,000,000	$848,436,996	$158,997,134	$ 689,439,861

B&P notes that Section 2.4 states that DHSS must begin accepting facility applications within 365 of December 3, 2020 (the effective date of Section 2) and must grant application approvals within one-hundred and eighty days of their submission. Therefore, B&P estimates that sales of recreational marijuana will not begin until June 2022.

Applying the excise tax rate of 15% plus the state sales tax rate of 4.225% and excluding the estimated market for medical marijuana, B&P estimates that this proposal may increase state revenues by $50.0 million in calendar year 2022. By calendar year 2027, B&P estimates that this proposal may increase state revenues by $132.5 million. This proposal could also increase local revenues by $10.2 million in calendar year 2021 and $27.1 million by calendar year 2027; these estimates assume that no local jurisdictions opt-out of recreational marijuana. Table 3 shows the estimated revenues generated by calendar year.

[3] https://www.stltoday.com/news/local/metro/plenty-of-pot-study-says-missouri-will-license-twice-as/article_e94469b0-e1c6-5893-bc2e-e1d7b24f4a73.html

Table 3: Estimated Calendar Year Revenues

Fund	CY 2022*	CY 2023	CY 2024	CY 2025	CY 2026	CY 2027
GR (3.0% tax)	$7,814,811	$14,854,095	$16,311,370	$17,768,645	$19,225,921	$20,683,196
Education (1.0% tax)	$2,604,937	$4,951,365	$5,437,123	$5,922,882	$6,408,640	$6,894,399
Conservation (0.125% tax)	$325,617	$618,921	$679,640	$740,360	$801,080	$861,800
Parks, soil, water (0.1% tax)	$260,494	$495,136	$543,712	$592,288	$640,864	$689,440
Veterans, Infrastructure, and Health Fund (15.0% tax)	$39,074,057	$74,270,475	$81,556,851	$88,843,227	$96,129,603	$103,415,979
TSR (total 4.225% state sales tax)	**$50,079,057**	**$95,189,992**	**$104,528,697**	**$113,867,402**	**$123,206,108**	**$132,544,813**
Local Revenue (pop. weighted local rate 3.93%)	$10,237,403	$19,458,864	$21,367,895	$23,276,925	$25,185,956	$27,094,987

*Assumes 7 months of sales from June 2022 through December 2022.

However, B&P notes that sales would start one month before the end of FY 2022. Based on historical sales tax collection data, B&P adjusts calendar year collections 50% into the first fiscal year and 50% into the second fiscal year. Therefore, B&P estimates that this proposal will increase state revenues by $7.2 million in FY 2022. By FY 2028, this proposal may increase state revenues by $132.5 million. This proposal may also increase local revenues by $1.5 million in FY 2022 and up to $27.1 million by FY 2028, assuming no local jurisdictions opt out of recreational marijuana. Table 4 shows the estimated revenue generated by fiscal year.

Table 4: Estimated Fiscal Year Revenues

Fund	FY 2022	FY 2023	FY 2024	FY 2025	FY 2026	FY 2027	FY 2028
GR	$1,116,402	$14,125,457	$15,582,733	$17,040,008	$18,497,283	$19,954,558	$20,683,196
Education	$372,134	$4,708,486	$5,194,244	$5,680,003	$6,165,761	$6,651,519	$6,894,399
Conservation	$46,517	$588,561	$649,281	$710,000	$770,720	$831,440	$861,800
Parks, soil, water	$37,213	$470,849	$519,424	$568,000	$616,576	$665,152	$689,440
Veterans, Infrastructure, and Health Fund	$5,582,008	$70,627,287	$77,913,663	$85,200,039	$92,486,415	$99,772,791	$103,415,979
TSR	**$7,154,274**	**$90,520,639**	**$99,859,344**	**$109,198,050**	**$118,536,755**	**$127,875,461**	**$132,544,813**
Local Revenue	$1,462,486	$18,504,349	$20,413,380	$22,322,410	$24,231,441	$26,140,471	$27,094,987

Section 2.6 further states that the taxes and fees levied under Section 2 shall be deposited into the newly created Veterans, Infrastructure, and Health Fund. B&P notes that this would include all license application and renewal fees, annual facility fees, and the 15% excise tax. This would not include the 4.225% state sales tax.

Monies in the Veterans, Infrastructure, and Health Fund are to be distributed in the following manner:

1. Amounts necessary to cover any DHSS costs related to Section 2 administration.
2. Amounts necessary for the creation of a reserve fund within DHSS to ensure there is enough working cash balance to administer Section 2.
3. 3/15th of the remaining balance to any local jurisdiction with recreational marijuana sales.
4. Any remaining balance will then be distributed:
    a. 1/3 to the Missouri Veterans Commission
    b. 1/3 to the State Road Fund
    c. 1/3 to DHSS for grants to non-profits and other agencies in relation to drug addiction treatment.

B&P is unable to estimate the amount of revenues that would be required to meet DHSS administrative costs and reserve fund needs. Therefore, for the purpose of this fiscal note, B&P will show the maximum amount of sales tax related revenues that could be distributed if all administration fees and reserve fund needs were met by the facility licensing fees.

Table 5: Maximum Distribution Amounts Based on 15% Excise Tax Collections

	FY 2022	FY 2023	FY 2024	FY 2025	FY 2026	FY 2027	FY 2028
Veterans, Infrastructure, and Health Fund	$5,582,008	$70,627,287	$77,913,663	$85,200,039	$92,486,415	$99,772,791	$103,415,979
Estimated Maximum Distributions							
DHSS Administrative Costs*	Unknown	Unknown	Unknown	Unknown	Unknown	Unknown	Unknown
DHSS Reserve Fund*	Unknown	Unknown	Unknown	Unknown	Unknown	Unknown	Unknown
Local Jurisdictions**	$1,116,402	$14,125,457	$15,582,733	$17,040,008	$18,497,283	$19,954,558	$20,683,196
Missouri Veterans Commission	$1,488,536	$18,833,943	$20,776,977	$22,720,010	$24,663,044	$26,606,078	$27,577,594
State Road Fund	$1,488,536	$18,833,943	$20,776,977	$22,720,010	$24,663,044	$26,606,078	$27,577,594
DHSS Drug Treatment Grants	$1,488,536	$18,833,943	$20,776,977	$22,720,010	$24,663,044	$26,606,078	$27,577,594

*For the purpose of this fiscal note, B&P will assume that DHSS costs are fully met through the licensing fee collections. Actual distributions may be significantly different.

**Assumes no local jurisdictions opt-out.

B&P notes that depending on administrative and reserve fund needs, actual distributions may be significantly different from the estimates shown above.

Section 2.10 specifies that adult use of recreational marijuana is not unlawful and allows for individuals who have been arrested, charged, or found guilty for any offense that would no longer be illegal after the effective date of Section 2 to apply for and be granted expungement of their records pertaining to such offenses. B&P defers to the Department of Corrections and the State Public Defender's Office for the estimated impact from these provisions.

Officials from the **Office of State Courts Administrator** indicated the initiative petition proposes a constitutional amendment to Article XIV to modify the current provisions of the Missouri Constitution relating to legalization of marijuana.

The average of all marijuana related charge codes from 2012 to 2016 for Circuit case types is 11,537 per year. The average of all marijuana related charge codes from 2012 to 2016 for Associate case types is 8,765. We are unable to determine what number of these charges were for someone over the age of twenty-one.

The following Criminal Court Costs would be affected by this proposed legislation:

Criminal Court Costs		
Felony Case Costs	**Amount of Cost**	**Disburse to State/County**
Basic Civil Legal Services Fund surcharge	$10.00	State of Missouri - Basic Civil Legal Services Fund
Clerk Fee	$45.00	State of Missouri - General Revenue $36, County $9
County Fee	$75.00	County
Court Automation Fund Fee	$7.00	State of Missouri -Statewide Court Automation Fund
Court Reporter fee (All Circuit Division Cases)	$15.00	State of Missouri - General Revenue
Crime Victims' Compensation Fund surcharge	$7.50	State of Missouri - Crime Victims' Compensation Fund
DNA Profiling Analysis Fund surcharge	$30.00	State of Missouri - DNA Profiling Analysis Fund
Brain Injury Fund surcharge	$2.00	State of Missouri - Head Injury Fund
Independent Living Center Fund surcharge	$1.00	State of Missouri - Independent Living Center Fund
Motorcycle Safety Trust Fund surcharge	$1.00	State of Missouri - Motorcycle Safety Trust Fund
Peace Officer Standards & Training (POST) Commission surcharge	$1.00	State of Missouri - Peace Officer Standards & Training Fund
Prosecuting Attorney and Circuit Attorneys' Retirement Fund	$4.00	Pros. Attorney Retirement Fund
Prosecuting Attorney Training Fund surcharge	$1.00	State of Missouri - Prosecuting Attorney Training Fund
Sheriffs' Fee	$75.00	County
Sheriffs' Retirement Fund surcharge (except 21st Circuit)	$3.00	Sheriffs' Retirement Fund
Spinal Cord Injury Fund surcharge	$2.00	State of Missouri - Spinal Cord Injury Fund
Total	**$279.50**	
Misdemeanor Case Costs		

Basic Civil Legal Services Fund surcharge	$8.00	State of Missouri - Basic Civil Legal Services Fund
Clerk Fee	$15.00	$12 State of Missouri / $3 County
County Fee	$25.00	County
Court Automation Fund Fee	$7.00	State of Missouri - Court Automation Fund
Crime Victims' Compensation Fund surcharge	$7.50	State of Missouri - Crime Victims' Compensation Fund
DNA Profiling Analysis Fund surcharge	$15.00	State of Missouri - DNA Profiling Analysis Fund
Brain Injury Fund surcharge	$2.00	State of Missouri - Brain Injury Fund
Independent Living Center Fund surcharge	$1.00	State of Missouri - Independent Living Center Fund
Motorcycle Safety Trust Fund surcharge	$1.00	State of Missouri - Motorcycle Safety Trust Fund
Peace Officer Standards and Training (POST) Commission surcharge	$1.00	State of Missouri - Peace Officer Standards & Training Fund
Prosecuting Attorney and Circuit Attorneys' Retirement Fund	$4.00	Pros. Attorney Retirement Fund
Prosecuting Attorney Training Fund surcharge	$1.00	$0.50 State of Missouri / $0.50 County
Sheriffs' fee	$10.00	County
Sheriffs' Retirement Fund surcharge (except 21st Circuit)	$3.00	Sheriffs' Retirement fund
Spinal Cord Injury Fund Surcharge	$2.00	State of Missouri - Spinal Cord Injury Fund
Total	**$102.50**	
Municipal Case (Filed in Associate Division) Costs		
Clerk Fee	$15.00	$12 State of Missouri / $3 County
Court Automation Fund Fee	$7.00	State of Missouri - Court Automation Fund
Crime Victims' Compensation Fund surcharge	$7.50	State of Missouri - Crime Victims' Compensation Fund
Peace Officer Standards and Training (POST) Commission surcharge	$1.00	State of Missouri - Peace Officer Standards & Training Fund

Sheriffs' Retirement Fund surcharge	$3.00	Sheriffs' Retirement Fund
Total	**$33.50**	
Criminal Costs Not Included Above		
Drug Testing by a State Lab	$150.00	State of Missouri
Drug Testing by a Private Lab	Actual Costs	County Reimbursement
Law Enforcement Arrest Costs:		
Highway Patrol		Amt. Approved by the Court
Local (County)		Amt. Approved by the Court
Municipal		Amt. Approved by the Court

The decrease in the court fees, depending on the number of cases, will result in an unknown loss to the courts.

We also assume there will be an unknown decrease in caseload for the courts because the courts will no longer process these cases; however, at this time we are unable to calculate the decrease.

Any significant increase or decrease will be reflected in future budget requests.

Officials from the **Missouri Senate** indicated they anticipate no fiscal impact.

Officials from the **Secretary of State's office** indicated unless a special election is called for the purpose, Referendums are submitted to the people at the next general election. Article III section 52(b) of the Missouri Constitution authorizes the general assembly to order a special election for measures referred to the people. If a special election is called to submit a Referendum to a vote of the people, Section 115.063.2 RSMo. requires the state to pay the costs. The cost of the special election has been estimated to be $7.8 million based on the cost of the 2016 Presidential Preference Primary.

Their office is required to pay for publishing in local newspapers the full text of each statewide ballot measure as directed by Article XII, Section 2(b) of the Missouri Constitution and Section 116.230-116.290, RSMo. Funding for this item is adjusted each year depending upon the election cycle. A new decision item is requested in odd numbered fiscal years and the amount requested is dependent upon the estimated number of ballot measures that will be approved by the General Assembly and the initiative petitions certified for the ballot. In FY (fiscal year) 2014, the General Assembly changed the appropriation so that it was no longer an estimated appropriation.

In FY19, over $5.8 million was spent to publish the full text of the measures for the August and November elections. They estimate $65,000 per page for the costs of publications based on the actual cost incurred for the one referendum that was on the August 2018 ballot.

Their office will continue to assume, for the purposes of this fiscal note, that it should have the full appropriation authority it needs to meet the publishing requirements. Because these requirements are mandatory, they reserve the right to request funding to meet the cost of their publishing requirements if the Governor and the General Assembly again change the amount or continue to not designate it as an estimated appropriation.

Officials from the **Office of the State Public Defender** indicated if passed, this constitutional amendment would have a positive impact on the workload of the Missouri State Public Defender (MSPD), since possession, manufacture, distribution, etc. of cannabis would no longer be unlawful, offenses that the Public Defender currently uses resources to defend and no longer would need to.

The exact positive impact is difficult to predict because they track their cases by statutory offense and most drug offenses are not limited to marijuana.

However, their best estimate, using FY2019 MSPD data, is that this would reduce their caseload by 4,219 cases (149 A/B felonies, 3,102 C/D felonies, 144 misdemeanors, and 974 probation violations).

In *The Missouri Project: A Study of the Missouri Public Defender System and Attorney Workload Standards*, prepared by RubinBrown on behalf of the American Bar Association's Standing Committee on Legal Aid and Indigent Defendants, the relevant workload standards are: A/B felonies, 47.6 hours per case; C/D felonies, 25.0 hours per case; misdemeanors, 11.7 hours per case; and probation violations, 9.8 hours per case). (The workload standards include only case related tasks over which an attorney has some control (they exclude, for example, in court and travel time) and thereby reflect a conservative estimate.)

Applying those workload standards to the 4,219 cases, those cases require 88,765 attorney hours. With 2,080 hours per attorney available each year, that represents the work of 43 attorneys.

While in theory they might also handle fewer appeals of guilty verdicts after trial, the fact is that only a very small percentage of their cases proceed to trial and it's likely that only a small percentage of those cases are appeals from marijuana convictions. Therefore this minimal positive impact is not being taken into account in this estimate.

However, the Missouri State Public Defender already is significantly understaffed by 321 attorneys under the workload standards developed in *The Missouri Project*.

Therefore, despite the positive impact on the workload of the Missouri State Public Defender, because they are already understaffed that savings in attorney time would not

allow the Public Defender to reduce its workforce and therefore would not translate into an actual cost savings. However it does reduce by the cost of 43 attorneys how much money needs to be added to their budget in order to meet *The Missouri Project*'s workload standards.

Officials from the **State Treasurer's office** indicated no fiscal impact to their office.

Officials from **Greene County** indicated there is anticipated costs to the County of Greene for this initiative petition, per the following information concerning this initiative petition, https://static1.squarespace.com/static/5541a76ae4b0175cee8827d0/t/580684e5ff7c50adea98399e/1476822252561/Letter+to+CA+from+Denver+DA.jpgI provided by their County Prosecutor, Dan Patterson.

To fully understand the fiscal impact would require a very detailed study to give the best opportunity to understand the impact to law enforcement, prosecutors and the circuit courts within the proposed changes of this initiative petition, which the linked letter demonstrates occurred in Colorado after similar legislation passed.

County Prosecutor, Dan Patterson provided the following information:

DenverDA
Mitchell R. Morrissey, District Attorney - Second Judicial District

Fax: 720-913-903

October 12, 2016

No on 64 Campaign and SAM Action

California voters are being told that they will see the crime rate go down if they vote to legalize marijuana commercially; this has not been the case in the state of Colorado or the city of Denver. Since the legalization of recreational marijuana in Colorado in 2013 traffic related marijuana deaths have increased 48%, marijuana related emergency room visits have increased 49%, and marijuana related calls to the poison center have increased 100%. According to the Colorado Bureau of Investigations in 2015 statewide homicides in Colorado rose 14.7 % over the previous year. Pueblo, Colorado had the highest homicide rate in the state with 11.1 killings per 100,000 residents. Aurora, Colorado's homicide rate more than doubled from 2014. Additionally more places in Colorado were robbed and more thefts occurred, especially cars, as 193,115 motor vehicles were reported stolen, up 27.7 % in 2015 from the previous year. In 2015, sexual assaults rose 10% in Colorado with Denver, Aurora, Lakewood, Westminster and Pueblo all reporting higher numbers as well.

In the city of Denver since the legalization of recreational marijuana the number of crimes in Denver has grown by about 44 %, according to annual figures the city reported to the National Incident Based Reporting System. In 2015 in Denver alone crime rose in every neighborhood in the city. The murder rate hit a decade high, 1059 more cars were broken into, there were 903 more auto thefts, 321 more aggravated assaults and 231 more homes were broken into compared to 2014.

California voters are also being told that legalizing recreational marijuana will free up law enforcement to work on other criminal activities. Again that has not been the case in Denver. Besides the overall increases in crime we have experience, the Denver police department is dealing with a 900% increase in the unlawful cultivation and manufacture of marihuana concentrate, and a 99% increase in the unlawful distribution of marijuana and marijuana concentrate. The quantity of illegal marijuana seized by the Denver police has increased 3,424% on average per case. The volume of marijuana seized per case has increased from an average of 162 pounds to 5724 pounds. In Denver unlawful public consumption of marijuana citations has increased over 300% per year since the legalization of recreational marijuana. The Denver police department is busier enforcing marijuana laws and investigating crimes directly related to marijuana, including murderers, robberies, and home invasions, than any other time in the history of the city.

Sincerely,

Mitchell R. Morrissey
Denver District Attorney

Officials from **St. Louis County** indicated they see nothing in this proposal which would mandate operations of their county government, causing it a fiscal impact. Any acts that would be allowed county government would not be mandatory and would not mandatorily cause a fiscal impact. The amendment would not necessarily require the county to do anything, but those that the amendment would permit the county to do if it wanted to would not, it appears to them, cause any fiscal impact to their county.

Officials from the **City of Kansas City** indicated this initiative petition may have a positive fiscal impact on their city in an indeterminate amount as a result of increased sales tax revenues; however, such revenues could be offset by increased expenses in an indeterminate amount.

Officials from the **Wellsville-Middletown R-1 School District** indicated in that it may have a positive impact on the State's General Revenue Fund through additional taxation, this petition may have a positive fiscal impact on their school.

Officials from **Metropolitan Community College** indicated no fiscal impact.

Officials from the **Missouri Veterans Commission** indicated:

Michael L. Parson
Governor

Grace Link
Executive Director

MISSOURI VETERANS COMMISSION

205 Jefferson Street, P.O. Drawer 147, Jefferson City, MO 65102-0147
Telephone: (573) 751-3779 www.mvc.dps.mo.gov Fax: (573) 751-6836

October 21, 2019

The Honorable John R. Ashcroft
Secretary of State
600 W. Main Street
Jefferson City, MO 65101

Dear Secretary of State Ashcroft,

Initiative Petitions 2020-125 and 2020-126 (hereinafter, the Initiatives), which are identical in language, will have a disastrous fiscal impact upon the Missouri Veterans Commission. Under the existing medical marijuana program, we anticipate receiving $12,458 in FY20, $2,135,510 in FY21, $2,529,753 in FY22 and $2,929,271 in FY23 from the tax revenues generated from the retail sales of medical marijuana. The Initiatives make no significant changes to that program, but the adverse impact the Initiatives pose to the Commission is in the creation of the non-medical marijuana program. The medical marijuana program is predicated on medical need and the physician certification that marijuana is the appropriate treatment for that medical need. Conversely, the non-medical marijuana program has no requirement for medical need or for physician certification. It is only common sense that those wishing to use marijuana products will forego the inconvenience of establishing medical need and obtaining a physician's certification and avail themselves of the non-medical program regardless of their reason for wanting to use marijuana products. Therefore, we anticipate a significant reduction in the tax revenues generated by the medical marijuana program, perhaps as high as a 90% reduction, should the Initiatives become law.

Moreover, given the significantly different distribution of tax revenues provided for under the non-medical marijuana program, we do not anticipate that our portion of the tax revenues generated under the non-medical program will defray the reduction we would experience under the medical marijuana program. Specifically, the medical marijuana program establishes a 4% tax on all retail sales of medical marijuana and allocates to the Commission all of those proceeds minus 5% to the Department of Revenue and an amount to the Department of Health and Senior Services necessary to defray their costs in regulating the program. Conversely, the non-medical marijuana program establishes a 15% tax on all retail sales of non-medical marijuana and allocates to the Commission one-third of those proceeds minus 2% to the Department of Revenue, an amount to the Department of Health and Senior Services necessary to defray their costs in regulating the program, and 3/15 to the local jurisdiction in which the sale took place. Despite the increased tax rate under the non-medical program, we anticipate receiving a significantly smaller portion of the tax revenues collected given the smaller allocation amount dedicated to the Commission.

Finally, the purpose for which the Commission may use its portion of the tax proceeds will essentially eliminate our ability to initiate construction projects to improve our physical facilities. Specifically, the medical marijuana program allows the Commission to use those proceeds for "for health and care services for military veterans, including the following purposes: operations, *maintenance and capital improvements* of the Missouri veterans homes, the Missouri service officer's program, and other services for veterans approved by the commission, including, but not limited to, health care services, mental health services, drug rehabilitation services, housing assistance, job training, tuition assistance, and housing assistance to prevent homelessness." (Emphasis added) That is essentially everything that the Commission does and clearly affords the Commission the flexibility necessary to address the needs of Missouri's veterans as they change over time. Conversely, the non-medical marijuana program requires the Commission to use its significantly reduced portion of the tax revenues strictly for "*health care and other services* for military veterans and their dependent families". (Emphasis added) This language will severely limit our ability to adjust our facilities to meet the changing needs of Missouri's veterans.

In closing, Initiative Petitions 2020-125 and 2020-126 will adversely impact the ability of the Missouri Veterans Commission to serve the veterans of Missouri for the reasons set forth above. If I can be of any further assistance on this issue, please contact me at (573) 751-4066 at your convenience.

Sincerely,

Grace Link

Grace Link
Executive Director
Missouri Veterans Commission

Officials from the **Missouri Office of Prosecution Services** indicated there is no fiscal impact to their office. The enactment of a new crime [Section 2.10(6)(c)] creates additional responsibilities for county prosecutors which may in turn result in additional costs which are difficult to determine.

ANALYSIS OF FISCAL IMPACT OF MEDICAL MARIJUANA PETITION

The fiscal impact analysis contained herein focuses on estimating the fee and tax revenue resulting from the constitutional amendment proposed in the initiative petition. Table 1 summarizes the revenue and savings estimated by source and by fiscal year.

Table 1 - Summary of Tax, Application and License Fees, Revenue, and Savings by Fund

Purpose	FY 2021	FY 2022	FY 2023	FY 2024	FY 2025	5-year total
Marijuana Cultivation Facilities	$720,000	$1,500,000	$1,500,000	$1,500,000	$1,800,000	$7,020,000
Marijuana-Infused Products Manufacturing Facilities	$602,000	$860,000	$860,000	$860,000	$1,118,000	$4,300,000
Marijuana Dispensary Facilities	$1,344,000	$1,920,000	$1,920,000	$1,920,000	$2,496,000	$9,600,000
Marijuana Microbusiness Facilities	$0	$192,000	$120,000	$120,000	$240,000	$672,000
15% sales tax	$0	$0	$43,905,110	$77,285,223	$116,604,755	$237,795,089
subtotal Veterans, Infrastructure, and Health Fund	$2,666,000	$4,472,000	$48,305,110	$81,685,223	$122,258,755	$259,387,089
General Revenue sales tax	$0	$0	$8,781,022	$15,457,045	$23,320,951	$47,559,018
General Revenue budget savings	$0	$9,686,290	$12,212,877	$14,837,955	$15,505,916	$52,243,038
subtotal GR	$0	$9,686,290	$20,993,899	$30,295,000	$38,826,867	$99,802,056
Prop C sales tax	$0	$0	$2,927,007	$5,152,348	$7,773,650	$15,853,006
Conservation sales tax	$0	$0	$365,876	$644,044	$971,706	$1,981,626
Parks and Soils sales tax	$0	$0	$292,701	$515,235	$777,365	$1,585,301
Criminal Records System Fund	$0	$540,584	$54,054	$54,054	$54,054	$702,746
subtotal Other State Funds	$0	$540,584	$3,639,638	$6,365,681	$9,576,776	$20,122,678
subtotal all state funds	$2,666,000	$14,698,874	$72,938,647	$118,345,903	$170,662,397	$379,311,822
Local Sales Tax	$0	$0	$10,244,526	$18,033,219	$27,207,776	$55,485,521
Grand Total State and Local	$2,666,000	$14,698,874	$83,183,173	$136,379,122	$197,870,174	$434,797,343

This is the allocation table of the new Veterans, Infrastructure, and Health Fund. More explanation can be found on page 20.

Table 2 - Allocation of Veterans, Infrastructure, and Health Fund

	FY 2021	FY 2022	FY 2023	FY 2024	FY 2025	5-year total
Veterans, Infrastructure, and Health Fund						
Sales tax revenue - received	$0	$0	$43,905,110	$77,285,223	$116,604,755	$237,795,089
Application and license fees	$2,666,000	$4,472,000	$4,400,000	$4,400,000	$5,654,000	$21,592,000
Total VIH fund collections	$2,666,000	$4,472,000	$48,305,110	$81,685,223	$122,258,755	$259,387,089
Administration of tax and program

Remainder to distribute to major purposes	$0	$0	$31,670,418	$64,069,557	$103,511,979	$199,251,954
Major Purposes						
Local governments (3/15ths of remainder)	$0	$0	$6,334,084	$12,813,911	$20,702,396	$39,850,391
Veterans (one-third after local govt.)	$0	$0	$8,445,445	$17,085,215	$27,603,194	$53,133,854
Infrastructure (one-third after local govt.)	$0	$0	$8,445,445	$17,085,215	$27,603,194	$53,133,854
Health (one-third after local govt.)	$0	$0	$8,445,445	$17,085,215	$27,603,194	$53,133,854
subtotal for major purposes	$0	$0	$31,670,418	$64,069,557	$103,511,979	$199,251,954
Total allocated	$2,666,000	$4,472,000	$48,305,110	$81,685,223	$122,258,755	$259,387,089

Implementation dates required by Petition 2020-126

Table 3 below identifies the implementation dates prescribed in the petition. All fiscal estimates in this analysis assume that the Department of Health and Senior Services, and all other state and local governments affected by this petition will meet the deadlines required by the petition.

TABLE 3 - Implementation Schedule	
11/3/2020	Election Day - Voter Approval
12/3/2020	30 days after election - effective date of constitutional amendment
2/1/2021	Prospective applicants shall notify DHSS of their intent to apply and prefile their application fee for Marijuana Cultivation Facilities, Marijuana Testing Facilities, Marijuana Dispensary Facilities, and Marijuana-Infused Products Manufacturing Facilities.
270 days after effective date of constitutional amendment	
8/30/2021	DHSS shall make available license application forms and application instructions for Marijuana Cultivation Facilities, Marijuana Testing Facilities, Marijuana Dispensary Facilities, Marijuana-Infused Products Manufacturing Facilities and Marijuana Microbusiness Facilities, and any other license types and certifications it deems necessary.
365 days after effective date of constitutional amendment	
12/3/2021	DHSS shall begin accepting application forms for Marijuana Cultivation Facilities, Marijuana Testing Facilities, Marijuana Dispensary Facilities, Marijuana-Infused Products Manufacturing Facilities, Marijuana Microbusiness Facilities, Seed-to-Sale tracking systems, and transportation of marijuana from medical marijuana facilities with similar licenses
180 days after DHSS begins accepting application forms it begins approving licenses	
6/1/2022	For any application submitted on the day required under the constitutional provisions, DHSS shall have approved or denied application forms for Marijuana Cultivation Facilities, Marijuana Testing Facilities, Marijuana Dispensary Facilities, Marijuana-Infused Products Manufacturing Facilities, and Marijuana Microbusiness Facilities. All applications must be approved or denied within 180 days of submission to DHSS thereafter.
First November national election date after initial statewide voter approval	
11/8/2022	Local governments can seek elections to prohibit operation of all or any category of marijuana facilities in their jurisdiction.
815 days after effective date of constitutional amendment	
2/26/2023	270 days after DHSS begins issuing licenses (6/1/22) DHSS may issue 6 additional microbusiness licenses per Congressional district.
1,093 days after effective date of constitutional amendment	
12/1/2023	548 days after DHSS begins issuing licenses (6/1/22) DHSS shall begin approving licenses for Marijuana Cultivation Facilities, Marijuana Testing Facilities, Marijuana Dispensary Facilities, Marijuana-Infused Products Manufacturing Facilities, Marijuana Microbusiness Facilities, Seed-to-Sale tracking systems, and transportation of marijuana from non-medical marijuana facility applicants. DHSS may issue 6 additional microbusiness licenses per Congressional district.

Cultivation Application and License fees

The proposal provides for the licensing of Marijuana Cultivation Facilities. The DHSS is required to charge a one-time non-refundable application fee of $12,000. Once granted, the DHSS is required to charge an annual license fee of $25,000. Renewal fees are $5,000 after three years.

As seen in Table 3, the DHSS is required to make application forms available no later than 270 days after the effective date of the new constitutional provisions – which will be August 30, 2021. The DHSS is required to begin accepting applications no later than 365 days after the effective date of the new constitutional provisions – which will be December 3, 2021. The proposal requires that prospective applicants shall notify DHSS of their intent to apply and prefile their application fee by February 1, 2021, in FY 2021. The proposal also provides that for the first 548 days after the DHSS begins to license facilities it may only accept applications for licensure from entities holding medical marijuana cultivation facility licenses. The first adult use marijuana licenses awarded to entities that are not medical marijuana licensees will begin December 1, 2023 (state fiscal year FY 2024).

Table 4 shows the calculation of the fee revenue estimated at $720,000 in FY 2021, $1.5 million from FY 2022 to FY 2024, and $1.8 million in FY 2025. Other assumptions include:

- The DHSS is expected to license 60 medical marijuana cultivation facilities in compliance with the medical marijuana constitutional provisions. These are the only facilities eligible for licensure for the first and second years after the election.
- Since the application award happens by June 2022, it is assumed that the licensees will pay the annual license fee in FY 2022 and the renewal license fee payment will occur in FY 2025.
- During the roll out of the medical marijuana process the department has expressed concern about the level of demand for medical marijuana and placed a University of Missouri market study on its website about the subject. Given the department's stated hesitancy, this analysis assumes no new additional facilities will be licensed during the period. Thus, the revenue estimate is conservative as the department moves slowly to license additional facilities. Only the renewal costs are included in the long-range forecast.

Table 4 shows:

- Application fees - $720,000 in FY 2021 and $0 in FY 2022-FY 2025.
- Renewal fees - $300,000 in FY 2025.
- Annual license fees - $1.5 million from FY 2022 to FY 2025.

Table 4 - Cultivation Facilities - Fee Revenues

	FY 2021	FY 2022	FY 2023	FY 2024	FY 2025
Non-refundable application fee	$12,000	$12,000	$12,000	$12,000	$12,000
Renewal fee					$5,000
Applicants					
Medical marijuana licenses eligible year 1	60	0	0	0	60
New additional licenses	0	0	0	0	0
subtotal Non-Refundable Fee revenues	$720,000	$0	$0	$0	$300,000
Annual license fee	$25,000	$25,000	$25,000	$25,000	$25,000
Licenses					
Medical marijuana licenses eligible year 1	0	60	60	60	60
New additional licenses	0	0	0	0	0
subtotal Annual License Fee revenues	$0	$1,500,000	$1,500,000	$1,500,000	$1,500,000
Total Cultivation license & fee revenues	$720,000	$1,500,000	$1,500,000	$1,500,000	$1,800,000

Marijuana-Infused Products Manufacturing Facilities Application and License fees

The proposal provides for the licensing of Marijuana-Infused Products Manufacturing Facilities. The DHSS is required to charge a one-time non-refundable application fee of $7,000. Once granted, the DHSS is required to charge an annual license fee of $10,000. Renewal fees are $3,000 after three years.

As seen in Table 3, the DHSS is required to make application forms available no later than 270 days after the effective date of the new constitutional provisions – which will be August 30, 2021. The DHSS is required to begin accepting applications no later than 365 days after the effective date of the new constitutional provisions – which will be December 3, 2021. The proposal requires that prospective applicants shall notify DHSS of their intent to apply and prefile their application fee by February 1, 2021, in FY 2021. The proposal also provides that for the first 548 days after the DHSS begins to license facilities it may only accept applications for licensure from entities holding medical marijuana infused products facility licenses. The first adult use marijuana licenses awarded to entities that are not medical marijuana licensees will begin December 1, 2023 (state fiscal year FY 2024).

Table 5 shows the calculation of the fee revenue estimated at $602,000 in FY 2021, $860,000 in FY 2022-FY 2024, and $1.1 million in FY 2025. Other assumptions include:

- The DHSS is expected to license 86 medical marijuana-infused products manufacturing facilities in compliance with the medical marijuana constitutional provisions. These are the only facilities eligible for licensure for the first and second years after the election.
- Since the application award happens by June 2022, it is assumed that the licensees will pay the annual license fee in FY 2022 and the renewal license fee payment will occur in FY 2025.
- During the roll out of the medical marijuana process the department has expressed concern about the level of demand for medical marijuana and placed a University of Missouri market study on its website about the subject. Given the department's stated hesitancy, this analysis assumes no new additional facilities will be licensed during the period. Thus, the revenue estimate is conservative as the department moves slowly to license additional facilities. Only the renewal costs are included in the long-range forecast.

Table 5 shows:

- Application fees - $602,000 in FY 2021 and $0 from FY 2022-FY 2025.
- Renewal fees - $258,000 in FY 2025.
- Annual license fees - $860,000 from FY 2022-FY 2025.

Table 5 - Infused Products Manufacturing Facilities - Fee Revenues

	FY 2021	FY 2022	FY 2023	FY 2024	FY 2025
Non-refundable application fee	$7,000	$7,000	$7,000	$7,000	$7,000
Renewal fee					$3,000

Licenses					
Medical marijuana licenses eligible year 1	0	86	86	86	86
New additional licenses	0	0	0	0	0
subtotal Annual License Fee revenues	$0	$860,000	$860,000	$860,000	$860,000
Total Infused Product Manufacturing license & fee revenues	$602,000	$860,000	$860,000	$860,000	$1,118,000

Marijuana Dispensary Facilities Application and License fees

The proposal provides for the licensing of Marijuana Dispensary Facilities. The DHSS is required to charge a one-time non-refundable application fee of $7,000. Once granted, the DHSS is required to charge an annual license fee of $10,000. Renewal fees are $3,000 after three years.

As seen in Table 3, the DHSS is required to make application forms available no later than 270 days after the effective date of the new constitutional provisions – which will be August 30, 2021. The DHSS is required to begin accepting applications no later than 365 days after the effective date of the new constitutional provisions – which will be December 3, 2021. The proposal requires that prospective applicants shall notify DHSS of their intent to apply and prefile their application fee by February 1, 2021, in FY 2021. The proposal also provides that for the first 548 days after the DHSS begins to license facilities it may only accept applications for licensure from entities holding medical marijuana dispensary facility licenses. The first adult use marijuana licenses awarded to entities that are not medical marijuana licensees will begin December 1, 2023 (state fiscal year FY 2024).

Table 6 shows the calculation of the fee revenue estimated at $1.3 million in FY 2021 and $1.9 million in FY 2022-FY2024, and $2.5 million in FY 2025. Other assumptions include:

- The DHSS is expected to license 192 medical marijuana dispensary facilities in compliance with the medical marijuana constitutional provisions. These are the only facilities eligible for licensure for the first and second years after the election.

- Since the application award happens by June 2022, it is assumed that the licensees will pay the annual license fee in FY 2022 and the renewal license fee payment will occur in FY 2025.
- During the roll out of the medical marijuana process the department has expressed concern about the level of demand for medical marijuana and placed a University of Missouri market study on its website about the subject. Given the department's stated hesitancy, this analysis assumes no new additional facilities will be licensed during the period. Thus, the revenue estimate is conservative as the department moves slowly to license additional facilities. Only the renewal costs are included in the long-range forecast.

Table 6 shows:

- Application fees - $1,344,000 in FY 2021 and $0 from FY 2022-FY2025.
- Renewal fees: $576,000 in FY 2025.
- Annual license fees - $1.9 million from FY 2022-FY 2025.

Table 6 - Dispensary Facilities - Fee Revenues

	FY 2021	FY 2022	FY 2023	FY 2024	FY 2025
Non-refundable application fee	$7,000	$7,000	$7,000	$7,000	$7,000
Renewal fee					$3,000
Applicants					
Medical marijuana licenses eligible year 1	192	0	0	0	192
New additional licenses	0	0	0	0	0

New additional licenses	0	0	0	0	0
subtotal Annual License Fee revenues	$0	$1,920,000	$1,920,000	$1,920,000	$1,920,000
Total Dispensary license & fee revenues	$1,344,000	$1,920,000	$1,920,000	$1,920,000	$2,496,000

Marijuana Microbusiness Facilities Application and License fees

The proposal provides for the licensing of Marijuana Microbusiness Facilities. The DHSS is required to charge a one-time non-refundable application fee of $1,500. Once granted, the DHSS is required to charge an annual license fee of $2,500. Renewal fees are $2,500 after three years.

As seen in Table 3, the DHSS is required to make application forms available no later than 270 days after the effective date of the new constitutional provisions – which will be August 30, 2021. The DHSS is required to begin accepting applications no later than 365 days after the effective date of the new constitutional provisions – which will be December 3, 2021. Both deadlines are in FY 2022 of the Missouri state government budget. It is assumed that no revenues will be received before FY 2022. The proposal also provides that for the first 365 days after the DHSS may only accept applications for licensure from entities holding similar medical marijuana facility licenses.

Table 7 shows the calculation of the fee revenue estimated at $192,000 in FY 2022, $120,000 in FY 2023-FY 2024, and $240,000 in FY 2025. Other assumptions include:

- Marijuana Microbusiness Facilities are not included in the medical marijuana program.
- The proposal provides that a minimum of six such licenses be issued within each of Missouri's eight U.S. Congressional districts when licenses are first issued.
- Since the application periods open in the middle of the year it is assumed that the licensees will pay both the non-refundable application fee and the annual license fee in the same year.
- Since application fees are non-refundable additional revenue may be collected in FY 2023 from any applicant that is ultimately refused a license. This possible revenue is not calculated into this revenue estimate.
- During the roll out of the medical marijuana process the department has expressed concern about the level of demand for medical marijuana and placed a University of Missouri market study on its website about the subject. Given the department's stated hesitancy, this analysis assumes no new additional facilities will be licensed during the period. Thus, the revenue estimate is conservative as the department moves slowly to license additional facilities. Only the renewal costs are included in the long-range forecast.

Table 7 shows:

- Application fees - $72,000 in FY 2022 and $0 from FY 2023-2025.
- Renewal fees - $120,000 in FY 2025.
- Annual license fees - $120,000 from FY 2022-FY 2025.

Table 7 - Microbusiness Facilities - Fee Revenues

	FY 2022	FY 2023	FY 2024	FY 2025
Non-refundable application fee	$1,500	$1,500	$1,500	$1,500
Renewal fee				$2,500
Licenses				
Year 1 - estimate (minimum 6/Congressional Dist.)	48			48
New additional licenses	0	0	0	0

subtotal Annual License Fee revenues	$120,000	$120,000	$120,000	$120,000
Total Microbusiness license & fee revenues	$192,000	$120,000	$120,000	$240,000

States that have approved adult use marijuana

Ten states and Washington D.C. have approved adult use marijuana. Nine received approval from voters while Illinois passed legislation to do so. Table 8 shows that Colorado and Oregon were the first approve adult use marijuana in November 2012. The table also shows when sales started and the length of time in months from approval to first sales. At this point only Colorado, Washington, and Oregon have had sales of at least three years to provide the best data necessary to fully understand the longer-range revenue prospects for adult use marijuana. Alaska is close to having three years' experience. However, it took Alaska longer to implement its program. Alaska also has a small program and uses an excise tax that makes it less comparable to the first three which have similar taxes as that proposed in the Missouri initiative petition. This fiscal note will focus on data from Colorado, Washington, and Oregon in the analysis.

Table 8 - States with Adult Use Marijuana

State	Approved by voters or legislature	Month/year sales started or anticipated	Months from election to sales
Colorado	November 2012	January 2014	15
Washington	November 2012	July 2014	21
Oregon	November 2014	February 2016	15
Alaska	November 2014	October 2016	23
Nevada	November 2016	July 2017	9
California	November 2016	January 2018	15
Massachusetts	November 2016	November 2018	24
Maine	November 2016	March 2020	40
Michigan	November 2018	May 2020	18
Illinois	June 2019	January 2020	6
Missouri (if approved)	November 2020	July 2022	21

Many factors will influence the size of the adult use marijuana program. Having selected three states as the focus of the analysis, four factors in particular will be reviewed.

- Marijuana usage in the states – a review of how Missouri's reported marijuana usage compares to other states to help determine the possible base line for the initial years of the program.
- Initial sales and growth over time.
- Initial infrastructure for sales and its effect on sales.
- Tourism in the states to help determine the impact of sales in Missouri.

Marijuana Usage

Table 9 provides another way to think about the states that have approved adult use marijuana and its possible use in Missouri and revenue estimates. Table 9 shows the percent of those age 18 and over who indicate use of marijuana in the past year from 2012 to 2017 published by the U.S. Department of Health and Human Services, Substance Abuse and Mental Health Services Administration. The 2016-2017 data is the most recently published. The table is sorted by marijuana usage in 2012-2013 which is the last data before adult use marijuana was available in any state. The top 30 states and the national average are shown.

The states that have legalized adult use marijuana are highlighted in blue. All but Illinois, the last state that made it legal, were in the top 15 states for marijuana use in the past year in 2012-2013 and all were above the U.S. national average. Legal medical marijuana programs may be a factor in the higher percentage reported in some of these states. Missouri's 2012-2013 rate of 11.41% is substantially below all of the states that have started sales of adult use marijuana and in every year thereafter. Illinois and Missouri have nearly the same rate of use at the start and end of this timeline. The green boxes are the

last year for each state before adult use sales started which also highlights the fact that only a few states have three full years of experience with revenues.

Table 9. Marijuana Use in the Past Year, by Age Group and State: Percentages, Annual Averages Based on NSDUH

Rank	State	2012-2013 - 18 or Older Estimate	2013-2014 - 18 or Older Estimate	2014-2015 - 18 or Older Estimate	2015-2016 - 18 or Older Estimate	2016-2017 - 18 or Older Estimate
1	Rhode Island	20.21%	19.13%	19.04%	20.62%	21.24%

Source: SAMHSA, Center for Behavioral Health Statistics and Quality, National Survey on Drug Use and Health[i]

Table 10 compares Missouri's base year to Colorado, Washington, and Oregon. Missouri's 13.95% base year is between 3.63% to 5.64% lower than the three states.

Table 10 - Base Year 18 years or older % Marijuana Use in Past Year			
	Base Year Marijuana Usage	Base year rate	Difference in rate from MO
Missouri	2016-2017	13.95%	
Colorado	2012-2013	18.94%	4.99%
Washington	2012-2013	17.58%	3.63%
Oregon	2014-2015	19.59%	5.64%

Table 11 shows how the percentage of those age 18 and older reporting marijuana use changed in the first three years of adult use marijuana sales for Colorado, Washington, and Oregon. In each state the percentage went up over the three years. In the first year the Colorado rate increased 1.8%, Washington by slightly less at 1.48%, and Oregon by 3.6%. The percentage increase in use at the end of the three years compared to the base year percentage was substantially different in each state – Colorado (4.88%), Washington (1.87%), and Oregon (7.79%). Given the lower base year in Missouri shown in Table 10 it seems unlikely that it will increase to the levels shown in the other states in Table 11. Adding Washington's roughly 2.0% increase to Missouri's rate would bring it to 15.95% which is lower than where the other three states started.

Table 11 - Marijuana Use in the Past Year		
	% use age 18 and older	Change in rate
Colorado		
Base year (2012-2013)	18.94%	
Year 1	20.74%	1.80%
Year 2	23.57%	2.83%
Year 3	23.82%	0.25%
overall change base to year 3		4.88%
Washington		
Base year (2012-2013)	17.58%	
Year 1	19.06%	1.48%
Year 2	17.68%	-1.38%
Year 3	19.45%	1.77%
overall change base to year 3		1.87%

Initial infrastructure for adult use marijuana

Table 12 shows the number of retail stores over the first three years in Colorado, Washington, and Oregon. Colorado and Washington start with roughly the same number of retail outlets. Oregon data is unavailable because the program did not establish the statistical infrastructure to collect it in the early years. The Department of Health and Senior Services intends to license 192 medical marijuana dispensaries – the minimum required under that constitutional amendment. The proposed petition provides that for the first year and a half only the medical marijuana dispensaries can be permitted to provide adult use marijuana.

During the roll out of the medical marijuana process the department has expressed concern about the level of demand for medical marijuana. The department placed on its website a University of Missouri market study that estimates substantially fewer medical marijuana patients than estimated in the ballot language for voters in November 2018. The study reflects concern that oversupply will affect product price and thus the economic feasibility of the envisioned facilities throughout the state. The study also reflects concern about possible diversion of oversupply to the illegal market. In addition, we are aware of reports that Oregon has an oversupply of marijuana.

For these reasons, the estimates assume that the number of Missouri dispensaries will grow more slowly than those in the three states on which the analysis is based. Thus, both application and license fee revenue will be lower as will the likely spending per person in this analysis.

Table 12 - Retail Marijuana Dispensaries in Other States

	# of stores	Change in #	% change
Colorado			
January 2014	161		
January 2015	356	195	121.1%
January 2016	422	66	18.5%
change over 3 years		261	162.1%
Washington

FY 2017	N/A	0	#DIV/0!
change over 3 years		0	#DIV/0!

Marijuana sales over the first three years in other states

Table 13 shows data for the first three years of sales in Colorado[ii], Washington[iii], and Oregon[iv]. The population used for each year is from the estimates made by the U.S. Census Bureau.[v]

Colorado ($56.57/capita) and Washington ($37.24/capita) have year one sales lower than Oregon ($94.05/capita). Dividing the population of the three states into the total sales gives a first-year per capita sale of $57.74/capita. Washington had an unregulated medical marijuana program. Its lower per capita sales may be a function of the fact that it was harder to flip to adult use marijuana than in Oregon which had a regulated medical marijuana program.

By year three the Washington ($190.97) had grown dramatically from its low start. Oregon ($132.90) per capita sales which started as the highest per capita sales are the lowest by year three.

Table 13 - First 3 full-years of Marijuana Sales Retail Value for Colorado, Washington, and Oregon

State/year	Year of starting month	Population	Marijuana sales	$ per capita spent on Retail marijuana
Colorado				
Year 1	2014	5,351,218	$303,239,699	$56.67
Year 2	2015	5,452,107	$577,536,343	$105.93
Year 3	2016	5,540,921	$861,587,411	$155.50
Washington				
Year 1	2014	6,968,170	259,524,430.41	$37.24
Year 2	2015	7,061,410	786,404,467.45	$111.37
Year 3	2016	7,183,700	1,371,862,186.37	$190.97
Oregon				
Year 1	2016	4,091,404	$384,797,226	$94.05
Year 2	2017	4,146,592	$419,924,401	$101.27
Year 3	2018	4,190,713	$556,959,330	$132.90
Combined 3 state totals				
Year 1		16,410,792	947,561,355	$57.74
Year 2		16,660,109	1,783,865,211	$107.07
Year 3		16,915,334	2,790,408,928	$164.96

Table 14 shows the dollar per capita and percentage growth in the first three years of sales. Washington with its low start had very high growth in year 2. Colorado grew by 86.9%. In year two Oregon's growth slowed but it had dollar per capita sales very similar to Colorado. The combined 3 state totals are weighted by population and show 85.4% growth in the second year and 54.1% growth in the third year.

Table 14 - First 3 full-years of Marijuana Sales Retail Value for Colorado, Washington, and Oregon

State/year	$ per capita spent on Retail marijuana	$ Change in $/capita	% change in $/capita

3-year change		$107.22	185.7%

Tourism

A portion of adult use marijuana sales are the result of visitors to the states that have approved such sales. Table 15 provides tourism data for Colorado, Washington, Oregon, and Missouri[vi]. Both Colorado and Washington have more than twice the number of visitor nights compared to its population as Missouri. In addition, Missouri's spending by visitors compared to population is substantially less than that of Colorado and Washington. The Oregon and Missouri numbers are similar on visitor nights but Missouri lags behind the Oregon spending level. It has been estimated that tourism accounts for less than 10% of Colorado's sales.[vii]

While Missouri may see an uptick of travelers and tourist dollars as a result of adult use marijuana sales it is starting at a significantly lower base to make a dramatic impact on tax collections.

Table 15 - Tourism Visitors and Spending

	Colorado	Washington	Oregon	Missouri
Population estimate 2018	5,695,564	7,535,591	4,190,713	6,126,452
# of visitor nights	85,200,000	128,700,000	29,100,000	42,000,000
Visitors per population	14.96	17.08	6.94	6.86
$ spending of visitors	$22,300,000,000	$24,400,000,000	$12,300,000,000	$13,500,000,000
Spending per population	$3,915.33	$3,237.97	$2,935.06	$2,203.56

Adult Use Marijuana Sales in Missouri

Table 16 provides a range for possible adult use marijuana sales for the first three years of the program. The population calculations were calculated using data from the Office of Administration, Division of Budget and Planning.[viii]

High-end estimate - assumes the population weighted combined 3 state totals from Colorado, Oregon, and Washington shown in Table 14 above. Per capita sales start at $57.74 and grow by 85.4% and 54.1% respectively in years 2 and 3. However, Missouri's base year marijuana usage, as shown in Table 10 is 3.63% to 5.64% below the starting base year for these three states. The value of adult use marijuana sales starts at $375.6 million in year 1 and grows to $1,086 million in year 3.

Low-end estimate - begins at Washington's $37.24/capita starting point. Missouri's marijuana usage is lower. However, Missouri will have a regulated medical marijuana program that Washington did not have when the adult use program began. The low-end estimate assumes the growth in the combined 3 state totals shown in Table 14 of 85.4% and 54.1% respectively in years 2 and 3. The value of adult use marijuana sales starts at $242.2 million in year 1 and grows to $700.2 million in year 3.

Moderate estimate - starts at $45 per capita. This is $11.67/capita lower, about 20% lower, than Colorado. It's higher than Washington's level which was suppressed in year 1. The moderate estimate assumes growth of 75% in year 2 and 50% in year 3.

As noted in Table 14 the three states had different paths to their three-year sales levels. Washington started much lower but had the highest growth in years 2 and 3. Oregon started with high sales per capita but very little growth in year 2 and moderate growth in year 3. The value of adult use marijuana sales starts at $292.7 million in year 1 and grows to $774.4 million in year 3.

The moderate estimate is conservative based on the data reviewed in the pages above.

- Missouri's base year marijuana usage according to federal surveys is lower than the level in Colorado, Oregon, and Washington at the start of the adult use marijuana program.
- Missouri has fewer tourists that could boost sales.

- The department has expressed concern about demand and will likely move more slowly than the other states in adding dispensaries and other facilities.
- Prices for adult use marijuana are difficult to estimate and are likely to decrease over the first few years as supply increases as has happened in the other states.
- It also reflects the difficulty of estimating a new program with limited experience in the other states and the need to make conservative budget assumptions for a healthy program.

Table 16 – Adult Use Marijuana Sales in Missouri

			Low End Estimate		Moderate Estimate		High End Estimate	
	Fiscal Year	Missouri Population	Per capita	Value of Adult use Sales	Per capita	Value of Adult use Sales	Per capita	Value of Adult use Sales
Year 1	2023	6,504,461	$37.24	$242,226,120	$45.00	$292,700,736	$57.74	$375,567,567
Year 2	2024	6,542,664	$69.04	$451,724,916	$78.75	$515,234,822	$107.07	$700,523,077
Year 3	2025	6,580,868	$106.40	$700,172,776	$118.13	$777,365,033	$164.96	$1,085,579,985

Tax, License, and Fee Revenue Estimate

Table 17 uses the moderate estimate of sales to calculate the tax revenues for the new Veterans, Infrastructure, and Health Fund, state general revenue, other state funds, and local funds. The local funds calculation assumes a 3.5% median sales tax derived from the Department of Revenue's list of 2,361 local sales tax rates.[ix] The first licenses will be awarded by early June 2022. The estimates assume the department will issue the license and complete the department's final inspection and other tasks with tax revenue beginning in July 2022 (FY 2023).

Combined State and local tax, fee, and license collections:

- A total all state and local funds of $2.7 million in FY 2021 rising to $182.3 million in FY 2025.
- A five-year total of $381.9 million in all state and local funds.

State license and fee collections:

- Total state funds of $2.7 million in FY 2021 and $5.7 million in FY 2025.
- A five-year total of $21.6 million in state funds.

State tax collections:

- A total all state funds of $56.3 million in FY 2023 rising to $149.4 million in FY 2025.
- A five-year total of $304.8 million in all state funds.
- Veterans, Infrastructure, and Health Fund: $43.9 million in FY 2023 rising to $116.6 million in FY 2025.
- General Revenue Fund: $8.8 million in FY 2023 rising to $23.3 million in FY 2025.
- Prop C: $2.9 million in FY 2023 rising to $7.8 million in FY 2025.
- Conservation: $365,876 in FY 2023 rising to $971,706 in FY 2025.
- Parks and Soils: $292,701 in FY 2023 rising to $777,365 in FY 2025.

Local tax collections:

- Total local funds of $10.2 million in FY 2023 rising to $27.2 million in FY 2025.
- A five-year total of $55.5 million in local funds.

Table 17 - Missouri Tax, License, and Fee Revenue Estimate

Allocation of Veterans, Infrastructure, and Health Fund

The proposed petition establishes a number of purposes for which the revenue derived is to be used. First, the Department of Revenue (collection costs) and the Department of Health and Senior Services (administration) are to receive their funds before allocation to the other major purposes. Table 18 shows the distribution among the uses identified in the petition.

Assumptions for the allocation table below include:

- The Department of Revenue takes the maximum 2% it is allowed to take for collection costs.
- The Department of Health and Senior Services spends the same amount, including fringe benefit costs, for administration of the adult use marijuana program as it received in the FY 2020 budget for the medical marijuana program. It will either do so by shifting some medical marijuana staff to the adult use program or add additional staff. A two percent inflation factor is provided beginning in FY 2024. For FY 2022 it is assumed that the department's cost above the Veterans, Infrastructure, and Health Fund revenues, if any, will be paid with a transfer from general revenue as provided by the act.
- The remaining uses receive their share as detailed in the petition.

Allocations:

- Local government: $6.3 million in FY 2023 rising to $20.7 million in FY 2025. A 5-year total of $39.9 million.
- Veterans: $8.4 million in FY 2023 rising to $27.6 million in FY 2025. A 5-year total of $53.1 million.
- Infrastructure: $8.4 million in FY 2023 rising to $27.6 million in FY 2025. A 5-year total of $53.1 million.
- Health: $8.4 million in FY 2023 rising to $27.6 million in FY 2025. A 5-year total of $53.1 million.

Table 18 - Allocation of Veterans, Infrastructure, and Health Fund

	FY 2021	FY 2022	FY 2023	FY 2024	FY 2025	5-year total
Veterans, Infrastructure, and Health Fund						
Sales tax revenue - received	$0	$0	$43,905,110	$77,285,223	$116,604,755	$237,795,089

Department of Health and Senior Services (DHSS) - costs

DHSS has experience with implementing the medical marijuana program in accordance with Amendment 2 passed by Missouri voters in November 2018. Thus, the learning curve should be dramatically reduced for the department for a fully legal adult use marijuana program. Much of the language of the new petition mirrors the framework and language from voter-approved Amendment 2 to implement the new program. The tasks that DHSS has already completed or will complete for the medical marijuana program includes, but is not limited to creating:

- rules for the medical marijuana program;
- Advisory Committees;
- a robust website with information about the program;
- forms and applications;
- an online application portal;
- awarding and completing a contract to provide for blind scoring of the applications;
- FAQs;
- videos to help applicants understand the process

- a significant outreach program to businesses and organizations involved or interested in the medical marijuana program;
- reporting mechanisms available to show the distribution of applicants across the state;
- other resources for applicants and the public; and
- educating the Governor and legislature on its budgetary needs to successfully implement the program.

DHSS was successful in receiving $846,726, including 3.5 staff, in FY 2019 supplemental budget funding to begin implementation of the medical marijuana program. In addition, DHSS received $15.7 million, including 52 staff and fringe benefits, in full year FY 2020 funding to implement the program. The staff included:

- 40 health facilities consultants to process and verify applications, inspect facilities, provide technical assistance to the testing facilities to assist with obtaining and maintaining certification; monitor for compliance, and other duties as needed.
- 4 health and senior services managers to manage patient and caregiver applications while meeting application decision deadlines; manage licensing and/or certification of medical marijuana cultivation facilities, dispensary facilities, infused products manufacturing facilities, testing facilities, transportation entities, seed-to-sale tracking systems; and provide ongoing management responsibilities.
- 2 attorneys to provide legal support.
- 1 Planner IV to project manage and work in conjunction with the IT project manager to plan, monitor, and execute the implementation of a seed-to-sale tracking system
- 1 designated principal assistant.
- 4 clerical support staff

Table 19 provides budget information for Colorado[x], Washington, and Oregon to provide perspective on their administrative costs for the Department of Revenue and the relevant administrative agencies. Missouri's $15.7 million budget for medical marijuana administration appears to be larger than the programs in the other states.

Table 19 - Administrative costs in Oregon, Washington, and Colorado

	Total (in millions)	FTE
Oregon		
Adult use	$19.0	68.0
Medical	$5.6	23.0
Total	$24.6	91.0
Washington		
Adult use & medical	$24.2	
Colorado		
Adult use	$14.5	120.1
Medical	$2.4	1.3
Total	$16.9	121.4

All of this success and sizable budget should make the additional cost of regulating legal marijuana more easily accomplished and keep costs down. For example, DHSS has 40 health facility consultants to process and verify applications, provide technical assistance, monitor compliance, and other duties.

DHSS asked for such a sizable staff in part because it was unclear whether OA ITSD would supply a highly functional IT system to process applications during this first round of applications. DHSS received 2,163 medical marijuana applications yet is expected to issue just 348 licenses – the minimum required by the medical marijuana amendment. DHSS has thus received about 6 times more applicants than the number it will approve.

The current DHSS process and timetable is for the first medical marijuana licenses to be issued in late December 2019 or early January 2020. Providing the necessary construction phase for the medical marijuana facilities and the initial growing period, Missourians can expect that medical marijuana product becomes available during the summer or fall of 2020 with dispensaries being opened from then until the end of 2020. DHSS has indicated publicly that it intends to go slowly on issuing licenses during the first few years of medical marijuana implementation to ensure that the marketplace is sufficient to provide a healthy medical marijuana industry and prevent an oversupply of product. There is little expectation that DHSS will begin another round of medical marijuana facilities expansion before late 2022 – which is beyond the dates contained in this petition and required for implementation of a legal marijuana program. Thus, there is no conflict or doubling up of application processing between the two programs.

As noted earlier in this analysis, for the first 548 days of legal marijuana applications DHSS may only accept applications for licensure from entities holding similar medical marijuana facility licenses. The 40 health facility consultants will face a maximum of 348 marijuana facility applications in late 2021, 16% of what they faced in 2019. In addition, the health facility consultants and all of the staff only have to deal with facilities that they have already instructed, inspected, monitored for compliance, and reviewed. The owners and staff of the medical marijuana facilities will already be knowledgeable of all of the rules and regulations and will have developed a strong working relationship with DHSS.

It is assumed that there will be some costs required to process adult use marijuana facility applications. Costs for OA ITSD for IT services are included in the DHSS medical marijuana budget and can be used to provide additional functionality to reduce the amount of paperwork done by the health facilities consultants and clerical staff. Providing a more efficient, robust and user-friendly application portal will help the department. In addition, additional website development to improve reporting tools, update videos, and other functionality can be completed before the adult use program applications are announced. Blind scoring costs currently in the DHSS budget will not be needed for the first round of adult use marijuana application evaluation.

This analysis assumes that the department will spend the same $15.7 million for their administrative costs for adult use as it did for medical marijuana. It will either do so by shifting some medical marijuana staff to the adult use program or add additional staff. There likely will be significant cost savings in administrative costs when the medical and adult use programs are operational. As shown in Table 19, Colorado, Washington, and Oregon spend much less than the $32 million in administration for both programs that possible under the assumptions of this analysis. Those savings are not calculated herein and will be decided by the Governor and legislature as both programs proceed.

Department of Corrections Savings

In a fiscal note to HB 1448 (2018) the Department of Corrections laid out its estimate of savings to a bill that allowed adult use marijuana. It indicated substantial savings. The department reported that the annual number of persons admitted for cannabis offenses was expected to be 209 with an additional 986 sent to probation. It also reported that the average incarcerated offender spent one year in prison and three more years on parole.

https://house.mo.gov/billtracking/bills181/fiscal/fispdf/4952-01N.ORG.pdf

In its 2017 Annual Report the Missouri Board of Probation and Parole reported that the per diem cost of incarceration was $58.85 compared to $5.39 for probation or parole. Revised numbers have not been made available by the Department. However, the 2017 costs are included in the analysis below to identify the cost savings of the initiative petition to the Department. A two percent inflation factor is assumed for institutional and probation/parole costs.

The number of people normally incarcerated remains static in this analysis at 209 each year since a new cohort comes in and then leaves after one year. At $58.85/day ($21,480/year) the department will save $4.5 million in incarceration costs. The number of people normally expected to be under supervision grows until it peaks at year four. The 209 that normally serves three years of probation increases until it tops out at 627. The 986 people that normally serve three years of supervision tops out at 2,958. The number of people that will not be under supervision in year four is 3,794. The savings run from $6.4 million in year one to $12.2 million in year four.

Table 20 - Department of Corrections - Savings				
	FY 2022	FY 2023	FY 2024	FY 2025
Incarcerated	209	209	209	209
Parole		209	418	627
Probation	986	1,972	2,958	2,958
subtotal supervision	986	2,181	3,376	3,585
Total affected population	1,195	2,390	3,585	3,794
Institutional costs/day	$58.85	$60.03	$61.23	$62.45

Probation/parole costs/day	$5.39	$5.50	$5.61	$5.72
Probation/parole costs/year	$1,967	$2,007	$2,047	$2,088
Savings institutional	$4,489,372	$4,579,160	$4,670,743	$4,764,158
Savings probation/parole	$1,939,807	$4,376,606	$6,910,101	$7,484,647
Total Savings	$6,429,179	$8,955,766	$11,580,844	$12,248,805

This measure will not result in an increase in crime as a result of the legalization of adult use marijuana. A recent study published by Reason Magazine[xi] concluded legalization reduced possession and other marijuana crimes and relieved the burden placed on courts, law enforcement and prisons, allowing for greater focus on violent crime. It also identified other studies that showed that opioid use and deaths decreased in states with adult use marijuana. It reports on studies that show reduction in property crime and others that suggest that marijuana use does not lead to an increase in violent crime. Some more recent studies suggest that legalization might reduce violent crime. The Reason study also reported on a recent study that found legalization of marijuana for recreational use in Colorado and Washington was associated with an improvement in the rate of clearance of cases relating to violent crimes.

A federally funded study[xii] of the experience in Colorado and Washington also concluded that marijuana legislation had minimal to no effect on major crimes in those states. The study found no statistically significant long-term effects of recreational cannabis laws or the initiation of retails sales on violent or property crimes in those states. The analysis was based on FBI data on violent, property, aggravated assault, auto theft, burglary, larceny, and robbery crime rates. The one trend that held was a decrease in the burglary rate in Washington. The study also called out some published research for bad research design and data for studies that purported to show increases in crime. The study found some immediate effect on crime in Colorado (property crime) and Washington (larceny) at the point of legalization but the trends suggest that if marijuana legalization influenced crime, it was short-lived.

Multiple analyses have concluded that medical marijuana laws are not causally linked with increases in violent crime or property crime.[xiii] RAND researchers found a negative and significant relationship between dispensary allowances and property crime rates.[xiv] A September 2019 study in Regional Science and Urban Economics reports reduction in crimes in areas around marijuana dispensaries.[xv]

The Cato Institute studied outcomes in Colorado and Washington, including crime rates in Denver and Seattle, and found no statistical relationship between passage of adult-use legalization and increased crime.[xvi] In a recent paper a University of Washington researcher used regression analysis on crime data from 1990 to 2017 and found that the legalization of marijuana, both recreational and medical, does not increase violent crime rates but could lead to a decline in violent crime such as homicide, robbery and aggravated assault.[xvii] A peer-reviewed study published in *The Economic Journal* indicates that legalizing marijuana is likely reducing crime in many states by displacing the illicit markets traditionally controlled by drug cartels.[xviii]

Other news reports also show a minimal impact of legal marijuana on crime[xix] and its effect on reducing opioid use and deaths.

Public Defender Savings

The State Public Defender's Office also estimated its savings in the same fiscal note to HB 1448 (2018). The Public Defender reported that the bill would save 52,230 attorney hours, or slightly more than 25 attorneys based on the state's 2,080-hour work year. The Public Defender assumed that 25% of drug cases relate to marijuana affecting about 2,472 cases. However, it did not convert the 52,230 hours savings into a dollar amount. It stated that it would not cut its budget because it is staffed substantially below the level it believes is necessary to meet its caseload standards.

Table 21 provides the conversion of hours saved into dollars using the FY 2020 budget request for 385 additional staff made by the Public Defender's Office. The FY 2020 budget request included a request for attorneys at a salary of $60,084 and a secretary for every three attorneys at a salary of $28,668. That provides a savings of $1.7 million in salaries if the Public Defender's budget was cut to keep its staffing levels at the level the General Assembly has been providing. The expense and equipment requests provided $10,500/attorney in travel and $6,380/FTE for all other expense and equipment leading to a savings of $475,145. Fringe benefit savings would add another $1 million. Total savings to the Public Defender's budget annually is estimated at $3.3 million. However, the petitioners do not recommend such cuts.

Table 21 - Public Defender possible savings			
Hours saved	52,230		
Yearly hours per FTE	2,080		
FTE saved	25.11		
	# staff	Avg. salary	Total
Public defenders	25	$60,084	$1,502,100
Secretary (1 for every 3 attorneys)	8.33	$28,668	$238,804
subtotal Personal Service Savings			$1,740,904
Expense & equipment			
Travel	25	$10,500	$262,500
Other items	33.33	$6,380	$212,645
subtotal E&E Savings			$475,145
Fringe benefits (59.8% of PS costs)			$1,041,061
Total savings for Public Defender			$3,257,110

Other department – costs, revenues, or savings

The Missouri State Highway Patrol (MSHP) should expect additional revenue as a result of this proposal. For HB 1448 (2018) the MSHP estimated income of $540,584 for the Criminal Records System Fund as a result of fingerprint and criminal record system checks in the first year and $54,054 annually thereafter.

The Office of Administration, Information Technology Systems Division provided IT support to DHSS. Possible additional costs to OA ITSD are included in the DHSS cost discussion of this analysis.

The Office of State Courts Administrator, the courts, the Department of Corrections, and the Public Defender may have additional costs to process expungement of marijuana convictions from criminal records. The petition provides that people with such convictions "may apply for expungement upon the

effective date of this section and such expungement shall be granted…". A search of the Missouri General Assembly's bill list for the past seven regular sessions found three bills filed by Rep. Ellington from 2014-2016 that included expungement of such records. It was not the same as the petition's provisions. The Oversight Division did not complete a fiscal note of the possible costs or savings.

and

IP 2020-126 Legalization of THC-containing recreational marijuana
https://www.sos.mo.gov/CMSImages/Elections/Petitions/2020-126.pdf

Dear Hon. Governor Parson, Nicole Galloway, Jay Ashcroft, and Eric Schmitt,

We are filing this document as formal comments for inclusion in the public record regarding the two Initiatives identified above.

This document provides a necessary estimate of the consequential costs **(CC)** that will by incurred if THC-containing marijuana (hereinafter referred to as "**psychoactive marijuana**" regardless of the reason for is use as a "medical" or "recreational" drug), is legalized in Missouri.

Preface and Recommendation Summary:

When other states legalized THC-containing marijuana, they only calculated the cost for implementing the new statute. They failed to foresee the necessity of evaluating fiscal impact of the *consequences* of legalization.

In other states, marijuana legalization was enacted expecting profits, when in fact massive losses to states, local jurisdictions, and businesses took place. These states are in jeopardy, unable to reverse legalization, unable to tax because of restrictions in the laws enacted, and stuck with massive costs.

In the short amount of time it is only possible to make a rough estimate the fiscal impact. There are thousands of state and local expenditures impacted by use of substances that impact mind and body for days, weeks, or years, and the abuse of those drugs.

We have many years of experience studying these problems and are in the best possible position to estimate these costs so the voters have some idea of the financial cost to the State.

We have an incontrovertible wealth of longitudinal facts from other states proving decisively that marijuana legalization will:

1. Greatly harm the general welfare of Missourians without providing any palpable benefit, and,

2. Create a large annual fiscal note comprised of a long list of proven fiscal consequences imposed on other states, local jurisdictions, and businesses in states legalized any form of psychoactive marijuana.

Finding:

We estimate the total CC fiscal note associated with the passage of the above to Initiatives would be a total annual fiscal note of approximately $2,818,214,740 annually to the state of Missouri and local governments.

Breakdown of costs:

> **$1,283,340,100** of the total is a baseline cost representing actual Colorado data adjusted for population.
>
> **$1,534,874,640** is our estimated "contingency" cost for 15 categories of known expenses that the Colorado study did not evaluate. These categories are evaluated later in this document and rationally estimated.
>
> It is not possible to do thorough research and numerical analysis of these items in just a few days, however, I do believe it is mandatory to express the likely magnitude of expense the Initiatives will incur.
>
> What we can supportably declare, based on my research and estimates below is "Fifteen complex line items cannot be accurately numerically evaluated, but **may** represent significant cost."

This amount will ramp up to the amount estimated within two to four years of passage, and elastically grow or shrink as use and abuse rates of psychoactive marijuana rise to levels we see in other states that legalized the use of any form of THC-containing marijuana.

Items Not included in the Cost Estimate:

1. There are longitudinal elements we are unable to estimate here, such as the potential cost to the state of younger Missourians who increasingly use or abuse substances in the "gig economy' employment environment where retirement plans and medical insurance are often not provided. So called "failure to launch" kids, who may have brain damage caused exposure before birth or use before the age of 24, may represent a large long-term cost liability to the State for medical, health, housing, and eventual indigency in old age.

2. We cannot estimate the costs to business in this document. We can say that the costs to business of legalization psychoactive marijuana will be high.

   Property, medical, and workman's compensation insurance rates will skyrocket. Workman's comp fraud and lawsuits will force many businesses to either close down, leave urban areas, or only hire self-insuring contractors.

   Costs for all businesses and government agencies that have to comply with OSHA will skyrocket. Pyschoactive marijuana impacts motor skills and judgement for at least one or two days or in some cases months after use. The bus driver who gets stoned on Saturday night is much more likely to have an accident on Monday morning, for example.

   If other states are a predictor, we will see all "brick and mortar" businesses, particularly larger businesses, hit with head taxes and "window taxes". These IP's bar the state from additional taxation of marijuana, so creative new taxes will be invented to pay for the consequential costs of drug use and abuse.

Recommendations:

1. If possible, we recommend that the Attorney General and/or the Secretary of State reject IP 2020-125 "Marijuana Legalization" and IP 2020-126, for the following reasons:

   a. The CC cannot be reasonably ascertained until a full cost study is performed, which is not possible short time period allowed in the context of the Initiative process.
   b. The legalization of psychoactive marijuana falls under the statutory authority of the Missouri Legislature, which has the authority and time to conduct a thorough fiscal impact study and allocate budgetary resources to fund those consequences, and
   c. The CC constitutes a large unfunded mandate on the State of Missouri for which there is no pressing constitutional justification for forcing on the State, local jurisdictions, and the taxpayers to bear, and
   d. These Initiatives deny the Legislature and local jurisdictions its statutory right to increase or enact new taxes on psychoactive marijuana to fund the associated CC at both state and local levels.
   e. These Initiatives may be unconstitutional as previously communicated to Governor Parsons, Attorney General Eric Schmitt, and the legislature.

2. If either ballot initiative is approved for the 2020 election cycle, we recommend that in addition to the implementation costs, the ballot state that "The consequential fiscal cost

of additional substance use and abuse to the state, local jurisdictions, and taxpayers is estimated to be $2,818,214,740 billion dollars annually".

This sum reflects costs to both state and local governments. Since these are state initiatives, the state should take responsibility, anticipate the expenditures, and be prepared to raise the funds to pay for the increase in problems that will arise in every jurisdiction. The most serious impacts will be seen in St. Louis, Kansas City, and perhaps Springfield. We should not abandon them to go bankrupt because of a state initiative.

This estimate may be slightly higher or lower depending on whether one or both Initiatives are enacted. The impact differential will be small because, in both cases, "recreational marijuana" is being fully legalized. Whether or not one has to get a card and a doctor's letter is merely procedural. In other states, medical marijuana quickly fell into disuse as soon as unrestricted "recreational marijuana" was legalized.

This may provide some incentive to reject these initiatives on the grounds they involve very large unfunded annual mandates that may also be unconstitutional. There is no rational basis for inserting possibly unconstitutional unfunded mandates into the Missouri Constitution when the initiatives contain no pressing strict-scrutiny civil rights concern requiring the state to fund the initiative.

The Fiscal Note Estimate:

1. **Components of the Fiscal Note Estimate:** The fiscal note must include:

   a. The costs for administratively implementing and managing legalization, and

   b. The costs the state will incur due to the "consequential costs" (CC) of marijuana legalization. CC includes all expenditures to the state and local jurisdictions due to increased **use and abuse** of psychoactive marijuana such as homelessness, medicare, high-school dropouts and youth drug gangs, interdiction and prosecution of illegal marijuana growing, environmental cleanup of illegal grows, sales and smuggling, crime, incarceration, police, violence, divorce and illegitimacy, mental health problems, violence shelters, illegal smuggling and illegal grows, OSHA-compliance, unemployment, and increased insurance costs for property, workman's comp, medical, and liability insurance. We cannot estimate those costs in this document. We must be aware that the actual costs of marijuana to all government agencies is much higher than the fiscal note estimate below, which applies only at the State level.

2. **Basis for Fiscal Note Estimate:**

   Our CC fiscal note estimate is based on actual CC financial data extracted from the State of Colorado and reports documenting the CC of the legalization of psychoactive marijuana. Colorado was the first state to legalize psychoactive marijuana. The longitudinal consequences are documented more thoroughly for Colorado than any other state.

3. **Baseline CC Fiscal Note Estimate: $1,283,340,100 annually.**

The Centennial Institute of the Colorado Christian University reports that Colorado is spending about $4.50 in costs to mitigate the effects of legalization for every $1 of tax revenue income. This baseline estimate does not include a large number of consequential expenses.

A. In 2018, the tax revenue for Marijuana in Colorado was $266,529,617.[1]
B. Therefore, the approximate fiscal note for downstream costs of marijuana legalization in Colorado for 2018 was approximately $4.50 * $266,529,617, for an estimate of $1,199,383,276.
C. The population of Colorado of individuals aged 10 and older is approximately 5,010,757.
D. The population of Missouri of individuals aged 10 and older is 5,375,792.
E. **Therefore, the baseline annual CC for psychoactive marijuana legalization in Missouri, adjusted for population, is $1,283,340,100.**

4. **Contingency Risk Factor Costs: $1,534,874,640.**

The following contingency multipliers, when applied to the baseline cost are a total contingency multiplier of 119.6%.

These factors are added because they are known cost factors not evaluated in the Colorado report:

a. **(15%) CC contingency for extant drug abuse and violence problems:** Missouri and St. Louis are at high risk of fiscal and law-enforcement exposure to the consequences of marijuana legalization compared to Colorado:

- Missouri has the 3rd highest per-capita drug abuse rate in the nation before Psychoactive marijuana is legalized.[2]
- St. Louis had the highest STD rate in the nation.[3] (the prevalence of STD's is highly associated with substance abuse).
- St. Louis has the highest murder rate in the nation in 2017 [4] and was ranked the most dangerous city in America by CBS News.[5] (Gun violence is tightly linked to substance abuse and the drug trade[6]).

b. **(10%) Gang violence in St. Louis and Kansas City:** The problems of gang violence in St. Louis and secondarily in Kansas City will grow and become much more serious with the legalization of psychoactive marijuana. Gangs control the smuggling and sales of illegal drugs. In Colorado, about 2/3 of marijuana sales are by illegal drug dealers because their product is much less expensive than the highly-regulated, taxed retail stores. St. Louis recently announced it is spending $5-million on a "Cure Violence" program that is a proven failure in all other cities that it has

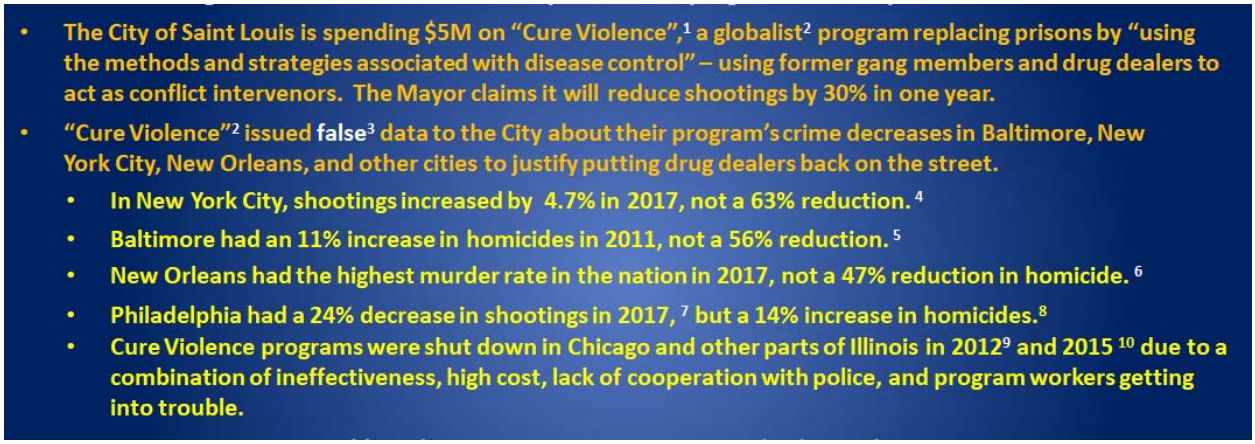
[6] https://www.stltoday.com/news/local/crime-and-courts/deadly-turn-study-shows-violent-crime-growing-deadlier-in-st/article_45e5d21f-1b38-5ada-8b04-e5eddb82ab3b.html

been implemented in. The State should be prepared to intervene. The screen capture below is by my organization Civitas Economic Engineering, documenting the fact that Cure Violence does not work:[7]



c. **(10%) CC baby boomer contingency:** There are a large number of baby boomers who have little savings and who use (or will use) psychoactive marijuana. According to the retirement institute, 45% of baby boomers have no retirement savings.[8] I estimate that at least 10% of them use psychoactive marijuana. This is attributable to the fact that baby boomers are the hippie culture, where marijuana use was and is still commonplace. Use of mood-altering substances over time does impact life, financial choices, and upward mobility negatively. Medical, housing, and other costs for caring for indigent elderly with aggressive mental health and memory issues may likely be a major expense to the state or local jurisdictions.

d. **(6%) Educational Remediation:** To pay for education remediation for marijuana-using school dropouts and disciplinary problems in public schools and universities. We are placing emphasis on this category because high-school dropouts are a very costly problem in Colorado.

e. **(10%) Long-term impact on (government and contractor) employee productivity**: This category includes lower production, rework, associated material and other costs, and legal expense. 15.2% of Coloradans are regular users of psychoactive marijuana. Efficiency, motivation, mistakes, rework, damage, and accidents are the consequence. 80% of Colorado marijuana users are not as active as indicated and have higher rates of medical problems, with medical expenditures of $54,833,218 in 2017.[9] Cost of cannabis use disorder in Colorado for 2017 was $31,448,908.[10] These kinds of costs may fall on the State or local jurisdictions for employees and indigents.

[8] https://www.investopedia.com/articles/personal-finance/032216/are-we-baby-boomer-retirement-crisis.asp
[9] http://cdn-centennial.pressidium.com/centennial/wp-content/uploads/2018/11/Economic-and-Social-Costs-of-Legalized-Marijuana-CO.pdf, pg. 26
[10] http://cdn-centennial.pressidium.com/centennial/wp-content/uploads/2018/11/Economic-and-Social-Costs-of-Legalized-Marijuana-CO.pdf pf. 21.

f. **(0%) Medical care for indigents:** Depending on insurance and local policy, costs for marijuana-related expenditures itemized in (d.) may fall on the State or local jurisdictions. Please add a percent if you believe this is a factor in Missouri.

g. **(6%) Workplace accidents:**

h. **(5%) Gun and domestic violence:** Substance-abuse is highly correlated with gun violence (at least 50% of all cases) and domestic violence (at least 75% of all cases). This drives costs police, investigative, prosecution, shelter, riot control, property damage, and compliance with federal social justice mandates for the state and local jurisdictions.

i. **(10%) Marijuana-related crime outside St. Louis:** This may be a very large number considering the broad costs of interdiction, prosecution, imprisonment, property damage, murder, theft, . Colorado reports a severe shortage of funding for marijuana inspections, finding and cleaning up illegal grows, and dealing with marijuana DUI. Missouri is a major route for smuggling and distribution of drugs along interstates 40 and 44. If psychoactive marijuana is legalized we will see a lot more local marijuana being grown and smuggled to other states.

j. We are adding a contingency to assure enough resources are available to handle these problems.

k. **(3%) Marijuana-related hazardous environmental cleanups:** The Rocky Mountain HIDTA report shows that meth and other drug use is being replaced by marijuana use and abuse. Illegal grows in Colorado and other states are expensive to catch, requiring aerial surveillance. Environmental cleanup of toxic chemicals can be very costly. Since Missouri is a prime state for growing marijuana outdoors, and we have a lot of heavily forested areas, we predict that illegal growing on public lands and related cleanups will become a major problem.

l. **(5%) Property damage**: This estimates cost to repair property damage to public properties caused by substance abusers.

m. **(19%) Homelessness and Urban Cleanup**: There were 5,883 homeless adults in Missouri in 2018 while Colorado, a state with similar population had a homeless population of 10,857[11] despite approximately 350 anti-homeless laws enacted to combat fires, trash, crime, and tent cities.[12] In this chart, we see that states that legalized psychoactive marijuana years ago suffer from the highest homelessness rates regardless of weather conditions.

A 2008 survey by the United States Conference of Mayors asked 25 cities for their top three causes of homelessness. Substance abuse was the single largest cause of homelessness for single adults (reported by 68% of cities).[13]

[11] https://files.hudexchange.info/resources/documents/2018-AHAR-Part-1.pdf
[12] https://en.wikipedia.org/wiki/Homelessness_in_the_United_States_by_state
[13] National Coalition for the Homeless, "Substance Abuse and Homelessness"; July, 2009; https://www.nationalhomeless.org/factsheets/addiction.html

Following the legalization of psychoactive marijuana in 2012, Colorado experienced the third largest percent increase in homelessness nationally -13 percent between 2015 and 2016.[14]

Scott Lindsay, a consultant to the Mayor of Seattle, investigated the cases of about 100 homeless people in Seattle and found that 100% of them had a substance abuse problem. Over 2/3 have been arrested for theft this year. Retailers are hit hard by theft. [15]
States report that each homeless person costs the government up to $50,000 per year.[16] These are costs associated with arrest, prosecution, cleanup of homeless tent cities, medical, health and hospitalization, services, trash, fires, property damage, and human waste.

If Missouri's homeless rate grows the match Colorado's, which should be expected, it will add an additional cost burden of $248,700,000, or 19.1% of the baseline CC cost to state and local governments.

n. **(.6%) Costs of family breakup and non-marriage**: The annual cost to the state of Missouri for 19,187 divorces and 29,134 children born out of wedlock in 2017 is conservatively estimated to be about $1.7 Billion – (5.8% of Missouri's 2019 budget). (UMC Regional and Fiscal Studies, CDC). Substance abuse is a primary factor in family breakup and failure of unmarried cohabiting relationships.[17]

   With each instance of non-marriage costing the state about $20,000 annually, an 10% decrease in marriage rates and 10% increase in cohabitation or illegitimzy rates will cost the state $170,000,000 not including lost tax receipts that would have been paid if couples had not broken up. This amount is six-tenths of 1% of the baseline cost estimate.

o. **(20%) Miscellaneous costs to state and local governments**: There are hundreds of elastic line item costs to state and local jurisdictions that expand or shrink with the prevalence of substance use and abuse. Here is a short list of major categories, some of which are not listed above. The Auditor's office may wish to modify our estimate based on their understanding of other expenses that will be incurred, a short list of categories listed below:[18]

ADDENDUM:

The following pages are included to provide additional research, facts, information and citations of authorities the auditor's staff may wish to use to adjust or verify our estimation.

Unconstitutionality Of Legalizing Psychoactive Marijuana

We believe it is within the jurisdiction of the Attorney General and perhaps the Secretary of State to reject the above constitutional initiatives to protect the Constitution of the State of Missouri from being suborned by provisions detrimental to the purpose of Constitutional government and the general welfare of the Citizens of the State of Missouri.

> **Cite:** Article 1 Section 2 of the Missouri Constitution requires the state to serve the general welfare of the Citizens. The idea that the state should go into business making money selling drugs that drive violence, homelessness, divorce, and poverty fully opposes the purpose of Constitutional government in the State of Missouri:
>
> Promotion of general welfare--natural rights of persons--equality under the law--purpose of government.
>
> Section 2. That all constitutional government is intended to promote the general welfare of the people; that all persons have a natural right to life, liberty, the pursuit of happiness and the enjoyment of the gains of their own industry; that all persons are created equal and are entitled to equal rights and opportunity under the law; that to give security to these things is the principal office of government, and that when government does not confer this security, it fails in its chief design.
>
> Source: Const. of 1875, Art. II, § 4.

A large body of data exists documenting the consequences of legalizing marijuana over the past 12 years in other states and by the federal government, herein cited below.

This easily-obtained body of publicly-accessible documentation provides incontrovertible and convincing evidence that the legalization of marijuana containing a primary ingredient of THC causes great Harms to the general welfare of the people. It causes many social, economic, and legal consequences, resulting in crushing costs and legal dilemmas to the state, local jurisdictions, businesses, and individuals. It is not possible to reverse these consequences and equitably correct the Harms regardless of crisis-management expense by the State and local governments.

We suggest that the Attorney General has a duty to *protect* the Missouri Constitution by rejecting any Constitutional Amendment Initiative containing language that offends, controverts, opposes, or violates settled law principles set forth in the Missouri Constitution.

We state that the form of IP 2020-125 Section 2.1 is deceptive and must be rejected in the absence of evidence from proponents proving that their claims regarding very positive impact of the Initiative are in fact true and accurate

.

We have a large body of studies, reports, and longitudinal data from other states that legalized psychoactive marijuana for "medicinal" or recreational purposes proving that the statements contained in IP 2020-125 Section 2.2 "Purpose" are false and deceptive.

The White House Office of National Drug Control Policy (ONDCP)[19] has issued The Rocky Mountain High Intensity Drug Trafficking Area Report [20], an extensive series of longitudinal reports spanning 23 years tracking marijuana use and abuse in Colorado, Montana, Utah, and Wyoming since 1996. The ONDCP uniformly reports harm to citizens who use marijuana and finds no salutary benefits worthy of Constitutional protection or recognition.

I am available to consult and testify to the facts below on behalf of the Citizens of the State of Missouri and/or as an advisor to the Missouri Attorney General's Office as a Subject Matter Expert on marijuana legalization

We find both of the above Initiatives invalid. The intent stated in the language of **Section 2.1. "Purpose"** is opposite of the actual effect the Constitutional Amendment will impose on the Citizens of the State of Missouri:

Section 2. Marijuana Legalization, Regulation, and Taxation

1. Purpose.

The purpose of this section is to make marijuana legal under state and local law for adults twenty-one years of age or older, and to control the commercial production and distribution of marijuana under a system that licenses, regulates, and taxes the businesses involved while protecting public health. The intent is to prevent arrest and penalty for personal possession and cultivation of limited amounts of marijuana by adults twenty-one years of age or older; remove the commercial production and distribution of marijuana from the illicit market; prevent revenue generated from commerce in marijuana from going to criminal enterprises; prevent the distribution of marijuana to persons under twenty-one years of age; prevent the diversion of marijuana to illicit markets; protect health by ensuring the safety of marijuana and products containing marijuana; and ensure the security of marijuana facilities. To the fullest extent possible, this section shall be interpreted in accordance with the purpose and intent set forth in this section.

13

The Policy Impact of both Initiatives:

1. **THC vs. CBD: Fraudulent misrepresentation of fact by omission.**

    a. The Definitions, Section 2. (6) on both Initiatives do not state that "recreational marijuana" containing THC is being legalized. The initiative uses scientific plant names that that the average person does not understand. Marijuana is defined deceptively as any form of marijuana not containing CBD. Many voters will not understand that this Initiative legalizes recreational psychoactive marijuana with no proven medical advantages over CBD, but is bred to get people very "high".

[19] https://www.whitehouse.gov/ondcp/
[20] https://rmhidta.org/default.aspx?act=documents2.aspx&DocumentCategoryID=27&AspxAutoDetectCookieSupport=1

(6) "Marijuana" means *cannabis indica*, *cannabis sativa*, and *cannabis ruderalis*, hybrids of such species, and any other strains commonly understood within the scientific community to constitute marijuana or cannabis, as well as resin extracted from the plant and marijuana-infused products. "Marijuana" does not include industrial hemp including any part of that plant, including the seeds thereof and all derivatives, extracts, cannabinoids, isomers, acids, salts, and salts of isomers, whether growing or not with a delta-9 tetrahydrocannabinol concentration of not more than three-tenths of one percent on a dry weight basis, or commodities or products manufactured with industrial hemp, or any other ingredient combined with marijuana or marijuana to prepare topical or oral administrations, food, drink, or other products.

b. Marijuana grown for "recreational" use is specifically bred to reduce CBD content to near-zero because CBD kills the "high" caused by THC. Therefore, we can decisively state that psychoactive marijuana is genetically bred and engineered to get people "high", not to provide medical benefits that do not put the patient at risk for car accidents, paranoia, hallucinations, suicide, or addiction.

c. Medical uses for CBD (cannabiol) legalized under the trade name Epidiolex are well-documented and understood. CBD provides the medical properties that are medically beneficial without the "high" caused by THC. There is no harm to citizens and no consequential costs to the state by the legalization of CBD-based products. The Missouri legislature enacted law in 2018 legalizing farming of marijuana plants genetically hybridized to produce CBD with little or no THC in the plant.

d. There are no proven **additional** medical benefits of psychoactive marijuana over what is provided by CBD.[21] Proponents of recreational marijuana flooded the internet and media with anectdotal claims that pmarijuana might be beneficial for sleep disorders, morning sickness, pain, and other ailments, but there is no peer-reviewed medical testing or evidence that THC does anything more than get people "high". Studies do say that, if anything, recreational marijuana only delays pain.

CBD vs. THC: Medical benefits

CBD and THC have many of the same medical benefits. They can provide relief from several of the same conditions. However, CBD doesn't cause the euphoric effects that occur with THC. Some people may prefer to use CBD because of the lack of this side effect.

In June 2018, the Food and Drug Administration approved Epidiolex, the first prescription medication to contain CBD. It's used to treat rare, difficult-to-control forms of epilepsy.

2. **<u>Health Consequences of Psychoactive Marijuana</u>:**

It is impossible for licensure, regulation, or taxation of marijuana to "protect public health". Legalizing a destructive recreational drug increases documented Harm to citizens and the state.

The health consequences and costs to the state making recreational use and abuse of psychoactive marijuana a constitutional right are not disclosed in the Initiative.

[21] https://www.healthline.com/health/cbd-vs-thc#medical-benefits

"Public health" includes the physical, emotional, mental, financial, employability, and health care costs imposed on individuals.

a. Marijuana is a drug that even in the best of situations is a primary driver of domestic, violence, gun violence, mass violence, school failure, homelessness, mental health problems, divorce, crime, and employment problems. THC causes permanent brain damage in individuals under age 24 and the unborn, and is an incontrovertible medical threat to public health.
b. Psychoactive marijuana harms public health no matter whether it is inhaled, smoked, or ingested. Peer-reviewed studies prove there are few, if any benefits of marijuana or THC on the human body. It is an addictive, mood-altering chemical used for getting high. It is classified as a Class-1 drug alongside heroin, lysergic acid diethylamide (LSD), marijuana (cannabis), 3,4-methylenedioxymethamphetamine (ecstasy), methaqualone, and peyote

- Proponents of psychoactive marijuana claim many possible medicinal benefits but none have been found medically effective or safe, and none are undergoing approved by the FDA.
- Marijuana causes amotivational syndrome, psychosis, acute psychosis, schizophrenia, tachycardia, postural hypotension, cyclic vomiting syndrome, attention impairment, hypotension, panic, anxiety, myoclonic jerking/hyperkinesis, delirium, respiratory depression, ataxia, and conjunctivitis.[22] Half of young adults in Massachusetts report using marijuana.[23] Marijuana smoke is significantly more damaging to heart, lungs, and circulatory system than cigarette smoke.[24]
- In school, marijuana-exposed children are more likely to show gaps in problem-solving skills, memory, the ability to remain attentive, low birth weight, and decreased motor development.[25] MRI scans confirm damage to the prefrontal cortex[26].
- Trying marijuana by age 15 doubles the risk of addiction.[27] Marijuana is a mixer drug. 60% of Marijuana users also misuse illegal and prescription drugs.[28]
- A noted large-group controlled study by Harvard psycho-biologist Dr. Bertha Madras, analyzing 65,454 brain scans from 31,227 people age 9 months to 105 years proved that marijuana cuts blood flow (and ages brains) similarly to bipolar disorder, ADHD, and schizophrenia.[29] Reduced blood flow is also linked to dementia and stroke.

[29] http://www.dailymail.co.uk/health/article-6086073/Smoking-cannabis-ages-brain-average-2-8-YEARS.html

- In youth, marijuana causes depression, functional problems, and educational failure.[30] Colorado's youth marijuana usage rate 74% higher than the national average[31] because it is seen as "safe" because it is legal.
- Pot advocates teach people to believe it is safe to drive stoned[32] when in fact it is dangerous.[33]
- With marijuana being a "multiplier drug" enhancing the effects of alcohol,[34] many individuals drive when they are drunk *and* stoned, resulting in many more deaths.[35] Driving drunk and stoned doubles the driving risk.[36]
- Colorado's noted Colorado Christian University Centennial Institute found that marijuana legalization resulted in great economic, social, physical losses to the State of Colorado and its Citizens: [37]
    - **For every dollar gained in tax revenue, Coloradans spent approximately $4.50 to mitigate the effects of legalization.**
    - **The cost of DUI's for people who tested positive for marijuana in 2016 was over $25-million.**
    - **Costs related to the healthcare system and from high school drop-outs are the largest cost contributors.**
    - Like tobacco, commercial marijuana is likely to have health consequences that we won't be able to determine for decades.
    - 69% of marijuana users say they have driven under the influence of marijuana at least once, and 27% admit to driving under the influence on a daily basis.
    - Research does suggest that long-term marijuana use may lead to reduced cognitive ability, particularly in people who begin using it before they turn 18.
    - Adult marijuana users generally have lower educational attainment than non-users
    - The marijuana industry used enough electricity to power 32,355 homes in 2016
- Marijuana "normalization" results in state-sponsored child abuse and neglect. Abuse of any drug results in profound impact to children. here many proven stories of adults getting babies[38] or children[39] stoned, abusing them, neglecting them, babies born "high", children being raised in marijuana "grow" operations, and leaving marijuana where children can use it.
- When entire urban areas reek of pot,[40] we know that marijuana addiction is a seminal public safety and health problem.[41]

[40] https://www.bostonglobe.com/lifestyle/style/2017/07/04/you-love-smell-marijuana-morning/VWnegTgDNDdNJGHlFM6QcP/story.html

- The Colorado School of Public Health[42] study recognized that children are being "prescribed" psychoactive marijuana in Colorado and that parents use pot as a "parenting tool" to calm themselves (p. 33).[43]
- The American Academy of Child and Adolescent Psychiatry formally opposes marijuana legalization.[44]

3. **Homelessness:**

   Marijuana and abuse of other drugs drives the tragic and very expensive homelessness crisis. Marijuana is the most commonly abused drug by the homeless.

   - The correlation between substance abuse and homelessness is nearly 100% because nobody dares to help a drug abuser by letting them move into their home.
   - San Francisco is spending $280-million annually on homelessness[45] — over $37,000 per person – not including another $65-million on street cleanup[46] – for a total of $345-million in expenses for just one city
   - Orange County is spending nearly $300-million[47] on homelessness.
   - Los Angeles County is spending $1-billion annually on homelessness[48] with no end in sight.

4. **Expansion of the Illicit marijuana Market: cultivation, smuggling, interdiction, arrests, and prosecutions**

   IP 2020-125 Section 1. Purpose does not accurately state the purpose of the Initiative. There is no body of documentation proving the theories stated are anything other than theories.

   We have in our possession abundant documentation proving that the statements made in Section 1. Purpose are undocumented theories or marketing language that are 180-degree opposite of what marijuana legalization caused in all other states.

   The benefits asserted are entirely false, unproven, and controverted by abundant historical documented proof about the consequences of marijuana legalization in all other states we have studied.

[48] http://www.latimes.com/local/lanow/la-me-county-homelessness-spending-20160205-story.html

Where the Purposes stated are a gross misrepresentation of documented facts, with massive fiscal costs to the State and local jurisdictions intentionally concealed, we urge the Secretary of State and the Attorney General to reject IP 2020-125 on the grounds that an accurate Fiscal note is impossible to estimate until a longitudinal cost study is done a Big Four accounting firm.

We suggest that if recreational marijuana is to be legalized, it should be done by the Missouri Legislature which is in the statutory position to conduct appropriate cost and impact, and budget studies before passing legislation:

A. Legalization of recreational marijuana does not "remove (or reduce} **the commercial production and distribution, of marijuana from the illicit market". The illicit market and costs to the state expand precipitously with legalization of recreational marijuana.**

- Illegal pot is now commonly grown in state parks in California, Colorado, Washington, and other states with great damage done to the environment due to noxious chemicals going into waterways. Interdiction is expensive and underfunded. There are many articles about this we can provide to prove this fact. [49] [50] [51]
- Approximately 10% of low income housing in Colorado has been destroyed by illegal growers who rent cheap houses to grow pot, which then have to be torn down because of mold and toxic chemicals. This decreases housing available to low-income citizens and effectively makes them homeless. There are many news stories and police testimony documenting this fact. [52] [53] [54]
- Los Angeles recently charged over 500 people running illegal pot businesses.[55]
- Seizures of black market marijuana in Colorado increased 1042% since recreational marijuana was legalized.[56]

  - Seizures of Colorado marijuana in the U.S. mail system has **increased 1,042 percent** from an average of 52 parcels (2009-2012) to an average of 594 parcels (2013-2017) during the time recreational marijuana has been legal.

- The number of seizures of illegally-grown marijuana increased 2800% since the legalization of recreational marijuana in Colorado.[57]

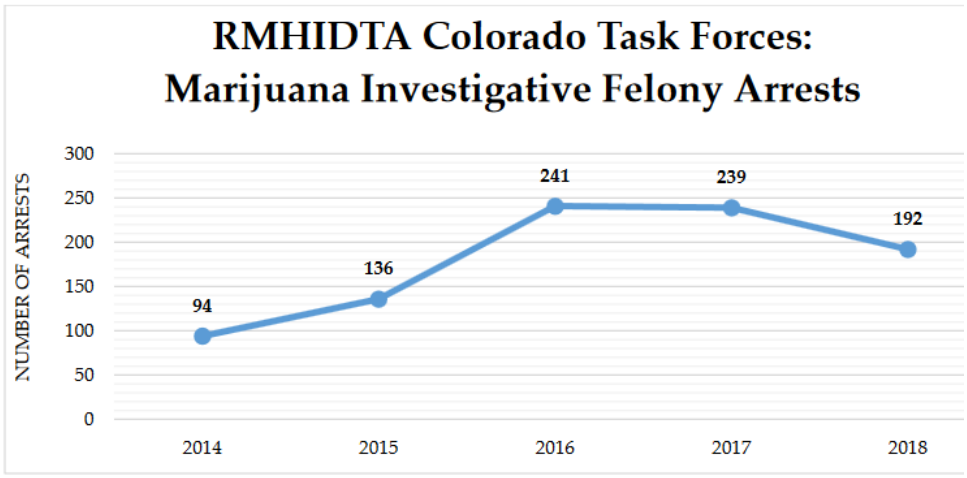
SOURCE: Rocky Mountain HIDTA Performance Management Process (PMP) Data

- The number of felony arrests for marijuana increased by 208% in Colorado from 2014 to 2018 after recreational marijuana was legalized:[58]

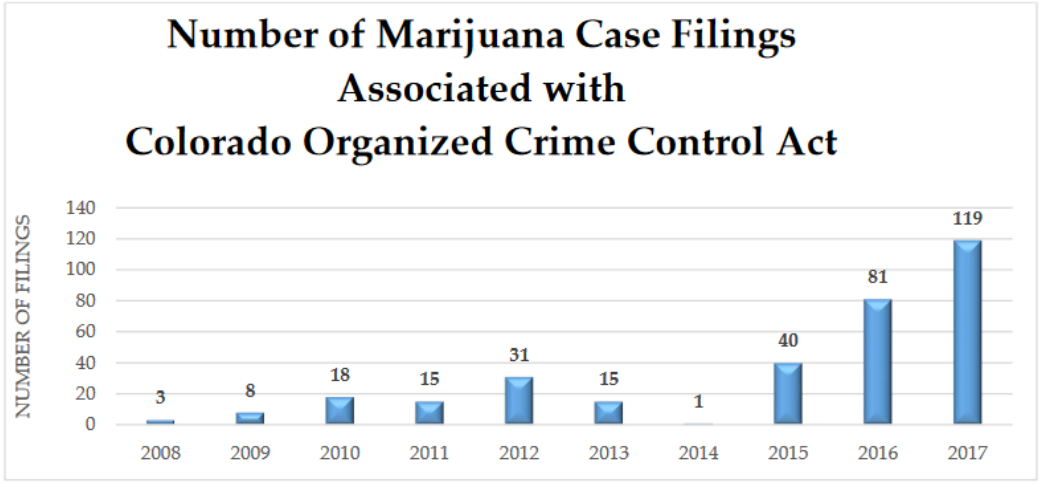


SOURCE: Rocky Mountain HIDTA Performance Management Process (PMP) Data

- The number of case filings under the Colorado Organized Crime Control Act increased 11,900% since recreational marijuana was legalized in 2014:[59]

[58] http://msani.org/wp-content/uploads/2019/09/The-Legalization-of-Marijuana-in-Colo.The-Impact.-Volume-6.pdf, pg 52.
[59] http://msani.org/wp-content/uploads/2019/09/The-Legalization-of-Marijuana-in-Colo.The-Impact.-Volume-6.pdf pg 52

Colorado Organized Crime Control Act Filings



SOURCE: Colorado Department of Public Safety, Division of Criminal Justice, Office of Research and Statistics

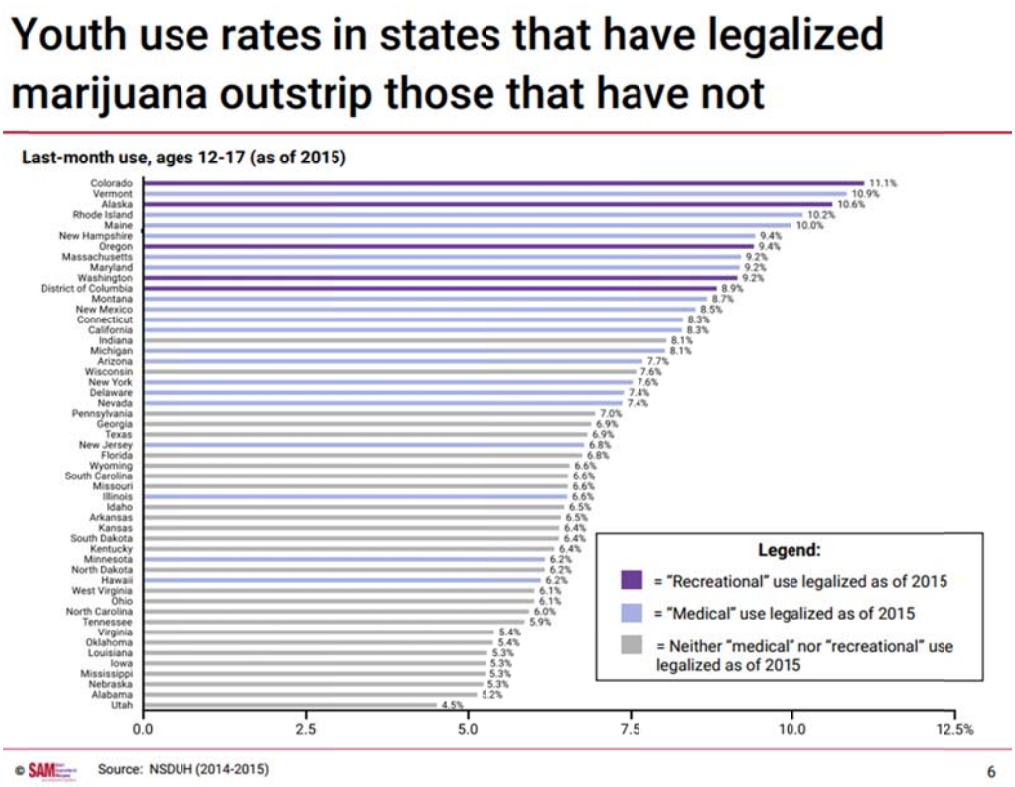
- Colorado Organized Crime Control Act (COCCA) filings are conspiracy cases in which there is potential for a larger sentence than other types of drug filings.

B. Distribution of marijuana to minors will increase

These Initiatives will not prevent the distribution of marijuana to persons under twenty-one years of age. Marijuana use by youths age 12-17 and a variety of consequential mental health problems increased precipitously in states that legalized either "medical" or "recreational" marijuana according to the National Survey on Drug Abuse and Health (NSDUH)[60] administered by the federal Substance Abuse and Mental Health Services Administration (SAMSHA).

- Substance abuse rates are as much as 244% higher in states that legalized any form of psychoactive marijuana. There is no data proving a decrease in substance abuse by young adults in states that legalized any form of psychoactive marijuana. The structure of this IP contains no policy different from other states that would result in a decrease of distribution marijuana to persons under age 21:[61]

[60] https://nsduhweb.rti.org/respweb/homepage.cfm; https://www.samhsa.gov/data/sites/default/files/NSDUH-FFR1-2016/NSDUH-FFR1-2016.pdf
[61] https://learnaboutsam.org/wp-content/uploads/2017/04/MMJgraph.png



o From 2009 to 2017, ingestion of marijuana by youth increased an mean average of 27% per year in states that legalized any form of psychoactive marijuana:[62]

Children Ingesting Marijuana Increase after Legalization of Marijuana

From January 2000 through June 2017 there were nearly 3,000 ingestions of marijuana by children younger than six. Over 70% of those ingestions were by children under the age of 3 and more than half received some form of hospital-based care. Symptoms in the children ranged from drowsiness and confusion to seizures and coma. Before 2009 there was no significant change in either the number or rate of marijuana ingestions, however from 2009 to 2017 the mean annual increase was 27% per year rising to 742 ingestions per year. Over 70% of those ingestions occurred in states with legalized marijuana.

SOURCE: **Wang, Sam. (2019). *Study shows increase in ingestions of marijuana by children in U.S.* Nationwide Children's Hospital.**

C. Revenue to criminal enterprises will increase

Both initiatives will increase the revenue generated by illicit marijuana going to criminal enterprises. The IP will increase the diversion of marijuana to illegal enterprises and create a new shadow street market based on back-door sales by licensed growers and sales outlets. Every state that legalized "recreational" (sometimes called medical) marijuana has seen significant increases in criminal illegal cultivation, smuggling, interdiction, arrests, and prosecutions.

[62] http://msani.org/wp-content/uploads/2019/09/The-Legalization-of-Marijuana-in-Colo.The-Impact.-Volume-6.pdf; pg 48.

These initiatives will not decrease revenue to illicit markets. Illegal marijuana growing, distribution, smuggling, and importation has been proven to be stimulated by marijuana legalization. This drives increases in violent crime, and does not decrease criminal prosecutions for illegal marijuana growing, sales, and production.

- When marijuana is legalized, the market size for marijuana increases exponentially. This drives increases in local illegal growing and importation from Mexico.
- Interdictions of illegal product actually increase and there are actually more arrests for illegal growing. Over 400 polluted grow sites exist in California[63] in public forests.
- Illegal marijuana costs much less than state-approved marijuana – causing a new and very large black market to appear that is difficult to interdict because the state cannot prosecute without proving that the pot is illegal.
- In Colorado, legal stores are selling only about 1/3 of the product they anticipated. Licensed growers end up selling overproduction on the black market to keep from going bankrupt. *Licensing does not encourage above-board commercial activity. It is driving major expansions of illicit activity that are much more profitable for marijuana business people.*
- At least half of all gun violence is caused by individuals who test positive for illegal drugs at the time of arrest. Marijuana is the most common drug involved in gun violence.[64]
- 76% of domestic violence involves an offender using drugs or alcohol at the time of the offense. (*Ibid., 25)*
- In Washington State, legal production is 300% of sales demand,[65] and prices for "regulated" pot are half of black market prices. So growers are illegally exporting large quantities of pot to non-marijuana states.
- Increasingly violent drug wars in Chicago are a direct consequence of Illinois' marijuana legalization in 2013 with an additional Cook County ballot approval in June, 2018.[66]
- Cartels are buying many inexpensive homes and turning them into marijuana farms[67] to the destruction of community, environment, and real estate markets. In Colorado and California,
- Pot shops are losing a lot of "business" to bootleg weed.[68]
- The "litany of conflicts created by [the paradigm shift of] legal marijuana" have made policing and enforcement expensive, laborious, and difficult.[69]

D. FISCAL NOTE:

- **The Fiscal note in the Initiative estimates only administrative costs for implementing the Initiative. Other states failed to estimate the consequential costs and are facing budgetary and social disaster. Missouri must fully understand the costs to the state before approving any Initiative to legalize recreational marijuana.**
- **The costs for interdiction, enforcement, interdiction, environmental damage, gang violence, mass shootings, longitudinal costs for kids who fail in school, mental health problems, divorce, illegitimacy, homelessness, and other problems caused by substance use and abuse will increase significantly and must be estimated in the Fiscal note. Front-line costs to local jurisdictions, who are immediately impacted, must also be estimated so the voters know what they are voting on. I very roughly estimate we are looking at well over $4 billion in costs to the State annually.**

E. Public Safety: IP 2020-125 will result in much higher rates of traffic fatalities, serious environmental risks.

- Pot advocates teach people to believe it is safe to drive stoned[70] when in fact it is dangerous.[71] As we might expect, drugged driving is now the leading cause of traffic deaths.[72]
- In Denver and at least 9 other American cities, laws banning the smoking of marijuana publicly are broadly ignored. Los Angeles just charged over 500 people running illegal pot businesses. Marijuana is being illegally grown in plain sight.
- Illegal grows on public lands are out of control and result in costly, dangerous environmental cleanups. [73]
- The stench[74] of both legal and illegal marijuana farming and its widepread use[75] are driving community disagreement[76] and property value loss.
- Misuse of fertilizer and herbicides poisons public lands, waterways, and kills animals.[77]

F. IP 2020-125 will not "protect health by ensuring the safety of marijuana and products containing marijuana". It will magnify and exacerbate existing health consequences of marijuana use and abuse.

- Psychoactive marijuana will never be a "safe drug". Its effects on individuals are almost entirely harmful with the impact to brain and motor functions extending days or weeks after use.
- THC causes permanent brain damage in individuals under age 24.
- THC causes paranoia and anxiety in many individuals.
- Cannabis-related deaths increased in Colorado by 66% after marijuana was legalized.[78]
- A highlighted 2017 CDOT survey found that 55% of marijuana users surveyed drove a vehicle within two hours of smoking pot with only 32% believing they were "safe to drive". [79]
- Violent crime increased by 40% in Denver since "medical marijuana" was "legalized"[80]
- Violent juvenile crime in Denver was up 11% between 2013 and 2015.[81]
- Chronic homelessness in Denver is at a 10-year high in 2017 [82] (homelessness began increasing as soon as "medical marijuana" was legalized in Colorado in 2008).
- Colorado had a 24% increase — the nation's largest increase — in homeless veterans, at a time when Veteran homelessness is declining nationally.[83]
- Homelessness grew exponentially in every state that legalized psychoactive marijuana. Domestic violence, gun violence, health care crises grew substantially in every state that legalized psychoactive marijuana.
- The problem of illegal street marijuana is so bad that in Colorado cities are forcing growers to spray junk DNA on their product so the State can identify legal vs illegal marijuana. This adds expense for both growers and the state (DNA tests are very expensive) – making legal marijuana even more uncompetitive against street marijuana. **Dangerous Health Risk:** The strains of custom junk DNA used for tracing grower identity have not been FDA tested or approved – creating a potentially serious public health risk that has not been tested or approved by the FDA.
- The KOMO News Special: Seattle is Dying[84] documented and proved that substance abuse – led by marijuana use – is driving a massive homelessness problem in Seattle. They are pushing for mandatory substance abuse treatment in prisons.

G. Marijuana legalization drives significant increases in youth educational, addiction, and school failure.

- In individuals under age 24, marijuana causes depression, functional problems, and educational failure.[85]
- Colorado's youth marijuana usage rate 74% higher than the national average[86] because it is seen as "safe" because it is legal.
- Rhode Island, which legalized medicinal use, tops the list for use by 12-17 year olds with rates 55% higher than the national average and 82% higher than Idaho (where marijuana is not legal). The percentage of youth aged 12-17 in Alaska that reported past month marijuana use is 80% higher than Idaho youth.[87]

H. Unconstitutional Overreach:

- IP 2020-125 Section 6.(2).(c).(iii) publicly admits that marijuana causes serious substance abuse and addiction *problems and provides funding to "help" citizens whose lives have been destroyed by drug abuse that will be sponsored by the State of Missouri via a constitutionally-protected public-private drug-dealing operation.*
- It is unconstitutional for the State to violate Article 2, Section 1 of the Missouri Constitution by going into business as a drug dealer, and going into business with drug dealers selling "recreational" Class-I drugs known to harm and addict Missouri Citizens.
- An IP that violates any provision of the Missouri Constitution cannot be added to the Missouri Constitution and must be procedurally rejected.
- We would never Constitutionally immunize doctors for recommending cigarettes[88] as they did nearly 60 years ago. We cannot now establish a Constitutional Right and Immunity for the State, drug dealers, and drug-dealing "businesses" to promote and profit from drug addiction.

I. The massive negative fiscal note provisions intentionally designed into IP 2020-125 render it unconstitutional. Section 6. of this IP will structurally impose massive unfunded fiscal mandates, fiscal liabilities, and imponderable policy quagmires on the State of Missouri, the Missouri Legislature, all local jurisdictions, businesses, and taxpayers; as follows:

Cite - IP 2020-125 Section 6. and subsections:

[85] http://www.dailymail.co.uk/health/article-4728102/Increasing-marijuana-use-age-linked-depression.html
[86] https://amp.usatoday.com/amp/536010001

6. Taxation and Reporting.

(1) A tax shall be levied upon the retail sale of non-medical marijuana sold to consumers at marijuana facilities licensed pursuant to this section within the state. The tax shall be at a rate of fifteen percent of the retail price. The tax shall be collected by each licensed non-medical retail marijuana facility and paid to the department of revenue. After retaining no more than two percent of the total tax collected or its actual collection costs, whichever is less, amounts generated by the tax levied in this section shall be deposited by the department of revenue into the "Veterans, Infrastructure, and Health Fund") created under this subsection. Licensed entities making non-medical retail sales within the state shall be allowed approved credit for returns provided the tax was paid on the returned item and the purchaser was given the refund or credit.

(2) There is hereby created in the state treasury the "Veterans, Infrastructure, and Health Fund" which shall consist of taxes and fees collected under this section. The state treasurer shall be custodian of the fund, and he or she shall invest monies in the fund in the same manner as other funds are invested. Any interest and moneys earned on such investments shall be credited to the fund. Notwithstanding any other provision of law, any monies remaining in the fund at the end of a biennium shall not revert to the credit of the general revenue fund. The commissioner of administration is authorized to make cash operating transfers to the fund for purposes of meeting the cash requirements of the department in advance of it receiving annual application, licensing, and tax revenue, with any such transfers to be repaid as provided by law. The fund shall be a dedicated fund and shall be distributed as follows:

(a) First, to the department, an amount necessary for the department to carry out this section, including repayment of any cash operating transfers, payments made through contract or agreement with other state and public agencies necessary to carry out this section, and a reserve fund to maintain a reasonable working cash balance for the purpose of carrying out this section;

(b) Next, distributed to the local government where the retail sale occurred, three-fifteenths of the remaining fund balance.

(c) After the distribution to the local government where the retail sale occurred, the remaining fund balance shall be distributed in thirds as follows:

(i) One-third of the remainder of the fund balance shall be transferred to the Missouri veterans commission and allied state agencies, as determined by

(Continued next page)

appropriation, exclusively for health care and other services for military veterans and their dependent families;

(ii) One-third of the remainder of the fund balance to the State Road Fund created under article IV, section 30b of this Constitution for constructing and maintaining an adequate system of connected state highways; and

(iii) One-third of the remainder of the fund balance to the department to provide grants to existing agencies and not-for-profit organizations, whether government or community-based, to increase access to evidence-based low-barrier drug addiction treatment, prioritizing medically proven treatment and overdose prevention and reversal methods and public or private treatment options with an emphasis on reintegrating recipients into their local communities, to support overdose prevention education, and to support job placement, housing, and counseling for those with substance use disorders. Agencies and organizations serving populations with the highest rates of drug-related overdose shall be prioritized to receive the grants.

(d) All monies from the taxes and fees authorized hereunder shall provide additional dedicated funding for the purposes enumerated above and shall not replace existing dedicated funding.

(3) For all retail sales of marijuana, a record shall be kept by the seller of all amounts and types of marijuana involved in the sale and the total amount of money involved in the sale, including itemizations, taxes collected, and grand total sale amounts. All such records shall be kept on the premises in a readily available format and be made available for review by the department and the department of revenue upon request. Such records shall be retained for five years from the date of the sale.

(4) The tax levied pursuant to this subsection is separate from and in addition to any general state and local sales and use taxes that apply to retail sales, which shall continue to be collected and distributed as provided by general law.

(5) Except as authorized in this subsection, no additional taxes shall be imposed on the sale of marijuana.

The IP is unconstitutional for the following aggregate reasons:

A. IP 2020-125 provides no funding to pay for the massive fiscal note imposed on the state and local jurisdictions to cover costs of significant increases in homelessness, crime, violence, vehicle accidents, divorce, and other expensive problems that state-sponsored substance abuse has proven to have caused in other states.

B. IP 2020-125 Section 6(1) creates a 15% sales tax on recreational marijuana but intentionally denies funding to the State, local jurisdictions, and businesses to pay for costs of implementation and the diaspora of consequences of marijuana legalization including but not limited to homelessness, interdiction, prisons, environmental cleanup, crime, increased domestic and gun violence, property damage, increased medical, property, and vehicle insurance, OSHA compliance, testing of marijuana for safety, and state and local marijuana regulation infrastructure.

C. IP 2020-125 Section 6(2) forces all but a tiny percent of tax revenues to be donated a "Veterans, Infrastructure, and Health Fund" operating independently of the General Revenue fund, operating as follows:

1. The fund firstly pays for "carrying out" the IP. *It does not fund ongoing operations of state agencies to handle, pay for, or recover from the consequences of this IP or substance abuse.*
2. Funding to Veterans
3. Highway funding,
4. Addiction treatment done by psychiatrists, psychologists, and mental health individuals.

- The State Legislature has responsibility for and is constitutionally required to enact a balanced budget every year. Spending needs consistently outpace tax collections. This IP undermines the Legislature's constititutional right to establish and manage the state budget.

- The directed use of tax revenues defined in the IP are a "Christmas tree" of political buyoffs unrelated to the purpose of the IP. These buy-offs are intended to garner support for the initiative, but do not provide functional use of the revenues to carry out the IP.

- To pass constitutional muster, if the IP directs use of tax revenues, the funds must go to serve a narrowly-tailored purpose fully funding the provisions of the IP without imposing unfunded mandates or tying the hands of the Missouri Legislature to implement the State Budget.

- The majority of tax revenues will not be directed to pay for the costs, impacts, and consequences of marijuana legalization. This forms an unconstitutional unfunded mandate requiring rejection of the IP.

- Section 6. (5) prohibits enactment of any additional taxes on marijuana at the state or local levels to pay for unfunded costs, mandates, and consequences of marijuana legalization. The hands of the legislature, local jurisdictions, and courts are tied.

- The wording of IP 2020-125 Section 6. suggests that the Missouri Supreme Court could rule it unconstitutional for the City of St. Louis to enact a corporate head tax to pay for homelessness – which is caused by substance abuse, or any other tax to pay for problems caused by substance abuse

- I argue that it is unconstitutional for Citizens to force large invisible, un-itemized, un-estimated, unassigned, and unfunded mandates on the State, the Legislature, local jurisdictions, businesses, and Citizens via a Constitutional initiative not afforded strict scrutiny protections for race and sex and designed to procedurally serve and financially execute narrowly-tailored constitutional purpose.

- In Montana, the Marsy's Law IP was ruled unconstitutional by the Montana Supreme Court[89] because of unfunded mandates and an expansive list of unseen impacts that voters, the State, and local jurisdictions could not see or judge within the language of the IP..

> "Although well intentioned, the process leading to **CI-116's passage deprived Montana voters of the ability to consider the many, separate ways it changed Montana's constitution or explain the significant administrative, financial, and compliance burdens its unfunded mandates imposed upon state, county and local governments while jeopardizing the existing rights of everyone involved with the criminal justice system,"** wrote Lewis and Clark County Attorney Leo Gallagher, one of those initially named on the petition to void Marsy's Law, in a press release.

J. IP 2020-125 is unconstitutional in present form because:

A. It forces many unseen and unreconciled changes other state laws, administrative rules for many agencies, police, social services, and local laws that the voters cannot see or vote on.

B. It forces many unseen financial mandates on the state, local jurisdictions, schools, police, and other public institutions.

C. It forces exceptionally-large financial mandates on insurance companies. Insurance companies will be forced to pay for much higher rates of traffic accident, mental health, property, theft, and OSHA and employment-related claims and lawsuits, suicides, and life insurance.

D. It forces unfunded mandates on businesses who will:
- Be forced to deal with, pay for, and clean up after vagrancy, theft, crime, and loss of business caused by homeless encampments.
- Be forced to pay large "head taxes" and other brick-and-mortar taxes that have been imposed on businesses in Colorado, Washington, California, and New York to pay for homelessness and related increases in criminal costs.

E. I believe that the Montana ruling on the many administrative, financial, and compliance burdens imposed on state, local, police, courts, and administrative agencies, and the very large costs imposed on businesses and insurance companies prove that **IP 2020-125** is an unconstitutional Initiative in the form it is written, and must be rejected. Marijuana legalization is a complicated issue that must be handled and funded by the Missouri Legislature.

The cycle of community failure begins with substance abuse.

The cycle of urban success begins with families being empowered with choice-based policy to drive substance abuse out of their neighborhoods – *one family at a time.*

Fact: Substance Abuse is the primary driver of violence in America

- 76% of domestic violence involves an offender using drugs or alcohol **at the time of the offense. ***
- At least 50% of non-intimate violence involves an offender using drugs or alcohol **at the time of the offense. ***
- **Underreporting**: The BJS did not report how much violence involves individuals addicted to substances who were not "high" at the time of the offense. *

Among victims of violence who were able to describe the offender's use of drugs or alcohol, about two-thirds in an intimate relationship with the offender reported the offender's drinking at the time of the crime.

Victim-offender relationship	Total	Offender using: Alcohol	Drugs	Drugs or alcohol	Neither drugs nor alcohol
All victims of violence	100%	28%	7%	9%	56%
Intimate*	100	55	9	12	25
Nonmarital relative	100	38	14	12	36
Acquaintance	100	28	9	10	52
Stranger	100	24	6	7	63

*Includes current or former spouse, boyfriend, and girlfriend.

Figure 3

- 75% of people who begin treatment for drug addiction report performing acts of violence, including (but not limited to) mugging, physical assault, and using a weapon to attack another person.**
- Gun owners who have been convicted of an alcohol-related offense, such as driving under the influence or drunk and disorderly conduct, are up to five times more likely to be arrested for a violent or firearm-related crime than those who have not. ***

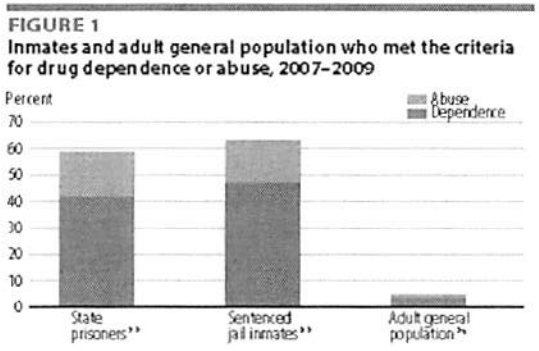
Fact: Substance Abuse is the primary driver of crime and violence in America

- About 60% of the prison population has met the DSM-IV criteria for drug dependence or abuse.*
- Almost 40% of people locked up for property crimes and 14% of those incarcerated for violent crimes reported that they had committed their most serious offense for drug-related reasons. *
- During 2007-09, prisoners (77%) and jail inmates (78%) reported having ever used marijuana/hashish, more than any other drug*
- NOTE: The above figures are understated because:
  1. Substance users tend to be reticent admitting to using substances .
  2. Substance users who were killed, escaped while committing a crime, or not arrested are not included in this data set.
  3. Individuals misusing prescription drugs are often not triaged until a deep investigation into a violent crime is specifically made.
  4. **Substance abuse causes symptoms presumed to be "mental illness" until diagnosed as a "substance use disorder". *An unknown but significant amount of substance abuse is undiagnosed, misreported as "mental illness", and improperly blamed on "mental illness".* The Sandy Hook case is an example of misreporting later corrected by deep police investigation.**



- **Psychiatric drug cover-up: There have been at least 27 school shootings committed by those taking or withdrawing from psychiatric drugs *such as opiates*, resulting in 162 wounded and 72 students and/or faculty killed ... *there has yet to be a federal investigation in the United States on the link between psychiatric drugs and acts of school or other mass shooting.* ****

* Results from the 2017 National Survey on Drug Use and Health (HHS Publication No. SMA 18-5068) Bureau Of Justice Statistics, September, 2018; https://www.bjs.gov/content/pub/pdf/dudaspji0709.pdf

Fact: Substance Abuse is also the primary driver of homelessness in America

- A 2008 survey by the United States Conference of Mayors asked 25 cities for their top three causes of homelessness. Substance abuse was the single largest cause of homelessness for single adults (reported by 68% of cities).[1]
- Scott Lindsay, a consultant to the Mayor of Seattle, investigated the cases of about 100 homeless people in Seattle and found that 100% of them had a substance abuse problem. Over 2/3 have been arrested for theft this year. Retailers are hit hard by theft. [2]

Why do substance abusers end up homeless?

- If you are a hard working person and you accidentally end up in hard times, your friends or your church will take you in or help you find a place to live until you get your feet back on the ground.
- But if you are a drug addict and end up divorced, unemployed, or destitute, nobody will help you or let you move in with them. You are on your own living on the streets unless you can find room in a homeless shelter.

Our Policy Meta-analysis:

- **Our extensive review of interdisciplinary literature indicates that the onset of substance abuse -- most often in the family -- is the predominant lifespan factor driving homelessness and many other serious longitudinal consequences for individuals and families.**
- **Homelessness cannot be managed via end-stage crisis-cleanup programs. Free housing, food, and support services are a formula for long-term dependence, not recovery and independence. *The emphasis must be on upstream substance abuse policy in the family.***
- **Substance abuse usually begins because of social and environmental factors. As substance abuse advances to addiction, epigenetic change to brain DNA takes place, modifying neural networks in ways that can persist beyond the time of drug intake and may become permanent.[3] *Therefore substance abuse treatment must occur near the onset of substance abuse, which is commonly the family.***
- **Homelessness can be effectively prevented via simple policies *healing early-stage substance abuse in families before irreversible chronic phase consequences and hopelessness have destroyed families.***

Impacting Substance Abuse in the family is the key to balancing local, state, and federal budgets

Substance abuse is the riverhead driving a long list of serious intergenerational consequences. Below is a partial list of costly consequences of unaddressed substance abuse in the family:

- Mass shootings (at least 80% correlation)
- Homelessness (nearly 100% correlation)
- Domestic Violence (at least 75% correlation)
- Gun Violence (at least 50% correlation)
- Car, Construction, Work, Other Accidents
- Crime, Property damage, related costs
- High medical, property, accident insurance
- High divorce, illegitimacy, related costs
- Lifelong debilitating mental and physical problems and longitudinal costs (all ages)
- Child Abuse and Neglect
- Educational failure
- "Failure to Launch" permanently-dependent adult children
- Permanent brain damage to children under age 24 caused by marijuana and other drugs
- Suicide by adults and children (600% higher)
- Long-term poverty for women and children
- **Double Governmental Jeopardy: Loss of tax income coupled with compounding demand spending**

Today there are no federal or state policies impacting substance abuse in the family.
Filling the "Recovery Gap" is the only way we can reverse the trend of costly, violent socioeconomic collapse

© Civitas Economic Engineering LLC, 2019

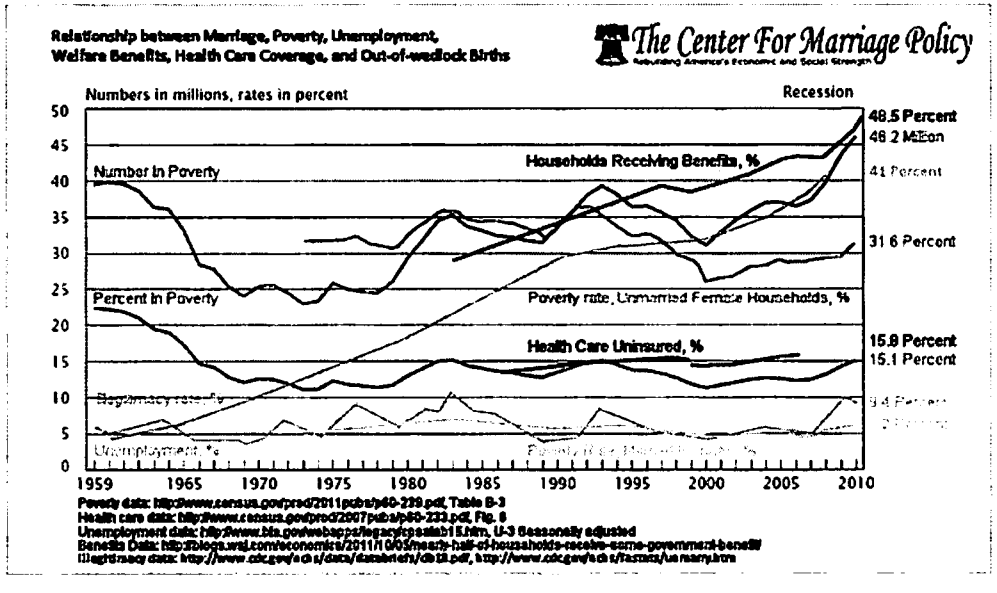
Ending family disruption driven by substance abuse is the key to balancing government budgets and maintaining a strong economy over time

- Marriage is the socioeconomic engine creating the motivated, educated, reliable work force that businesses want and need.
- Marriage guarantees the lowest crime rates, poverty rates, and means-tested welfare costs.
- Marriage guarantees the brightest social and economic outcomes for women and children.
- We either have big marriage or big government. *Marriage metrics report success or failure of social policy just like employment/unemployment metrics report success or failure of economic policy*. **Success in both sectors is required for a balanced budget.**
- Political parties are at loggerheads arguing about high crime rates, poverty, violence, and deficit spending. Our political system is overwhelmed and the rule of Constitutional law existentially threatened by the trickle-down consequences of substance abuse. **Government will be increasingly frantic, volatile, radical, and unproductive until we finally reverse the unaddressed trend of substance abuse.**
- Health care financial metrics will stabilize. Far fewer individuals will need free health care when mass substance abuse is obviated. National Health Care can be retired without a fight.
- Gun control will fall by the wayside as a national issue.

© Civitas Economic Engineering LLC, 2019

Why Building Marriage is the key to balancing budgets.

- **Despite welfare spending being the largest line item in the federal budget, the poverty rate for married families is consistently at least 450% to 600% lower than for unmarried female households.**
- ***This happens because married families have two income sources and twice the human resources.***
- **When we finally address substance abuse in the family, poverty and means-tested welfare spending will shrink naturally.**
- **The bonus prizes will be corresponding shrinkage of health care, criminal and educational costs.**



© Civitas Economic Engineering LLC, 2019

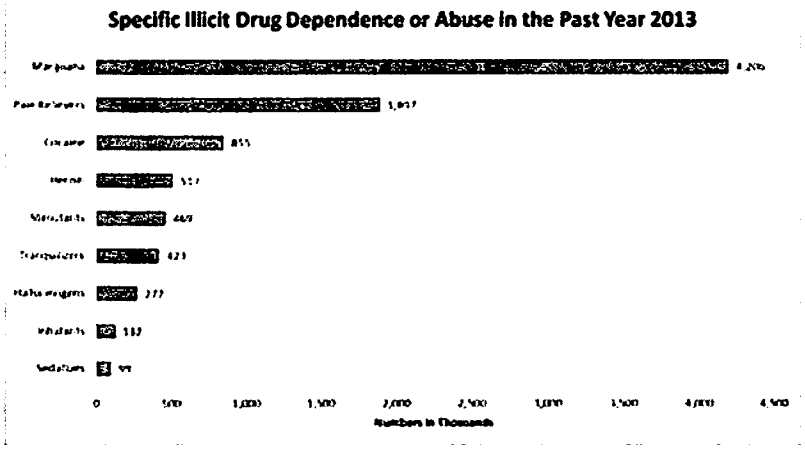
Why Building Marriage is the key to freeing up budget resources for education and infrastructure

- According to the Heritage Foundation, each divorce and case of illegitimacy costs the state an average of $20,000 in expenditures and lost revenues ***each year***
- The annual cost to the state of Missouri for 19,187 divorces and 29,134 children born out of wedlock in 2017 is conservatively estimated to be about $1.7 Billion – (5.8% of Missouri's 2019 budget). (UMC Regional and Fiscal Studies, CDC)
- A reduction of divorce and illegitimacy of only 10% will painlessly shrink demand spending in Missouri by at least $116-million, freeing up capital for education. Actual savings should be much higher.
- States will enjoy across-the-board spending reductions due to the wide span of programs with costs driven by substance abuse. Savings could be as high as $2-billion in Missouri depending on the amount invested in public outreach and subsequent media involvement.

© Civitas Economic Engineering LLC, 2019

Closing the "Treatment Gap" – In the Family[1]

- In 2015, the National Institute for Drug Abuse (NIDA) stated that an estimated 22.7 million Americans (8.6 percent) needed treatment for a problem related to drugs or alcohol, but only about 2.5 million people (about 11% of substance abusers) received treatment at a specialty facility.
- **Only 1 in 10 individuals addicted to substances are recovering from their addiction.**
  (The other 9 are bankrupting the United States and making it impossible to govern).
- NIDA calls this oversight the **"Treatment Gap".** Substance abuse occurs ***in the family***. The family is the only effective place to effect recovery – before people lose everything and become hopeless.
- The opiate and marijuana abuse crises will abate when people stop wanting drugs for recreational purposes. Policies aggressively reducing teen and young adult drug abuse – **in the family** – are overdue.



Binge and heavy drinking are more widespread among men than women. In 2013, 30.2 percent of men and 16.0 percent of women 12 and older reported binge drinking in the past month. And 9.5 percent of men and 3.3 percent of women reported heavy alcohol use.

Drug use is highest among people in their late teens and twenties. In 2013, 22.6 percent of 18- to 20-year-olds reported using an illicit drug in the past month.

The Family Substance-Abuse Restraining Order (FSRO) Process
How It Works

- **An FSRO is similar to what Drug Courts do, but brings about substance-abuse recovery in an intact family, at an early phase in the addiction cycle, and usually long before the substance abuser ends up in serious or irreversible trouble.**
- The spouse of a substance-abusing partner (or parents of a substance abusing child) files for a Family Substance-Abuse Restraining Order at the same court where domestic violence restraining orders are filed.
- For substance-abusing children, the parent coordinates with a children's home, which cooperatively handles or performs substance abuse counseling in a rigorous, disciplined, environment. Children will take recovery very seriously because they do not like living in the highly regimented "boot camp" of a children's home.
- The substance abuser is removed from the home and is not allowed to return until he/she has demonstrated a convincing level of sobriety. The Judge tells the substance abuser that they only have two choices – grow up or lose everything – to emphasize the importance of choosing recovery.
- Telephone-contact orders are encouraged to maintain communication so the responsible spouse can gauge recovery progress and keep firm but loving pressure on the substance abuser to recover.
- Recovery status is mailed to the court biweekly (or when indicated by an event) via forms using checkboxes indicating recovery progress and cooperation. This is similar to drug-court reporting methods (which make court appearances by recovery centers, A.A., and other counselors unnecessary).
- The FSRO is dropped when the court and spouse/parent are convinced that the respondent's has achieved a convincing level of sobriety.

The cost of substance abuse is very high.
Everyone is impacted socially, economically, and politically

- Every corporation pays for the costs of substance abuse via inflating HR costs, poor work performance, turnover, accidents, lawsuits, health and property insurance, property loss, and high taxes.
- Governments, OSHA-compliant businesses and agencies, and insurance companies have the highest direct-exposure out-of-pocket costs.
- "Death Profession" risks are significantly driven by substance abuse (both on and off the job), and job-related exposure to substance-abusers.
- Every taxpayer funds the high costs of government constantly reacting to, enabling, covering up, and cleaning up from substance-abuse related criminal, social, and economic consequences. Many innocent victims are robbed, injured, or killed by substance abusers.
- ***Marijuana "legalization" approximately quadruples the number of costly criminal prosecutions and incarcerations for illegal drug sales, smuggling, growing, and illegal production. Prisons fill up, not empty out and interdiction costs explode.[1] This fact is opposite of claims made by marijuana activists.***
- The inability of politicians to manage out-of-control costs, deficits, human wreckage, and mass violence problems is why cities, states, and the federal government are drowning in debt, while politicians and media are in a war of words with no actionable answers on the horizon.

If you ask politicians or the media what is driving violence,
the chances are they will blame it on guns, poverty, police, gangs, mental health, racism, fatherlessness, video games, or income inequality.

If you ask police officers what is driving violence,
The chances are they will say drugs or substance abuse.

Politicians usually do not know what police officers know. They are not on the front lines. Politicians often hurriedly respond to angry constituents with costly crisis mop-up programs funding the *consequences* of substance abuse. This fixes nothing and fosters funding models that entitle and guarantee future drug abuse in the community.[1]

Harnessing the People to drive substance abuse out of communities,
one family at a time, is the only way for everyone to finally win.

The "system" knows that substance abuse drives crime and violence.
(Why Missouri Must Act Now)

In August, 2019, Federalist advocates at the National Council for Behavioral Health issued a 77-page study, "Mass Violence In America".[1]

They intend to misuse mass violence to "end the war on drugs", empty-out prisons, and establish a powerful new government agency combining national security, FBI, substance abuse, mental health, school, and family surveillance functions into one super-agency.

This new agency would move social and psychological services inside national security with unlimited "military" funding not presently available to social services.

The agency would have power to surveil families from schools and other government agencies. It is intended to eventually force substance abuse or mental health services on adults or children and expand common core agenda in our schools – in the name of public safety.

Our FSRO policy giving citizens the personal power to drive substance abuse out of their communities, one family at a time, is the only small-government, effective way to reverse the trend of mass substance abuse.
We must not let Federalists establish a new and dangerously powerful conglomerate agency.

The City of Saint Louis knows that substance abuse drives crime and violence.

So it is launching a $5M make-work "violence prevention" program that is a proven failure in other cities.

- **The City of Saint Louis is spending $5M on "Cure Violence",[1] a globalist[2] program replacing prisons by "using the methods and strategies associated with disease control" – using former gang members and drug dealers to act as conflict intervenors. The Mayor claims it will reduce shootings by 30% in one year.**
- **"Cure Violence"[2] issued false[3] data to the City about their program's crime decreases in Baltimore, New York City, New Orleans, and other cities to justify putting drug dealers back on the street.**
  - **In New York City, shootings increased by 4.7% in 2017, not a 63% reduction. [4]**
  - **Baltimore had an 11% increase in homicides in 2011, not a 56% reduction. [5]**
  - **New Orleans had the highest murder rate in the nation in 2017, not a 47% reduction in homicide. [6]**
  - **Philadelphia had a 24% decrease in shootings in 2017, [7] but a 14% increase in homicides.[8]**
  - **Cure Violence programs were shut down in Chicago and other parts of Illinois in 2012[9] and 2015 [10] due to a combination of ineffectiveness, high cost, lack of cooperation with police, and program workers getting into trouble.**

Fact: Public policy cannot put Humpty Dumpty back together again.
Substance abuse must be addressed in the family so that crime, violence, homelessness, and frightfully expensive crisis-cleanup demand spending does not overwhelm state and local budgets.

Where do we want Missouri to be in five years?

Every state that legalized THC-containing marijuana (in any form) has suffered crippling increases in serious social and budget problems due to crisis demand spending.

Local jurisdictions in states that legalized THC-containing marijuana (in any form) sustained imponderable increases in serious social and budget crises due to homelessness, crime, loss of tax income, unemployment, and more.

Constitutional Initiatives banning new marijuana taxes (*like enacted in Missouri*) forced legislatures and cities to invent tangential "head" and other "gotcha" taxes on businesses and innocent citizens to subsidize the State-run Drug Cartel.

Amazon abandoned plans to build its new headquarters buildings in Seattle and New York City because of costly marijuana-driven taxation schemes. Amazon is building its HQ in a small Virginia town where it cannot be soaked.

Missouri legalized high-power THC-containing "medical" marijuana in 2018.
1/3 of marijuana users have a life-impacting addiction problem.*[1] *Missouri's socioeconomic disaster will begin in 2020.

The Family Substance-abuse Restraining Order (FSRO) legislation will improve Missouri's tax income and broadly reduce crisis-demand spending, making Missouri safer and more competitive than marijuana states.

Missouri's crime, substance abuse, and STD rates and costs can be the best in Nation -- not the worst.

Missouri must grant every responsible citizen in every Missouri family the personal power to drive substance abuse out of their community, *one family at a time.*

Empowering and Enlisting every responsible Missouri Citizen is the only way to put drug dealers out of business And to facilitate maximal capital Missouri needs for infrastructure, education and other growth priorities.

Fiscal Note Summary

State government entities are expected to have one-time costs of $21 million, annual costs from $6 million to unknown, and annual revenues from $86 million to $155 million by 2025. Local governments estimate unknown costs and are expected to have annual revenues from $17 million to $27 million by 2025.

Jefferson City, MO 65101

RE: Petition approval request from Deirdre Hirner regarding a proposed constitutional amendment to Article XIV (2020-125)

Dear Auditor Galloway:

Enclosed please find an initiative petition sample sheet for a proposal to amend the Missouri Constitution filed by Deirdre Hirner on October 9, 2019.

We are referring the enclosed petition sample sheet to you for the purposes of preparing a fiscal note and fiscal note summary as required by Section 116.332, RSMo. Section 116.175.2, RSMo requires the state auditor to forward the fiscal note and fiscal note summary to the attorney general within twenty days of receipt of the petition sample sheet.

Thank you for your immediate consideration of this request.

Sincerely,

John R. Ashcroft

Be it resolved by the people of the state of Missouri that the Constitution be amended:

Article XIV is amended by amending Section 1 of Article XIV and enacting one new section to be known as Section 2 of Article XIV, to read as follows:

XIV Section 1. Right to access medical marijuana. — 1. Purposes.

This section is intended to permit state-licensed physicians to recommend marijuana for medical purposes to patients with serious illnesses and medical conditions. The section allows patients with qualifying medical conditions the right to discuss freely with their physicians the possible benefits of medical marijuana use, the right of their physicians to provide professional advice concerning the same, and the right to use medical marijuana for treatment under the supervision of a physician.

This section is intended to make only those changes to Missouri laws that are necessary to protect patients, their primary caregivers, and their physicians from civil and criminal penalties, and to allow for the limited legal production, distribution, sale and purchase of marijuana for medical use. This section is not intended to change current civil and criminal laws governing the use of marijuana for nonmedical purposes. The section does not allow for the public use of marijuana and driving under the influence of marijuana.

2. Definitions.

(1) **"Administer"** means the direct application of marijuana to a qualifying patient by way of any of the following methods:

(a) Ingestion of capsules, teas, oils, and other marijuana-infused products;

(b) Vaporization or smoking of dried flowers, buds, plant material, extracts, or oils;

(c) Application of ointments or balms;

(d) Transdermal patches and suppositories;

(e) Consuming marijuana-infused food products; or

(f) Any other method recommended by a qualifying patient's physician.

(2) **"Department"** means the department of health and senior services, or its successor agency.

(3) **"Entity"** means a natural person, corporation, professional corporation, nonprofit corporation, cooperative corporation, unincorporated association, business trust, limited liability company, general or limited partnership, limited liability partnership, joint venture, or any other legal entity.

(4) **"Flowering plant"** means a marijuana plant from the time it exhibits the first signs of sexual maturity through harvest.

(5) **"Marijuana"** or **"marihuana"** means *Cannabis indica*, *Cannabis sativa*, and *Cannabis ruderalis*, hybrids of such species, and any other strains commonly understood within the scientific community to constitute marijuana, as well as resin extracted from the plant and marijuana-infused products. "Marijuana" or "marihuana" do not include industrial hemp containing a cropwide average tetrahydrocannabinol concentration that does not exceed three-tenths of one percent on a dry weight basis, or commodities or products manufactured from industrial hemp.

(6) **"Marijuana-infused products"** means products that are infused with marijuana or an extract thereof and are intended for use or consumption other than by smoking, including, but not limited to, edible products, ointments, tinctures and concentrates.

(7) **"Medical marijuana cultivation facility"** means a facility licensed by the department to acquire, cultivate, process, store, transport, and sell marijuana to a medical marijuana dispensary facility, medical marijuana testing facility, or to a medical marijuana-infused products manufacturing facility.

(8) **"Medical marijuana dispensary facility"** means a facility licensed by the department to acquire, store, sell, transport, and deliver marijuana, marijuana-infused products, and drug paraphernalia used to administer marijuana as provided for in this section to a qualifying patient, a primary caregiver, another medical marijuana dispensary facility, a medical marijuana testing facility, or a medical marijuana-infused products manufacturing facility.

(9) **"Medical marijuana-infused products manufacturing facility"** means a facility licensed by the department to acquire, store, manufacture, transport, and sell marijuana-infused products to a medical marijuana dispensary facility, a medical marijuana testing facility, or to another medical marijuana-infused products manufacturing facility.

(10) **"Medical marijuana testing facility"** means a facility certified by the department to acquire, test, certify, and transport marijuana.

(11) **"Medical use"** means the production, possession, delivery, distribution, transportation, or administration of marijuana or a marijuana-infused product, or drug paraphernalia used to administer marijuana or a marijuana-infused product, for the benefit of a qualifying patient to mitigate the symptoms or effects of the patient's qualifying medical condition.

(12) **"Physician"** means an individual who is licensed and in good standing to practice medicine or osteopathy under Missouri law.

(13) **"Physician certification"** means a document, whether handwritten, electronic or in another commonly used format, signed by a physician and stating that, in the physician's professional opinion, the patient suffers from a qualifying medical condition.

(14) **"Primary caregiver"** means an individual twenty-one years of age or older who has significant responsibility for managing the well-being of a qualifying patient and who is designated as such on the primary caregiver's application for an identification card under this section or in other written notification to the department.

(15) **"Qualifying medical condition"** means the condition of, symptoms related to, or side-effects from the treatment of:

(a) Cancer;

(b) Epilepsy;

(c) Glaucoma;

(d) Intractable migraines unresponsive to other treatment;

(e) A chronic medical condition that causes severe, persistent pain or persistent muscle spasms, including but not limited to those associated with multiple sclerosis, seizures, Parkinson's disease, and Tourette's syndrome;

(f) Debilitating psychiatric disorders, including, but not limited to, posttraumatic stress disorder, if diagnosed by a state licensed psychiatrist;

(g) Human immunodeficiency virus or acquired immune deficiency syndrome;

(h) A chronic medical condition that is normally treated with a prescription medication that could lead to physical or psychological dependence, when a physician determines that medical use of marijuana could be effective in treating that condition and would serve as a safer alternative to the prescription medication;

(i) Any terminal illness; or

(j) In the professional judgment of a physician, any other chronic, debilitating or other medical condition, including, but not limited to, hepatitis C, amyotrophic lateral sclerosis, inflammatory bowel disease, Crohn's disease, Huntington's disease, autism, neuropathies, sickle cell anemia, agitation of Alzheimer's disease, cachexia, and wasting syndrome.

(16) **"Qualifying patient"** means a Missouri resident diagnosed with at least one qualifying medical condition.

3. Creating Patient Access to Medical Marijuana.

(1) In carrying out the implementation of this section, the department shall have the authority to:

(a) Grant or refuse state licenses and certifications for the cultivation, manufacture, dispensing, sale, testing, tracking, and transportation of marijuana for medical use as provided by law; suspend, fine, restrict, or revoke such licenses and certifications upon a violation of this section or a rule promulgated pursuant to this section; and impose any administrative penalty authorized by this section or any rule promulgated pursuant to this section.

(b) Promulgate rules and emergency rules necessary for the proper regulation and control of the cultivation, manufacture, dispensing, and sale of marijuana for medical use and for the enforcement of this section so long as patient access is not restricted unreasonably and such rules are reasonably necessary for patient safety or to restrict access to only licensees and qualifying patients.

(c) Develop such forms, certificates, licenses, identification cards, and applications as are necessary for, or reasonably related to, the administration of this section or any of the rules promulgated under this section;

(d) Require a seed-to-sale tracking system that tracks medical marijuana from either the seed or immature plant stage until the medical marijuana or medical marijuana-infused product is sold to a qualifying patient or primary caregiver to ensure that no medical marijuana grown by a medical marijuana cultivation facility or manufactured by a medical marijuana-infused products manufacturing facility is sold or otherwise transferred except by a medical marijuana dispensary facility. The department shall certify, if possible, at least two commercially available systems to licensees as compliant with its tracking standards and issue standards for the creation or use of other systems by licensees.

(e) Issue standards for the secure transportation of marijuana and marijuana-infused products. The department shall certify entities which demonstrate compliance with its transportation standards to transport marijuana and marijuana-infused products to a medical marijuana cultivation facility, a medical marijuana-infused products manufacturing facility, a medical marijuana dispensary facility, a medical marijuana testing facility, or another entity with a transportation certification. The department shall develop or adopt from any other governmental agency such safety and security standards as are reasonably necessary for the transportation of marijuana. Any entity licensed or certified pursuant to this section shall be allowed to transport cannabis.

(f) The department may charge a fee not to exceed $5,000 for any certification issued pursuant to this section.

(g) Prepare and transmit annually a publicly available report accounting to the governor for the efficient discharge of all responsibilities assigned to the department under this section;

(h) Establish a system to numerically score competing medical marijuana licensee and certificate applicants, only in cases where more applicants apply than the minimum number of licenses or certificates as calculated by this section, which scoring shall be limited to an analysis of the following:

(i) the character, veracity, background, qualifications, and relevant experience of principal officers or managers;

(ii) the business plan proposed by the applicant, which in the case of cultivation facilities and dispensaries shall include the ability to maintain an adequate supply of marijuana, plans to ensure safety and security of qualifying patients and the community, procedures to be used to prevent diversion, and any plan for making marijuana available to low-income qualifying patients;

(iii) site security;

(iv) experience in a legal cannabis market;

(v) in the case of medical marijuana testing facilities, the experience of their personnel with testing marijuana, food or drugs for toxins and/or potency and health care industry experience;

(vi) the potential for positive economic impact in the site community;

(vii) in the case of medical marijuana cultivation facilities, capacity or experience with agriculture, horticulture, and health care;

(viii) in the case of medical marijuana dispensary facilities, capacity or experience with health care, the suitability of the proposed location, and its accessibility for patients;

(ix) in the case of medical marijuana-infused products manufacturing facilities, capacity or experience with food and beverage manufacturing; and

(x) maintaining competitiveness in the marijuana for medical use marketplace.

In ranking applicants and awarding licenses and certificates, the department may consult or contract with other public agencies with relevant expertise regarding these factors. The department shall lift or ease any limit on the number of licensees or certificate holders in order to meet the demand for marijuana for medical use by qualifying patients.

(2) The department shall issue any rules or emergency rules necessary for the implementation and enforcement of this section and to ensure the right to, availability, and safe use of marijuana for medical use by qualifying patients. In developing such rules or emergency rules, the department may consult with other public agencies. In addition to any other rules or emergency rules necessary to carry out the mandates of this section, the department may issue rules or emergency rules relating to the following subjects:

(a) Compliance with, enforcement of, or violation of any provision of this section or any rule issued pursuant to this section, including procedures and grounds for denying, suspending, fining, restricting, or revoking a state license or certification issued pursuant to this section;

(b) Specifications of duties of officers and employees of the department;

(c) Instructions or guidance for local authorities and law enforcement officers;

(d) Requirements for inspections, investigations, searches, seizures, and such additional enforcement activities as may become necessary from time to time;

(e) Creation of a range of administrative penalties for use by the department;

(f) Prohibition of misrepresentation and unfair practices;

(g) Control of informational and product displays on licensed premises provided that the rules may not prevent or unreasonably restrict appropriate signs on the property of the medical marijuana dispensary facility, product display and examination by the qualifying patient and/or primary caregiver, listings in business directories including phone books, listings in marijuana-related or medical publications, or the sponsorship of health or not for profit charity or advocacy events;

(h) Development of individual identification cards for owners, officers, managers, contractors, employees, and other support staff of entities licensed or certified pursuant to this

section, including a fingerprint-based federal and state criminal record check in accordance with U.S. Public Law 92-544, or its successor provisions, as may be required by the department prior to issuing a card and procedures to ensure that cards for new applicants are issued within fourteen days. Applicants licensed pursuant to this section shall submit fingerprints to the Missouri state highway patrol for the purpose of conducting a state and federal fingerprint-based criminal background check. The Missouri state highway patrol, if necessary, shall forward the fingerprints to the Federal Bureau of Investigation (FBI) for the purpose of conducting a fingerprint-based criminal background check. Fingerprints shall be submitted pursuant to 43.543 and fees shall be paid pursuant to 43.530;

(i) Security requirements for any premises licensed or certified pursuant to this section, including, at a minimum, lighting, physical security, video, alarm requirements, and other minimum procedures for internal control as deemed necessary by the department to properly administer and enforce the provisions of this section, including reporting requirements for changes, alterations, or modifications to the premises;

(j) Regulation of the storage of, warehouses for, and transportation of marijuana for medical use;

(k) Sanitary requirements for, including, but not limited to, the preparation of medical marijuana-infused products;

(l) The specification of acceptable forms of picture identification that a medical marijuana dispensary facility may accept when verifying a sale;

(m) Labeling and packaging standards;

(n) Records to be kept by licensees and the required availability of the records;

(o) State licensing procedures, including procedures for renewals, reinstatements, initial licenses, and the payment of licensing fees;

(p) The reporting and transmittal of tax payments;

(q) Authorization for the department of revenue to have access to licensing information to ensure tax payment and the effective administration of this section; and

(r) Such other matters as are necessary for the fair, impartial, stringent, and comprehensive administration of this section.

(3) The department shall issue rules or emergency rules for a medical marijuana and medical marijuana-infused products independent testing and certification program for medical marijuana licensees and requiring licensees to test medical marijuana using one or more impartial, independent laboratories to ensure, at a minimum, that products sold for human consumption do not contain contaminants that are injurious to health, to ensure correct labeling and measure potency. The department shall not require any medical marijuana or medical marijuana-infused products to be tested more than once prior to sale.

(4) The department shall issue rules or emergency rules to provide for the certification of and standards for medical marijuana testing facilities, including the requirements for equipment and qualifications for personnel, but shall not require certificate holders to have any federal agency licensing or have any relationship with a federally licensed testing facility. The department shall certify, if possible, at least two entities as medical marijuana testing facilities. No medical marijuana testing facility shall be owned by an entity under substantially common control, ownership, or management as a medical marijuana cultivation facility, medical marijuana-infused product manufacturing facility, or medical marijuana dispensary facility.

(5) [The department shall maintain the confidentiality of reports or other information obtained from an applicant or licensee containing any individualized data, information, or records related to the licensee or its operation, including sales information, financial records, tax returns, credit reports, cultivation information, testing results, and security information and plans, or revealing any patient information, or any other records that are exempt from public inspection

pursuant to state or federal law. Such reports or other information may be used only for a purpose authorized by this section. Any information released related to patients may be used only for a purpose authorized by federal law and this section, including verifying that a person who presented a patient identification card to a state or local law enforcement official is lawfully in possession of such card.] Beginning December 2, 2020, all public records produced or retained pursuant to this section are subject to the general provisions of the Missouri Sunshine Law, as amended from time to time. Notwithstanding the foregoing, records containing proprietary business information obtained from an applicant or licensee are subject to closure. For documents submitted on or after December 2, 2020, the applicant or licensee shall label business information it believes to be proprietary prior to submitting it to the department. For documents submitted prior to December 2, 2020, the applicant or licensee may advise the department, through a department approved process, of any records previously submitted by the applicant or licensee it believes contain proprietary business information. Proprietary business information shall include sales information, financial records, tax returns, credit reports, cultivation information unrelated to product safety, testing results unrelated to product safety, site security information and plans, and individualized consumer information. The presence of proprietary business information shall not justify the closure of public records:

(a) identifying the applicant or licensee;

(b) relating to any citation, notice of violation, tax delinquency, or other enforcement action;

(c) relating to any public official's support or opposition relative to any applicant, licensee, or their proposed or actual operations;

(d) where disclosure is reasonably necessary for the protection of public health or safety; or

(e) that are otherwise subject to public inspection under other applicable law.

(6) Within one hundred eighty days of December 6, 2018, the department shall make available to the public license application forms and application instructions for medical marijuana cultivation facilities, medical marijuana testing facilities, medical marijuana dispensary facilities, and medical marijuana-infused products manufacturing facilities.

(7) Within one hundred eighty days of December 6, 2018, the department shall make available to the public application forms and application instructions for qualifying patient, qualifying patient cultivation, and primary caregiver identification cards. Within two hundred ten days of December 6, 2018, the department shall begin accepting applications for such identification cards.

(8) An entity may apply to the department for and obtain one or more licenses to grow marijuana as a medical marijuana cultivation facility. Each facility in operation shall require a separate license, but multiple licenses may be utilized in a single facility. Each indoor facility utilizing artificial lighting may be limited by the department to thirty thousand square feet of flowering plant canopy space. Each outdoor facility utilizing natural lighting may be limited by the department to two thousand eight hundred flowering plants. Each greenhouse facility using a combination of natural and artificial lighting may be limited by the department, at the election of the licensee, to two thousand eight hundred flowering plants or thirty thousand square feet of flowering plant canopy. The license shall be valid for three years from its date of issuance and shall be renewable, except for good cause. The department shall charge each applicant a nonrefundable fee of ten thousand dollars per license application or renewal for all applicants filing an application within three years of December 6, 2018, and shall charge each applicant a nonrefundable fee of five thousand dollars per license application or renewal thereafter. Once granted, the department shall charge each licensee an annual fee of twenty-five thousand dollars per facility license. Application and license fees shall be increased or decreased each year by the percentage of increase or decrease from the end of the previous calendar year of the Consumer Price Index, or successor index as published by the U.S. Department of Labor, or its successor agency. No more than three medical marijuana cultivation facility licenses shall be issued to any entity under substantially common control, ownership, or management.

(9) An entity may apply to the department for and obtain one or more licenses to operate a medical marijuana dispensary facility. Each facility in operation shall require a separate license. A license shall be valid for three years from its date of issuance and shall be renewable, except for good cause. The department shall charge each applicant a nonrefundable fee of six thousand dollars per license application or renewal for each applicant filing an application within three years of December 6, 2018, and shall charge each applicant a nonrefundable fee of three thousand dollars per license application or renewal thereafter. Once granted, the department shall charge each licensee an annual fee of ten thousand dollars per facility license. Application and license fees shall be increased or decreased each year by the percentage of increase or decrease from the end of the previous calendar year of the Consumer Price Index, or successor index as published by the U.S. Department of Labor, or its successor agency. No more than five medical marijuana dispensary facility licenses shall be issued to any entity under substantially common control, ownership, or management.

(10) An entity may apply to the department for and obtain one or more licenses to operate a medical marijuana-infused products manufacturing facility. Each facility in operation shall require a separate license. A license shall be valid for three years from its date of issuance and shall be renewable, except for good cause. The department shall charge each applicant a nonrefundable fee of six thousand dollars per license application or renewal for each applicant filing an application within three years of December 6, 2018, and shall charge each applicant a nonrefundable fee of three thousand dollars per license application or renewal thereafter. Once granted, the department shall charge each licensee an annual fee of ten thousand dollars per facility license. Application and license fees shall be increased or decreased each year by the percentage of increase or decrease from the end of the previous calendar year of the Consumer Price Index, or successor index as published by the U.S. Department of Labor, or its successor agency. No more than three medical marijuana-infused products manufacturing facility licenses shall be issued to any entity under substantially common control, ownership, or management.

(11) Any applicant for a license authorized by this section may prefile their application fee with the department beginning 30 days after December 6, 2018.

(12) Except for good cause, a qualifying patient or his or her primary caregiver may obtain an identification card from the department to cultivate up to six flowering marijuana plants for the exclusive use of that qualifying patient. The card shall be valid for twelve months from its date of issuance and shall be renewable with the annual submittal of a new or updated physician's certification. The department shall charge an annual fee for the card of one hundred dollars, with such rate to be increased or decreased each year by the percentage of increase or decrease from the end of the previous calendar year of the Consumer Price Index, or successor index as published by the U.S. Department of Labor, or its successor agency.

(13) The department may set a limit on the amount of marijuana that may be purchased by or on behalf of a single qualifying patient in a thirty-day period, provided that limit is not less than four ounces of dried, unprocessed marijuana, or its equivalent. Any such limit shall not apply to a qualifying patient with written certification from two independent physicians that there are compelling reasons why the qualifying patient needs a greater amount than the limit established by the department.

(14) The department may set a limit on the amount of marijuana that may be possessed by or on behalf of each qualifying patient, provided that limit is not less than a sixty-day supply of dried, unprocessed marijuana, or its equivalent. A primary caregiver may possess a separate legal limit for each qualifying patient under their care and a separate legal limit for themselves if they are a qualifying patient. Qualifying patients cultivating marijuana for medical use may possess up to a ninety-day supply, so long as the supply remains on property under their control. Any such limit shall not apply to a qualifying patient with written certification from two independent physicians that there are compelling reasons for additional amounts. Possession of between the legal limit and up to twice the legal limit shall subject the possessor to department sanctions, including an administrative penalty and loss of their patient identification card for up to a year. Purposefully possessing amounts in excess of twice the legal limit shall be punishable by imprisonment of up to one year and a fine of up to two thousand dollars.

(15) The department may restrict the aggregate number of licenses granted for medical marijuana cultivation facilities, provided, however, that the number may not be limited to fewer

than one license per every one hundred thousand inhabitants, or any portion thereof, of the state of Missouri, according to the most recent census of the United States. A decrease in the number of inhabitants in the state of Missouri shall have no impact.

(16) The department may restrict the aggregate number of licenses granted for marijuana-infused products manufacturing facilities, provided, however, that the number may not be limited to fewer than one license per every seventy thousand inhabitants, or any portion thereof, of the state of Missouri, according to the most recent census of the United States. A decrease in the number of inhabitants in the state of Missouri shall have no impact.

(17) The department may restrict the aggregate number of licenses granted for medical marijuana dispensary facilities, provided, however, that the number may not be limited to fewer than twenty-four licenses in each United States congressional district in the state of Missouri pursuant to the map of each of the eight congressional districts as drawn and effective on December 6, 2018. Future changes to the boundaries of or the number of congressional districts shall have no impact.

(18) The department shall begin accepting license and certification applications for medical marijuana dispensary facilities, medical marijuana testing facilities, medical marijuana cultivation facilities, medical marijuana-infused products manufacturing facilities, seed-to-sale tracking systems, and for transportation of marijuana no later than two hundred forty days after December 6, 2018. Applications for licenses and certifications under this section shall be approved or denied by the department no later than one hundred fifty days after their submission. If the department fails to carry out its nondiscretionary duty to approve or deny an application within one hundred fifty days of submission, an applicant may immediately seek a court order compelling the department to approve or deny the application.

(19) Qualifying patients under this section shall obtain [and annually renew] an identification card or cards from the department. The department shall charge a fee of twenty-five dollars per year per card with such fee to be increased or decreased each year by the percentage of increase or decrease from the end of the previous calendar year of the Consumer Price Index, or successor index as published by the U.S. Department of Labor or its successor agency. Cards shall be valid for three years and may be renewed with a new physician's certification. Upon receiving an application for a qualifying patient identification card or qualifying patient cultivation identification card, the department shall, within thirty days, either issue the card or provide a written explanation for its denial. If the department fails to deny and fails to issue a card to an eligible qualifying patient within thirty days, then their physician certification shall serve as their qualifying patient identification card or qualifying patient cultivation identification card for up to one year from the date of physician certification. All initial applications for or renewals of a qualifying patient identification card or qualifying patient cultivation identification card shall be accompanied by a physician certification that is less than thirty days old.

(20) Primary caregivers under this section shall obtain [and annually renew] an identification card from the department. Cards shall be valid for three years. The department shall charge a fee of [twenty-five] seventy-five dollars [per year], with such fee to be increased or decreased each year by the percentage of increase or decrease from the end of the previous calendar year of the Consumer Price Index, or successor index as published by the U.S. Department of Labor, or its successor agency. Upon receiving an application for a primary caregiver identification card, the department shall, within thirty days, either issue the card or provide a written explanation for its denial.

(21) All marijuana for medical use sold in Missouri shall be cultivated in a licensed medical marijuana cultivation facility located in Missouri.

(22) All marijuana-infused products for medical use sold in the state of Missouri shall be manufactured in a medical marijuana-infused products manufacturing facility.

(23) The denial of a license, license renewal, or identification card by the department shall be appealable to the administrative hearing commission, or its successor entity. Following the exhaustion of administrative review, denial of a license, license renewal, or identification card by the department shall be subject to judicial review as provided by law.

(24) No elected official shall interfere directly or indirectly with the department's obligations and activities under this section.

(25) The department shall not have the authority to apply or enforce any rule or regulation that would impose an undue burden on any one or more licensees or certificate holders, any qualifying patients, or act to undermine the purposes of this section.

4. Taxation and Reporting.

(1) A tax is levied upon the retail sale of marijuana for medical use sold at medical marijuana dispensary facilities within the state. The tax shall be at a rate of four percent of the retail price. The tax shall be collected by each licensed medical marijuana dispensary facility and paid to the department of revenue. After retaining no more than five percent for its actual collection costs, amounts generated by the tax levied in this section shall be deposited by the department of revenue into the Missouri veterans' health and care fund. Licensed entities making retail sales within the state shall be allowed approved credit for returns provided the tax was paid on the returned item and the purchaser was given the refund or credit.

(2) There is hereby created in the state treasury the "Missouri Veterans' Health and Care Fund", which shall consist of taxes and fees collected under this section. The state treasurer shall be custodian of the fund, and he or she shall invest monies in the fund in the same manner as other funds are invested. Any interest and monies earned on such investments shall be credited to the fund. Notwithstanding any other provision of law, any monies remaining in the fund at the end of a biennium shall not revert to the credit of the general revenue fund. The commissioner of administration is authorized to make cash operating transfers to the fund for purposes of meeting the cash requirements of the department in advance of it receiving annual application, licensing, and tax revenue, with any such transfers to be repaid as provided by law. The fund shall be a dedicated fund and shall stand appropriated without further legislative action as follows:

(a) First, to the department, an amount necessary for the department to carry out this section, including repayment of any cash operating transfers, payments made through contract or agreement with other state and public agencies necessary to carry out this section, and a reserve fund to maintain a reasonable working cash balance for the purpose of carrying out this section;

(b) Next, the remainder of such funds shall be transferred to the Missouri veterans commission for health and care services for military veterans, including the following purposes: operations, maintenance and capital improvements of the Missouri veterans homes, the Missouri service officer's program, and other services for veterans approved by the commission, including, but not limited to, health care services, mental health services, drug rehabilitation services, housing assistance, job training, tuition assistance, and housing assistance to prevent homelessness. The Missouri veterans commission shall contract with other public agencies for the delivery of services beyond its expertise.

(c) All monies from the taxes authorized under this subsection shall provide additional dedicated funding for the purposes enumerated above and shall not replace existing dedicated funding.

(3) For all retail sales of marijuana for medical use, a record shall be kept by the seller which identifies, by secure and encrypted patient number issued by the seller to the qualifying patient involved in the sale, all amounts and types of marijuana involved in the sale and the total amount of money involved in the sale, including itemizations, taxes collected and grand total sale amounts. All such records shall be kept on the premises in a readily available format and be made available for review by the department and the department of revenue upon request. Such records shall be retained for five years from the date of the sale.

(4) The tax levied pursuant to this subsection is separate from, and in addition to, any general state and local sales and use taxes that apply to retail sales, which shall continue to be collected and distributed as provided by general law.

(5) Except as authorized in this subsection, no additional taxes shall be imposed on the sale of marijuana for medical use.

(6) The fees and taxes provided for in this Article XIV, Section 1 shall be fully enforceable notwithstanding any other provision in this Constitution purportedly prohibiting or restricting the taxes and fees provided for herein.

(7) The unexpended balance existing in the fund shall be exempt from the provisions of section 33.080 relating to the transfer of unexpended balances to the general revenue fund.

5. Additional Patient, Physician, Caregiver and Provider Protections.

(1) Except as provided in this section, the possession of marijuana in quantities less than the limits of this section, or established by the department, and transportation of marijuana from a medical marijuana dispensary facility to the qualifying patient's residence shall not subject the possessor to arrest, criminal or civil liability, or sanctions under Missouri law, provided that the possessor produces on demand to the appropriate authority a valid qualifying patient identification card; a valid qualifying patient cultivation identification card; a valid physician certification while making application for an identification card; or a valid primary caregiver identification card. Production of the respective equivalent identification card or authorization issued by another state or political subdivision of another state shall also meet the requirements of this subdivision and shall allow for the purchase of marijuana for use by a non-resident patient from a medical marijuana dispensary facility as permitted by this section and in compliance with department regulations.

(2) No patient shall be denied access to or priority for an organ transplant because they hold a qualifying patient identification card or use marijuana for medical use.

(3) A physician shall not be subject to criminal or civil liability or sanctions under Missouri law or discipline by the Missouri state board of registration for the healing arts, or its successor agency, for owning, operating, investing in, being employed by, or contracting with any entity licensed or certified pursuant to this section or issuing a physician certification to a patient diagnosed with a qualifying medical condition in a manner consistent with this section and legal standards of professional conduct.

(4) A health care provider shall not be subject to civil or criminal prosecution under Missouri law, denial of any right or privilege, civil or administrative penalty or sanction, or disciplinary action by any accreditation or licensing board or commission for owning, operating, investing in, being employed by, or contracting with any entity licensed or certified pursuant to this section or providing health care services that involve the medical use of marijuana consistent with this section and legal standards of professional conduct.

(5) A medical marijuana testing facility shall not be subject to civil or criminal prosecution under Missouri law, denial of any right or privilege, civil or administrative penalty or sanction, or disciplinary action by any accreditation or licensing board or commission for providing laboratory testing services that relate to the medical use of marijuana consistent with this section and otherwise meeting legal standards of professional conduct.

(6) A health care provider shall not be subject to mandatory reporting requirements for the medical use of marijuana by nonemancipated qualifying patients under eighteen years of age in a manner consistent with this section and with consent of a parent or guardian.

(7) A primary caregiver shall not be subject to criminal or civil liability or sanctions under Missouri law for purchasing, transporting, or administering marijuana for medical use to a qualifying patient or participating in the patient cultivation of up to six flowering marijuana plants per patient in a manner consistent with this section and generally established legal standards of personal or professional conduct.

(8) An attorney shall not be subject to disciplinary action by the state bar association or other professional licensing body for owning, operating, investing in, being employed by, contracting with, or providing legal assistance to prospective or licensed medical marijuana testing facilities, medical marijuana cultivation facilities, medical marijuana dispensary facilities, medical marijuana-infused products manufacturing facilities, qualifying patients, primary caregivers, physicians, health care providers or others related to activity that is no longer subject to criminal penalties under state law pursuant to this section.

(9) Actions and conduct by qualifying patients, primary caregivers, medical marijuana testing facilities, medical marijuana cultivation facilities, medical marijuana-infused products manufacturing facilities, or medical marijuana dispensary facilities licensed or registered with the department, or their employees or agents, as permitted by this section and in compliance with department regulations and other standards of legal conduct, shall not be subject to criminal or civil liability or sanctions under Missouri law, except as provided for by this section.

(10) Nothing in this section shall provide immunity for negligence, either common law or statutorily created, nor criminal immunities for operating a vehicle, aircraft, dangerous device, or navigating a boat under the influence of marijuana.

(11) It is the public policy of the state of Missouri that contracts related to marijuana for medical use that are entered into by qualifying patients, primary caregivers, medical marijuana testing facilities, medical marijuana cultivation facilities, medical marijuana-infused products manufacturing facilities, or medical marijuana dispensary facilities and those who allow property to be used by those entities, should be enforceable. It is the public policy of the state of Missouri that no contract entered into by qualifying patients, primary caregivers, medical marijuana testing facilities, medical marijuana cultivation facilities, medical marijuana-infused products manufacturing facilities, or medical marijuana dispensary facilities, or by a person who allows property to be used for activities that are exempt from state criminal penalties by this section, shall be unenforceable on the basis that activities related to medical marijuana may be prohibited by federal law.

6. Legislation.

Nothing in this section shall limit the general assembly from enacting laws consistent with this section, or otherwise effectuating the patient rights of this section. The legislature shall not enact laws that hinder the right of qualifying patients to access marijuana for medical use as granted by this section.

7. Additional Provisions.

(1) Nothing in this section permits a person to:

(a) Consume marijuana for medical use in a jail or correctional facility;

(b) Undertake any task under the influence of marijuana when doing so would constitute negligence or professional malpractice; or

(c) Operate, navigate, or be in actual physical control of any dangerous device or motor vehicle, aircraft or motorboat while under the influence of marijuana; or

(d) Bring a claim against any employer, former employer, or prospective employer for wrongful discharge, discrimination, or any similar cause of action or remedy, based on the employer, former employer, or prospective employer prohibiting the employee, former employee, or prospective employee from being under the influence of marijuana while at work or disciplining the employee or former employee, up to and including termination from employment, for working or attempting to work while under the influence of marijuana.

(2) No medical marijuana cultivation facility, medical marijuana testing facility, medical marijuana dispensary facility, or medical marijuana-infused products manufacturing facility, or entity with a transportation certification shall be owned, in whole or in part, or have as an officer, director, board member, manager, or employee, any individual with a disqualifying felony offense. A **"disqualifying felony offense"** is a violation of, and conviction or guilty plea to, state or federal law that is, or would have been, a felony under Missouri law, regardless of the sentence imposed, unless the department determines that:

(a) The person's conviction was for the medical use of marijuana or assisting in the medical use of marijuana; or

(b) The person's conviction was for a nonviolent crime for which he or she was not incarcerated and that is more than five years old; or

(c) More than five years have passed since the person was released from parole or probation, and he or she has not been convicted of any subsequent criminal offenses.

The department may consult with and rely on the records, advice and recommendations of the attorney general and the department of public safety, or their successor entities, in applying this subdivision.

(3) All medical marijuana cultivation facility, medical marijuana dispensary facility, and medical marijuana-infused products manufacturing facility licenses, entities with medical marijuana testing facility certifications, and entities with transportation certifications shall be held by entities that are majority owned, directly or indirectly, by natural persons who have been citizens of the state of Missouri for at least one year prior to the application for such license or certification. Notwithstanding the foregoing, persons or entities outside the state of Missouri may own a minority stake, directly or indirectly, in such entities.

(4) No medical marijuana cultivation facility, medical marijuana dispensary facility, or medical marijuana-infused products manufacturing facility shall manufacture, package or label marijuana or marijuana-infused products in a false or misleading manner. No person shall sell any product in a manner designed to cause confusion between a marijuana or marijuana-infused product and any product not containing marijuana. A violation of this subdivision shall be punishable by an appropriate and proportional department sanction, up to and including loss of license.

(5) All edible marijuana-infused products shall be sold in individual, child-resistant containers that are labeled with dosage amounts, instructions for use, and estimated length of effectiveness. All marijuana and marijuana-infused products shall be sold in containers clearly and conspicuously labeled as mandated by the department [, in a font size at least as large as the largest other font size used on the package,] as containing "Marijuana", or a "Marijuana-Infused Product". Violation of this prohibition shall subject the violator to department sanctions, including an administrative penalty.

(6) No individual shall serve as the primary caregiver for more than three qualifying patients.

(7) No qualifying patient shall consume marijuana for medical use in a public place, unless provided by law. Violation of this prohibition shall subject the violator to sanctions as provided by general law.

(8) No person shall extract resins from marijuana using dangerous materials or combustible gases without a medical marijuana-infused products manufacturing facility license. Violation of this prohibition shall subject the violator to department sanctions, including an administrative penalty and, if applicable, loss of their identification card, certificate, or license for up to one year.

(9) All qualifying patient cultivation shall take place in an enclosed, locked facility that is equipped with security devices that permit access only by the qualifying patient or by such patient's primary caregiver. Two qualifying patients, who both hold valid qualifying patient cultivation identification cards, may share one enclosed, locked facility. No more than twelve qualifying patient or primary caregiver cultivated flowering marijuana plants may be cultivated in a single, enclosed locked facility, except when a primary caregiver also holds a qualifying patient cultivation identification card, in which case no more than eighteen flowering marijuana plants may be cultivated in a single, enclosed, locked facility.

(10) No medical marijuana cultivation facility, medical marijuana dispensary facility, medical marijuana-infused products manufacturing facility, medical marijuana testing facility, or entity with a transportation certification shall assign, sell, give, lease, sublicense, or otherwise transfer its license or certificate to any other entity without the express consent of the department, not to be unreasonably withheld.

(11) Unless allowed by the local government, no new medical marijuana cultivation facility, medical marijuana testing facility, medical marijuana dispensary facility, or medical marijuana-infused products manufacturing facility shall be initially sited within one thousand feet of any then-existing elementary or secondary school, child day-care center, or church. No local

government shall prohibit medical marijuana cultivation facilities, medical marijuana testing facilities, medical marijuana-infused products manufacturing facilities, or medical marijuana dispensary facilities, or entities with a transportation certification either expressly or through the enactment of ordinances or regulations that make their operation unduly burdensome in the jurisdiction. However, local governments may enact ordinances or regulations not in conflict with this section, or with regulations enacted pursuant to this section, governing the time, place, and manner of operation of such facilities in the locality. A local government may establish civil penalties for violation of an ordinance or regulations governing the time, place, and manner of operation of a medical marijuana cultivation facility, medical marijuana testing facility, medical marijuana-infused products manufacturing facility, medical marijuana dispensary facility, or entity holding a transportation certification that may operate in such locality.

(12) Unless superseded by federal law or an amendment to this Constitution, a physician shall not certify a qualifying condition for a patient by any means other than providing a physician certification for the patient, whether handwritten, electronic, or in another commonly used format. [A qualifying patient must obtain a new physician certification at least annually.]

(13) A physician shall not issue a certification for the medical use of marijuana for a nonemancipated qualifying patient under the age of eighteen without the written consent of the qualifying patient's parent or legal guardian. The department shall not issue a qualifying patient identification card on behalf of a nonemancipated qualifying patient under the age of eighteen without the written consent of the qualifying patient's parent or legal guardian. Such card shall be issued to one of the parents or guardians and not directly to the patient. Only a parent or guardian may serve as a primary caregiver for a nonemancipated qualifying patient under the age of eighteen. Only the qualifying patient's parent or guardian shall purchase or possess medical marijuana for a nonemancipated qualifying patient under the age of eighteen. A parent or guardian shall supervise the administration of medical marijuana to a nonemancipated qualifying patient under the age of eighteen.

(14) Nothing in this section shall be construed as mandating health insurance coverage of medical marijuana for qualifying patient use.

(15) Real and personal property used in the cultivation, manufacture, transport, testing, distribution, sale, and administration of marijuana for medical use or for activities otherwise in compliance with this section shall not be subject to asset forfeiture solely because of that use.

8. Severability.

The provisions of this section are severable, and if any clause, sentence, paragraph or section of this measure, or an application thereof, is adjudged invalid by any court of competent jurisdiction, the other provisions shall continue to be in effect to the fullest extent possible.

9. Effective Date.

The provisions of this section shall become effective on December 6, 2018.

Section 2. Marijuana Legalization, Regulation, and Taxation

1. Purpose.

The purpose of this section is to make marijuana legal under state and local law for adults twenty-one years of age or older, and to control the commercial production and distribution of marijuana under a system that licenses, regulates, and taxes the businesses involved while protecting public health. The intent is to prevent arrest and penalty for personal possession and cultivation of limited amounts of marijuana by adults twenty-one years of age or older; remove the commercial production and distribution of marijuana from the illicit market; prevent revenue generated from commerce in marijuana from going to criminal enterprises; prevent the distribution of marijuana to persons under twenty-one years of age; prevent the diversion of marijuana to illicit markets; protect health by ensuring the safety of marijuana and products containing marijuana; and ensure the security of marijuana facilities. To the fullest extent possible, this section shall be interpreted in accordance with the purpose and intent set forth in this section.

This section is not intended to allow for the public use of marijuana, driving while intoxicated by marijuana, the use of marijuana in the workplace, or the use of marijuana by persons under twenty-one years of age.

2. Definitions.

(1) "Consumer" means a person who is at least twenty-one years of age.

(2) "Department" means the department of health and senior services, or its successor agency.

(3) "Entity" means a natural person, corporation, professional corporation, nonprofit corporation, cooperative corporation, unincorporated association, business trust, limited liability company, general or limited partnership, limited liability partnership, joint venture, or any other legal entity.

(4) "Flowering plant" means a marijuana plant from the time it exhibits the first signs of sexual maturity through harvest.

(5) "Local government" means, in the case of an incorporated area, a village, town, or city and, in the case of an unincorporated area, a county.

(6) "Marijuana" means *cannabis indica*, *cannabis sativa*, and *cannabis ruderalis*, hybrids of such species, and any other strains commonly understood within the scientific community to constitute marijuana or cannabis, as well as resin extracted from the plant and marijuana-infused products. "Marijuana" does not include industrial hemp including any part of that plant, including the seeds thereof and all derivatives, extracts, cannabinoids, isomers, acids, salts, and salts of isomers, whether growing or not with a delta-9 tetrahydrocannabinol concentration of not more than three-tenths of one percent on a dry weight basis, or commodities or products manufactured with industrial hemp, or any other ingredient combined with marijuana or marijuana to prepare topical or oral administrations, food, drink, or other products.

(7) "Marijuana accessories" means any equipment, product, material, or combination of equipment, products, or materials, which is specifically designed for use in planting, propagating, cultivating, growing, harvesting, manufacturing, compounding, converting, producing, processing, preparing, testing, analyzing, packaging, repackaging, storing, containing, ingesting, inhaling, or otherwise introducing marijuana into the human body.

(8) "Marijuana Cultivation Facility" means an entity licensed by the department to acquire, cultivate, process, store, transport, and sell marijuana to a marijuana dispensary facility, marijuana testing facility, or to a marijuana-infused products manufacturing facility.

(9) "Marijuana Dispensary Facility" means an entity licensed by the department to acquire, store, sell, transport, and deliver marijuana, marijuana-infused products, and marijuana accessories as provided for in this section to consumers.

(10) "Marijuana Facility" means a marijuana cultivation facility, marijuana dispensary facility, marijuana testing facility, a marijuana-infused products manufacturing facility, or a marijuana microbusiness facility, or any other type of marijuana-related facility or business licensed or certified by the department pursuant to this section.

(11) "Marijuana-Infused Products" means products that are infused with marijuana or an extract thereof and are intended for use or consumption other than by smoking, including, but not limited to, edible products, ointments, tinctures and concentrates.

(12) "Marijuana-Infused Products Manufacturing Facility" means an entity licensed by the department to acquire, store, manufacture, transport, and sell marijuana-infused products to a marijuana dispensary facility, a marijuana testing facility, or to another marijuana-infused products manufacturing facility.

(13) "Marijuana Microbusiness Facility" means an entity licensed to cultivate not more than one hundred and fifty flowering plants, process and package the marijuana it cultivates or that it obtains from another marijuana microbusiness facility, and acquire, store, transport, deliver, sell, or otherwise transfer marijuana and marijuana-infused products it cultivates and processes, or that it obtains from other marijuana microbusiness facilities, to marijuana dispensary facilities, marijuana testing facilities, other marijuana microbusiness facilities, or consumers.

(14) "Marijuana Testing Facility" means an entity certified by the department to acquire, test, certify, and transport marijuana.

(15) "Owner" means an officer, board member, or other individual who has a financial (other than a security interest, lien, or encumbrance) or voting interest in ten percent or greater of a marijuana facility.

(16) "Unduly burdensome" means that the measures necessary to comply with the rules or ordinances adopted pursuant to this section subject licensees or potential licensees to such a high investment of money, time, or any other resource or asset that a reasonably prudent businessperson would not operate the marijuana facility.

3. Limitations.

(1) Except as otherwise provided in this article, this section does not preclude, limit, or affect laws that assign liability relative to, prohibit, or otherwise regulate:

(a) Delivery or distribution of marijuana or marijuana accessories, with or without consideration, to a person younger than twenty-one years of age;

(b) Purchase, possession, use, or transport of marijuana or marijuana accessories by a person younger than twenty-one years of age;

(c) Consumption of marijuana by a person younger than twenty-one years of age;

(d) Operating or being in physical control of any motor vehicle, train, aircraft, motorboat, or other motorized form of transport while intoxicated by marijuana;

(e) Consumption of marijuana while operating or being in physical control of a motor vehicle, train, aircraft, motorboat, or other motorized form of transport, while it is being operated;

(f) Smoking marijuana within a motor vehicle, train, aircraft, motorboat, or other motorized form of transport while it is being operated;

(g) Possession or consumption of marijuana or possession of marijuana accessories on the grounds of a public or private preschool, elementary or secondary school, institution of higher education, in a school bus, or on the grounds of any correctional facility;

(h) Smoking marijuana in a location where smoking tobacco is prohibited;

(i) Consumption of marijuana in a public place, other than in an area licensed by the department for consumption;

(j) Conduct that endangers others;

(k) Undertaking any task while under the influence of marijuana, if doing so would constitute negligence or professional malpractice; or

(l) Performing solvent-based extractions on marijuana using solvents other than water, glycerin, propylene glycol, vegetable oil, or food grade ethanol, unless licensed for this activity by the department.

(2) This section does not limit any privileges, rights, immunities, or defenses of a person or entity as provided in section 1 of this article, or any other law of this state allowing for or regulating marijuana for medical use.

(3) This section does not require an employer to permit or accommodate conduct otherwise allowed by this section in any workplace or on the employer's property. This section does not prohibit an employer from disciplining an employee for violation of a workplace drug policy or for working while intoxicated by marijuana. This section does not prevent an employer from refusing to hire, discharging, disciplining, or otherwise taking an adverse employment action against a person with respect to hire, tenure, terms, conditions, or privileges of employment because of that person's violation of a workplace drug policy or because that person was working while intoxicated by marijuana.

(4) This section allows a person to prohibit or otherwise regulate the consumption, cultivation, distribution, processing, sale, or display of marijuana, marijuana-infused products, and marijuana accessories on private property the person owns, leases, occupies, or manages, except that a lease agreement executed after the enactment of this section may not prohibit a tenant from lawfully possessing and consuming marijuana by means other than smoking.

4. Regulation of Marijuana.

(1) In carrying out the implementation of this section, the department shall have the authority to:

(a) Grant or refuse state licenses for the cultivation, manufacture, dispensing, and sale of marijuana as provided by law; suspend, fine, restrict, or revoke such licenses upon a violation of this section or a rule promulgated pursuant to this section; and impose any reasonable administrative penalty authorized by this section or any rule promulgated pursuant to this section;

(b) Promulgate rules and emergency rules necessary for the proper regulation and control of the cultivation, manufacture, dispensing, and sale of marijuana and for the enforcement of this section so long as such rules are reasonable and not unduly burdensome;

(c) Develop such forms, certificates, licenses, identification cards, and applications as are necessary for, or reasonably related to, the administration of this section or any of the rules promulgated under this section;

(d) Require a seed-to-sale tracking system that tracks marijuana from either the seed or immature plant stage until the marijuana or marijuana-infused product is sold to a consumer to ensure that no marijuana grown by a marijuana cultivation facility or marijuana microbusiness facility or manufactured by a marijuana-infused products manufacturing facility or marijuana microbusiness facility is sold or otherwise transferred to a consumer except by a marijuana dispensary facility or a marijuana microbusiness facility. The department shall certify, if possible, at least two commercially available systems to licensees as compliant with its tracking standards and issue standards for the creation or use of other systems by licensees;

(e) Issue standards for the secure transportation of marijuana and marijuana-infused products. The department shall certify entities that demonstrate compliance with its transportation standards to transport marijuana and marijuana-infused products to a marijuana cultivation facility, marijuana-infused products manufacturing facility, marijuana dispensary facility, marijuana microbusiness facility, marijuana testing facility, or another entity with a transportation certification. The department shall develop or adopt from any other governmental agency such safety and security standards as are reasonably necessary for the transportation of marijuana. Any entity licensed or certified pursuant to this section shall be allowed to transport its own inventory and products in compliance with department transportation rules;

(f) Promulgate rules and emergency rules specific to the licensing, regulation, and oversight of marijuana microbusiness facilities;

(g) Provide for the issuance of additional types or classes of licenses to operate marijuana-related businesses, including licenses that allow for only limited cultivation, processing, transportation, delivery, storage, sale, or purchase of marijuana, licenses that allow for the consumption of marijuana within designated, age-restricted areas, licenses that allow for cultivation for purposes of propagation, and licenses intended to facilitate scientific research or education;

(h) Prepare and transmit annually a publicly available report accounting to the governor, the general assembly, and the public for the efficient discharge of all responsibilities assigned to the department under this section;

(i) Establish a system to numerically score competing marijuana license and certificate applicants, only in cases where more applicants apply than the number of licenses available, in which scoring shall be limited to an analysis of the following:

(i) The character, veracity, background, qualifications, and relevant experience of principal officers or managers;

(ii) The business plan proposed by the applicant, which in the case of cultivation facilities and dispensaries shall include the ability to maintain an adequate supply of marijuana, and for all facilities shall include procedures to be used to prevent product diversion;

(iii) Site security;

(iv) In the case of licenses other than the microbusiness license, testing license, or certification types, previous experience as an owner or employee of a marijuana microbusiness facility;

(v) In the case of marijuana testing facilities, the experience of their personnel with testing marijuana, food or drugs for toxins and potency and health care industry experience;

(vi) The potential for positive economic impact in the site community;

(vii) In the case of marijuana cultivation facilities and marijuana microbusiness facilities, capacity or experience with agriculture and horticulture;

(viii) In the case of marijuana dispensary facilities, the suitability of the proposed location for consumer access;

(ix) In the case of marijuana-infused products manufacturing facilities, capacity or experience with food and beverage manufacturing; and

(x) Maintaining competitiveness in the marijuana marketplace.

(j) In ranking applicants and awarding licenses and certificates, the department may consult or contract with other public agencies with relevant expertise regarding these factors.

(2) The department shall issue, at a minimum, the same number of marijuana cultivation facility licenses as are issued for medical marijuana cultivation facilities under section 1 of this article, the same number of marijuana-infused products manufacturing facility licenses as are issues for medical marijuana-infused products manufacturing facilities under section 1, the same number of marijuana dispensary facility licenses as are issued to medical marijuana dispensary facilities under section 1, in addition to the minimum number of marijuana microbusiness licenses as are required under this section. The department shall lift or ease any limit on the number of licensees or certificate holders in order to meet the demand for marijuana by consumers in the state and to ensure a competitive market while also preventing an over-concentration of marijuana facilities within the boundaries of any particular local government.

(3) If marijuana cultivation facility licenses, marijuana-infused products manufacturing facility licenses, or marijuana dispensary facility licenses become available so that the number of total licenses in any respective category falls below the minimum required under this article, section and subsection, the department shall first award the number of new licenses available to satisfy the minimum requirement to applicants who are qualified marijuana microbusiness license holders and who are at least fifty percent owned by natural persons who qualified as economically disadvantaged owners or disabled veterans at the time they applied for and received the marijuana microbusiness facility license, if such an applicant applies and qualifies for the license.

(4) The department may issue any rules or emergency rules necessary for the implementation and enforcement of this section and to ensure the right to, availability, and safe use of marijuana by consumers. In developing such rules or emergency rules, the department may consult or contract with other public agencies. In addition to any other rules or emergency rules necessary to carry out the mandates of this section, the department shall issue rules or emergency rules relating to the following subjects:

(a) Procedures for issuing a license and for renewing, suspending, and revoking a license;

(b) Qualifications for licensure that are directly and demonstrably related to the operation of a marijuana facility;

(c) Requirements and standards for safe cultivation, processing, and distribution of marijuana and marijuana-infused products by marijuana facilities, including health standards to ensure the safe preparation of marijuana-infused products and prohibitions on pesticides that are not safe for use on marijuana;

(d) Testing, packaging, and labeling standards, procedures, and requirements for marijuana and marijuana-infused products and a requirement that a representative sample of marijuana be tested by a marijuana testing facility to ensure public health;

(e) Labeling standards that protect public health by requiring the listing of pharmacologically active ingredients, including, but not limited to, tetrahydrocannabinol (THC), cannabidiol (CBD), and other cannabinoid content, the THC and other cannabinoid amount in milligrams per serving, and the number of servings per package;

(f) Requirements that packaging and labels shall not be made to be attractive to children and that marijuana and marijuana-infused products be sold in resealable, child-resistant packaging, to protect public health;

(g) Security requirements, including lighting, physical security, and alarm requirements, and requirements for securely transporting marijuana between marijuana facilities;

(h) Record keeping requirements for marijuana facilities and monitoring requirements to track the transfer of marijuana by licensees;

(i) Restrictions on advertising, marketing, and display of marijuana, marijuana-infused products, marijuana accessories, and marijuana facilities;

(j) A plan to promote and encourage ownership and employment in the marijuana industry by people from political subdivisions and districts that are economically distressed and to positively impact those political subdivisions and districts;

(k) Civil penalties for failure to comply with any rule promulgated pursuant to this section or for any violation of rules and regulations adopted pursuant to this section by a licensee, including civil fines and suspension, revocation, or restriction of a license. The licensee may choose to challenge any penalties imposed by the department through the Administrative Hearing Commission, or its successor entity. Pursuant to § 536.100 R.S.Mo., or successor provisions, any licensee who has exhausted all administrative remedies provided by law and who is aggrieved by a final decision in a contested case is entitled to judicial review;

(l) Reporting and transmittal of tax payments required under this section;

(m) Authorization for the department of revenue to have access to licensing information to ensure tax payment and the effective administration of this section; and

(n) Such other matters as are necessary for the fair, impartial, stringent, and comprehensive administration of this section.

(5) The department shall issue rules or emergency rules for marijuana and marijuana-infused products independent testing and certification program for marijuana facility licensees and requiring licensees to test marijuana using one or more impartial, independent laboratory or laboratories to ensure, at a minimum, correct labeling, potency measurement, and that products sold for human consumption do not contain contaminants that are potentially injurious to public health.

(6) The department shall issue rules or emergency rules to provide for the certification of and standards for marijuana testing facilities, including the requirements for equipment and qualifications for personnel, but shall not require certificate holders to have any federal agency licensing or have any relationship with a federally licensed testing facility. The department shall certify, if possible, at least two entities as marijuana testing facilities. No marijuana testing facility shall be owned by an entity under substantially common control, ownership, or management as a marijuana cultivation facility, marijuana-infused products manufacturing facility, marijuana microbusiness facility, or marijuana dispensary facility.

(7) All public records produced or retained pursuant to this section are subject to the general provisions of the Missouri Sunshine Law, as amended from time to time. Notwithstanding the foregoing, public records containing proprietary business information obtained from an applicant or licensee are subject to closure. The applicant or licensee shall label business information it believes to be proprietary prior to submitting it to the department. Proprietary business information shall include sales information, financial records, tax returns, credit reports, cultivation information unrelated to product safety, testing results unrelated to product safety, site security information and plans, and individualized consumer information. The presence of proprietary business information shall not justify the closure of public records:

(a) Identifying the applicant or licensee;

(b) Relating to any citation, notice of violation, tax delinquency, or other enforcement action;

(c) Relating to any public official's support or opposition relative to any applicant, licensee, or their proposed or actual operations;

(d) Where disclosure is reasonably necessary for the protection of public health or safety; or

(e) That are otherwise subject to public inspection under applicable law.

(8) Within two hundred and seventy days of the effective date of this section, the department shall make available to the public license application forms and application instructions for marijuana cultivation facilities, marijuana testing facilities, marijuana dispensary facilities, marijuana microbusiness facilities, marijuana-infused products manufacturing facilities, and any other license types and certifications it deems necessary.

(9) An entity may apply to the department for and obtain one or more licenses to grow marijuana as a marijuana cultivation facility. Each facility in operation shall require a separate license, but multiple licenses may be utilized in a single facility. Each indoor facility utilizing artificial lighting may be limited by the department to thirty thousand square feet of flowering plant canopy space. Each outdoor facility utilizing natural lighting may be limited by the department to two thousand eight hundred flowering plants. Each greenhouse facility using a combination of natural and artificial lighting may be limited by the department, at the election of the licensee, to two thousand eight hundred flowering plants or thirty thousand square feet of flowering plant canopy. The license shall be valid for three years from its date of issuance and shall be renewable, except for good cause. The department shall charge each applicant a non-refundable fee of ten thousand dollars per license application or renewal for all applicants filing an application within three years of the effective date of this section and shall charge each applicant a non-refundable fee of five thousand dollars per license application or renewal thereafter. Once granted, the department shall charge each licensee an annual fee of twenty-five thousand dollars per facility license. Application and license fees shall be increased or decreased each year by the percentage of increase or decrease from the end of the previous calendar year of the Consumer Price Index, or successor index as published by the U.S. Department of Labor, or its successor agency. An entity may not be an owner of more than three marijuana cultivation facility licenses.

(10) An entity may apply to the department for and obtain one or more licenses to operate a marijuana dispensary facility. Each facility in operation shall require a separate license. A license shall be valid for three years from its date of issuance and shall be renewable, except for good cause. The department shall charge each applicant a non-refundable fee of six thousand dollars per license application or renewal for each applicant filing an application within three years of the effective date of this section and shall charge each applicant a non-refundable fee of three thousand dollars per license application or renewal thereafter. Once granted, the department shall charge each licensee an annual fee of ten thousand dollars per facility license. Application and license fees shall be increased or decreased each year by the percentage of increase or decrease from the end of the previous calendar year of the Consumer Price Index, or successor index as published by the U.S. Department of Labor, or its successor agency. An entity may not be an owner of more than five marijuana dispensary facility licenses.

(11) An entity may apply to the department for and obtain one or more licenses to operate a marijuana-infused products manufacturing facility. Each facility in operation shall require a

separate license. A license shall be valid for three years from its date of issuance and shall be renewable, except for good cause. The department shall charge each applicant a non-refundable fee of six thousand dollars per license application or renewal for each applicant filing an application within three years of the effective date of this section and shall charge each applicant a non-refundable fee of three thousand dollars per license application or renewal thereafter. Once granted, the department shall charge each licensee an annual fee of ten thousand dollars per facility license. Application and license fees shall be increased or decreased each year by the percentage of increase or decrease from the end of the previous calendar year of the Consumer Price Index, or successor index as published by the U.S. Department of Labor, or its successor agency. An entity may not be an owner of more than three marijuana-infused products manufacturing facility licenses.

(12) An entity may apply to the department for and obtain only one license to operate a marijuana microbusiness facility. A marijuana microbusiness facility license shall allow the licensee to be vertically integrated. A marijuana microbusiness facility licensee may engage in all of the activities allowed under the license or it may apply for and engage in a subset of the activities allowed, if the applicant or license holder so chooses. A marijuana microbusiness facility licensee may sell marijuana it cultivates, processes, and packages to any marijuana dispensary facility, any other marijuana microbusiness facility, or directly to consumers. A marijuana microbusiness facility may also process and sell to consumers marijuana and marijuana-infused products it obtains from another marijuana microbusiness facility. A license shall be valid for three years from its date of issuance and shall be renewable, except for good cause. The department shall charge each applicant a non-refundable fee of one thousand five hundred dollars per license application or renewal for each applicant filing an application within three years of the effective date of this section and shall charge each applicant a non-refundable fee of two thousand five hundred dollars per license application or renewal thereafter. Once granted, the department shall charge each licensee an annual fee of two thousand five hundred dollars per facility license. Application and license fees shall be increased or decreased each year by the percentage of increase or decrease from the end of the previous calendar year of the Consumer Price Index, or successor index as published by the U.S. Department of Labor, or its successor agency. An entity may not be an owner of more than one marijuana microbusiness facility license. An owner of a marijuana microbusiness facility may not also be an owner of another licensed marijuana facility or medical marijuana facility regulated under this article. However, the owner of a marijuana microbusiness facility may apply for a license or licenses for other marijuana or medical marijuana facilities under this article. If granted one or more of these licenses, the marijuana microbusiness facility owner may transition to other licensed operations on a reasonably practical timetable established by the department. In addition to other requirements established by this section, a marijuana microbusiness facility must be majority-owned by natural persons who have been citizens of the state of Missouri for at least one year prior to the application for such license. The majority owner or owners must be economically disadvantaged persons, as defined by the department, or disabled veterans, as defined by the department.

(13) The department may restrict the aggregate number of licenses granted for marijuana microbusiness facilities, provided, however, that the number may not be limited to fewer than the following number of licenses in each United States congressional district in the state of Missouri pursuant to the map of each of the eight congressional districts as drawn and effective on December 6, 2018:

(a) Six once the department begins issuing licenses for marijuana facilities under this subsection;

(b) An additional six following the first two hundred and seventy days after the department begins issuing licenses for marijuana facilities under this subsection; and

(c) An additional six after the first five hundred and forty-eight days after the department begins issuing licenses for marijuana facilities under this subsection, but only after the department conducts an analysis and determines that there is a market for additional microbusiness licenses.

Future changes to the boundaries or the number of congressional districts shall have no impact.

(14) The department shall begin accepting license and certification applications for marijuana dispensary facilities, marijuana testing facilities, marijuana cultivation facilities, marijuana-infused products manufacturing facilities, marijuana microbusiness facilities, seed-to-sale tracking systems, and for transportation of marijuana no later than three hundred and sixty-five days after the effective date of this section. Applications for licenses under this section shall be approved or denied by the department no later than one hundred fifty days after their submission. If the department fails to carry out its non-discretionary duty to approve or deny an application within one hundred fifty days of submission, an applicant may immediately seek a court order compelling the department to approve or deny the application.

(15) With the exception of microbusiness licenses, and consistent with any limitations set forth in this section, for the first five hundred and forty-eight days after the department begins issuing license for marijuana facilities, the department may only issue a license:

(a) For a marijuana cultivation facility to an entity holding a medical marijuana cultivation facility license issued pursuant to section 1 of this article seeking licensure to operate a marijuana cultivation facility at the same location;

(b) For a marijuana dispensary facility to an entity holding a medical marijuana dispensary facility license issued pursuant to section 1 of this article seeking licensure to operate a marijuana dispensary facility at the same location;

(c) For a marijuana-infused products manufacturing facility to an entity holding a medical marijuana-infused products manufacturing facility license issued pursuant to section 1 of this article seeking licensure to operate a marijuana-infused product manufacturing facility at the same location; and

(d) For a marijuana testing facility to an entity holding a medical marijuana testing facility license issued pursuant to section 1 of this article seeking licensure to operate a marijuana testing facility at the same location.

(16) The department shall issue a license to each applicant for a marijuana facility pursuant to subdivision (15) of this subsection if the applicant is in good standing with the department and has reasonably complied with this article and all of the rules and regulations promulgated pursuant to this article.

(17) If an existing medical marijuana dispensary facility is located in a jurisdiction that bans marijuana dispensary facilities under this section, the medical marijuana dispensary facility may apply to the department for a marijuana dispensary license pursuant to subdivision (15) of this subsection in a new location, and such application shall be granted so long as the applicant meets all the requirements of this section and department regulation.

(18) For the first five hundred and forty-eight days after the department begins issuing licenses for marijuana facilities under this section, the department shall issue a license for a marijuana microbusiness facility to any qualified applicant consistent with the qualifications and limitations set forth in this section.

(19) A medical marijuana cultivation facility that is issued a marijuana cultivation facility license pursuant to subdivision (15) of this subsection is limited under both licenses to the total cultivation amount allowed pursuant to its medical marijuana facility license. A marijuana cultivation facility license issued pursuant to subdivision (15) of this subsection allows that entity to sell marijuana to medical marijuana facilities and marijuana facilities consistent with any limitations set forth in this section or department regulation.

(20) In addition to the foregoing, the department may issue a non-medical license pursuant to this section to a medical marijuana cultivation facility, medical marijuana-infused products manufacturing facility, or medical marijuana dispensary facility, only after the department determines that doing so will not limit or restrict access by qualifying patients, as defined in section 1 of this article, to an adequate supply of marijuana and marijuana-infused products at a reasonable cost.

(21) The department may not promulgate a rule prohibiting a marijuana facility from operating at the same location as a medical marijuana facility of the same license type operating pursuant to section 1 of this article.

(22) Marijuana facilities licensed to distribute marijuana, marijuana-infused products, and marijuana accessories directly to consumers pursuant to this section may also distribute marijuana, marijuana-infused products, and marijuana accessories to qualifying patients and primary caregivers consistent with section 1 of this article and department regulation.

(23) The department may charge a fee not to exceed five thousand dollars for any certification issued pursuant to this section.

(24) Until such time that federal law permits otherwise, all marijuana sold in Missouri shall be cultivated in a marijuana cultivation facility or a marijuana microbusiness facility located in Missouri. If allowed by federal law, marijuana may be exported from Missouri.

(25) Until such time that federal law permits otherwise, all marijuana-infused products sold in the state of Missouri shall be manufactured in a marijuana-infused products manufacturing facility or a marijuana microbusiness facility located in Missouri. If allowed by federal law, marijuana-infused products may be exported from Missouri.

(26) The denial of a license or license renewal by the department shall be appealable. The applicant may choose to challenge any denial by the department through the Administrative Hearing Commission, or successor entity. Pursuant to § 536.100 R.S.Mo., or successor provisions, any licensee who has exhausted all administrative remedies provided by law and who is aggrieved by a final decision in a contested case is entitled to judicial review.

(27) No elected official shall interfere directly or indirectly with the department's obligations and activities under this section.

(28) To minimize the potential for undue political influence in awarding licenses, the department shall review license applications using reasonable safeguards that ensure the name of the applicant and its principal owners, officers, and managers are not identified to the application scorers.

(29) The department shall have the sole authority within the state of Missouri to issue licenses for marijuana facilities and certifications pursuant to this section.

(30) The department shall not have the authority to promulgate, apply, or enforce any rule or regulation that is unduly burdensome or act to undermine the purposes of this section.

5. Local Control.

(1) Except as provided in this subsection, a local government may prohibit the operation of all non-medical retail marijuana facilities regulated under this section from being located within its jurisdiction through voter approval of a ballot question submitted to the qualified voters of the local government, provided that any ballot measure shall be voted on only during the regularly scheduled general election held on the first Tuesday after the first Monday in November of an even-numbered year starting in 2022, thereby avoiding any additional local governmental cost or expense. Until the first general election following the general election held November 3, 2020, a local government may through local ordinance temporarily prohibit non-medical retail marijuana facilities regulated under this section from being located within its jurisdiction. When a ballot question prohibiting non-medical retail marijuana facilities regulated under this section is submitted to voters, the following question shall be presented to the voters in the area subject to the prohibition, "Shall (insert name of local government) ban all non-medical retail marijuana facilities from being located within (insert name of local government and, where applicable, its "unincorporated areas") and forgo any additional related local tax revenue? ( ) Yes ( ) No." If a majority of the votes cast on the question by the qualified voters voting thereon are in favor of the question, then the ban shall go into effect as provided by law. If a question receives less than the required majority, then the jurisdiction shall have no power to ban new non-medical retail marijuana facilities regulated under this section, unless voters at a subsequent election on the first Tuesday after the first Monday in November of an even-numbered year approve a ban on new non-medical retail marijuana facilities submitted to them by the governing body. A local government may repeal an existing ban by its own ordinance or by a vote of the people, either through referral of a ballot question to the voters by the governing body or through citizen petition. In the case of a referral of a ballot question by the governing body or citizen's petition to repeal an existing ban, the question shall be voted on only during the regularly scheduled

general election held on the first Tuesday after the first Monday in November of an even-numbered year. A citizen's petition to repeal an existing ban shall be signed by at least five percent of the qualified voters in the area subject to the ban, determined on the basis of the number of votes cast for governor in such locale at the last gubernatorial election held prior to the filing of the petition. The local government shall count the petition signatures and give legal notice of the election as provided by applicable law. Denial of ballot access shall be subject to judicial review. Whether submitted by the governing body or by citizen's petition, the question shall be submitted in the following form: "Shall (insert name of local government) allow non-medical retail marijuana facilities to be located within (insert name of local government and where applicable, its "unincorporated areas") as regulated by state law? ( ) Yes ( ) No." If a majority of the votes cast on the question by the qualified voters voting thereon are in favor of the question, then the ban shall be repealed.

(2) Unless allowed by the local government, no new marijuana facility shall be initially sited within one thousand feet of any then-existing elementary or secondary school, child day-care center, or church. Except as otherwise provided in this subsection, no local government shall prohibit marijuana facilities or entities with a transportation certification either expressly or through the enactment of ordinances or regulations that make their operation unduly burdensome in the jurisdiction. However, local governments may enact ordinances or regulations not in conflict with this section, or with regulations enacted pursuant to this section, governing the time, place, and manner of operation of such facilities in the locality. A local government may establish civil penalties for violation of an ordinance or regulations governing the time, place, and manner of operation of a marijuana facility, or entity holding a transportation certification that may operate in such locality.

6. Taxation and Reporting.

(1) A tax shall be levied upon the retail sale of non-medical marijuana sold to consumers at marijuana facilities licensed pursuant to this section within the state. The tax shall be at a rate of fifteen percent of the retail price. The tax shall be collected by each licensed non-medical retail marijuana facility and paid to the department of revenue. After retaining no more than two percent of the total tax collected or its actual collection costs, whichever is less, amounts generated by the tax levied in this section shall be deposited by the department of revenue into the "Veterans, Infrastructure, and Health Fund") created under this subsection. Licensed entities making non-medical retail sales within the state shall be allowed approved credit for returns provided the tax was paid on the returned item and the purchaser was given the refund or credit.

(2) There is hereby created in the state treasury the "Veterans, Infrastructure, and Health Fund" which shall consist of taxes and fees collected under this section. The state treasurer shall be custodian of the fund, and he or she shall invest monies in the fund in the same manner as other funds are invested. Any interest and moneys earned on such investments shall be credited to the fund. Notwithstanding any other provision of law, any monies remaining in the fund at the end of a biennium shall not revert to the credit of the general revenue fund. The commissioner of administration is authorized to make cash operating transfers to the fund for purposes of meeting the cash requirements of the department in advance of it receiving annual application, licensing, and tax revenue, with any such transfers to be repaid as provided by law. The fund shall be a dedicated fund and shall be distributed as follows:

(a) First, to the department, an amount necessary for the department to carry out this section, including repayment of any cash operating transfers, payments made through contract or agreement with other state and public agencies necessary to carry out this section, and a reserve fund to maintain a reasonable working cash balance for the purpose of carrying out this section;

(b) Next, distributed to the local government where the retail sale occurred, three-fifteenths of the remaining fund balance.

(c) After the distribution to the local government where the retail sale occurred, the remaining fund balance shall be distributed in thirds as follows:

(i) One-third of the remainder of the fund balance shall be transferred to the Missouri veterans commission and allied state agencies, as determined by

appropriation, exclusively for health care and other services for military veterans and their dependent families;

(ii) One-third of the remainder of the fund balance to the State Road Fund created under article IV, section 30b of this Constitution for constructing and maintaining an adequate system of connected state highways; and

(iii) One-third of the remainder of the fund balance to the department to provide grants to existing agencies and not-for-profit organizations, whether government or community-based, to increase access to evidence-based low-barrier drug addiction treatment, prioritizing medically proven treatment and overdose prevention and reversal methods and public or private treatment options with an emphasis on reintegrating recipients into their local communities, to support overdose prevention education, and to support job placement, housing, and counseling for those with substance use disorders. Agencies and organizations serving populations with the highest rates of drug-related overdose shall be prioritized to receive the grants.

(d) All monies from the taxes and fees authorized hereunder shall provide additional dedicated funding for the purposes enumerated above and shall not replace existing dedicated funding.

(3) For all retail sales of marijuana, a record shall be kept by the seller of all amounts and types of marijuana involved in the sale and the total amount of money involved in the sale, including itemizations, taxes collected, and grand total sale amounts. All such records shall be kept on the premises in a readily available format and be made available for review by the department and the department of revenue upon request. Such records shall be retained for five years from the date of the sale.

(4) The tax levied pursuant to this subsection is separate from and in addition to any general state and local sales and use taxes that apply to retail sales, which shall continue to be collected and distributed as provided by general law.

(5) Except as authorized in this subsection, no additional taxes shall be imposed on the sale of marijuana.

(6) The fees and taxes provided for in this section shall be fully enforceable notwithstanding any other provision in this Constitution purportedly prohibiting or restricting the taxes and fees provided for herein.

7. Additional Protections.

(1) A marijuana testing facility shall not be subject to civil or criminal prosecution, denial of any right or privilege, civil or administrative penalty or sanction, or disciplinary action by any accreditation or licensing board or commission for providing laboratory testing services that relate to marijuana consistent with this section and otherwise meeting legal standards of professional conduct.

(2) An attorney shall not be subject to disciplinary action by the state bar association or other professional licensing body for owning, operating, investing in, being employed by, contracting with, or providing legal assistance to any person related to activity that is no longer subject to criminal penalties under state law pursuant to this section.

(3) Actions and conduct by marijuana facilities licensed or otherwise certified by the department, or their employees or agents, as permitted by this section and in compliance with department regulations and other standards of legal conduct, shall not be subject to criminal or civil liability or sanctions under Missouri law, except as provided for by this section.

(4) The department may not promulgate a rule that requires a consumer to provide a marijuana facility with identifying information other than identification to determine the consumer's age or requires the marijuana facility to acquire or record personal information about consumers other than information typically required in a retail transaction.

(5) It is the public policy of the state of Missouri that contracts related to marijuana that are entered into by marijuana facilities and those who allow property to be used by those entities, should be enforceable. It is the public policy of the state of Missouri that no contract entered into by marijuana facilities, or by a person who allows property to be used for activities that are exempt from state criminal penalties by this section, shall be unenforceable on the basis that activities related to marijuana may be prohibited by federal law.

8. Legislation.

Nothing in this section shall limit the general assembly from enacting laws consistent with the purposes of this section.

9. Additional Provisions.

(1) No owner of a marijuana facility or entity with a transportation certification shall be an individual with a disqualifying felony offense. A "disqualifying felony offense" is a violation of, and conviction or guilty plea to, state or federal law that is, or would have been, a felony under Missouri law, regardless of the sentence imposed, unless the department determines that:

(a) The person's conviction was for a marijuana offense, other than provision of marijuana to a minor; or

(b) The person's conviction was for a non-violent crime for which he or she was not incarcerated and that is more than five years old; or

(c) More than five years have passed since the person was released from parole or probation, and he or she has not been convicted of any subsequent criminal offenses.

The department may consult with and rely on the records, advice, and recommendations of the attorney general and the department of public safety, or their successor entities, in carrying out the provisions of this subdivision.

(2) All marijuana facilities and certificates shall be held by entities that are majority owned, directly or indirectly, by natural persons who have been citizens of the state of Missouri for at least one year prior to the application for such license or certification. Notwithstanding the foregoing, persons or entities outside the state of Missouri may own a minority stake, directly or indirectly, in such entities.

(3) No marijuana facility shall manufacture, package, or label marijuana or marijuana-infused products in a false or misleading manner. No person shall sell any product in a manner designed to cause confusion between a marijuana or marijuana-infused product and any product not containing marijuana. A violation of this subdivision shall be punishable by an appropriate and proportional department sanction, up to and including loss of license.

(4) No marijuana facility may sell edible marijuana-infused candy in shapes or packages that are attractive to children or that are easily confused with commercially sold candy that does not contain marijuana.

(5) All marijuana and marijuana-infused products shall be sold in individual, child-resistant containers that are labeled with serving amounts, instructions for use, and estimated length of effectiveness. All marijuana and marijuana-infused products shall be sold in containers clearly and conspicuously labeled, as mandated by the department, as containing "Marijuana," or a "Marijuana-Infused Product." Violation of this subdivision shall subject the violator to department sanctions, including an administrative penalty.

(6) A marijuana facility may not allow cultivation, processing, sale, or display of marijuana, marijuana-infused products, or marijuana accessories to be visible from a public place outside of the marijuana facility without the use of binoculars, aircraft, or other optical aids.

(7) A marijuana facility may not cultivate, process, test, or store marijuana at any location other than a physical address approved by the department and within an enclosed area that is secured in a manner that prevents access by persons not permitted by the marijuana facility to access the area.

(8) A marijuana facility shall secure every entrance to the facility so that access to areas containing marijuana is restricted to employees and other persons permitted by the marijuana facility to access the area and to agents of the department or state and local law enforcement officers and emergency personnel and shall secure its inventory and equipment during and after operating hours to deter and prevent theft of marijuana, marijuana-infused products, and marijuana accessories.

(9) No marijuana facility may refuse representatives of the department the right during the hours of operation to inspect the licensed premises or to audit the books and records of the marijuana facility.

(10) No marijuana facility may allow a person under twenty-one years of age to volunteer or work for the marijuana facility.

(11) No marijuana facility, or entity with a certification, shall assign, sell, give, lease, sublicense, or otherwise transfer its license or certificate to any other entity without the express consent of the department, not to be unreasonably withheld.

(12) To the fullest extent allowed by the Constitution of the United States, the Constitution of Missouri, and federal law, no unsolicited advertisements for marijuana, marijuana-infused products, or marijuana accessories are permitted and no off-site advertisement or marketing for marijuana, marijuana-infused products, or marijuana accessories may be placed on any billboard within the state or in any location exposed to view from a public place within one thousand feet of an elementary or secondary school, child daycare center, or church.

(13) Real and personal property used in the cultivation, manufacture, transport, testing, distribution, sale, and administration of marijuana for activities otherwise in compliance with this section shall not be subject to asset forfeiture solely because of that use.

(14) No person shall extract resins from marijuana using dangerous materials or combustible gases without a marijuana-infused products manufacturing facility license. Violation of this prohibition shall subject the violator to department sanctions, including an administrative penalty and, if applicable, loss of certificate or license for up to one year.

10. Personal Use of Marijuana.

(1) Subject to the limitations in subsection 3 of this section, the following acts by a person at least twenty-one years of age are not unlawful and shall not be an offense under state law or the laws of any local government within the state or be subject to a civil fine, penalty, or sanction, or be a basis for detention, search, or arrest, or to deny any right or privilege, or to seize or forfeit assets under state law or the laws of any local government:

(a) Possessing, using, ingesting, inhaling, processing, transporting, delivering without consideration, or distributing without consideration one ounce or less of marijuana, except that not more than the equivalent of one ounce of marijuana, as determined by the department, may be in a concentrated form;

(b) Possessing, planting, cultivating, harvesting, drying, processing, or manufacturing one-half the number of plants a qualifying patient is permitted to cultivate pursuant to section 1 of this article and department regulation, provided:

a. The plants and any marijuana produced by the plants in excess of one ounce are kept at one private residence, are in a locked space, and are not visible by normal, unaided vision from a public place; and
b. Not more than twice the number of allowable plants under paragraph (b) of this subdivision are kept in or on the grounds of a private residence at one time.

(c) Assisting another person who is at least twenty-one years of age in, or allowing property to be used for, any of the acts permitted by this section; and

(d) Possessing, using, delivering, distributing, manufacturing, transferring, or selling to persons twenty-one years of age or older marijuana accessories.

(2) A person who, pursuant to this section, cultivates marijuana plants that are visible by normal, unaided vision from a public place is subject to a civil penalty not exceeding two hundred and fifty dollars and forfeiture of the marijuana.

(3) A person who, pursuant to this section, cultivates marijuana plants that are not kept in a locked space is subject to a civil penalty not exceeding two hundred and fifty dollars and forfeiture of the marijuana.

(4) A person who smokes marijuana in a public place, other than in an area licensed for such activity by the department, is subject to a civil penalty not exceeding one hundred dollars and forfeiture of the marijuana.

(5) A person who is under twenty-one years of age who possesses, uses, ingests, inhales, transports, delivers without consideration or distributes without consideration one ounce or less of marijuana, or possesses, delivers without consideration, or distributes without consideration marijuana accessories is subject to a civil penalty not to exceed one hundred dollars and forfeiture of the marijuana. Any such person shall be provided the option of attending up to four hours of drug education or counseling in lieu of the fine.

(6) Subject to the limitations of this section, a person who possesses not more than twice the amount of marijuana allowed pursuant to this subsection, produces not more than twice the amount of marijuana allowed pursuant to this subsection, delivers without receiving any consideration or remuneration to a person who is at least twenty-one years of age not more than twice the amount of marijuana allowed by this subsection, or possesses with intent to deliver not more than twice the amount of marijuana allowed by this subsection:

(a) For a first violation, is subject to an infraction punishable by a civil penalty not exceeding two hundred and fifty dollars and forfeiture of the marijuana;

(b) For a second violation, is subject to an infraction punishable by a civil penalty not exceeding five hundred dollars and forfeiture of the marijuana;

(c) For a third or subsequent violation, is subject to a misdemeanor punishable by a fine not exceeding one-thousand dollars and forfeiture of the marijuana; and

(d) For a person under twenty-one years of age, is subject to a civil penalty not to exceed two hundred and fifty dollars. Any such person shall be provided the option of attending up to eight hours of drug education or counseling in lieu of the fine.

(7) Any person currently serving a sentence for a conviction, whether by trial or open or negotiated plea, who would not have been guilty of an adult or juvenile offense, or who would have been guilty of a lesser adult or juvenile offense had sections 1 and 2 of this article been in effect at the time of the offense, may petition for a recall or dismissal of sentence before the trial court that entered the judgement of conviction in the person's case to request resentencing or dismissal consistent with sections 1 and 2 of this article with credit for time and supervision period already served and such petition shall be granted.

(8) A person arrested, charged, or found guilty, whether by trial or open or negotiated plea, for any offense that is no longer a crime after the effective dates of sections 1 and 2 of this article may apply for expungement upon the effective date of this section and such expungement shall be granted and the records expunged from all government records absent good cause for denial. The effect of such order shall be to restore such person to the status the person occupied prior to such arrest, plea or conviction and as if such event had never taken place. No person for whom such order has been entered shall be held thereafter under any provision of any law to be guilty of perjury or otherwise giving a false statement by reason of the person's failure to recite or acknowledge such arrest, plea, trial, conviction, or expungement in response to any inquiry made of the person for any purpose whatsoever, and no such inquiry shall be made for information relating to an expungement.

(9) A person shall not be denied adoption, custody, or visitation rights relative to a minor solely for conduct that is permitted by this section, unless the person's behavior is such that granting the rights is not in the best interests of the child, as determined by other applicable law and procedures.

(10) No person shall be denied access to or priority for an organ transplant for conduct that is permitted by this section.

11. Severability.

The provisions of this section are severable, and if any clause, sentence, paragraph or section of this measure, or an application thereof, is adjudged invalid by any court of competent jurisdiction, the other provisions shall continue to be in effect to the fullest extent possible.

12. Effective Date.

The provisions of this section shall become effective on December 3, 2020, as provided by this Constitution.

MISSOURI STATE AUDITOR'S OFFICE
FISCAL NOTE (20-125)

Subject

Initiative petition from Deirdre Hirner regarding a proposed constitutional amendment to Article XIV of the Constitution of Missouri. (Received October 10, 2019)

Date

November 4, 2019

Description

This proposal would amend Article XIV of the Constitution of Missouri.

The amendment is to be voted on in November 2020.

Public comments and other input

The State Auditor's office requested input from the **Attorney General's office,** the **Department of Agriculture,** the **Department of Economic Development,** the **Department of Elementary and Secondary Education,** the **Department of Higher Education and Workforce Development,** the **Department of Health and Senior Services,** the **Department of Commerce and Insurance,** the **Department of Mental Health,** the **Department of Natural Resources,** the **Department of Corrections,** the **Department of Labor and Industrial Relations,** the **Department of Revenue,** the **Department of Public Safety,** the **Department of Social Services,** the **Governor's office,** the **Missouri House of Representatives,** the **Department of Conservation,** the **Department of Transportation,** the **Office of Administration,** the **Office of State Courts Administrator,** the **Missouri Senate,** the **Secretary of State's office,** the **Office of the State Public Defender,** the **State Treasurer's office, Adair County, Boone County, Callaway County, Cass County, Clay County, Cole County, Greene County, Jackson County, Jasper County, St. Charles County, St. Louis County, Taney County,** the **City of Cape Girardeau,** the **City of Columbia,** the **City of Jefferson,** the **City of Joplin,** the **City of Kansas City,** the **City of Kirksville,** the **City of Mexico,** the **City of Raymore,** the **City of St. Joseph,** the **City of St. Louis,** the **City of Springfield,** the **City of Union,** the **City of Wentzville,** the **City of West Plains, Cape Girardeau 63 School District, Hannibal 60 School District, Malta Bend R-V School District, Mehlville School District, Wellsville-Middletown R-1 School District, State Technical College of Missouri, Metropolitan Community College, University of Missouri, St. Louis Community College, Missouri Veterans Commission, Missouri Office of Prosecution Services, Kansas City Board of Police Commissioners, The Metropolitan Police Department - City of St. Louis, University of Central Missouri, Harris-Stowe State University, Lincoln University, Missouri State University, Missouri Southern**

State University, Missouri Western State University, Northwest Missouri State University, Southeast Missouri State University, and **Truman State University.**

Mark R. Reading provided information to the State Auditor's office.

David R. Usher provided information to the State Auditor's office.

Assumptions

Officials from the **Attorney General's office** indicated they expect that, to the extent that the enactment of this proposal would result in increased litigation, they expect that their office could absorb the costs associated with that increased litigation using existing resources. However, if the enactment of this proposal were to result in substantial additional litigation, their office may be required to request additional appropriations.

Officials from the **Department of Agriculture** indicated no fiscal impact on their department.

Officials from the **Department of Economic Development** indicated no impact to their department.

Officials from the **Department of Elementary and Secondary Education** indicated a total estimated net effect on all state funds of $0 for fiscal year 2020, $0 for fiscal year 2021, and $0 for fiscal year 2022.

Officials from the **Department of Health and Senior Services** indicated increased operating costs to the Veterans Infrastructure and Health Fund of $1,605,331 in fiscal year 2021, $5,541,694 in fiscal year 2022, and $12,440,048 in fiscal year 2023. Of these costs, $77,049 are one-time costs in fiscal year 2021 for office furniture and equipment, $508,624 are one-time costs in fiscal year 2022 for office furniture, equipment, and application scoring costs, and $4,722,049 are one-time costs in fiscal year 2023 for office furniture, equipment, contracted attorney fees, and application scoring costs.

Space for thirty-nine additional staff will be required by fiscal year (FY) 2023: 39 FTE x 230 sq. ft. x &18.00 = $161,460. These staff will be located in Jefferson City. An additional thirty FTE are assumed to be telecommuters.

This will create new small business opportunities and all the costs associated with a new business, along with the associated licensing fees.

At the time of submission Office of Administration - Information Technology Services Division (ITSD) had not provided a response.

The proposed legislation amends Section 1 of Article XIV and enacts one new section to be known as Section 2 of Article XIV regarding adult use marijuana legalization, regulation, and taxation. The new law stipulates the minimum number of facilities to be

licensed and the application and operation fees associated with each type of facility. It is assumed sales of marijuana will begin in FY 2023, increasing state revenue through the collection of a fifteen percent sales tax levied on the retail sale of adult use marijuana sold to consumers.

Office of General Counsel:

The proposed changes to this legislation will require the Department of Health and Senior Services to aid the program in building all the rules, pre-licensing, preparing required forms, and litigation on any legal challenges for denial of licenses through the Missouri court system. Based on our experience with medical marijuana facility license applications, we assume a similar number of facility license applications will be received for potentially even fewer available licenses. To defend the denial of an estimated 2,000 licenses, the department will temporarily contract with attorneys and support staff for a period of approximately 18 – 24 months. The total estimated amount of these contracts is $3,538,085. In addition, the department would require the following staff:

Three full-time attorneys (average annual salary of $75,000) would be needed to assist in reviewing records and defending the department in anticipated trials from denied licenses due to the limited number allowed to be issued. Two Attorneys would be needed for fiscal year 2021 with a third FTE Attorney added in fiscal year 2022, and maintaining the three Attorneys for the third year of fiscal year 2023.
Additional duties include:

- Reviewing requests for records (sunshine and/or subpoenas)
- Coordinating and advising with Medical Marijuana staff to determine whether the Department has records responsive to requests
- Review of individual records
- Determining appropriate response
- Responding to requestor
- Drafting/filing motions to quash subpoenas when necessary
- Possible referrals to AGO
- Representing the department in any court room activities resulting from this change in legislation

In addition, one support staff would be required to assist the three attorneys in the paperwork required for these court cases.

For the purposes of this fiscal note, they assumed temporary contracts would be necessary for attorneys, paralegals, and support staff to defend the denial of an estimated 2,000 licenses. The length of these contracts is estimated for a period of approximately 18 – 24 months, at an estimated total cost of $3,538,085, to cover any litigation associated with these denials. The three full-time attorneys and one support staff needed to handle the on-going costs of this proposed legislation would indeed be on-going with no estimate of any end date. Within the parameters of the assumptions used for this response, at this time, there are no other anticipated temporary or other costs for this proposed legislation from the Office of General Counsel.

Division of Regulation and Licensure (DRL):

Section 1 of Article XIV includes minor changes that will cause some adjustment to the operations of the Section for Medical Marijuana (SMMR), but those changes have no fiscal impact. Section 2 of Article XIV requires creation of a new program for the regulation of adult use marijuana. This new program will share some employees and resources with the current SMMR. For purposes of this fiscal note, the new, combined program will be called the Section for Marijuana Regulation (SMR).

Section 2 of Article XIV requires implementation of adult use marijuana in several phases over the course of three years. Much of the regulatory structure mandated in Section 2 mirrors that in Section 1; thus, some efficiencies can be captured by merging this new program with the existing SMMR. However, the regulations and businesses to be licensed for the new program are different enough from the SMMR regulations and businesses that some functions, particularly on the compliance side, will need to be expanded significantly. Furthermore, assuming similar licensing functions for the new program (initial applications with applications for changes to businesses following licensure), the licensing needs of the new program will double those of the existing program as several waves of new licensing processes will occur at regular intervals, including for a new class of marijuana businesses. With each new wave, facility agent application processing will increase.

In addition to staffing needs, the new program will necessitate new or amended contracts for IT solutions and application scoring. All new adult use businesses will have application requirements different from medical marijuana businesses, which must be built within the existing IT solution for Missouri marijuana regulation or through a new IT solution. While the bulk of the initial wave of licensing for adult use will not require scoring applications, microbusiness applications will likely require scoring at each stage of licensing, and in the third year, it appears scoring will be necessary for all new facilities of any type.

The following are the estimates of costs associate with the staffing and contractual needs outlined above.

YEAR 1

Between December 2020 and December 2021, the SMR will begin program build out, draft and file rules, draft and issue Request for Proposals (RFPs) or contract amendments for IT solutions, and begin pre-licensing functions, including public outreach/response.

To cover program implementation, pre-licensing, and public outreach/response in the first year, the SMR will require additional staff. The following positions will be hired as of January 2021:

- One Planner IV with an annual salary of $55,000, job duties will include oversight of contracts, procurement, and website and supervisory responsibilities;
- One Planner II with an annual salary of $45,000, job duties will be consistent with that of the Planner IV to a lesser degree;

- Four Special Assistant Professionals with an annual salary of $45,000, job duties will be to function as facility licensing specialists and process applications and renewals;
- Five Health Program Representative IIs with an annual salary of $40,000 job duties will be Facility Agent ID's and handle public assistant calls; and
- Two Administrative Office Support Assistants with an annual salary of $38,000, to provide support for the above staff.

Due to the increase supervisory and oversight responsibilities, salaries to existing staff will be studied and adjustments will be made when deemed appropriate.

The current contract for IT solutions will need to be continued and expanded. The estimated cost for year one is $769,000.

YEAR 2

The SMR will continue program build-out and begin accepting facility applications in December 2021 and will have 150 days to approve or deny all applications. For 348 licenses, applications will be reviewed for minimum qualifications, but no scoring will be necessary. For 48 licenses (the microbusiness licenses), applications will be reviewed for minimum qualifications and scoring will be necessary. Facilities may begin operating sometime after May 2022. Facility agent applications and oversight will increase when the new facilities begin operating. The SMR will also draft and issue RFPs or contract amendments for application scoring in Year 2.

To cover program implementation and oversight, public outreach/response, facility agent applications and oversight, and compliance/enforcement functions for a new regulatory structure with up to 396 new facility licenses (not counting additional, new license types added as needed), the SMR will require additional staff. The following positions will be hired as of July 2021:

- Three Investigation Managers with an annual salary of $65,000, job duties to include supervision of additional investigative staff;
- Three Investigator IIIs with an annual salary of $60,000, job duties to be to inspect and investigate facilities throughout the state and provide oversight to Investigator II's;
- Seventeen Investigators II with an annual salary of $50,000, job duties to include inspecting and investigating facilities across the state;
- One Planner II with an annual salary of $45,000, job duties to include oversight on additional contracts and regulations;
- Five Health Program Representatives II with an annual salary of $40,000, job duties to provide public assistance and facilitate increase activity for facility agent ID applications. and
- Two Administrative Office Support Assistants with an annual salary of $38,000, to provide support for the above additional staff.

The Investigators are assumed to be telecommuters and are expected to travel extensively; it is assumed that the travel cost will be $10,118 annually for all investigative staff.

It is assumed application scoring will cost approximately $200,000 in Year 2. This estimate is based on the current SMMR contract, assuming a new contract will be necessary and assuming there will be four times the number of applications received as there are licenses available for microbusinesses (based on experience in 2019).

The current contract for IT solutions will need to be continued and expanded. The estimated cost for year two is $518,599.

Section 6 (iii) requires the Department to provide grants to existing agencies and not-for-profit organizations to increase access to evidence-based low barrier drug addiction treatment, and to support reintegrating those with substance abuse disorders, by supporting job placement, housing and counseling. The Division of Regulation and Licensure's Financial Services Unit (FSU) will require additional personnel to oversee the grant processes, as well as provide overall support to the additional SMR staff. The FSU will require one Planner III at an annual salary of $60,000, one Executive II with an annual salary of $40,000, and one Senior Office Support Assistant with an annual salary of $27,851. All FSU staff are assumed to start in July 2021.

YEAR 3

The SMR will continue program build-out and receive applications for an additional 48 microbusinesses in January 2023, which will likely require both minimum qualification review and scoring. Licensing of new business of all types will begin in November 2023, requiring minimum qualification review and scoring. Facility agent applications and oversight will increase when new facilities begin operating.

To cover public outreach/response, facility agent applications and oversight, and additional increases in compliance/enforcement functions for new facility licenses, the SMR will require additional staff. The following positions will be hired as of July 2022:

- Two Investigator IIIs with an annual salary of $60,000;
- Eight Investigators II with an annual salary of $50,000;
- Four Special Assistant Professionals with an annual salary of $45,000;
- Three Health Program Representative IIs with an annual salary of $40,000; and
- One Administrative Office Support Assistant with an annual salary of $38,000.

All job duties consistent with previous staff.

The Investigators are assumed to be telecommuters and are expected to travel extensively; it is assumed that the travel cost will be $10,118 annually for all investigative staff.

It is assumed application scoring will cost approximately $2,200,000 in Year 3. This estimate is based on the current SMMR contract, assuming a new contract will be necessary and assuming there will be four times the number of applications received as there are licenses available for microbusinesses, and assuming the scoring expense for new

marijuana business applications of all types will be similar to 2019 SMMR experience for expenses.

The IP implies a duty to reopen application periods when licenses become available. There is also the option to issue additional licenses indefinitely. And whenever there are more applicants than licenses available, DRL will have to have them scored. DRL would assumes that the ongoing costs would be approximately $1,110,000 for application scoring. We do not have any other one-time costs except for the office furniture/equipment.

The current contract for IT solutions will need to be continued and expanded. The estimated cost for year three is $518,599.

Officials from the **Department of Commerce and Insurance** indicated this petition, if passed, will have no cost or savings to their department.

Officials from the **Department of Mental Health** indicated this proposal creates no direct obligations or requirements to their department that would result in a fiscal impact.

Officials from the **Department of Natural Resources** indicated their department would not anticipate a direct fiscal impact from this proposal.

Officials from the **Department of Corrections** indicated a fiscal impact of costs savings of $778,038 in fiscal year 2021, $1,184,936 in fiscal year 2022, $1,328,713 by fiscal year 2026.

The estimate of the impact of this amendment is determined by a standard response of looking at persons committed for marijuana-only offenses. In 2018, thirty people were incarcerated and 383 given probationary terms of cannabis-only violations. The average sentence is 7.0 years with 0.9 served before first release; the average probationary term is three years.

Passage of Initiative Petition (IP) 2020-125 is estimated to result in 30 fewer persons incarcerated and 383 fewer persons entering probationary supervision per year in their department. The full impact of the bill occurs in fiscal year (FY) 2026 with 90 fewer persons incarcerated and 1269 fewer persons on field supervision. This results in a reduction of 10 (Probation and Parole) P&P officers by FY2026. Their department cost of incarceration in $17.224 per day or an annual cost of $6,287 per offender. Their department cost of probation or parole is determined by the number of P&P Officer II positions that would be needed to cover the new caseload.

Officials from the **Department of Labor and Industrial Relations** indicated this initiative petition is expected to have no fiscal impact on their department.

Officials from the **Department of Revenue** indicated:

Section 1.3 states that all public records produced or retained pursuant to this section are subject to the general provisions of Missouri's Sunshine Law. Thus, information obtained from an applicant or licensee are subject to closure.

Section 1.3 also states that qualifying patients under this section shall obtain an identification card which shall be valid for three years and may be renewed with a new physician's certification. The Department recognizes that the fee of twenty-five dollars per year per card remains the same, and does not anticipate this to have an impact.

Section 1.3 also states that primary caregiver's identification cards shall be valid for three years. Furthermore, the fee for a primary caregiver's identification card has been increased from twenty-five dollars to seventy-five dollars. The Department recognizes that the fee, as it is written today, reads that it shall be twenty-five dollars per year. This initiative petition increases the fee to seventy-five dollars every three years. The total revenue gained, in totality, then, should not change, but the state could recognize changes in cash flow with the fee being paid by primary caregivers every three years instead of one. The Department defers to the Department of Health and Senior Services to estimate the impact to state cash flows.

Section 1.5 awards non-resident of Missouri patients the ability to purchase marijuana for medical purposes from a medical marijuana dispensary facility as permitted by this section. The Department recognizes that if out of state residents purchase medical marijuana in Missouri that the Missouri Veterans' Health and Care fund could increase as well as state and local sales and use taxes. The Department provides an unknown impact for this section, though, as the number of outside residents purchasing marijuana in Missouri cannot truly be estimated.

Section 2.1 states that recreational marijuana shall be legal for individuals aged twenty one and above.

Section 2.3 states that this section shall not require any employer to permit or accommodate conduct otherwise allowed by this section in any workplace or employer's property.

Section 2.4 states the Department of Health and Senior Services shall issue, at a minimum, the same number of marijuana cultivation facilities under Section 1 (medical marijuana), the same number of marijuana-infused products manufacturing facilities licenses as are issued for medical marijuana infused products manufacturing facilities, the same number of marijuana dispensary facility licenses as are issued to medical marijuana dispensary facilities, and a minimum number of marijuana microbusiness licenses are allowed for medical marijuana; stating that marijuana microbusiness licenses shall be awarded to applicants of marijuana microbusinesses that is at least fifty percent owned by natural persons who qualified as economically disadvantaged owners or disabled veterans at the time they applied and received their licenses.

The Department recognizes that Section 1 (medical marijuana) allows for a minimum of 60 cultivation facility licenses, 86 marijuana-infused product facilities, and 192 dispensary

licenses. The number of marijuana microbusiness licenses would be issued over a period of time, as any other licenses allowed fall short of the minimum required.

The Department estimates the following minimum impact for Section 2.4:

Chart 1

Facility Type	Application Fee/Renewal Fee		Annual Fee	Minimum Number of Licenses	Estimated Revenue (Minimum)		
	Valid for 3 years	Year 4 and Thereafter			Application Fee	Renewal Fee	Annual Fee
Marijuana Cultivation Facility	$10,000	$5,000	$25,000	60	$600,000	$300,000	$1,500,000
Dispensary	$6,000	$3,000	$10,000	192	$1,152,000	$576,000	$1,920,000
Marijuana Infused Product Facility	$6,000	$3,000	$10,000	86	$516,000	$258,000	$860,000
Marijuana Microbusiness	$1,500	$2,500	$2,500	96	$144,000	$240,000	$240,000

Section 2.5 states that a local government may prohibit the operation of all non-medical retail marijuana facilities regulated under this section from being located within its jurisdiction through voter approval of a ballot question submitted to such voters of such local government.

Section 2.6 of this initiative petition states that a tax equal to 15% of the retail price of non-medical marijuana sold to consumers shall be levied. Furthermore, the Department recognizes that Section 2.6 states that the tax levied is separate from and in addition to any general state and local sales and use tax(es) that apply to retail sales – which will be collected upon the retail sales to consumers.

The Department observed data published by Marijuana Business Daily that projects U.S. retail marijuana sales to 2023, including both medical marijuana retail sales and recreational marijuana retail sales, shown separately.

Chart 2

Year	Medical U.S. Cannabis Retail Sales		Recreational U.S. Cannabis Retail Sales		Total U.S. Cannabis Retail Sales	
	Low	High	Low	High	Low	High
2018	$3,300,000,000	$3,800,000,000	$5,300,000,000	$6,200,000,000	$8,600,000,000	$10,000,000,000
2019	$4,200,000,000	$5,200,000,000	$7,000,000,000	$8,500,000,000	$11,200,000,000	$13,700,000,000
2020	$5,500,000,000	$6,800,000,000	$10,200,000,000	$12,200,000,000	$15,700,000,000	$19,000,000,000
2021	$6,400,000,000	$7,800,000,000	$13,000,000,000	$15,700,000,000	$19,400,000,000	$23,500,000,000
2022	$6,700,000,000	$8,300,000,000	$15,700,000,000	$19,100,000,000	$22,400,000,000	$27,400,000,000
2023	$6,900,000,000	$8,400,000,000	$18,100,000,000	$22,000,000,000	$25,000,000,000	$30,400,000,000

https://mjbizdaily.com/exclusive-us-retail-marijuana-sales-on-pace-to-rise-35-in-2019-and-near-30-billion-by-2023/

Using the "Total U.S. Cannabis Retail Sales column from Chart 2, the Department calculated, for both high and low estimates, the estimated increase in total U.S. marijuana retail sales for each year to calculate an the average increase recognized each year so that the Department could estimate retail sales through Year 2030. The Department recognized the following estimated increases in U.S. marijuana retail sales, as they were estimated by Marijuana Business Daily, between 2018 and 2023:

Chart 3

Year	Percent Difference (Using Total U.S. Marijuana Retail Sales)	
	Low	High
2019	30.23%	37%
2020	40.18%	39%
2021	23.57%	24%
2022	15.46%	17%
2023	11.61%	11%
Average Percent Difference	**24%**	**25%**

The Department used the average percent difference (increase) calculated from Chart 3 to estimate the total U.S. marijuana retail sales through Year 2030:

Chart 4

Year	Total Estimated U.S. Cannabis Retail Sales 2018-2030	
	Low	High
2018	$8,600,000,000	$10,000,000,000
2019	$11,200,000,000	$13,700,000,000
2020	$15,700,000,000	$19,000,000,000
2021	$19,400,000,000	$23,500,000,000
2022	$22,400,000,000	$27,400,000,000
2023	$25,000,000,000	$30,400,000,000
2024	$31,052,453,447	$38,116,431,496
2025	$38,570,194,602	$47,791,524,670
2026	$47,907,966,892	$59,922,446,584
2027	$59,506,396,466	$75,132,560,206
2028	$73,912,784,241	$94,203,456,716
2029	$91,806,931,670	$118,115,118,571
2030	$114,033,218,871	$148,096,277,158

The Department, then, using Chart 2, calculated the estimated percent of medical marijuana retail sales (medical marijuana retail sales / total U.S. marijuana retail sales) and the estimated percent of recreational marijuana retail sales (recreational marijuana retail sales / total U.S. marijuana retail sales), for both low and high estimates:

Chart 5

Year	Percent of Medical	Percent of Medical	Percent of Recreational	Percent of Recreational
	Low	High	Low	High
2018	38%	38%	62%	62%
2019	38%	38%	63%	62%
2020	35%	36%	65%	64%

The Department recognized that the estimated medical marijuana retail sales results to 34 percent of the total U.S. marijuana retail sales and recreational marijuana retail sales results in 66 percent of the total U.S. marijuana retail sales.

The Department applied the percentages estimated in Chart 5 to Chart 4 to determine the U.S. Cannabis Retail Sales, from 2018 to 2030, separated by medical marijuana retail sales and recreational marijuana retail sales:

Chart 6

Year	Total Estimated U.S. Cannabis Retail Sales		Medical Sales (Low)	Recreational Sales (Low)	Medical Sales (High)	Recreational Sales (High)
	Low	High	34%	66%	34%	66%
2018	$8,600,000,000	$10,000,000,000	$2,924,000,000	$5,676,000,000	$3,400,000,000	$6,600,000,000
2019	$11,200,000,000	$13,700,000,000	$3,808,000,000	$7,392,000,000	$4,658,000,000	$9,042,000,000
2020	$15,700,000,000	$19,000,000,000	$5,338,000,000	$10,362,000,000	$6,460,000,000	$12,540,000,000
2021	$19,400,000,000	$23,500,000,000	$6,596,000,000	$12,804,000,000	$7,990,000,000	$15,510,000,000
2022	$22,400,000,000	$27,400,000,000	$7,616,000,000	$14,784,000,000	$9,316,000,000	$18,084,000,000
2023	$25,000,000,000	$30,400,000,000	$8,500,000,000	$16,500,000,000	$10,336,000,000	$20,064,000,000
2024	$31,052,453,447	$38,116,431,496	$10,557,834,172	$20,494,619,275	$12,959,586,708	$25,156,844,787
2025	$38,570,194,602	$47,791,524,670	$13,113,866,165	$25,456,328,437	$16,249,118,388	$31,542,406,282
2026	$47,907,966,892	$59,922,446,584	$16,288,708,743	$31,619,258,149	$20,373,631,838	$39,548,814,745
2027	$59,506,396,466	$75,132,560,206	$20,232,174,798	$39,274,221,667	$25,545,070,470	$49,587,489,736
2028	$73,912,784,241	$94,203,456,716	$25,130,346,642	$48,782,437,599	$32,029,175,283	$62,174,281,432
2029	$91,806,931,670	$118,115,118,571	$31,214,356,768	$60,592,574,902	$40,159,140,314	$77,955,978,257
2030	$114,033,218,871	$148,096,277,158	$38,771,294,416	$75,261,924,455	$50,352,734,234	$97,743,542,924

The Department recognizes that medical marijuana will be accounted for pursuant to the passage of Amendment 2 of 2018 and that this initiative petition states that a "tax shall be levied upon the retail sale of *non-medical marijuana*…" Thus, the Department has removed the medical marijuana retail sales from the projections:

Chart 7

Year	Total Estimated U.S. Cannabis Retail Sales		Recreational Sales (Low)	Recreational Sales (High)
	Low	High	66%	66%
2018	$8,600,000,000	$10,000,000,000	$5,676,000,000	$6,600,000,000

2023	$25,000,000,000	$30,400,000,000	$16,500,000,000	$20,064,000,000
2024	$31,052,453,447	$38,116,431,496	$20,494,619,275	$25,156,844,787
2025	$38,570,194,602	$47,791,524,670	$25,456,328,437	$31,542,406,282
2026	$47,907,966,892	$59,922,446,584	$31,619,258,149	$39,548,814,745
2027	$59,506,396,466	$75,132,560,206	$39,274,221,667	$49,587,489,736
2028	$73,912,784,241	$94,203,456,716	$48,782,437,599	$62,174,281,432
2029	$91,806,931,670	$118,115,118,571	$60,592,574,902	$77,955,978,257
2030	$114,033,218,871	$148,096,277,158	$75,261,924,455	$97,743,542,924

Based on a report published by the Substance Abuse and Mental Health Services Administration, in 2018, 34.8 percent of individuals surveyed, within the United States, aged 18-25 used marijuana in the past year and 13.3 percent of individuals surveyed, within the United States, aged 26 and older used marijuana in the past year.

The Henry Kaiser Family Foundation (KFF) states that there are approximately 240,903,600 individuals in the United States aged 19 and above. Separating the population by age, there are approximately 28,348,600 individuals within the United States between the ages of 19 and 25 and approximately 212,555,000 individuals within the United States aged 26 or above.

Using the data published by the Substance Abuse and Mental Health Services Administration in conjunction with the age demographics published by the KFF, approximately 9,865,313 (28,348,600 x 34.8%) individuals in the United States aged between 19 and 25 and 28,269,815 (212,555,000 x 13.3%) individuals in the United States aged 26 and older that have used marijuana in the past year

A data search with Missouri Census Data Center states that there are approximately 566,385 individuals in Missouri aged 18 -24 and approximately 4,183,237 individuals in Missouri aged 25 and older, with a total of 4,749,622 individuals aged 18 or above.

Using the data published by the Substance Abuse and Mental Health Services Administration in conjunction with the Missouri Census Data Center statistics, 197,102 (566,385 x 34.8%) Missourians aged 18-24 and 556,370 (4,183,237 x 13.3%) Missourians aged 25 and above have used marijuana in the past year.

*The Department notes that, due to the difference in the age groups defined between the Substance Abuse and Mental Health Services Administration and the Missouri Census Data Center, that the revenue forecasts for Missouri is understated slightly, as individuals aged 25 in Missouri are included within the projections using 13.3% and not 34.8% - whereas individuals aged 25 were included within the 34.8% stated by the Substance Abuse and Mental Health Services Administration.

Comparing the United States individuals to Missouri individuals who have used marijuana in the past year, the Department estimates Missouri's marijuana market share of total U.S. marijuana retail sales to be approximately 1.98% (estimated Missouri total population aged 18 and above using marijuana in the past year / total U.S. population aged 18 and above using marijuana in the past year percent of the total marijuana market within the United States – (197,102 + 556,370) / (9,865,313 + 28,269,815)).

Therefore, the Department refers back to the total Estimated U.S. Cannabis Retail Sales 2018-2030 from Chart 7, to forecast Missouri's recreational marijuana market/retail sales:

Chart 8

Missouri's Recreational Marijuana Market (1.98%)	
Low	**High**
$112,384,800	$130,680,000
$146,361,600	$179,031,600
$205,167,600	$248,292,000
$253,519,200	$307,098,000
$292,723,200	$358,063,200
$326,700,000	$397,267,200
$405,793,462	$498,105,527
$504,035,303	$624,539,644
$626,061,311	$783,066,532
$777,629,589	$981,832,297
$965,892,264	$1,231,050,772
$1,199,732,983	$1,543,528,369
$1,490,186,104	$1,935,322,150

The Department recognizes that Section 2.4 states that the Department of Health and Senior Services shall begin accepting facility applications within 365 days of December 3, 2020 (effective date of Section 2) and must allow application approvals within one-hundred fifty days after application submissions. The Department believes that the sale of recreational marijuana would not begin until May 2022.

When applying the state sales tax, the 15 percent excise tax, and weighted average local tax rate to Missouri's recreational marijuana market, as shown in Chart 7, the Department

estimates the following increases, including both low and high estimates, for the following tax years:

The Department further recognizes that sales would begin two months before the end of Fiscal Year 2022. Based on historical sales tax collection data, the Department adjusts calendar year collections putting 50 percent into the first fiscal year and fifty percent into

the second fiscal year. Thus, the Department estimates the following increases, including both low and high estimates, for the following fiscal years:

Chart 11

FY 30	$52,182,757.79	$17,394,252.60	$2,174,281.57	$1,739,425.26	$73,490,717	$260,913,788.95	$68,359,412.71

Section 2.6 further states that all revenues gained under Section 2 shall be deposited into the Veterans, Infrastructure, and Health Fund. The Department believes that this would

include all license fees, application fees, renewal fees, annual fees, and the 15 percent tax levied. The Department does not believe this would include the 4.225% state sales tax.

The Department notes that monies in the Veterans, infrastructure, and Health Fund shall be distributed in the following manner:

a. Amounts necessary to cover any Department of Health and Senior Services costs related to the administration of Section 2.
b. Amounts necessary for the creation of a reserve fund within the Department of Health and Senior Services to ensure there is enough working capital to administer Section 2.
c. 3/15th of the remaining balance to any local jurisdiction with recreational marijuana sales.
d. Any remaining balance will then be distributed
    a. 1/3rd to the Missouri Veterans' Commission
    b. 1/3rd to the State Road Fund
    c. 1/3rd to the Department of Health and Senior Services for grants to non-profits and other agencies in relation to drug addiction treatment.

The Department is unable to determine the amounts necessary for the Department of Health and Senior Services to administer Section 2 and the amounts necessary for the reserve fund. The Department will show the maximum amount of sales tax related revenues that could be distributed if all administration fees and reserve fund needs were met by the facility licensing fees.

Chart 13

Maximum Distribution Amounts Based on 15% Tax Collections (Low)							
Fiscal Year	**Veterans, Infrastructure and Health Fund**	**DHSS Administrative Costs**	**DHSS Reserve Fund**	**Local Jurisdictions**	**Missouri Veterans' Commission**	**State Road Fund**	**DHSS Addiction Treatment Grants**
FY 21	$0	$0	$0	$0	$0	$0	$0
FY 22	$7,318,080	Unknown	Unknown	$1,463,616	$1,951,488	$1,951,488	$1,951,488

As a result of the Department's inability to determine or estimate the administrative costs of the Department of Health and Senior Services and the amounts necessary for the reserve fund, the distribution(s) shown above are subject to change significantly.

Section 10 states that the adult use of recreational marijuana is not unlawful and further allows individuals who have been arrested, charged, or found guilty for any offense that would no longer be illegal after the effective date of Section 2 to apply for and be granted an expungement of their records specific to the aforementioned offenses. The Department defers to the Department of Corrections and the State Public Defender's Office to estimate the impact of Section 10.

https://www.kff.org/other/state-indicator/distribution-by-age/?dataView=1&currentTimeframe=0&sortModel=%7B%22colId%22:%22Location%22,%22sort%22:%22asc%22%7D

https://census.missouri.edu/population-by-age/report.php?s=29&y=2018&d=&a=5b

Officials from the **Department of Public Safety - Office of Director** indicated they see no fiscal impact due to this initiative petition. They also provided the following comments from Missouri State Highway Patrol officials.

Department of Public Safety - Division of Missouri State Highway Patrol indicated:

The Patrol's Criminal Justice Information Services Division (CJIS) processes all requests for expungements for criminal history records, and the requests are processed by a CJIS Technician. This person reviews criminal history records, contacts agencies associated with the arrests or convictions, and collects all necessary data for court orders.

As of September 2019, there were 234,808 marijuana-related arrest charges in the Central Repository. The expungement process takes approximately 90 minutes, so 1 full-time employee (FTE) could handle 1,243 expungements per year.

- 1,864 hours (average work hours per year) x 60 minutes per hour = 111,840 minutes per year.

- 111,840 minutes per year / 90 minutes per expungement = 1,243 expungements per year per FTE

- 234,808 records / 1,243 per FTE per year = 189 FTE

Additionally, the Patrol Records Division (PRD) processes all petitions and court orders relating to expungement of marijuana-related traffic arrests.

There are currently 113,922 traffic arrest records in the system. The expungement process takes approximately 30 minutes, so 1 FTE could handle 3,728 expungements per year.

- 111,840 minutes per year / 30 minutes per expungement = 3,728 expungements per year per FTE

- 113,922 records / 3,728 per FTE per year = 31 FTE

The Patrol would also need to replace all 10 of its canines. The Patrol's canines are currently trained using Cannabis/Marijuana as one of the drugs to which they alert. If this initiative were to pass, each canine would have to be retired and replaced. The purchase and initial training for a canine is approximately $22,000. Since the Patrol contracts its canine training, the time to train all 10 canines could take up to 3 years.

As a result, the anticipated total initial cost to the Patrol will be **$14,268,898**, as follows:

$12,730,318	Salary and fringe benefits for 189 CJIS Technicians and 31 PRD Technicians
$1,318,580	Expense and Equipment, including rental space, janitorial for the 220 FTE
$220,000	Cost of replacing and training 10 canines
$14,268,898	Total Cost

With the time involved in hiring and training FTE and processing expungements the Patrol anticipates this being a 2-year project, after which time the FTE would be terminated.

Missouri State Highway Patrol - Comments and Concerns:

In 2009, Colorado traffic fatalities involving drivers testing positive for marijuana represented 9% of the total traffic fatalities. Recreational marijuana use was legalized in 2012. By 2016, that number more than doubled to 21%.

Marijuana-related traffic deaths increased 66% in the four-year average (2013-2016) since Colorado legalized recreational marijuana compared to the four-year average (2009-2012) prior to legalization.

Marijuana-related deaths when a driver tested positive for marijuana more than doubled from 55 deaths in 2013 to 125 deaths in 2016.

The yearly number of marijuana related hospitalizations increased 72% after the legalization of marijuana, (2009-2012) vs. (2013-2016).

Colorado youth past month marijuana use for 2014/2015 was 55% higher than the national average.

The average THC levels in marijuana has increased significantly over the years: 1969-0.8%, 1995-4%, 2013-13%; 2017-20+%; Oil, 1995-13%, 2013-52%; highest Plant 38%, highest oil 95%+.

In Missouri, medical marijuana was legalized by Amendment 2 and took effect December 2018. As of June 10, 2019, 12 states have legalized recreational marijuana and 29 states have legalized medical marijuana. In a roadside 2013-2014 NHTSA roadside survey, 20% of the nighttime and weekend drivers tested positive for drugs. Interestingly, the number of daytime drugged drivers was approximately the same amount as night and weekend drugged drivers. A roadside study in Colorado and Washington, the first two states to legalize marijuana for recreational use, showed the primary increase of marijuana users happened to their daytime drivers. The percent of drivers that tested positive for marijuana during the day went from 8%, before recreational marijuana sales, to 23%, 6-12 months after marijuana was legalized. There was a 48% increase in weekend nighttime drivers testing positive for THC or 11-OH-THC (an active metabolite of THC) from 2007 to 2014. Montana legalized medical marijuana in 2004 and from 2007-2010, the presence of marijuana in DUI suspects increased over 100%. Also, the number of DUI suspects who tested positive for alcohol and marijuana increased by over 180%.

Medical marijuana has been legal in the state of Colorado since 2000. On November 12, 2012, the state of Colorado passed Amendment 64, which legalized private use of marijuana. Per the Colorado State Patrol's driving under the influence statistics, marijuana DUI citations increased 25.5% from 2014 to 2018 and marijuana and alcohol citations increased 112% in the same time range. As marijuana becomes legalized, its use increases.

The three years after Colorado legalized marijuana for recreational use (2013-2015), its use increased in youth ages 12-17, by 12%, in young adults aged 18-25 by 16%, and adults

26 in older by 71%. By removing the recommended acceptable ages of use, zoning regulations, packaging, and advertising of cannabis/marijuana, the risk of use and abuse of marijuana by the youth of Missouri is substantially increased. This category of Missourians, who recent studies have shown significant long-term cognitive impairment when marijuana is ingested during the developmental years, would be affected.

2(7) The Patrol recommends replacing the word "specifically" with "which has, is or can be used in. . ." There are many items, products, and chemicals that can be used with marijuana, but are not developed specifically for marijuana. (page 14)

3(1)(d) The Patrol recommends replacing the word "intoxicated" with "impaired. (page 15)

3(3) The Patrol recommends replacing the word "intoxicated" with "impaired". (page 15)

4(24) The Patrol recommends addressing the need to prohibit the importation of marijuana from outside Missouri. (page 22)

9(1)(b) There is no definition for what qualifies as a non-violent crime. This information would be critical for the Department of Health and Senior Services in determining a disqualifying felony offense. In addition, there are no provisions for conducting criminal background checks under section nine. (page 25)

9(5) This section specifies the type of container the marijuana is required to be sold in, however, there are no provisions or requirements about the marijuana remaining in the same packaging one the sale to an individual has been made. The Patrol recommends language requiring marijuana to remain in its original packaging. For individuals who produce for themselves it is recommending having guidelines on the type of container or packaging if carried in public. (page 25)

The Patrol recommends a $75 fee, similar to the criminal history background check fee, be implemented for the cost of researching and reviewing criminal histories, as well as contacting various agencies associated with arrests (in researching other states with similar expungement requirements, they all charge a fee to offset the cost of the time required to process the expungements - their fees ranged from $50 to $450 per petition per arrest date).

This initiative provides specific employment protections for those who use Cannabis/Marijuana. Such use while serving in any law enforcement related position not only creates public safety concerns, but also quality control and security issues when working with highly sensitive material or information. Additionally, the Patrol receives federal grant funding, subject to audits, that require a drug free workplace policy. For these reasons, the Patrol feels it is essential that it be allowed to continue administering drug testing for new employees, as well as random tests, critical incident tests, etc.

Additionally, the initiative does not contain any language concerning the amount of marijuana an individual may transport, purchase or sell. Also, there is no language as to where the marijuana may be transported. A lack of guidance may allow for Missouri

marijuana facilities to distribute marijuana outside of the state, or allow other states to distribute their marijuana in Missouri. A lack of such language could lead to Missouri being a distribution starting point for states where marijuana remains illegal.

Finally, if passed, the initiative petition will remove Cannabis/Marijuana from Missouri Revised Statutes and create conflict with both Federal and State laws, such as the use or possession of a firearm. As the Patrol has officers assigned to federal task forces that may be involved in a federal drug operation, there are concerns over potential civil litigation resulting from these types of operations, as marijuana is still classified as a Schedule I controlled substance, and illegal under federal law.

Officials from the **Department of Social Services** indicated they do not anticipate a fiscal impact due to this initiative petition.

Officials from the **Governor's office** indicated there should be no added costs or savings to their office.

Officials from the **House of Representatives** indicated no fiscal impact to their office.

Officials from the **Department of Conservation** indicated that no adverse fiscal impact to their department would be expected as a result of this proposal.

Officials from the **Department of Transportation** indicated:

Summary
Elements within the initiative petition submitted by Deirdre Hirner present a variance of state law with the Federal Motor Carrier Safety Regulations (FMCSRs). Should this petition pass a vote of the People and become state law, Missouri's share of federal Motor Carrier Safety Assistance Program (MCSAP) funding is at risk. The fiscal impact ranges from approximately $350,000 to $7 million.

Background
MCSAP funding is received and distributed by the Missouri Department of Transportation to fund commercial vehicle safety and enforcement activities performed by the MoDOT Motor Carrier Services and Highway Safety and Traffic divisions; the Missouri State Highway Patrol; and the commercial vehicle enforcement police teams of St. Louis City, Kansas City and St. Louis County.

In order to receive the funding, Missouri must enforce FMCSRs in whole. Language with respect to the expungement of marijuana convictions within the initiative petition would prevent enforcement of 49 CFR § Parts 391 and 392. These federal regulations relate to the transportation of and use of controlled substances by commercial motor vehicle drivers.

The expungement language, found in the petition in the section entitled *Personal Use of Marijuana* on page 27, 10-(7) and (8), would keep the marijuana-related convictions of commercial motor vehicle (CMV) drivers from appearing in their criminal records and

force Missouri agencies to forgo enforcement of FMCSRs pertaining to the use of disqualified drivers.

Penalty
Per 49 CFR § 350.215 – The penalty imposed upon States found to be in noncompliance can be as harsh as withholding all MCSAP funding; or
Withholding up to 5 percent of MCSAP funds during the fiscal year that the FMCSA notifies the State of its noncompliance;
Up to 10 percent of MCSAP funds for the first full fiscal year of noncompliance;
Up to 25 percent of MCSAP funds for the second full fiscal year of noncompliance; and
Not more than 50 percent of MCSAP funds for the third and any subsequent full fiscal year.

MCSAP funding, Using Missouri's MCSAP apportionment for Fiscal Year 2018 as a base, a **full withholding places $6,934,545** at risk. This is the steepest penalty possible.
If the less stringent withholding took effect, the results would be as follows:

- **5 percent** - $346,727 – during the fiscal year that FMCSA notifies the State of noncompliance;
- **10 percent** - $693,454 – during the first full fiscal year of non-compliance;
- **25 percent** - $1,733,636 – during the second full fiscal year of non-compliance; and
- **Not more than 50 percent** – or $3,467, 272 for the third and any subsequent full fiscal year of non-compliance.

BASIS FOR A POSSIBLE FISCAL IMPACT

Federal Motor Carrier Safety Regulations and Their Adoption in Missouri
Regardless of Missouri's legal status on cannabis, marijuana remains a controlled substance at the federal level and is illegal to possess, use or transport across state lines – whether it is intended for medicinal or recreational use.

The U.S. Department of Transportation prohibits the use of cannabis by commercial motor vehicle drivers as the U.S. Drug Enforcement Administration currently considers THC, or tetrahydrocannabinol, the principal psychoactive compound in marijuana, to be a Schedule I controlled substance.

The following DOT regulations in Title 49 CFR prohibit the use and possession of marijuana.

§382.213 Controlled substance use.

(a) No driver shall report for duty or remain on duty requiring the performance of safety sensitive functions when the driver uses any drug or substance identified in 21 CFR 1308.11 Schedule I.

§392.4 Drugs and other substances.

(a) No driver shall be on duty and possess, be under the influence of, or use, any of the following drugs or other substances:

(1) Any 21 CFR 1308.11 Schedule I substance;

Part 382 applies to drivers operating in both interstate and intrastate commerce.

Part 392 is specific to interstate transportation.

Though Part 392 is specific to interstate transportation, by virtue of Missouri's adoption of the FMCSRs through 307.400 RSMo, the regulation applies to intrastate transportation as well. No intrastate commercial motor vehicle driver can possess, be under the influence of, or use marijuana.

Disqualification of a CMV Driver

Title 49 CFR Part 391.15 – Disqualification of Drivers, addresses disqualification of commercial motor vehicle drivers. A driver, convicted of a disqualifying offense is disqualified for one year from the date of conviction for first offenders and three years after the date of conviction if, during the previous three years preceding the conviction date, the driver was convicted of a disqualifying offense.

One of the disqualifying offenses referenced is transporting, possessing or using a Schedule 1 substance while on duty:

49 CFR 391.15(c)(2)(iii) Transportation, possession, or unlawful use of a 21 CFR 1308.11 Schedule I identified controlled substance, amphetamines, narcotic drugs, formulations of an amphetamine, or derivatives of narcotic drugs while the driver is on duty, as the term on-duty time is defined in § 395.2 of this subchapter;

A CMV driver convicted of any of the above offenses specific to marijuana while on duty is a disqualified driver. The disqualification applies even if the marijuana offense occurred in a state where the disqualifying conviction was for an act/condition that later became legal.

If prior marijuana convictions are wholly expunged from criminal records, the records of CMV drivers who had been convicted of marijuana-related offences would not retain this information, yet the driver is technically not qualified to operate a CMV. Further, neither MoDOT Motor Carrier Services nor other motor carrier enforcement agencies could know of the convictions when making enforcement determinations.

Officials from the **Office of Administration** indicated this proposal amends Article XIV, Section 1 of the Missouri Constitution that was voter approved in November 2018 and adds additional language in Section 2 for recreational marijuana.

Section 1.3 states that all public records produced or retained under Section 1 shall become subject to the Missouri Sunshine Law on December 2, 2020. Section 1.3 changes qualified

patient identification cards from an annual renewal to every three years. Section 1.3 also changes primary caregiver identification cards from an annual renewal to every three years; the card fee is also increased from $25 to $75. Budget and Planning (B&P) defers to the Department of Health and Senior Services (DHSS) for the estimated impact from these provisions.

Section 1.5 would allow out-of-state medical patients to purchase medical marijuana within Missouri. B&P notes that this could increase funding to the Missouri Veterans' Health and Care Fund as well as state and local sales tax collections by an unknown amount if out-of-state patients subsequently purchase medical marijuana within Missouri.

Section 2.1 would legalize the use of recreational marijuana for individuals over the age of 21.

Section 2.4 states that the number of recreational marijuana facility licenses (cultivation, marijuana-infused products, and dispensaries) must equal the number of licenses granted under medical marijuana (Section 1). B&P notes that per Section 1, the minimum number of cultivation facility licenses is 60, dispensary licenses is 192, and marijuana-infused product facility licenses is 86. In addition, Section 2.4 creates a minimum number of microbusiness facility licenses granted over a period of time. Section 2.4 further details the amount of application and annual fees required. Table 1 lists the fees per facility type and the associated estimated minimum revenue. B&P defers to DHSS for a more detailed analysis of the estimated impacts from these provisions.

Table 1: Facility Fees

Facility Type	Application/ Renewal Fees		Annual Fee	# Min Licenses Allowed	Estimated Minimum Revenue		
	Years 1-3	Years 4+			Application Fee	Renewal Fee (Every 3 years)	Annual Fee
Cultivation Facility	$10,000	$5,000	$25,000	60	$600,000	$300,000	$1,500,000
Dispensary	$6,000	$3,000	$10,000	192	$1,152,000	$576,000	$1,920,000
Marijuana-Infused Product Facility	$6,000	$3,000	$10,000	86	$516,000	$258,000	$860,000
Microbusinesses *Note: Up to an additional 48 microbusiness licenses may be issued if DHSS determines there is a market.*	$1,500	$2,500	$2,500	96	$144,000	$240,000	$240,000

Section 2.5 allows local jurisdictions to prohibit the operation of non-medical marijuana facilities upon voter approval at a general election.

Section 2.6 establishes an excise tax rate of 15% upon the retail price of non-medical marijuana. Section 2.6 notes this is in addition to state and local sales taxes that apply to retail sales. B&P notes that the language refers to "general state and local sales and use taxes". For the purpose of this fiscal note, B&P assumes that general means all state and

local sales taxes levied and not just those levies that are directed to the state (or local) general revenue fund.

Based on research, B&P was able to find forecasts for the U.S. legal market for cannabis[1]. According to such forecasts, the U.S. market for legal marijuana will be approximately $24.5 billion in calendar year 2021 and grow up to $47.3 billion by calendar year 2027. Based on information from the Substance Abuse and Mental Health Services Administration[2], from 2016-2017 approximately 13.95% of Missouri residents and 14.73% of all U.S. residents surveyed have used marijuana within the last year. Using the populations of Missouri residents age 18 and over compared to the U.S. population age 18 and over, B&P estimates that the market for legal marijuana in Missouri is 1.79% of the total U.S. market. Therefore, B&P estimates that the Missouri market for legal marijuana would be approximately $439.5M in calendar year 2021 ($24.5 billion x 1.79%) and up to $848.4M by calendar year 2027 ($47.3 billion x 1.79%).

Based on further research[3], B&P estimates that there could be between 61,700 to 122,500 medical marijuana users in Missouri. Using these estimates, and the estimates shown above, B&P estimates that the Missouri market for medical marijuana would be between 0.17% and 0.34% of the total U.S. Market for legal marijuana. Therefore, B&P estimates that the total Missouri market for recreational marijuana would be 1.46% to 1.62% of the total U.S. market. Table 1 shows the estimated U.S. and Missouri markets for marijuana.

Table 2: Estimated Marijuana Market Size for the U.S. and Missouri

Calendar Year	Estimated U.S. Market Size	Estimated MO Market Size	Estimated MO Medical Market Size	Estimated MO Recreational Market Size
2021	$24,500,000,000	$439,465,251	$41,480,436	$ 397,984,815
2022	$28,300,000,000	$507,627,209	$61,066,553	$ 446,560,656
2023	$32,100,000,000	$575,789,166	$80,652,669	$ 495,136,497
2024	$35,900,000,000	$643,951,123	$100,238,785	$ 543,712,338
2025	$39,700,000,000	$712,113,081	$119,824,901	$ 592,288,179
2026	$43,500,000,000	$780,275,038	$139,411,018	$ 640,864,020
2027	$47,300,000,000	$848,436,996	$158,997,134	$ 689,439,861

B&P notes that Section 2.4 states that DHSS must begin accepting facility applications within 365 of December 3, 2020 (the effective date of Section 2) and must grant application approvals within one-hundred and fifty days of their submission. Therefore, B&P estimates that sales of recreational marijuana will not begin until May 2022.

Applying the excise tax rate of 15% plus the state sales tax rate of 4.225% and excluding the estimated market for medical marijuana, B&P estimates that this proposal may increase

[1] https://cannabusinessplans.com/cannabis-legal-market-size-projections/
[2] https://www.samhsa.gov/data/report/comparison-2015-2016-and-2016-2017-nsduh-population-percentages-50-states-and-district

state revenues by $57.2M in calendar year 2022. By calendar year 2027, B&P estimates that this proposal may increase state revenues by $132.5M. This proposal could also increase local revenues by $11.7M in calendar year 2021 and $27.1M by calendar year 2027; these estimates assume that no local jurisdictions opt-out of recreational marijuana. Table 3 shows the estimated revenues generated by calendar year.

Table 3: Estimated Calendar Year Revenues

Fund	CY 2022*	CY 2023	CY 2024	CY 2025	CY 2026	CY 2027
GR (3.0% tax)	$8,931,213	$14,854,095	$16,311,370	$17,768,645	$19,225,921	$20,683,196
Education (1.0% tax)	$2,977,071	$4,951,365	$5,437,123	$5,922,882	$6,408,640	$6,894,399
Conservation (0.125% tax)	$372,134	$618,921	$679,640	$740,360	$801,080	$861,800
Parks, soil, water (0.1% tax)	$297,707	$495,136	$543,712	$592,288	$640,864	$689,440
Veterans, Infrastructure, and Health Fund (15.0% tax)	$44,656,066	$74,270,475	$81,556,851	$88,843,227	$96,129,603	$103,415,979
TSR (total 4.225% state sales tax)	**$57,234,191**	**$95,189,992**	**$104,528,697**	**$113,867,402**	**$123,206,108**	**$132,544,813**
Local Revenue (pop. weighted local rate 3.93%)	$11,699,889	$19,458,864	$21,367,895	$23,276,925	$25,185,956	$27,094,987

*Assumes 8 months of sales from May 2022 through December 2022.

However, B&P notes that sales would start two months before the end of FY 2022. Based on historical sales tax collection data, B&P adjusts calendar year collections 50% into the first fiscal year and 50% into the second fiscal year. Therefore, B&P estimates that this proposal will increase state revenues by $14.3M in FY 2022. BY FY 2028, this proposal may increase state revenues by $132.5M. This proposal may also increase local revenues by $2.9M in FY 2022 and up to $27.1M by FY 2028, assuming no local jurisdictions opt out of recreational marijuana. Table 4 shows the estimated revenue generated by fiscal year.

Table 4: Estimated Fiscal Year Revenues

Fund	FY 2022	FY 2023	FY 2024	FY 2025	FY 2026	FY 2027	FY 2028
GR	$2,232,803	$14,125,457	$15,582,733	$17,040,008	$18,497,283	$19,954,558	$20,683,196
Education	$744,268	$4,708,486	$5,194,244	$5,680,003	$6,165,761	$6,651,519	$6,894,399
Conservation	$93,033	$588,561	$649,281	$710,000	$770,720	$831,440	$861,800
Parks, soil, water	$74,427	$470,849	$519,424	$568,000	$616,576	$665,152	$689,440
Veterans, Infrastructure, and Health Fund	$11,164,016	$70,627,287	$77,913,663	$85,200,039	$92,486,415	$99,772,791	$103,415,979
TSR	**$14,308,548**	**$90,520,639**	**$99,859,344**	**$109,198,050**	**$118,536,755**	**$127,875,461**	**$132,544,813**
Local Revenue	$2,924,972	$18,504,349	$20,413,380	$22,322,410	$24,231,441	$26,140,471	$27,904,987

Section 2.6 further states that the taxes and fees levied under Section 2 shall be deposited into the newly created Veterans, Infrastructure, and Health Fund. B&P notes that this would include all license application and renewal fees, annual facility fees, and the 15% excise tax. This would not include the 4.225% state sales tax.

Monies in the Veterans, Infrastructure, and Health Fund are to be distributed in the following manner:

1. Amounts necessary to cover any DHSS costs related to Section 2 administration.
2. Amounts necessary for the creation of a reserve fund within DHSS to ensure there is enough working cash balance to administer Section 2.
3. $3/15^{th}$ of the remaining balance to any local jurisdiction with recreational marijuana sales.
4. Any remaining balance will then be distributed:

a. 1/3 to the Missouri Veterans Commission
b. 1/3 to the State Road Fund
c. 1/3 to DHSS for grants to non-profits and other agencies in relation to drug addiction treatment.

B&P is unable to estimate the amount of revenues that would be required to meet DHSS administrative costs and reserve fund needs. Therefore, for the purpose of this fiscal note, B&P will show the maximum amount of sales tax related revenues that could be distributed if all administration fees and reserve fund needs were met by the facility licensing fees.

Table 5: Maximum Distribution Amounts Based on 15% Excise Tax Collections

	FY 2022	FY 2023	FY 2024	FY 2025	FY 2026	FY 2027	FY 2028
Veterans, Infrastructure, and Health Fund	$11,164,016	$70,627,287	$77,913,663	$85,200,039	$92,486,415	$99,772,791	$103,415,979
Estimated Maximum Distributions							
DHSS Administrative Costs*	Unknown	Unknown	Unknown	Unknown	Unknown	Unknown	Unknown
DHSS Reserve Fund*	Unknown	Unknown	Unknown	Unknown	Unknown	Unknown	Unknown
Local Jurisdictions**	$2,232,803	$14,125,457	$15,582,733	$17,040,008	$18,497,283	$19,954,558	$20,683,196
Missouri Veterans Commission	$2,977,071	$18,833,943	$20,776,977	$22,720,010	$24,663,044	$26,606,078	$27,577,594
State Road Fund	$2,977,071	$18,833,943	$20,776,977	$22,720,010	$24,663,044	$26,606,078	$27,577,594
DHSS Drug Treatment Grants	$2,977,071	$18,833,943	$20,776,977	$22,720,010	$24,663,044	$26,606,078	$27,577,594

*For the purpose of this fiscal note, B&P will assume that DHSS costs are fully met through the licensing fee collections. Actual distributions may be significantly different.

**Assumes no local jurisdictions opt-out.

B&P notes that depending on administrative and reserve fund needs, actual distributions may be significantly different from the estimates shown above.

Section 2.10 specifies that adult use of recreational marijuana is not unlawful and allows for individuals who have been arrested, charged, or found guilty for any offense that would no longer be illegal after the effective date of Section 2 to apply for and be granted expungement of their records pertaining to such offenses. B&P defers to the Department of Corrections and the State Public Defender's Office for the estimated impact from these provisions.

Officials from the **Office of State Courts Administrator** indicated the initiative petition proposes a constitutional amendment to Article XIV to modify the current provisions of the Missouri Constitution relating to legalization of marijuana.

The average of all marijuana related charge codes from 2012 to 2016 for Circuit case types is 11,537 per year. The average of all marijuana related charge codes from 2012 to 2016 for Associate case types is 8,765. We are unable to determine what number of these charges were for someone over the age of twenty-one.

The following Criminal Court Costs would be affected by this proposed legislation:

Criminal Court Costs		
Felony Case Costs	**Amount of Cost**	**Disburse to State/County**
Basic Civil Legal Services Fund surcharge	$10.00	State of Missouri - Basic Civil Legal Services Fund
Clerk Fee	$45.00	State of Missouri - General Revenue $36, County $9
County Fee	$75.00	County
Court Automation Fund Fee	$7.00	State of Missouri -Statewide Court Automation Fund
Court Reporter fee (All Circuit Division Cases)	$15.00	State of Missouri - General Revenue
Crime Victims' Compensation Fund surcharge	$7.50	State of Missouri - Crime Victims' Compensation Fund
DNA Profiling Analysis Fund surcharge	$30.00	State of Missouri - DNA Profiling Analysis Fund
Brain Injury Fund surcharge	$2.00	State of Missouri - Head Injury Fund
Independent Living Center Fund surcharge	$1.00	State of Missouri - Independent Living Center Fund
Motorcycle Safety Trust Fund surcharge	$1.00	State of Missouri - Motorcycle Safety Trust Fund
Peace Officer Standards & Training (POST) Commission surcharge	$1.00	State of Missouri - Peace Officer Standards & Training Fund
Prosecuting Attorney and Circuit Attorneys' Retirement Fund	$4.00	Pros. Attorney Retirement Fund
Prosecuting Attorney Training Fund surcharge	$1.00	State of Missouri - Prosecuting Attorney Training Fund
Sheriffs' Fee	$75.00	County
Sheriffs' Retirement Fund surcharge (except 21st Circuit)	$3.00	Sheriffs' Retirement Fund
Spinal Cord Injury Fund surcharge	$2.00	State of Missouri - Spinal Cord Injury Fund
Total	**$279.50**	
Misdemeanor Case Costs		

Basic Civil Legal Services Fund surcharge	$8.00	State of Missouri - Basic Civil Legal Services Fund
Clerk Fee	$15.00	$12 State of Missouri / $3 County
County Fee	$25.00	County
Court Automation Fund Fee	$7.00	State of Missouri - Court Automation Fund
Crime Victims' Compensation Fund surcharge	$7.50	State of Missouri - Crime Victims' Compensation Fund
DNA Profiling Analysis Fund surcharge	$15.00	State of Missouri - DNA Profiling Analysis Fund
Brain Injury Fund surcharge	$2.00	State of Missouri - Brain Injury Fund
Independent Living Center Fund surcharge	$1.00	State of Missouri - Independent Living Center Fund
Motorcycle Safety Trust Fund surcharge	$1.00	State of Missouri - Motorcycle Safety Trust Fund
Peace Officer Standards and Training (POST) Commission surcharge	$1.00	State of Missouri - Peace Officer Standards & Training Fund
Prosecuting Attorney and Circuit Attorneys' Retirement Fund	$4.00	Pros. Attorney Retirement Fund
Prosecuting Attorney Training Fund surcharge	$1.00	$0.50 State of Missouri / $0.50 County
Sheriffs' fee	$10.00	County
Sheriffs' Retirement Fund surcharge (except 21st Circuit)	$3.00	Sheriffs' Retirement fund
Spinal Cord Injury Fund Surcharge	$2.00	State of Missouri - Spinal Cord Injury Fund
Total	**$102.50**	
Municipal Case (Filed in Associate Division) Costs		
Clerk Fee	$15.00	$12 State of Missouri / $3 County
Court Automation Fund Fee	$7.00	State of Missouri - Court Automation Fund
Crime Victims' Compensation Fund surcharge	$7.50	State of Missouri - Crime Victims' Compensation Fund
Peace Officer Standards and Training (POST) Commission surcharge	$1.00	State of Missouri - Peace Officer Standards & Training Fund

Sheriffs' Retirement Fund surcharge	$3.00	Sheriffs' Retirement Fund
Total	**$33.50**	
Criminal Costs Not Included Above		
Drug Testing by a State Lab	$150.00	State of Missouri
Drug Testing by a Private Lab	Actual Costs	County Reimbursement
Law Enforcement Arrest Costs:		
Highway Patrol		Amt. Approved by the Court
Local (County)		Amt. Approved by the Court
Municipal		Amt. Approved by the Court

The decrease in the court fees, depending on the number of cases, will result in an unknown loss to the courts.

We also assume there will be an unknown decrease in caseload for the courts because the courts will no longer process these cases; however, at this time we are unable to calculate the decrease.

Any significant increase or decrease will be reflected in future budget requests.

Officials from the **Missouri Senate** indicated they anticipate no fiscal impact.

Officials from the **Secretary of State's office** indicated unless a special election is called for the purpose, Referendums are submitted to the people at the next general election. Article III section 52(b) of the Missouri Constitution authorizes the general assembly to order a special election for measures referred to the people. If a special election is called to submit a Referendum to a vote of the people, Section 115.063.2 RSMo. requires the state to pay the costs. The cost of the special election has been estimated to be $7.8 million based on the cost of the 2016 Presidential Preference Primary.

Their office is required to pay for publishing in local newspapers the full text of each statewide ballot measure as directed by Article XII, Section 2(b) of the Missouri Constitution and Section 116.230-116.290, RSMo. Funding for this item is adjusted each year depending upon the election cycle. A new decision item is requested in odd numbered fiscal years and the amount requested is dependent upon the estimated number of ballot measures that will be approved by the General Assembly and the initiative petitions certified for the ballot. In FY (fiscal year) 2014, the General Assembly changed the appropriation so that it was no longer an estimated appropriation.

In FY19, over $5.8 million was spent to publish the full text of the measures for the August and November elections. They estimate $65,000 per page for the costs of publications based on the actual cost incurred for the one referendum that was on the August 2018 ballot.

Their office will continue to assume, for the purposes of this fiscal note, that it should have the full appropriation authority it needs to meet the publishing requirements. Because these requirements are mandatory, they reserve the right to request funding to meet the cost of their publishing requirements if the Governor and the General Assembly again change the amount or continue to not designate it as an estimated appropriation.

Officials from the **Office of the State Public Defender** indicated if passed, this constitutional amendment would have a positive impact on the workload of the Missouri State Public Defender (MSPD), since possession, manufacture, distribution, etc. of cannabis would no longer be unlawful, offenses that the Public Defender currently uses resources to defend and no longer would need to.

The exact positive impact is difficult to predict because they track their cases by statutory offense and most drug offenses are not limited to marijuana.

However, their best estimate, using FY2018 MSPD data, is that this would reduce their caseload by 4,046 cases (149 A/B felonies, 2,911 C/D felonies, and 986 probation violations).

In *The Missouri Project: A Study of the Missouri Public Defender System and Attorney Workload Standards*, prepared by RubinBrown on behalf of the American Bar Association's Standing Committee on Legal Aid and Indigent Defendants, the relevant workload standards are: A/B felonies, 47.6 hours per case; C/D felonies, 25.0 hours per case; and probation violations, 9.8 hours per case). (The workload standards include only case related tasks over which an attorney has some control (they exclude, for example, in court and travel time) and thereby reflect a conservative estimate.)

Applying those workload standards to the 4,046 cases, those cases require 89,530 attorney hours. With 2,080 hours per attorney available each year, that represents the work of 43 attorneys.

While in theory they might also handle fewer appeals of guilty verdicts after trial, the fact is that only a very small percentage of their cases proceed to trial and it's likely that only a small percentage of those cases are appeals from marijuana convictions. Therefore this minimal positive impact is not being taken into account in this estimate.

However, the Missouri State Public Defender already is significantly understaffed by 289 attorneys under the workload standards developed in *The Missouri Project*. (The 289 attorneys is a conservative estimate of the under-staffing in that it assumes they contract all conflicts to private attorneys, which they are not able to do for budgetary reasons).

Therefore, despite the positive impact on the workload of the Missouri State Public Defender, because they are already understaffed that savings in attorney time would not allow the Public Defender to reduce its workforce and therefore would not translate into an actual cost savings. However it does reduce by the cost of 43 attorneys how much money needs to be added to their budget in order to meet *The Missouri Project*'s workload standards.

Officials from the **State Treasurer's office** indicated no fiscal impact to their office.

Officials from **Greene County** indicated there is anticipated costs to the County of Greene for this initiative petition, per the following information concerning this initiative petition.: https://static1.squarespace.com/static/5541a76ae4b0175cee8827d0/t/580684e5ff7c50adea98399e/1476822252561/Letter+to+CA+from+Denver+DA.jpgI provided by their County Prosecutor, Dan Patterson.

To fully understand the fiscal impact would require a very detailed study to give the best opportunity to understand the impact to law enforcement, prosecutors and the circuit courts within the proposed changes of this initiative petition, which the linked letter demonstrates occurred in Colorado after similar legislation passed.

County Prosecutor, Dan Patterson provided the following information:

DenverDA
Mitchell R. Morrissey, District Attorney - Second Judicial District
201 W. Colfax Avenue, Dept. 801, Denver, CO 80202
Bus. Phone: 720-913-900
Fax: 720-913-903

October 12, 2016

No on 64 Campaign and SAM Action

California voters are being told that they will see the crime rate go down if they vote to legalize marijuana commercially; this has not been the case in the state of Colorado or the city of Denver. Since the legalization of recreational marijuana in Colorado in 2013 traffic related marijuana deaths have increased 48%, marijuana related emergency room visits have increased 49%, and marijuana related calls to the poison center have increased 100%. According to the Colorado Bureau of Investigations in 2015 statewide homicides in Colorado rose 14.7 % over the previous year. Pueblo, Colorado had the highest homicide rate in the state with 11.1 killings per 100,000 residents. Aurora, Colorado's homicide rate more than doubled from 2014. Additionally more places in Colorado were robbed and more thefts occurred, especially cars, as 193,115 motor vehicles were reported stolen, up 27.7 % in 2015 from the previous year. In 2015, sexual assaults rose 10% in Colorado with Denver, Aurora, Lakewood, Westminster and Pueblo all reporting higher numbers as well.

In the city of Denver since the legalization of recreational marijuana the number of crimes in Denver has grown by about 44 %, according to annual figures the city reported to the National Incident Based Reporting System. In 2015 in Denver alone crime rose in every neighborhood in the city. The murder rate hit a decade high, 1059 more cars were broken into, there were 903 more auto thefts, 321 more aggravated assaults and 231 more homes were broken into compared to 2014.

California voters are also being told that legalizing recreational marijuana will free up law enforcement to work on other criminal activities. Again that has not been the case in Denver. Besides the overall increases in crime we have experience, the Denver police department is dealing with a 900% increase in the unlawful cultivation and manufacture of marihuana concentrate, and a 99% increase in the unlawful distribution of marijuana and marijuana concentrate. The quantity of illegal marijuana seized by the Denver police has increased 3,424% on average per case. The volume of marijuana seized per case has increased from an average of 162 pounds to 5724 pounds. In Denver unlawful public consumption of marijuana citations has increased over 300% per year since the legalization of recreational marijuana. The Denver police department is busier enforcing marijuana laws and investigating crimes directly related to marijuana, including murderers, robberies, and home invasions, than any other time in the history of the city.

Sincerely,

Mitchell R. Morrissey
Denver District Attorney

Officials from **St. Louis County** indicated they see no part of this proposed amendment that would mandate the operations of their county, causing a fiscal impact.

Officials from the **City of Kansas City** indicated this initiative petition may have a positive fiscal impact on their city in an indeterminate amount as a result of increased sales tax revenues; however, such revenues could be offset by increased expenses in an indeterminate amount.

Officials from the **Wellsville-Middletown R-1 School District** indicated in that it is impossible to tell the future. If anything in this petition (were it to pass and become law) is ultimately construed to require public schools to accommodate/facilitate the use of medical marijuana by students or staff, there could be considerable expense involved in the logistics of this accommodation and in the efforts to monitor who can or cannot legally be in possession of and use "medical" marijuana.

Officials from the **Missouri Veterans Commission** indicated:

Michael L. Parson
Governor

Grace Link
Executive Director

MISSOURI VETERANS COMMISSION

205 Jefferson Street, P.O. Drawer 147, Jefferson City, MO 65102-0147
Telephone: (573) 751-3779 www.mvc.dps.mo.gov Fax: (573) 751-6836

October 21, 2019

The Honorable John R. Ashcroft
Secretary of State
600 W. Main Street
Jefferson City, MO 65101

Dear Secretary of State Ashcroft,

Initiative Petitions 2020-125 and 2020-126 (hereinafter, the Initiatives), which are identical in language, will have a disastrous fiscal impact upon the Missouri Veterans Commission. Under the existing medical marijuana program, we anticipate receiving $12,458 in FY20, $2,135,510 in FY21, $2,529,753 in FY22 and $2,929,271 in FY23 from the tax revenues generated from the retail sales of medical marijuana. The Initiatives make no significant changes to that program, but the adverse impact the Initiatives pose to the Commission is in the creation of the non-medical marijuana program. The medical marijuana program is predicated on medical need and the physician certification that marijuana is the appropriate treatment for that medical need. Conversely, the non-medical marijuana program has no requirement for medical need or for physician certification. It is only common sense that those wishing to use marijuana products will forego the inconvenience of establishing medical need and obtaining a physician's certification and avail themselves of the non-medical program regardless of their reason for wanting to use marijuana products. Therefore, we anticipate a significant reduction in the tax revenues generated by the medical marijuana program, perhaps as high as a 90% reduction, should the Initiatives become law.

Moreover, given the significantly different distribution of tax revenues provided for under the non-medical marijuana program, we do not anticipate that our portion of the tax revenues generated under the non-medical program will defray the reduction we would experience under the medical marijuana program. Specifically, the medical marijuana program establishes a 4% tax on all retail sales of medical marijuana and allocates to the Commission all of those proceeds minus 5% to the Department of Revenue and an amount to the Department of Health and Senior Services necessary to defray their costs in regulating the program. Conversely, the non-medical marijuana program establishes a 15% tax on all retail sales of non-medical marijuana and allocates to the Commission one-third of those proceeds minus 2% to the Department of Revenue, an amount to the Department of Health and Senior Services necessary to defray their costs in regulating the program, and 3/15 to the local jurisdiction in which the sale took place. Despite the increased tax rate under the non-medical program, we anticipate receiving a significantly smaller portion of the tax revenues collected given the smaller allocation amount dedicated to the Commission.

Finally, the purpose for which the Commission may use its portion of the tax proceeds will essentially eliminate our ability to initiate construction projects to improve our physical facilities. Specifically, the medical marijuana program allows the Commission to use those proceeds for "for health and care services for military veterans, including the following purposes: operations, *maintenance and capital improvements* of the Missouri veterans homes, the Missouri service officer's program, and other services for veterans approved by the commission, including, but not limited to, health care services, mental health services, drug rehabilitation services, housing assistance, job training, tuition assistance, and housing assistance to prevent homelessness." (Emphasis added) That is essentially everything that the Commission does and clearly affords the Commission the flexibility necessary to address the needs of Missouri's veterans as they change over time. Conversely, the non-medical marijuana program requires the Commission to use its significantly reduced portion of the tax revenues strictly for "*health care and other services* for military veterans and their dependent families". (Emphasis added) This language will severely limit our ability to adjust our facilities to meet the changing needs of Missouri's veterans.

In closing, Initiative Petitions 2020-125 and 2020-126 will adversely impact the ability of the Missouri Veterans Commission to serve the veterans of Missouri for the reasons set forth above. If I can be of any further assistance on this issue, please contact me at (573) 751-4066 at your convenience.

Sincerely,

Grace Link

Grace Link
Executive Director
Missouri Veterans Commission

Officials from the **Missouri Office of Prosecution Services** indicated there is no fiscal impact to their office. The enactment of a new crime [Section 2.10(6)(c)] creates additional responsibilities for county prosecutors which may in turn result in additional costs which are difficult to determine.

Initiative Petition 2020-125
Marijuana Legalization, Regulation, and Taxation

Proposed Statement of Fiscal Impact

Fiscal Impact Information Submitted Pursuant to Section 23.140.2

The amendment's estimated state revenue is $197.9 million when fully implemented, including $27.6 million each for veterans, infrastructure, and health programs. General revenue and other state funds benefit by $48.4 million, and $27.2 million in local revenue is estimated.

ESTIMATED NET EFFECT ON STATE FUNDS

Fund Affected	FY 2022	FY 2023	FY 2024	FY 2025	4-year Total
General Revenue	$9,686,290	$20,993,899	$30,295,000	$38,826,867	$99,802,056
Veterans, Infrastructure, and Health Fund	$6,740,000	$48,305,110	$81,685,223	$122,258,755	$258,989,089
Other State Dedicated Funds	$540,584	$3,639,638	$6,365,681	$9,576,776	$20,122,678
Total Estimated Net Effect on All State Funds	$16,966,874	$72,938,647	$118,345,903	$170,662,397	$378,913,822
Total Estimated Net Effect on All Local Funds	$0	$10,244,526	$18,033,219	$27,207,776	$55,485,521
Total Estimated Net Effect on Federal Funds	$0	$0	$0	$0	$0
Total All Funds	$16,966,874	$83,183,173	$136,379,122	$197,870,174	$434,399,343

ANALYSIS OF FISCAL IMPACT OF MEDICAL MARIJUANA PETITION

The fiscal impact analysis contained herein focuses on estimating the fee and tax revenue resulting from the constitutional amendment proposed in the initiative petition. Table 1 summarizes the revenue and savings estimated by source and by fiscal year.

Table 1 - Summary of Tax, Application and License Fees, Revenue, and Savings by Fund

Purpose	FY 2022	FY 2023	FY 2024	FY 2025	4-year total
Marijuana Cultivation Facilities	$2,100,000	$1,500,000	$1,500,000	$1,800,000	$6,900,000
Marijuana-Infused Products Manufacturing Facilities	$1,376,000	$860,000	$860,000	$1,118,000	$4,214,000

Infrastructure (one-third after local govt.)	$0	$8,445,445	$17,085,215	$27,603,194	$53,133,854
Health (one-third after local govt.)	$0	$8,445,445	$17,085,215	$27,603,194	$53,133,854
subtotal for major purposes	$0	$31,670,418	$64,069,557	$103,511,979	$199,251,954
Total allocated	$6,740,000	$48,305,110	$81,685,223	$122,258,755	$258,989,089

Implementation dates required by Petition 2020-125

Table 3 below identifies the implementation dates prescribed in the petition. All fiscal estimates in this analysis assume that the Department of Health and Senior Services, and all other state and local governments affected by this petition will meet the deadlines required by the petition.

TABLE 3 - Implementation Schedule	
11/3/2020	Election Day - Voter Approval
12/3/2020	30 days after election - effective date of constitutional amendment
270 days after effective date of constitutional amendment	
8/30/2021	DHSS shall make available license application forms and application instructions for Marijuana Cultivation Facilities, Marijuana Testing Facilities, Marijuana Dispensary Facilities, Marijuana-Infused Products Manufacturing Facilities and Marijuana Microbusiness Facilities
365 days after effective date of constitutional amendment	
12/3/2021	DHSS shall begin accepting application forms for Marijuana Cultivation Facilities, Marijuana Testing Facilities, Marijuana Dispensary Facilities, Marijuana-Infused Products Manufacturing Facilities, Marijuana Microbusiness Facilities, Seed-to-Sale tracking systems, and transportation of marijuana from medical marijuana facilities with similar licenses
150 days after DHSS begins accepting application forms it begins approving licenses	
5/2/2022	For any application submitted by the day required under the constitutional provisions, DHSS shall have approved or denied application forms for Marijuana Cultivation Facilities, Marijuana Testing Facilities, Marijuana Dispensary Facilities, Marijuana-Infused Products Manufacturing Facilities, and Marijuana Microbusiness Facilities. All applications must be approved or denied within 150 days of submission to DHSS thereafter.
First November national election date after initial statewide voter approval	
11/8/2022	Local governments can seek elections to prohibit operation of all or any category of marijuana facilities in their jurisdiction.
785 days after effective date of constitutional amendment	
1/27/2023	270 days after DHSS begins issuing licenses (5/2/22) DHSS may issue 6 additional microbusiness licenses per Congressional district.
1,063 days after effective date of constitutional amendment	
11/1/2023	548 days after DHSS begins issuing licenses (5/2/22) DHSS may begin approving licenses for Marijuana Cultivation Facilities, Marijuana Testing Facilities, Marijuana Dispensary Facilities, Marijuana-Infused Products Manufacturing Facilities, Marijuana Microbusiness Facilities, DHSS may issue 6 additional microbusiness licenses per Congressional district.

Cultivation Application and License fees

The proposal provides for the licensing of Marijuana Cultivation Facilities. The DHSS is required to charge a one-time non-refundable application fee of $10,000. Once granted, the DHSS is required to charge an annual license fee of $25,000. Renewal fees are $5,000 after three years.

As seen in Table 3, the DHSS is required to make application forms available no later than 270 days after the effective date of the new constitutional provisions – which will be August 30, 2021. The DHSS is required to begin accepting applications no later than 365 days after the effective date of the new constitutional provisions – which will be December 3, 2021. Both deadlines are in FY 2022 of the Missouri state government budget. It is assumed that no revenues will be received before FY 2022. The proposal also provides that for the first 548 days after the DHSS begins to license facilities it may only accept applications for licensure from entities holding medical marijuana cultivation facility licenses. The first adult use marijuana licenses awarded to entities that are not medical marijuana licensees will begin November 1, 2023 (state fiscal year FY 2024).

Table 4 shows the calculation of the fee revenue estimated at $2.1 million in FY 2022, $1.5 million in FY 2023-FY 2024, and $1.8 million in FY 2025. Other assumptions include:

- The DHSS is expected to license 60 medical marijuana cultivation facilities in compliance with the medical marijuana constitutional provisions. These are the only facilities eligible for licensure for the first and second years after the election.
- Since the application period opens in the middle of the year and the award happens in May, it is assumed that the licensees will pay both the non-refundable application fee and the annual license fee in the same fiscal year.
- During the roll out of the medical marijuana process the department has expressed concern about the level of demand for medical marijuana and placed a University of Missouri market study on its website about the subject. Given the department's stated hesitancy, this analysis assumes no new additional facilities will be licensed during the period. Thus, the revenue estimate is conservative as the department moves slowly to license additional facilities. Only the renewal costs are included in the long-range forecast.

Table 4 shows:

- Application fees - $600,000 in FY 2022 and $0 in FY 2023-FY 2025.
- Renewal fees - $300,000 in FY 2025.
- Annual license fees - $1.5 million from FY 2022 to FY 2025.

Table 4 - Cultivation Facilities - Fee Revenues

	FY 2022	FY 2023	FY 2024	FY 2025
Non-refundable application fee	$10,000	$10,000	$10,000	$10,000
Renewal fee				$5,000
Licenses				
Medical marijuana licenses eligible year 1	60			60
New additional licenses	0	0	0	0
subtotal Non-Refundable Application Fee revenues	$600,000	$0	$0	$300,000
Annual license fee	$25,000	$25,000	$25,000	$25,000
Licenses				
Medical marijuana licenses eligible year 1	60	60	60	60
New additional licenses	0	0	0	0
subtotal Annual License Fee revenues	$1,500,000	$1,500,000	$1,500,000	$1,500,000
Total Cultivation license & fee revenues	$2,100,000	$1,500,000	$1,500,000	$1,800,000

Marijuana-Infused Products Manufacturing Facilities Application and License fees

The proposal provides for the licensing of Marijuana-Infused Products Manufacturing Facilities. The DHSS is required to charge a one-time non-refundable application fee of $6,000. Once granted, the DHSS is required to charge an annual license fee of $10,000. Renewal fees are $3,000 after three years.

As seen in Table 3, the DHSS is required to make application forms available no later than 270 days after the effective date of the new constitutional provisions – which will be August 30, 2021. The DHSS is required to begin accepting applications no later than 365 days after the effective date of the new constitutional provisions – which will be December 3, 2021. Both deadlines are in FY 2022 of the Missouri state government budget. It is assumed that no revenues will be received before FY 2022. The proposal also provides that for the first 548 days after the DHSS begins to license facilities it may only accept applications for licensure from entities holding medical marijuana infused products facility licenses. The first adult use marijuana licenses awarded to entities that are not medical marijuana licensees will begin November 1, 2023 (state fiscal year FY 2024).

Table 5 shows the calculation of the fee revenue estimated at $1.38 million in FY 2022, $860,000 in FY 2023-FY 2024, and $1.1 million in FY 2025. Other assumptions include:

- The DHSS is expected to license 86 medical marijuana-infused products manufacturing facilities in compliance with the medical marijuana constitutional provisions. These are the only facilities eligible for licensure for the first and second years after the election.
- Since the application period opens in the middle of the year and the award happens in May, it is assumed that the licensees will pay both the non-refundable application fee and the annual license fee in the same fiscal year.
- During the roll out of the medical marijuana process the department has expressed concern about the level of demand for medical marijuana and placed a University of Missouri market study on its website about the subject. Given the department's stated hesitancy, this analysis assumes no new additional facilities will be licensed during the period. Thus, the revenue estimate is

conservative as the department moves slowly to license additional facilities. Only the renewal costs are included in the long-range forecast.

Table 5 shows:

- Application fees - $516,000 in FY 2022 and $0 from FY 2023-FY 2025.
- Renewal fees - $258,000 in FY 2025.
- Annual license fees - $860,000 from FY 2022-FY 2025.

Table 5 - Infused Products Manufacturing Facilities - Fee Revenues

	FY 2022	FY 2023	FY 2024	FY 2025
Non-refundable application fee	$6,000	$6,000	$6,000	$6,000
Renewal fee				$3,000
Licenses				
Medical marijuana licenses eligible year 1	86			86
New additional licenses	0	0	0	0
subtotal Non-Refundable Fee revenues	$516,000	$0	$0	$258,000
Annual license fee	$10,000	$10,000	$10,000	$10,000
Licenses				
Medical marijuana licenses eligible year 1	86	86	86	86
New additional licenses	0	0	0	0
subtotal Annual License Fee revenues	$860,000	$860,000	$860,000	$860,000
Total Infused Product Manufacturing license & fee revenues	$1,376,000	$860,000	$860,000	$1,118,000

Marijuana Dispensary Facilities Application and License fees

The proposal provides for the licensing of Marijuana Dispensary Facilities. The DHSS is required to charge a one-time non-refundable application fee of $6,000. Once granted, the DHSS is required to charge an annual license fee of $10,000. Renewal fees are $3,000 after three years.

As seen in Table 3, the DHSS is required to make application forms available no later than 270 days after the effective date of the new constitutional provisions – which will be August 30, 2021. The DHSS is required to begin accepting applications no later than 365 days after the effective date of the new constitutional provisions – which will be December 3, 2021. Both deadlines are in FY 2022 of the Missouri state government budget. It is assumed that no revenues will be received before FY 2022. The proposal also provides that for the first 548 days after the DHSS begins to license facilities it may only accept applications for licensure from entities holding medical marijuana dispensary facility licenses. The first adult use marijuana licenses awarded to entities that are not medical marijuana licensees will begin November 1, 2023 (state fiscal year FY 2024).

Table 6 shows the calculation of the fee revenue estimated at $3.1 million in FY 2022 and $1.9 million in FY 2023-FY2024, and $2.5 million in FY 2025. Other assumptions include:

- The DHSS is expected to license 192 medical marijuana dispensary facilities in compliance with the medical marijuana constitutional provisions. These are the only facilities eligible for licensure for the first and second years after the election.
- Since the application period opens in the middle of the year and the award happens in May, it is assumed that the licensees will pay both the non-refundable application fee and the annual license fee in the same fiscal year.
- During the roll out of the medical marijuana process the department has expressed concern about the level of demand for medical marijuana and placed a University of Missouri market study on its website about the subject. Given the department's stated hesitancy, this analysis assumes no new additional facilities will be licensed during the period. Thus, the revenue estimate is conservative as the department moves slowly to license additional facilities. Only the renewal costs are included in the long-range forecast.

Table 6 shows:

- Application fees - $1,152,000 in FY 2022 and $0 from FY 2023-FY2025.
- Renewal fees: $576,000 in FY 2025.
- Annual license fees - $1.9 million from FY 2022-FY 2025.

Table 6 - Dispensary Facilities - Fee Revenues

	FY 2022	FY 2023	FY 2024	FY 2025
Non-refundable application fee	$6,000	$6,000	$6,000	$6,000
Renewal fee				$3,000
Licenses				
Medical marijuana licenses eligible year 1	192			192
New additional licenses	0	0	0	0
subtotal Non-Refundable Fee revenues	$1,152,000	$0	$0	$576,000
Annual license fee	$10,000	$10,000	$10,000	$10,000
Licenses				
Medical marijuana licenses eligible year 1	192	192	192	192
New additional licenses	0	0	0	0
subtotal Annual License Fee revenues	$1,920,000	$1,920,000	$1,920,000	$1,920,000
Total Dispensary license & fee revenues	$3,072,000	$1,920,000	$1,920,000	$2,496,000

Marijuana Microbusiness Facilities Application and License fees

The proposal provides for the licensing of Marijuana Microbusiness Facilities. The DHSS is required to charge a one-time non-refundable application fee of $1,500. Once granted, the DHSS is required to charge an annual license fee of $2,500. Renewal fees are $2,500 after three years.

As seen in Table 3, the DHSS is required to make application forms available no later than 270 days after the effective date of the new constitutional provisions – which will be August 30, 2021. The DHSS is required to begin accepting applications no later than 365 days after the effective date of the new constitutional provisions – which will be December 3, 2021. Both deadlines are in FY 2022 of the Missouri state government budget. It is assumed that no revenues will be received before FY 2022. The

proposal also provides that for the first 365 days after the DHSS may only accept applications for licensure from entities holding similar medical marijuana facility licenses.

Table 7 shows the calculation of the fee revenue estimated at $192,000 in FY 2022, $120,000 in FY 2023-FY 2024, and $240,000 in FY 2025. Other assumptions include:

- Marijuana Microbusiness Facilities are not included in the medical marijuana program.
- The proposal provides that a minimum of six such licenses be issued within each of Missouri's eight U.S. Congressional districts when licenses are first issued.
- Since the application periods open in the middle of the year it is assumed that the licensees will pay both the non-refundable application fee and the annual license fee in the same year.
- Since application fees are non-refundable additional revenue may be collected in FY 2023 from any applicant that is ultimately refused a license. This possible revenue is not calculated into this revenue estimate.
- During the roll out of the medical marijuana process the department has expressed concern about the level of demand for medical marijuana and placed a University of Missouri market study on its website about the subject. Given the department's stated hesitancy, this analysis assumes no new additional facilities will be licensed during the period. Thus, the revenue estimate is conservative as the department moves slowly to license additional facilities. Only the renewal costs are included in the long-range forecast.

Table 7 shows:

- Application fees - $72,000 in FY 2022 and $0 from FY 2023-2025.
- Renewal fees - $120,000 in FY 2025.
- Annual license fees - $120,000 from FY 2022-FY 2025.

Table 7 - Microbusiness Facilities - Fee Revenues

	FY 2022	FY 2023	FY 2024	FY 2025
Non-refundable application fee	$1,500	$1,500	$1,500	$1,500
Renewal fee				$2,500
Licenses				
Year 1 - estimate (minimum 6/Congressional Dist.)	48			48
New additional licenses	0	0	0	0
subtotal Non-Refundable Fee revenues	$72,000	$0	$0	$120,000
Annual license fee	$2,500	$2,500	$2,500	$2,500
Licenses				
Medical marijuana licenses eligible year 1	48	48	48	48
New additional licenses	0	0	0	0
subtotal Annual License Fee revenues	$120,000	$120,000	$120,000	$120,000
Total Microbusiness license & fee revenues	$192,000	$120,000	$120,000	$240,000

States that have approved adult use marijuana

Ten states and Washington D.C. have approved adult use marijuana. Nine received approval from voters while Illinois passed legislation to do so. Table 8 shows that Colorado and Oregon were the first approve adult use marijuana in November 2012. The table also shows when sales started and the length of time in months from approval to first sales. At this point only Colorado, Washington, and Oregon have had sales of at least three years to provide the best data necessary to fully understand the longer-range revenue prospects for adult use marijuana. Alaska is close to having three years' experience. However, it took Alaska longer to implement its program. Alaska also has a small program and uses an excise tax that makes it less comparable to the first three which have similar taxes as that proposed in the Missouri initiative petition. This fiscal note will focus on data from Colorado, Washington, and Oregon in the analysis.

Table 8 - States with Adult Use Marijuana

State	Approved by voters or legislature	Month/year sales started or anticipated	Months from election to sales
Colorado	November 2012	January 2014	15
Washington	November 2012	July 2014	21
Oregon	November 2014	February 2016	15
Alaska	November 2014	October 2016	23
Nevada	November 2016	July 2017	9
California	November 2016	January 2018	15
Massachusetts	November 2016	November 2018	24
Maine	November 2016	March 2020	40
Michigan	November 2018	May 2020	18
Illinois	June 2019	January 2020	6
Missouri (if approved)	November 2020	July 2022	21

Many factors will influence the size of the adult use marijuana program. Having selected three states as the focus of the analysis, four factors in particular will be reviewed.

- Marijuana usage in the states – a review of how Missouri's reported marijuana usage compares to other states to help determine the possible base line for the initial years of the program.
- Initial sales and growth over time.
- Initial infrastructure for sales and its effect on sales.
- Tourism in the states to help determine the impact of sales in Missouri.

Marijuana Usage

Table 9 provides another way to think about the states that have approved adult use marijuana and its possible use in Missouri and revenue estimates. Table 9 shows the percent of those age 18 and over who indicate use of marijuana in the past year from 2012 to 2017 published by the U.S. Department of Health and Human Services, Substance Abuse and Mental Health Services Administration. The 2016-2017 data is the most recently published. The table is sorted by marijuana usage in 2012-2013 which is the last data before adult use marijuana was available in any state. The top 30 states and the national average are shown.

The states that have legalized adult use marijuana are highlighted in blue. All but Illinois, the last state that made it legal, were in the top 15 states for marijuana use in the past year in 2012-2013 and all were above the U.S. national average. Legal medical marijuana programs may be a factor in the higher percentage reported in some of these states. Missouri's 2012-2013 rate of 11.41% is substantially below all of the states that have started sales of adult use marijuana and in every year thereafter. Illinois and Missouri have nearly the same rate of use at the start and end of this timeline. The green boxes are the

last year for each state before adult use sales started which also highlights the fact that only a few states have three full years of experience with revenues.

Table 9. Marijuana Use in the Past Year, by Age Group and State: Percentages, Annual Averages Based on NSDUH

Rank	State	2012-2013 - 18 or Older Estimate	2013-2014 - 18 or Older Estimate	2014-2015 - 18 or Older Estimate	2015-2016 - 18 or Older Estimate	2016-2017 - 18 or Older Estimate
1	Rhode Island	20.21%	19.13%	19.04%	20.62%	21.24%
2	Alaska	20.16%	19.86%	22.31%	23.46%	23.43%
3	Oregon	19.21%	19.50%	19.59%	23.19%	27.38%

Source: SAMHSA, Center for Behavioral Health Statistics and Quality, National Survey on Drug Use and Health[i]

Table 10 compares Missouri's base year to Colorado, Washington, and Oregon. Missouri's 13.95% base year is between 3.63% to 5.64% lower than the three states.

Table 10 - Base Year 18 years or older % Marijuana Use in Past Year			
	Base Year Marijuana Usage	Base year rate	Difference in rate from MO
Missouri	2016-2017	13.95%	
Colorado	2012-2013	18.94%	4.99%
Washington	2012-2013	17.58%	3.63%
Oregon	2014-2015	19.59%	5.64%

Table 11 shows how the percentage of those age 18 and older reporting marijuana use changed in the first three years of adult use marijuana sales for Colorado, Washington, and Oregon. In each state the percentage went up over the three years. In the first year the Colorado rate increased 1.8%, Washington by slightly less at 1.48%, and Oregon by 3.6%. The percentage increase in use at the end of the three years compared to the base year percentage was substantially different in each state – Colorado (4.88%), Washington (1.87%), and Oregon (7.79%). Given the lower base year in Missouri shown in Table 10 it seems unlikely that it will increase to the levels shown in the other states in Table 11. Adding Washington's roughly 2.0% increase to Missouri's rate would bring it to 15.95% which is lower than where the other three states started.

Table 11 - Marijuana Use in the Past Year		
	% use age 18 and older	Change in rate
Colorado		
Base year (2012-2013)	18.94%	
Year 1	20.74%	1.80%
Year 2	23.57%	2.83%

Year 2	17.68%	-1.38%
Year 3	19.45%	1.77%
overall change base to year 3		1.87%

Initial infrastructure for adult use marijuana

Table 12 shows the number of retail stores over the first three years in Colorado, Washington, and Oregon. Colorado and Washington start with roughly the same number of retail outlets. Oregon data is unavailable because the program did not establish the statistical infrastructure to collect it in the early years. The Department of Health and Senior Services intends to license 192 medical marijuana dispensaries – the minimum required under that constitutional amendment. The proposed petition provides that for the first year and a half only the medical marijuana dispensaries can be permitted to provide adult use marijuana.

During the roll out of the medical marijuana process the department has expressed concern about the level of demand for medical marijuana. The department placed on its website a University of Missouri market study that estimates substantially fewer medical marijuana patients than estimated in the ballot language for voters in November 2018. The study reflects concern that oversupply will affect product price and thus the economic feasibility of the envisioned facilities throughout the state. The study also reflects concern about possible diversion of oversupply to the illegal market. In addition, we are aware of reports that Oregon has an oversupply of marijuana.

For these reasons, the estimates assume that the number of Missouri dispensaries will grow more slowly than those in the three states on which the analysis is based. Thus, both application and license fee revenue will be lower as will the likely spending per person in this analysis.

Table 12 - Retail Marijuana Dispensaries in Other States

	# of stores	Change in #	% change

Marijuana sales over the first three years in other states

Table 13 shows data for the first three years of sales in Colorado[ii], Washington[iii], and Oregon[iv]. The population used for each year is from the estimates made by the U.S. Census Bureau.[v]

Colorado ($56.57/capita) and Washington ($37.24/capita) have year one sales lower than Oregon ($94.05/capita). Dividing the population of the three states into the total sales gives a first-year per capita sale of $57.74/capita. Washington had an unregulated medical marijuana program. Its lower per capita sales may be a function of the fact that it was harder to flip to adult use marijuana than in Oregon which had a regulated medical marijuana program.

By year three the Washington ($190.97) had grown dramatically from its low start. Oregon ($132.90) per capita sales which started as the highest per capita sales are the lowest by year three.

Table 13- First 3 full-years of Marijuana Sales Retail Value for Colorado, Washington, and Oregon

State/year	Year of starting month	Population	Marijuana sales	$ per capita spent on Retail marijuana
Colorado				
Year 1	2014	5,351,218	$303,239,699	$56.67
Year 2	2015	5,452,107	$577,536,343	$105.93
Year 3	2016	5,540,921	$861,587,411	$155.50
Washington				
Year 1	2014	6,968,170	259,524,430.41	$37.24
Year 2	2015	7,061,410	786,404,467.45	$111.37
Year 3	2016	7,183,700	1,371,862,186.37	$190.97
Oregon				
Year 1	2016	4,091,404	$384,797,226	$94.05
Year 2	2017	4,146,592	$419,924,401	$101.27
Year 3	2018	4,190,713	$556,959,330	$132.90
Combined 3 state totals				
Year 1		16,410,792	947,561,355	$57.74
Year 2		16,660,109	1,783,865,211	$107.07
Year 3		16,915,334	2,790,408,928	$164.96

Table 14 shows the dollar per capita and percentage growth in the first three years of sales. Washington with its low start had very high growth in year 2. Colorado grew by 86.9%. In year two Oregon's growth slowed but it had dollar per capita sales very similar to Colorado. The combined 3 state totals are weighted by population and show 85.4% growth in the second year and 54.1% growth in the third year.

Table 14- First 3 full-years of Marijuana Sales Retail Value for Colorado, Washington, and Oregon

State/year	$ per capita spent on Retail marijuana	$ Change in $/capita	% change in $/capita
Colorado			
Year 1	$56.67		
Year 2	$105.93	$49.26	86.9%
Year 3	$155.50	$49.57	46.8%
3-year change		$98.83	174.4%
Washington			
Year 1	$37.24		
Year 2	$111.37	$74.12	199.1%

Year 1	$57.74		
Year 2	$107.07	$49.33	85.4%
Year 3	$164.96	$57.89	54.1%
3-year change		$107.22	185.7%

Tourism

A portion of adult use marijuana sales are the result of visitors to the states that have approved such sales. Table 15 provides tourism data for Colorado, Washington, Oregon, and Missouri[vi]. Both Colorado and Washington have more than twice the number of visitor nights compared to its population as Missouri. In addition, Missouri's spending by visitors compared to population is substantially less than that of Colorado and Washington. The Oregon and Missouri numbers are similar on visitor nights but Missouri lags behind the Oregon spending level. It has been estimated that tourism accounts for less than 10% of Colorado's sales.[vii]

While Missouri may see an uptick of travelers and tourist dollars as a result of adult use marijuana sales it is starting at a significantly lower base to make a dramatic impact on tax collections.

Table 15 - Tourism Visitors and Spending

	Colorado	Washington	Oregon	Missouri
Population estimate 2018	5,695,564	7,535,591	4,190,713	6,126,452
# of visitor nights	85,200,000	128,700,000	29,100,000	42,000,000
Visitors per population	14.96	17.08	6.94	6.86
$ spending of visitors	$22,300,000,000	$24,400,000,000	$12,300,000,000	$13,500,000,000
Spending per population	$3,915.33	$3,237.97	$2,935.06	$2,203.56

Adult Use Marijuana Sales in Missouri

Table 16 provides a range for possible adult use marijuana sales for the first three years of the program. The population calculations were calculated using data from the Office of Administration, Division of Budget and Planning.[viii]

High-end estimate - assumes the population weighted combined 3 state totals from Colorado, Oregon, and Washington shown in Table 14 above. Per capita sales start at $57.74 and grow by 85.4% and 54.1% respectively in years 2 and 3. However, Missouri's base year marijuana usage, as shown in Table 10 is 3.63% to 5.64% below the starting base year for these three states. The value of adult use marijuana sales starts at $375.6 million in year 1 and grows to $1,086 million in year 3.

Low-end estimate - begins at Washington's $37.24/capita starting point. Missouri's marijuana usage is lower. However, Missouri will have a regulated medical marijuana program that Washington did not have when the adult use program began. The low-end estimate assumes the growth in the combined 3 state totals shown in Table 14 of 85.4% and 54.1% respectively in years 2 and 3. The value of adult use marijuana sales starts at $242.2 million in year 1 and grows to $700.2 million in year 3.

Moderate estimate - starts at $45 per capita. This is $11.67/capita lower, about 20% lower, than Colorado. It's higher than Washington's level which was suppressed in year 1. The moderate estimate assumes growth of 75% in year 2 and 50% in year 3.

As noted in Table 14 the three states had different paths to their three-year sales levels. Washington started much lower but had the highest growth in years 2 and 3. Oregon started with high sales per capita but very little growth in year 2 and moderate growth in year 3. The value of adult use marijuana sales starts at $292.7 million in year 1 and grows to $774.4 million in year 3.

The moderate estimate is conservative based on the data reviewed in the pages above.

- Missouri's base year marijuana usage according to federal surveys is lower than the level in Colorado, Oregon, and Washington at the start of the adult use marijuana program.
- Missouri has fewer tourists that could boost sales.

- The department has expressed concern about demand and will likely move more slowly than the other states in adding dispensaries and other facilities.
- Prices for adult use marijuana are difficult to estimate and are likely to decrease over the first few years as supply increases as has happened in the other states.
- It also reflects the difficulty of estimating a new program with limited experience in the other states and the need to make conservative budget assumptions for a healthy program.

Table 16 – Adult Use Marijuana Sales in Missouri

			Low End Estimate		Moderate Estimate		High End Estimate	
	Fiscal Year	Missouri Population	Per capita	Value of Adult use Sales	Per capita	Value of Adult use Sales	Per capita	Value of Adult use Sales
Year 1	2023	6,504,461	$37.24	$242,226,120	$45.00	$292,700,736	$57.74	$375,567,567
Year 2	2024	6,542,664	$69.04	$451,724,916	$78.75	$515,234,822	$107.07	$700,523,077
Year 3	2025	6,580,868	$106.40	$700,172,776	$118.13	$777,365,033	$164.96	$1,085,579,985

Tax, License, and Fee Revenue Estimate

Table 17 uses the moderate estimate of sales to calculate the tax revenues for the new Veterans, Infrastructure, and Health Fund, state general revenue, other state funds, and local funds. The local funds calculation assumes a 3.5% median sales tax derived from the Department of Revenue's list of 2,361 local sales tax rates.[ix] The first licenses will not be awarded until early May 2022. The estimates assume the department will issue the license and complete the department's final inspection and other tasks with tax revenue beginning in July 2022 (FY 2023).

Combined State and local tax, fee, and license collections:

- A total all state and local funds of $6.7 million in FY 2022 rising to $182.3 million in FY 2025.
- A four-year total of $381.5 million in all state and local funds.

State license and fee collections:

- Total state funds of $6.7 million in FY 2022 and $5.7 million in FY 2025.
- A four-year total of $21.2 million in state funds.

State tax collections:

- A total all state funds of $56.3 million in FY 2023 rising to $149.4 million in FY 2025.
- A four-year total of $304.8 million in all state funds.
- Veterans, Infrastructure, and Health Fund: $43.9 million in FY 2023 rising to $116.6 million in FY 2025.
- General Revenue Fund: $8.8 million in FY 2023 rising to $23.3 million in FY 2025.
- Prop C: $2.9 million in FY 2023 rising to $7.8 million in FY 2025.
- Conservation: $365,876 in FY 2023 rising to $971,706 in FY 2025.
- Parks and Soils: $292,701 in FY 2023 rising to $777,365 in FY 2025.

Local tax collections:

- Total local funds of $10.2 million in FY 2023 rising to $27.2 million in FY 2025.
- A four-year total of $55.5 million in local funds.

Table 17 - Missouri Tax, License, and Fee Revenue Estimate

	FY 2022	FY 2023	FY 2024	FY 2025	4-year total

Allocation of Veterans, Infrastructure, and Health Fund

The proposed petition establishes a number of purposes for which the revenue derived is to be used. First, the Department of Revenue (collection costs) and the Department of Health and Senior Services (administration) are to receive their funds before allocation to the other major purposes. Table 18 shows the distribution among the uses identified in the petition.

Assumptions for the allocation table below include:

- The Department of Revenue takes the maximum 2% it is allowed to take for collection costs.
- The Department of Health and Senior Services spends the same amount, including fringe benefit costs, for administration of the adult use marijuana program as it received in the FY 2020 budget for the medical marijuana program. It will either do so by shifting some medical marijuana staff to the adult use program or add additional staff. A two percent inflation factor is provided beginning in FY 2024. For FY 2022 it is assumed that the department's cost above the Veterans, Infrastructure, and Health Fund revenues, if any, will be paid with a transfer from general revenue as provided by the act.
- The remaining uses receive their share as detailed in the petition.

Allocations:

- Local government: $6.3 million in FY 2023 rising to $20.7 million in FY 2025. A 4-year total of $39.9 million.
- Veterans: $8.4 million in FY 2023 rising to $27.6 million in FY 2025. A 4-year total of $53.1 million.
- Infrastructure: $8.4 million in FY 2023 rising to $27.6 million in FY 2025. A 4-year total of $53.1 million.
- Health: $8.4 million in FY 2023 rising to $27.6 million in FY 2025. A 4-year total of $53.1 million.

Table 18 - Allocation of Veterans, Infrastructure, and Health Fund

	FY 2022	FY 2023	FY 2024	FY 2025	4-year total

Department of Health and Senior Services (DHSS) - costs

DHSS has experience with implementing the medical marijuana program in accordance with Amendment 2 passed by Missouri voters in November 2018. Thus, the learning curve should be dramatically reduced for the department for a fully legal adult use marijuana program. Much of the language of the new petition mirrors the framework and language from voter-approved Amendment 2 to implement the new program. The tasks that DHSS has already completed or will complete for the medical marijuana program includes, but is not limited to creating:

- rules for the medical marijuana program;
- Advisory Committees;
- a robust website with information about the program;
- forms and applications;
- an online application portal;
- awarding and completing a contract to provide for blind scoring of the applications;
- FAQs;
- videos to help applicants understand the process
- a significant outreach program to businesses and organizations involved or interested in the medical marijuana program;
- reporting mechanisms available to show the distribution of applicants across the state;
- other resources for applicants and the public; and
- educating the Governor and legislature on its budgetary needs to successfully implement the program.

DHSS was successful in receiving $846,726, including 3.5 staff, in FY 2019 supplemental budget funding to begin implementation of the medical marijuana program. In addition, DHSS received $15.7 million, including 52 staff and fringe benefits, in full year FY 2020 funding to implement the program. The staff included:

- 40 health facilities consultants to process and verify applications, inspect facilities, provide technical assistance to the testing facilities to assist with obtaining and maintaining certification; monitor for compliance, and other duties as needed.
- 4 health and senior services managers to manage patient and caregiver applications while meeting application decision deadlines; manage licensing and/or certification of medical marijuana cultivation facilities, dispensary facilities, infused products manufacturing facilities, testing facilities, transportation entities, seed-to-sale tracking systems; and provide ongoing management responsibilities.
- 2 attorneys to provide legal support.
- 1 Planner IV to project manage and work in conjunction with the IT project manager to plan, monitor, and execute the implementation of a seed-to-sale tracking system
- 1 designated principal assistant.
- 4 clerical support staff

Table 19 provides budget information for Colorado[x], Washington, and Oregon to provide perspective on their administrative costs for the Department of Revenue and the relevant administrative agencies. Missouri's $15.7 million budget for medical marijuana administration appears to be larger than the programs in the other states.

Table 19 - Administrative costs in Oregon, Washington, and Colorado

	Total (in millions)	FTE
Oregon		
Adult use	$19.0	68.0
Medical	$5.6	23.0
Total	$24.6	91.0
Washington		
Adult use & medical	$24.2	
Colorado		
Adult use	$14.5	120.1
Medical	$2.4	1.3
Total	$16.9	121.4

All of this success and sizable budget should make the additional cost of regulating legal marijuana more easily accomplished and keep costs down. For example, DHSS has 40 health facility consultants to process and verify applications, provide technical assistance, monitor compliance, and other duties. DHSS asked for such a sizable staff in part because it was unclear whether OA ITSD would supply a highly functional IT system to process applications during this first round of applications. DHSS received 2,163 medical marijuana applications yet is expected to issue just 348 licenses – the minimum required by the medical marijuana amendment. DHSS has thus received about 6 times more applicants than the number it will approve.

The current DHSS process and timetable is for the first medical marijuana licenses to be issued in late December 2019 or early January 2020. Providing the necessary construction phase for the medical marijuana facilities and the initial growing period, Missourians can expect that medical marijuana product becomes available during the summer or fall of 2020 with dispensaries being opened from then until the end of 2020. DHSS has indicated publicly that it intends to go slowly on issuing licenses during the first few years of medical marijuana implementation to ensure that the marketplace is sufficient to provide a healthy medical marijuana industry and prevent an oversupply of product. There is little expectation that DHSS will begin another round of medical marijuana facilities expansion before late 2022 – which is beyond the dates contained in this petition and required for implementation of a legal marijuana program. Thus, there is no conflict or doubling up of application processing between the two programs.

As noted earlier in this analysis, for the first 548 days of legal marijuana applications DHSS may only accept applications for licensure from entities holding similar medical marijuana facility licenses. The 40 health facility consultants will face a maximum of 348 marijuana facility applications in late 2021, 16% of what they faced in 2019. In addition, the health facility consultants and all of the staff only have to deal with facilities that they have already instructed, inspected, monitored for compliance, and reviewed. The owners and staff of the medical marijuana facilities will already be knowledgeable of all of the rules and regulations and will have developed a strong working relationship with DHSS.

It is assumed that there will be some costs required to process adult use marijuana facility applications. Costs for OA ITSD for IT services are included in the DHSS medical marijuana budget and can be used to provide additional functionality to reduce the amount of paperwork done by the health facilities consultants and clerical staff. Providing a more efficient, robust and user-friendly application portal will help the department. In addition, additional website development to improve reporting tools, update

videos, and other functionality can be completed before the adult use program applications are announced. Blind scoring costs currently in the DHSS budget will not be needed for the first round of adult use marijuana application evaluation.

This analysis assumes that the department will spend the same $15.7 million for their administrative costs for adult use as it did for medical marijuana. It will either do so by shifting some medical marijuana staff to the adult use program or add additional staff. There likely will be significant cost savings in administrative costs when the medical and adult use programs are operational. As shown in Table 19, Colorado, Washington, and Oregon spend much less than the $32 million in administration for both programs that possible under the assumptions of this analysis. Those savings are not calculated herein and will be decided by the Governor and legislature as both programs proceed.

Department of Corrections Savings

In a fiscal note to HB 1448 (2018) the Department of Corrections laid out its estimate of savings to a bill that allowed adult use marijuana. It indicated substantial savings. The department reported that the annual number of persons admitted for cannabis offenses was expected to be 209 with an additional 986 sent to probation. It also reported that the average incarcerated offender spent one year in prison and three more years on parole.

https://house.mo.gov/billtracking/bills181/fiscal/fispdf/4952-01N.ORG.pdf

In its 2017 Annual Report the Missouri Board of Probation and Parole reported that the per diem cost of incarceration was $58.85 compared to $5.39 for probation or parole. Revised numbers have not been made available by the Department. However, the 2017 costs are included in the analysis below to identify the cost savings of the initiative petition to the Department. A two percent inflation factor is assumed for institutional and probation/parole costs.

The number of people normally incarcerated remains static in this analysis at 209 each year since a new cohort comes in and then leaves after one year. At $58.85/day ($21,480/year) the department will save $4.5 million in incarceration costs. The number of people normally expected to be under supervision grows until it peaks at year four. The 209 that normally serves three years of probation increases until it tops out at 627. The 986 people that normally serve three years of supervision tops out at 2,958. The number of people that will not be under supervision in year four is 3,794. The savings run from $6.4 million in year one to $12.2 million in year four.

Table 20 - Department of Corrections - Savings				
	FY 2022	FY 2023	FY 2024	FY 2025
Incarcerated	209	209	209	209
Parole		209	418	627
Probation	986	1,972	2,958	2,958
subtotal supervision	986	2,181	3,376	3,585
Total affected population	1,195	2,390	3,585	3,794
Institutional costs/day	$58.85	$60.03	$61.23	$62.45
Institutional costs/year	$21,480	$21,910	$22,348	$22,795
Probation/parole costs/day	$5.39	$5.50	$5.61	$5.72
Probation/parole costs/year	$1,967	$2,007	$2,047	$2,088
Savings institutional	$4,489,372	$4,579,160	$4,670,743	$4,764,158
Savings probation/parole	$1,939,807	$4,376,606	$6,910,101	$7,484,647
Total Savings	$6,429,179	$8,955,766	$11,580,844	$12,248,805

Public Defender Savings

The State Public Defender's Office also estimated its savings in the same fiscal note to HB 1448 (2018). The Public Defender reported that the bill would save 52,230 attorney hours, or slightly more than 25 attorneys based on the state's 2,080-hour work year. The Public Defender assumed that 25% of drug cases relate to marijuana affecting about 2,472 cases. However, it did not convert the 52,230 hours savings into a dollar amount. It stated that it would not cut its budget because it is staffed substantially below the level it believes is necessary to meet its caseload standards.

Table 21 provides the conversion of hours saved into dollars using the FY 2020 budget request for 385 additional staff made by the Public Defender's Office. The FY 2020 budget request included a request for attorneys at a salary of $60,084 and a secretary for every three attorneys at a salary of $28,668. That provides a savings of $1.7 million in salaries if the Public Defender's budget was cut to keep its staffing levels at the level the General Assembly has been providing. The expense and equipment requests provided $10,500/attorney in travel and $6,380/FTE for all other expense and equipment leading to a savings of $475,145. Fringe benefit savings would add another $1 million. Total savings to the Public Defender's budget annually is estimated at $3.3 million. However, the petitioners do not recommend such cuts.

Table 21 - Public Defender possible savings			
Hours saved	52,230		
Yearly hours per FTE	2,080		
FTE saved	25.11		
	# staff	Avg. salary	Total
Public defenders	25	$60,084	$1,502,100
Secretary (1 for every 3 attorneys)	8.33	$28,668	$238,804
subtotal Personal Service Savings			$1,740,904
Expense & equipment			
Travel	25	$10,500	$262,500
Other items	33.33	$6,380	$212,645
subtotal E&E Savings			$475,145
Fringe benefits (59.8% of PS costs)			$1,041,061
Total savings for Public Defender			$3,257,110

Other department – costs, revenues, or savings

The Missouri State Highway Patrol (MSHP) should expect additional revenue as a result of this proposal. For HB 1448 (2018) the MSHP estimated income of $540,584 for the Criminal Records System Fund as a result of fingerprint and criminal record system checks in the first year and $54,054 annually thereafter.

The Office of Administration, Information Technology Systems Division provided IT support to DHSS. Possible additional costs to OA ITSD are included in the DHSS cost discussion of this analysis.

The Office of State Courts Administrator, the courts, the Department of Corrections, and the Public Defender may have additional costs to process expungement of marijuana convictions from criminal records. The petition provides that people with such convictions "may apply for expungement upon the effective date of this section and such expungement shall be granted…". A search of the Missouri General Assembly's bill list for the past seven regular sessions found three bills filed by Rep. Ellington from 2014-2016 that included expungement of such records. It was not the same as the petition's provisions. The Oversight Division did not complete a fiscal note of the possible costs or savings.

IP 2020-125 Converting Missouri's "Medical Marijuana" Amendment 1 enacted in 2018 to include Recreational Marijuana
https://www.sos.mo.gov/CMSImages/Elections/Petitions/2020-125.pdf

and

IP 2020-126 Legalization of THC-containing recreational marijuana
https://www.sos.mo.gov/CMSImages/Elections/Petitions/2020-126.pdf

Dear Hon. Governor Parson, Nicole Galloway, Jay Ashcroft, and Eric Schmitt,

We are filing this document as formal comments for inclusion in the public record regarding the two Initiatives identified above.

This document provides a necessary estimate of the consequential costs **(CC)** that will by incurred if THC-containing marijuana (hereinafter referred to as "**psychoactive marijuana**" regardless of the reason for is use as a "medical" or "recreational" drug), is legalized in Missouri.

Preface and Recommendation Summary:

When other states legalized THC-containing marijuana, they only calculated the cost for implementing the new statute. They failed to foresee the necessity of evaluating fiscal impact of the *consequences* of legalization.

In other states, marijuana legalization was enacted expecting profits, when in fact massive losses to states, local jurisdictions, and businesses took place. These states are in jeopardy, unable to reverse legalization, unable to tax because of restrictions in the laws enacted, and stuck with massive costs.

In the short amount of time it is only possible to make a rough estimate the fiscal impact. There are thousands of state and local expenditures impacted by use of substances that impact mind and body for days, weeks, or years, and the abuse of those drugs.

We have many years of experience studying these problems and are in the best possible position to estimate these costs so the voters have some idea of the financial cost to the State.

We have an incontrovertible wealth of longitudinal facts from other states proving decisively that marijuana legalization will:

1. Greatly harm the general welfare of Missourians without providing any palpable benefit, and,

2. Create a large annual fiscal note comprised of a long list of proven fiscal consequences imposed on other states, local jurisdictions, and businesses in states legalized any form of psychoactive marijuana.

Finding:

We estimate the total CC fiscal note associated with the passage of the above to Initiatives would be a total annual fiscal note of approximately $2,818,214,740 annually to the state of Missouri and local governments.

Breakdown of costs:

> **$1,283,340,100** of the total is a baseline cost representing actual Colorado data adjusted for population.
>
> **$1,534,874,640** is our estimated "contingency" cost for 15 categories of known expenses that the Colorado study did not evaluate. These categories are evaluated later in this document and rationally estimated.
>
> It is not possible to do thorough research and numerical analysis of these items in just a few days, however, I do believe it is mandatory to express the likely magnitude of expense the Initiatives will incur.
>
> What we can supportably declare, based on my research and estimates below is "Fifteen complex line items cannot be accurately numerically evaluated, but **may** represent significant cost."

This amount will ramp up to the amount estimated within two to four years of passage, and elastically grow or shrink as use and abuse rates of psychoactive marijuana rise to levels we see in other states that legalized the use of any form of THC-containing marijuana.

Items Not included in the Cost Estimate:

1. There are longitudinal elements we are unable to estimate here, such as the potential cost to the state of younger Missourians who increasingly use or abuse substances in the "gig economy' employment environment where retirement plans and medical insurance are often not provided. So called "failure to launch" kids, who may have brain damage caused exposure before birth or use before the age of 24, may represent a large long-term cost liability to the State for medical, health, housing, and eventual indigency in old age.

2. We cannot estimate the costs to business in this document. We can say that the costs to business of legalization psychoactive marijuana will be high.

   Property, medical, and workman's compensation insurance rates will skyrocket. Workman's comp fraud and lawsuits will force many businesses to either close down, leave urban areas, or only hire self-insuring contractors.

   Costs for all businesses and government agencies that have to comply with OSHA will skyrocket. Pyschoactive marijuana impacts motor skills and judgement for at least one or two days or in some cases months after use. The bus driver who gets stoned on Saturday night is much more likely to have an accident on Monday morning, for example.

   If other states are a predictor, we will see all "brick and mortar" businesses, particularly larger businesses, hit with head taxes and "window taxes". These IP's bar the state from additional taxation of marijuana, so creative new taxes will be invented to pay for the consequential costs of drug use and abuse.

Recommendations:

1. If possible, we recommend that the Attorney General and/or the Secretary of State reject IP 2020-125 "Marijuana Legalization" and IP 2020-126, for the following reasons:

   a. The CC cannot be reasonably ascertained until a full cost study is performed, which is not possible short time period allowed in the context of the Initiative process.
   b. The legalization of psychoactive marijuana falls under the statutory authority of the Missouri Legislature, which has the authority and time to conduct a thorough fiscal impact study and allocate budgetary resources to fund those consequences, and
   c. The CC constitutes a large unfunded mandate on the State of Missouri for which there is no pressing constitutional justification for forcing on the State, local jurisdictions, and the taxpayers to bear, and
   d. These Initiatives deny the Legislature and local jurisdictions its statutory right to increase or enact new taxes on psychoactive marijuana to fund the associated CC at both state and local levels.
   e. These Initiatives may be unconstitutional as previously communicated to Governor Parsons, Attorney General Eric Schmitt, and the legislature.

2. If either ballot initiative is approved for the 2020 election cycle, we recommend that in addition to the implementation costs, the ballot state that "The consequential fiscal cost

of additional substance use and abuse to the state, local jurisdictions, and taxpayers is estimated to be $2,818,214,740 billion dollars annually".

This sum reflects costs to both state and local governments. Since these are state initiatives, the state should take responsibility, anticipate the expenditures, and be prepared to raise the funds to pay for the increase in problems that will arise in every jurisdiction. The most serious impacts will be seen in St. Louis, Kansas City, and perhaps Springfield. We should not abandon them to go bankrupt because of a state initiative.

This estimate may be slightly higher or lower depending on whether one or both Initiatives are enacted. The impact differential will be small because, in both cases, "recreational marijuana" is being fully legalized. Whether or not one has to get a card and a doctor's letter is merely procedural. In other states, medical marijuana quickly fell into disuse as soon as unrestricted "recreational marijuana" was legalized.

This may provide some incentive to reject these initiatives on the grounds they involve very large unfunded annual mandates that may also be unconstitutional. There is no rational basis for inserting possibly unconstitutional unfunded mandates into the Missouri Constitution when the initiatives contain no pressing strict-scrutiny civil rights concern requiring the state to fund the initiative.

The Fiscal Note Estimate:

1. **Components of the Fiscal Note Estimate:** The fiscal note must include:

   a. The costs for administratively implementing and managing legalization, and

   b. The costs the state will incur due to the "consequential costs" (CC) of marijuana legalization. CC includes all expenditures to the state and local jurisdictions due to increased **use and abuse** of psychoactive marijuana such as homelessness, medicare, high-school dropouts and youth drug gangs, interdiction and prosecution of illegal marijuana growing, environmental cleanup of illegal grows, sales and smuggling, crime, incarceration, police, violence, divorce and illegitimacy, mental health problems, violence shelters, illegal smuggling and illegal grows, OSHA-compliance, unemployment, and increased insurance costs for property, workman's comp, medical, and liability insurance. We cannot estimate those costs in this document. We must be aware that the actual costs of marijuana to all government agencies is much higher than the fiscal note estimate below, which applies only at the State level.

2. **Basis for Fiscal Note Estimate:**

   Our CC fiscal note estimate is based on actual CC financial data extracted from the State of Colorado and reports documenting the CC of the legalization of psychoactive marijuana. Colorado was the first state to legalize psychoactive marijuana. The longitudinal consequences are documented more thoroughly for Colorado than any other state.

3. **Baseline CC Fiscal Note Estimate: $1,283,340,100 annually.**

The Centennial Institute of the Colorado Christian University reports that Colorado is spending about $4.50 in costs to mitigate the effects of legalization for every $1 of tax revenue income. This baseline estimate does not include a large number of consequential expenses.

A. In 2018, the tax revenue for Marijuana in Colorado was $266,529,617.[1]
B. Therefore, the approximate fiscal note for downstream costs of marijuana legalization in Colorado for 2018 was approximately $4.50 * $266,529,617, for an estimate of $1,199,383,276.
C. The population of Colorado of individuals aged 10 and older is approximately 5,010,757.
D. The population of Missouri of individuals aged 10 and older is 5,375,792.
E. **Therefore, the baseline annual CC for psychoactive marijuana legalization in Missouri, adjusted for population, is $1,283,340,100.**

4. **Contingency Risk Factor Costs: $1,534,874,640.**

The following contingency multipliers, when applied to the baseline cost are a total contingency multiplier of 119.6%.

These factors are added because they are known cost factors not evaluated in the Colorado report:

a. **(15%) CC contingency for extant drug abuse and violence problems:** Missouri and St. Louis are at high risk of fiscal and law-enforcement exposure to the consequences of marijuana legalization compared to Colorado:

- Missouri has the 3rd highest per-capita drug abuse rate in the nation before Psychoactive marijuana is legalized.[2]
- St. Louis had the highest STD rate in the nation.[3] (the prevalence of STD's is highly associated with substance abuse).
- St. Louis has the highest murder rate in the nation in 2017 [4] and was ranked the most dangerous city in America by CBS News.[5] (Gun violence is tightly linked to substance abuse and the drug trade[6]).

b. **(10%) Gang violence in St. Louis and Kansas City:** The problems of gang violence in St. Louis and secondarily in Kansas City will grow and become much more serious with the legalization of psychoactive marijuana. Gangs control the smuggling and sales of illegal drugs. In Colorado, about 2/3 of marijuana sales are by illegal drug dealers because their product is much less expensive than the highly-regulated, taxed retail stores. St. Louis recently announced it is spending $5-million on a "Cure Violence" program that is a proven failure in all other cities that it has

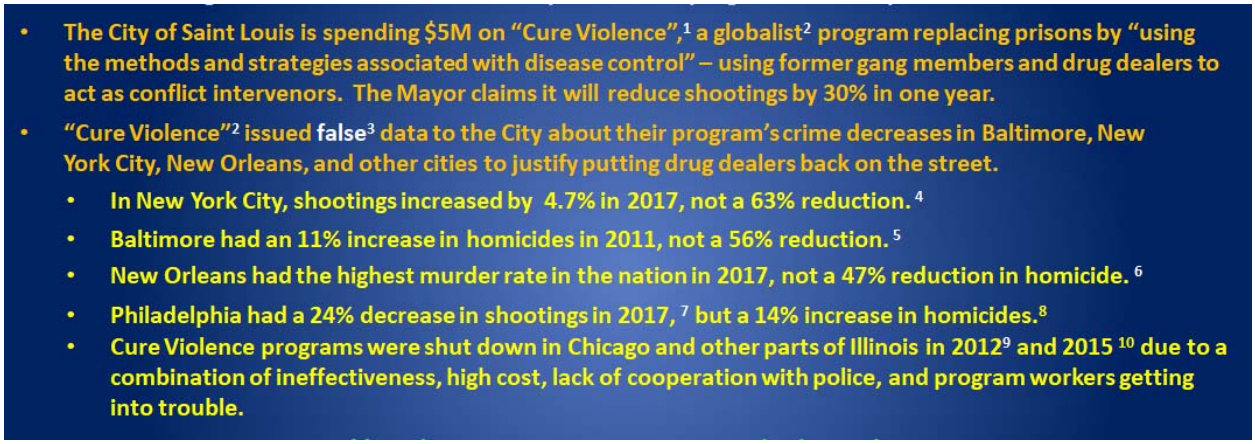
been implemented in. The State should be prepared to intervene. The screen capture below is by my organization Civitas Economic Engineering, documenting the fact that Cure Violence does not work:[7]



c. **(10%) CC baby boomer contingency:** There are a large number of baby boomers who have little savings and who use (or will use) psychoactive marijuana. According to the retirement institute, 45% of baby boomers have no retirement savings.[8] I estimate that at least 10% of them use psychoactive marijuana. This is attributable to the fact that baby boomers are the hippie culture, where marijuana use was and is still commonplace. Use of mood-altering substances over time does impact life, financial choices, and upward mobility negatively. Medical, housing, and other costs for caring for indigent elderly with aggressive mental health and memory issues may likely be a major expense to the state or local jurisdictions.

d. **(6%) Educational Remediation:** To pay for education remediation for marijuana-using school dropouts and disciplinary problems in public schools and universities. We are placing emphasis on this category because high-school dropouts are a very costly problem in Colorado.

e. **(10%) Long-term impact on (government and contractor) employee productivity**: This category includes lower production, rework, associated material and other costs, and legal expense. 15.2% of Coloradans are regular users of psychoactive marijuana. Efficiency, motivation, mistakes, rework, damage, and accidents are the consequence. 80% of Colorado marijuana users are not as active as indicated and have higher rates of medical problems, with medical expenditures of $54,833,218 in 2017.[9] Cost of cannabis use disorder in Colorado for 2017 was $31,448,908.[10] These kinds of costs may fall on the State or local jurisdictions for employees and indigents.

[8] https://www.investopedia.com/articles/personal-finance/032216/are-we-baby-boomer-retirement-crisis.asp
[9] http://cdn-centennial.pressidium.com/centennial/wp-content/uploads/2018/11/Economic-and-Social-Costs-of-Legalized-Marijuana-CO.pdf, pg. 26
[10] http://cdn-centennial.pressidium.com/centennial/wp-content/uploads/2018/11/Economic-and-Social-Costs-of-Legalized-Marijuana-CO.pdf pf. 21.

f. **(0%) Medical care for indigents:** Depending on insurance and local policy, costs for marijuana-related expenditures itemized in (d.) may fall on the State or local jurisdictions. Please add a percent if you believe this is a factor in Missouri.

g. **(6%) Workplace accidents:**

h. **(5%) Gun and domestic violence:** Substance-abuse is highly correlated with gun violence (at least 50% of all cases) and domestic violence (at least 75% of all cases). This drives costs police, investigative, prosecution, shelter, riot control, property damage, and compliance with federal social justice mandates for the state and local jurisdictions.

i. **(10%) Marijuana-related crime outside St. Louis:** This may be a very large number considering the broad costs of interdiction, prosecution, imprisonment, property damage, murder, theft, . Colorado reports a severe shortage of funding for marijuana inspections, finding and cleaning up illegal grows, and dealing with marijuana DUI. Missouri is a major route for smuggling and distribution of drugs along interstates 40 and 44. If psychoactive marijuana is legalized we will see a lot more local marijuana being grown and smuggled to other states.

j. We are adding a contingency to assure enough resources are available to handle these problems.

k. **(3%) Marijuana-related hazardous environmental cleanups:** The Rocky Mountain HIDTA report shows that meth and other drug use is being replaced by marijuana use and abuse. Illegal grows in Colorado and other states are expensive to catch, requiring aerial surveillance. Environmental cleanup of toxic chemicals can be very costly. Since Missouri is a prime state for growing marijuana outdoors, and we have a lot of heavily forested areas, we predict that illegal growing on public lands and related cleanups will become a major problem.

l. **(5%) Property damage**: This estimates cost to repair property damage to public properties caused by substance abusers.

m. **(19%) Homelessness and Urban Cleanup**: There were 5,883 homeless adults in Missouri in 2018 while Colorado, a state with similar population had a homeless population of 10,857[11] despite approximately 350 anti-homeless laws enacted to combat fires, trash, crime, and tent cities.[12] In this chart, we see that states that legalized psychoactive marijuana years ago suffer from the highest homelessness rates regardless of weather conditions.

A 2008 survey by the United States Conference of Mayors asked 25 cities for their top three causes of homelessness. Substance abuse was the single largest cause of homelessness for single adults (reported by 68% of cities).[13]

[11] https://files.hudexchange.info/resources/documents/2018-AHAR-Part-1.pdf
[12] https://en.wikipedia.org/wiki/Homelessness_in_the_United_States_by_state
[13] National Coalition for the Homeless, "Substance Abuse and Homelessness"; July, 2009; https://www.nationalhomeless.org/factsheets/addiction.html

Following the legalization of psychoactive marijuana in 2012, Colorado experienced the third largest percent increase in homelessness nationally -13 percent between 2015 and 2016.[14]

Scott Lindsay, a consultant to the Mayor of Seattle, investigated the cases of about 100 homeless people in Seattle and found that 100% of them had a substance abuse problem. Over 2/3 have been arrested for theft this year. Retailers are hit hard by theft. [15]
States report that each homeless person costs the government up to $50,000 per year.[16] These are costs associated with arrest, prosecution, cleanup of homeless tent cities, medical, health and hospitalization, services, trash, fires, property damage, and human waste.

If Missouri's homeless rate grows the match Colorado's, which should be expected, it will add an additional cost burden of $248,700,000, or 19.1% of the baseline CC cost to state and local governments.

n. **(.6%) Costs of family breakup and non-marriage**: The annual cost to the state of Missouri for 19,187 divorces and 29,134 children born out of wedlock in 2017 is conservatively estimated to be about $1.7 Billion – (5.8% of Missouri's 2019 budget). (UMC Regional and Fiscal Studies, CDC). Substance abuse is a primary factor in family breakup and failure of unmarried cohabiting relationships.[17]

   With each instance of non-marriage costing the state about $20,000 annually, an 10% decrease in marriage rates and 10% increase in cohabitation or illegitimzy rates will cost the state $170,000,000 not including lost tax receipts that would have been paid if couples had not broken up. This amount is six-tenths of 1% of the baseline cost estimate.

o. **(20%) Miscellaneous costs to state and local governments**: There are hundreds of elastic line item costs to state and local jurisdictions that expand or shrink with the prevalence of substance use and abuse. Here is a short list of major categories, some of which are not listed above. The Auditor's office may wish to modify our estimate based on their understanding of other expenses that will be incurred, a short list of categories listed below:[18]

ADDENDUM:

The following pages are included to provide additional research, facts, information and citations of authorities the auditor's staff may wish to use to adjust or verify our estimation.

Unconstitutionality Of Legalizing Psychoactive Marijuana

We believe it is within the jurisdiction of the Attorney General and perhaps the Secretary of State to reject the above constitutional initiatives to protect the Constitution of the State of Missouri from being suborned by provisions detrimental to the purpose of Constitutional government and the general welfare of the Citizens of the State of Missouri.

> **Cite:** Article 1 Section 2 of the Missouri Constitution requires the state to serve the general welfare of the Citizens. The idea that the state should go into business making money selling drugs that drive violence, homelessness, divorce, and poverty fully opposes the purpose of Constitutional government in the State of Missouri:
>
> Promotion of general welfare--natural rights of persons--equality under the law--purpose of government.
>
> Section 2. That all constitutional government is intended to promote the general welfare of the people; that all persons have a natural right to life, liberty, the pursuit of happiness and the enjoyment of the gains of their own industry; that all persons are created equal and are entitled to equal rights and opportunity under the law; that to give security to these things is the principal office of government, and that when government does not confer this security, it fails in its chief design.
>
> Source: Const. of 1875, Art. II, § 4.

A large body of data exists documenting the consequences of legalizing marijuana over the past 12 years in other states and by the federal government, herein cited below.

This easily-obtained body of publicly-accessible documentation provides incontrovertible and convincing evidence that the legalization of marijuana containing a primary ingredient of THC causes great Harms to the general welfare of the people. It causes many social, economic, and legal consequences, resulting in crushing costs and legal dilemmas to the state, local jurisdictions, businesses, and individuals. It is not possible to reverse these consequences and equitably correct the Harms regardless of crisis-management expense by the State and local governments.

We suggest that the Attorney General has a duty to *protect* the Missouri Constitution by rejecting any Constitutional Amendment Initiative containing language that offends, controverts, opposes, or violates settled law principles set forth in the Missouri Constitution.

We state that the form of IP 2020-125 Section 2.1 is deceptive and must be rejected in the absence of evidence from proponents proving that their claims regarding very positive impact of the Initiative are in fact true and accurate

.

We have a large body of studies, reports, and longitudinal data from other states that legalized psychoactive marijuana for "medicinal" or recreational purposes proving that the statements contained in IP 2020-125 Section 2.2 "Purpose" are false and deceptive.

The White House Office of National Drug Control Policy (ONDCP)[19] has issued The Rocky Mountain High Intensity Drug Trafficking Area Report [20], an extensive series of longitudinal reports spanning 23 years tracking marijuana use and abuse in Colorado, Montana, Utah, and Wyoming since 1996. The ONDCP uniformly reports harm to citizens who use marijuana and finds no salutary benefits worthy of Constitutional protection or recognition.

I am available to consult and testify to the facts below on behalf of the Citizens of the State of Missouri and/or as an advisor to the Missouri Attorney General's Office as a Subject Matter Expert on marijuana legalization

We find both of the above Initiatives invalid. The intent stated in the language of **Section 2.1. "Purpose"** is opposite of the actual effect the Constitutional Amendment will impose on the Citizens of the State of Missouri:

Section 2. Marijuana Legalization, Regulation, and Taxation

1. Purpose.

The purpose of this section is to make marijuana legal under state and local law for adults twenty-one years of age or older, and to control the commercial production and distribution of marijuana under a system that licenses, regulates, and taxes the businesses involved while protecting public health. The intent is to prevent arrest and penalty for personal possession and cultivation of limited amounts of marijuana by adults twenty-one years of age or older; remove the commercial production and distribution of marijuana from the illicit market; prevent revenue generated from commerce in marijuana from going to criminal enterprises; prevent the distribution of marijuana to persons under twenty-one years of age; prevent the diversion of marijuana to illicit markets; protect health by ensuring the safety of marijuana and products containing marijuana; and ensure the security of marijuana facilities. To the fullest extent possible, this section shall be interpreted in accordance with the purpose and intent set forth in this section.

13

The Policy Impact of both Initiatives:

1. **THC vs. CBD: Fraudulent misrepresentation of fact by omission.**

    a. The Definitions, Section 2. (6) on both Initiatives do not state that "recreational marijuana" containing THC is being legalized. The initiative uses scientific plant names that that the average person does not understand. Marijuana is defined deceptively as any form of marijuana not containing CBD. Many voters will not understand that this Initiative legalizes recreational psychoactive marijuana with no proven medical advantages over CBD, but is bred to get people very "high".

[19] https://www.whitehouse.gov/ondcp/
[20] https://rmhidta.org/default.aspx?act=documents2.aspx&DocumentCategoryID=27&AspxAutoDetectCookieSupport=1

(6) "Marijuana" means *cannabis indica*, *cannabis sativa*, and *cannabis ruderalis*, hybrids of such species, and any other strains commonly understood within the scientific community to constitute marijuana or cannabis, as well as resin extracted from the plant and marijuana-infused products. "Marijuana" does not include industrial hemp including any part of that plant, including the seeds thereof and all derivatives, extracts, cannabinoids, isomers, acids, salts, and salts of isomers, whether growing or not with a delta-9 tetrahydrocannabinol concentration of not more than three-tenths of one percent on a dry weight basis, or commodities or products manufactured with industrial hemp, or any other ingredient combined with marijuana or marijuana to prepare topical or oral administrations, food, drink, or other products.

b. Marijuana grown for "recreational" use is specifically bred to reduce CBD content to near-zero because CBD kills the "high" caused by THC. Therefore, we can decisively state that psychoactive marijuana is genetically bred and engineered to get people "high", not to provide medical benefits that do not put the patient at risk for car accidents, paranoia, hallucinations, suicide, or addiction.

c. Medical uses for CBD (cannabiol) legalized under the trade name Epidiolex are well-documented and understood. CBD provides the medical properties that are medically beneficial without the "high" caused by THC. There is no harm to citizens and no consequential costs to the state by the legalization of CBD-based products. The Missouri legislature enacted law in 2018 legalizing farming of marijuana plants genetically hybridized to produce CBD with little or no THC in the plant.

d. There are no proven **additional** medical benefits of psychoactive marijuana over what is provided by CBD.[21] Proponents of recreational marijuana flooded the internet and media with anectdotal claims that pmarijuana might be beneficial for sleep disorders, morning sickness, pain, and other ailments, but there is no peer-reviewed medical testing or evidence that THC does anything more than get people "high". Studies do say that, if anything, recreational marijuana only delays pain.

CBD vs. THC: Medical benefits

CBD and THC have many of the same medical benefits. They can provide relief from several of the same conditions. However, CBD doesn't cause the euphoric effects that occur with THC. Some people may prefer to use CBD because of the lack of this side effect.

In June 2018, the Food and Drug Administration approved Epidiolex, the first prescription medication to contain CBD. It's used to treat rare, difficult-to-control forms of epilepsy.

2. **<u>Health Consequences of Psychoactive Marijuana</u>:**

It is impossible for licensure, regulation, or taxation of marijuana to "protect public health". Legalizing a destructive recreational drug increases documented Harm to citizens and the state.

The health consequences and costs to the state making recreational use and abuse of psychoactive marijuana a constitutional right are not disclosed in the Initiative.

[21] https://www.healthline.com/health/cbd-vs-thc#medical-benefits

"Public health" includes the physical, emotional, mental, financial, employability, and health care costs imposed on individuals.

a. Marijuana is a drug that even in the best of situations is a primary driver of domestic, violence, gun violence, mass violence, school failure, homelessness, mental health problems, divorce, crime, and employment problems. THC causes permanent brain damage in individuals under age 24 and the unborn, and is an incontrovertible medical threat to public health.
b. Psychoactive marijuana harms public health no matter whether it is inhaled, smoked, or ingested. Peer-reviewed studies prove there are few, if any benefits of marijuana or THC on the human body. It is an addictive, mood-altering chemical used for getting high. It is classified as a Class-1 drug alongside heroin, lysergic acid diethylamide (LSD), marijuana (cannabis), 3,4-methylenedioxymethamphetamine (ecstasy), methaqualone, and peyote

- Proponents of psychoactive marijuana claim many possible medicinal benefits but none have been found medically effective or safe, and none are undergoing approved by the FDA.
- Marijuana causes amotivational syndrome, psychosis, acute psychosis, schizophrenia, tachycardia, postural hypotension, cyclic vomiting syndrome, attention impairment, hypotension, panic, anxiety, myoclonic jerking/hyperkinesis, delirium, respiratory depression, ataxia, and conjunctivitis.[22] Half of young adults in Massachusetts report using marijuana.[23] Marijuana smoke is significantly more damaging to heart, lungs, and circulatory system than cigarette smoke.[24]
- In school, marijuana-exposed children are more likely to show gaps in problem-solving skills, memory, the ability to remain attentive, low birth weight, and decreased motor development.[25] MRI scans confirm damage to the prefrontal cortex[26].
- Trying marijuana by age 15 doubles the risk of addiction.[27] Marijuana is a mixer drug. 60% of Marijuana users also misuse illegal and prescription drugs.[28]
- A noted large-group controlled study by Harvard psycho-biologist Dr. Bertha Madras, analyzing 65,454 brain scans from 31,227 people age 9 months to 105 years proved that marijuana cuts blood flow (and ages brains) similarly to bipolar disorder, ADHD, and schizophrenia.[29] Reduced blood flow is also linked to dementia and stroke.

[28] https://www.breitbart.com/news/study-medical-marijuana-users-likely-to-use-other-drugs/
[29] http://www.dailymail.co.uk/health/article-6086073/Smoking-cannabis-ages-brain-average-2-8-YEARS.html

- In youth, marijuana causes depression, functional problems, and educational failure.[30] Colorado's youth marijuana usage rate 74% higher than the national average[31] because it is seen as "safe" because it is legal.
- Pot advocates teach people to believe it is safe to drive stoned[32] when in fact it is dangerous.[33]
- With marijuana being a "multiplier drug" enhancing the effects of alcohol,[34] many individuals drive when they are drunk *and* stoned, resulting in many more deaths.[35] Driving drunk and stoned doubles the driving risk.[36]
- Colorado's noted Colorado Christian University Centennial Institute found that marijuana legalization resulted in great economic, social, physical losses to the State of Colorado and its Citizens: [37]
    - **For every dollar gained in tax revenue, Coloradans spent approximately $4.50 to mitigate the effects of legalization.**
    - **The cost of DUI's for people who tested positive for marijuana in 2016 was over $25-million.**
    - **Costs related to the healthcare system and from high school drop-outs are the largest cost contributors.**
    - Like tobacco, commercial marijuana is likely to have health consequences that we won't be able to determine for decades.
    - 69% of marijuana users say they have driven under the influence of marijuana at least once, and 27% admit to driving under the influence on a daily basis.
    - Research does suggest that long-term marijuana use may lead to reduced cognitive ability, particularly in people who begin using it before they turn 18.
    - Adult marijuana users generally have lower educational attainment than non-users
    - The marijuana industry used enough electricity to power 32,355 homes in 2016
- Marijuana "normalization" results in state-sponsored child abuse and neglect. Abuse of any drug results in profound impact to children. here many proven stories of adults getting babies[38] or children[39] stoned, abusing them, neglecting them, babies born "high", children being raised in marijuana "grow" operations, and leaving marijuana where children can use it.
- When entire urban areas reek of pot,[40] we know that marijuana addiction is a seminal public safety and health problem.[41]

[39] https://www.dailymail.co.uk/news/article-6140523/Parents-rage-videos-showing-babysitters-abusing-nine-year-old-son-Syndrome.html
[40] https://www.bostonglobe.com/lifestyle/style/2017/07/04/you-love-smell-marijuana-morning/VWnegTgDNDdNJGHlFM6QcP/story.html

- The Colorado School of Public Health[42] study recognized that children are being "prescribed" psychoactive marijuana in Colorado and that parents use pot as a "parenting tool" to calm themselves (p. 33).[43]
- The American Academy of Child and Adolescent Psychiatry formally opposes marijuana legalization.[44]

3. **Homelessness:**

   Marijuana and abuse of other drugs drives the tragic and very expensive homelessness crisis. Marijuana is the most commonly abused drug by the homeless.

   - The correlation between substance abuse and homelessness is nearly 100% because nobody dares to help a drug abuser by letting them move into their home.
   - San Francisco is spending $280-million annually on homelessness[45] — over $37,000 per person – not including another $65-million on street cleanup[46] – for a total of $345-million in expenses for just one city
   - Orange County is spending nearly $300-million[47] on homelessness.
   - Los Angeles County is spending $1-billion annually on homelessness[48] with no end in sight.

4. **Expansion of the Illicit marijuana Market: cultivation, smuggling, interdiction, arrests, and prosecutions**

   IP 2020-125 Section 1. Purpose does not accurately state the purpose of the Initiative. There is no body of documentation proving the theories stated are anything other than theories.

   We have in our possession abundant documentation proving that the statements made in Section 1. Purpose are undocumented theories or marketing language that are 180-degree opposite of what marijuana legalization caused in all other states.

   The benefits asserted are entirely false, unproven, and controverted by abundant historical documented proof about the consequences of marijuana legalization in all other states we have studied.

[48] http://www.latimes.com/local/lanow/la-me-county-homelessness-spending-20160205-story.html

Where the Purposes stated are a gross misrepresentation of documented facts, with massive fiscal costs to the State and local jurisdictions intentionally concealed, we urge the Secretary of State and the Attorney General to reject IP 2020-125 on the grounds that an accurate Fiscal note is impossible to estimate until a longitudinal cost study is done a Big Four accounting firm.

We suggest that if recreational marijuana is to be legalized, it should be done by the Missouri Legislature which is in the statutory position to conduct appropriate cost and impact, and budget studies before passing legislation:

A. Legalization of recreational marijuana does not "remove (or reduce} **the commercial production and distribution, of marijuana from the illicit market". The illicit market and costs to the state expand precipitously with legalization of recreational marijuana.**

- Illegal pot is now commonly grown in state parks in California, Colorado, Washington, and other states with great damage done to the environment due to noxious chemicals going into waterways. Interdiction is expensive and underfunded. There are many articles about this we can provide to prove this fact. [49] [50] [51]
- Approximately 10% of low income housing in Colorado has been destroyed by illegal growers who rent cheap houses to grow pot, which then have to be torn down because of mold and toxic chemicals. This decreases housing available to low-income citizens and effectively makes them homeless. There are many news stories and police testimony documenting this fact. [52] [53] [54]
- Los Angeles recently charged over 500 people running illegal pot businesses.[55]
- Seizures of black market marijuana in Colorado increased 1042% since recreational marijuana was legalized.[56]

  - Seizures of Colorado marijuana in the U.S. mail system has **increased 1,042 percent** from an average of 52 parcels (2009-2012) to an average of 594 parcels (2013-2017) during the time recreational marijuana has been legal.

- The number of seizures of illegally-grown marijuana increased 2800% since the legalization of recreational marijuana in Colorado.[57]

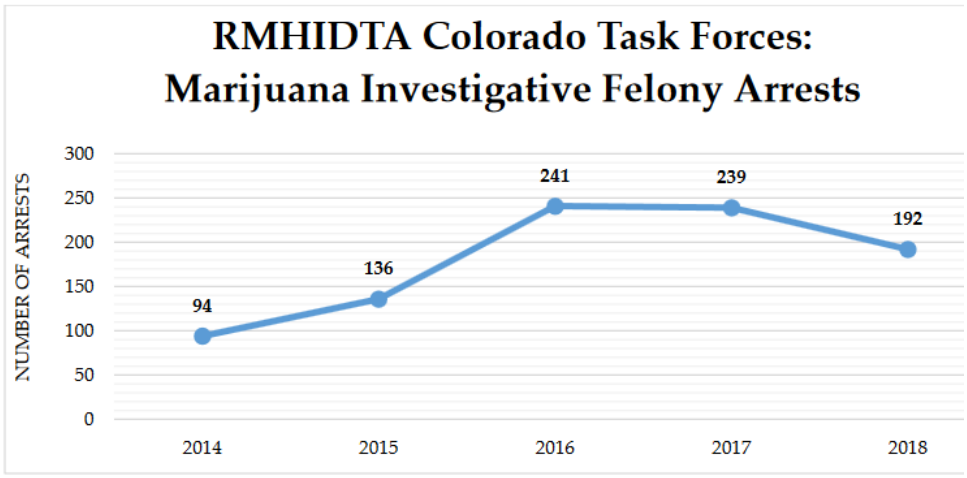
SOURCE: Rocky Mountain HIDTA Performance Management Process (PMP) Data

- The number of felony arrests for marijuana increased by 208% in Colorado from 2014 to 2018 after recreational marijuana was legalized:[58]

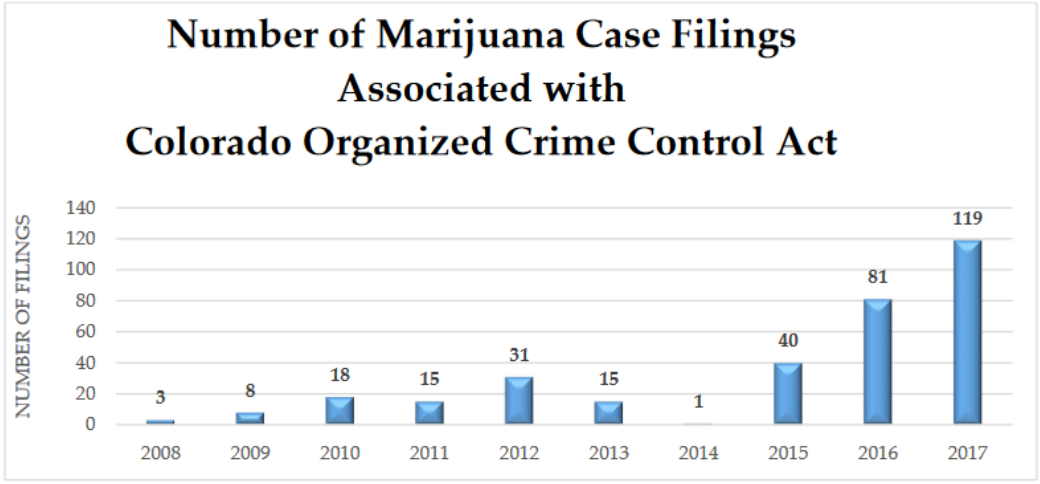


SOURCE: Rocky Mountain HIDTA Performance Management Process (PMP) Data

- The number of case filings under the Colorado Organized Crime Control Act increased 11,900% since recreational marijuana was legalized in 2014:[59]

[58] http://msani.org/wp-content/uploads/2019/09/The-Legalization-of-Marijuana-in-Colo.The-Impact.-Volume-6.pdf, pg 52.
[59] http://msani.org/wp-content/uploads/2019/09/The-Legalization-of-Marijuana-in-Colo.The-Impact.-Volume-6.pdf pg 52

Colorado Organized Crime Control Act Filings



SOURCE: Colorado Department of Public Safety, Division of Criminal Justice, Office of Research and Statistics

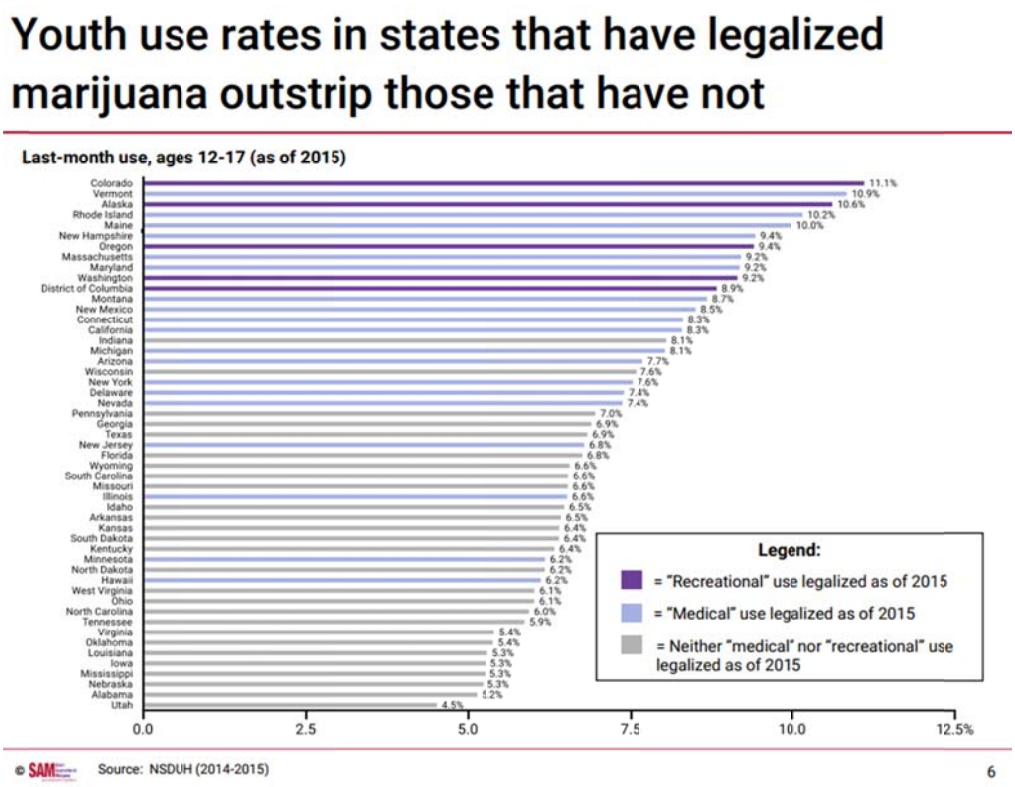
- Colorado Organized Crime Control Act (COCCA) filings are conspiracy cases in which there is potential for a larger sentence than other types of drug filings.

B. Distribution of marijuana to minors will increase

These Initiatives will not prevent the distribution of marijuana to persons under twenty-one years of age. Marijuana use by youths age 12-17 and a variety of consequential mental health problems increased precipitously in states that legalized either "medical" or "recreational" marijuana according to the National Survey on Drug Abuse and Health (NSDUH)[60] administered by the federal Substance Abuse and Mental Health Services Administration (SAMSHA).

- Substance abuse rates are as much as 244% higher in states that legalized any form of psychoactive marijuana. There is no data proving a decrease in substance abuse by young adults in states that legalized any form of psychoactive marijuana. The structure of this IP contains no policy different from other states that would result in a decrease of distribution marijuana to persons under age 21:[61]

[60] https://nsduhweb.rti.org/respweb/homepage.cfm; https://www.samhsa.gov/data/sites/default/files/NSDUH-FFR1-2016/NSDUH-FFR1-2016.pdf
[61] https://learnaboutsam.org/wp-content/uploads/2017/04/MMJgraph.png



o From 2009 to 2017, ingestion of marijuana by youth increased an mean average of 27% per year in states that legalized any form of psychoactive marijuana:[62]

Children Ingesting Marijuana Increase after Legalization of Marijuana

From January 2000 through June 2017 there were nearly 3,000 ingestions of marijuana by children younger than six. Over 70% of those ingestions were by children under the age of 3 and more than half received some form of hospital-based care. Symptoms in the children ranged from drowsiness and confusion to seizures and coma. Before 2009 there was no significant change in either the number or rate of marijuana ingestions, however from 2009 to 2017 the mean annual increase was 27% per year rising to 742 ingestions per year. Over 70% of those ingestions occurred in states with legalized marijuana.

SOURCE: **Wang, Sam. (2019). *Study shows increase in ingestions of marijuana by children in U.S.* Nationwide Children's Hospital.**

C. Revenue to criminal enterprises will increase

Both initiatives will increase the revenue generated by illicit marijuana going to criminal enterprises. The IP will increase the diversion of marijuana to illegal enterprises and create a new shadow street market based on back-door sales by licensed growers and sales outlets. Every state that legalized "recreational" (sometimes called medical) marijuana has seen significant increases in criminal illegal cultivation, smuggling, interdiction, arrests, and prosecutions.

[62] http://msani.org/wp-content/uploads/2019/09/The-Legalization-of-Marijuana-in-Colo.The-Impact.-Volume-6.pdf; pg 48.

These initiatives will not decrease revenue to illicit markets. Illegal marijuana growing, distribution, smuggling, and importation has been proven to be stimulated by marijuana legalization. This drives increases in violent crime, and does not decrease criminal prosecutions for illegal marijuana growing, sales, and production.

- When marijuana is legalized, the market size for marijuana increases exponentially. This drives increases in local illegal growing and importation from Mexico.
- Interdictions of illegal product actually increase and there are actually more arrests for illegal growing. Over 400 polluted grow sites exist in California[63] in public forests.
- Illegal marijuana costs much less than state-approved marijuana – causing a new and very large black market to appear that is difficult to interdict because the state cannot prosecute without proving that the pot is illegal.
- In Colorado, legal stores are selling only about 1/3 of the product they anticipated. Licensed growers end up selling overproduction on the black market to keep from going bankrupt. *Licensing does not encourage above-board commercial activity. It is driving major expansions of illicit activity that are much more profitable for marijuana business people.*
- At least half of all gun violence is caused by individuals who test positive for illegal drugs at the time of arrest. Marijuana is the most common drug involved in gun violence.[64]
- 76% of domestic violence involves an offender using drugs or alcohol at the time of the offense. (*Ibid., 25)*
- In Washington State, legal production is 300% of sales demand,[65] and prices for "regulated" pot are half of black market prices. So growers are illegally exporting large quantities of pot to non-marijuana states.
- Increasingly violent drug wars in Chicago are a direct consequence of Illinois' marijuana legalization in 2013 with an additional Cook County ballot approval in June, 2018.[66]
- Cartels are buying many inexpensive homes and turning them into marijuana farms[67] to the destruction of community, environment, and real estate markets. In Colorado and California,
- Pot shops are losing a lot of "business" to bootleg weed.[68]
- The "litany of conflicts created by [the paradigm shift of] legal marijuana" have made policing and enforcement expensive, laborious, and difficult.[69]

D. FISCAL NOTE:

- **The Fiscal note in the Initiative estimates only administrative costs for implementing the Initiative. Other states failed to estimate the consequential costs and are facing budgetary and social disaster. Missouri must fully understand the costs to the state before approving any Initiative to legalize recreational marijuana.**
- **The costs for interdiction, enforcement, interdiction, environmental damage, gang violence, mass shootings, longitudinal costs for kids who fail in school, mental health problems, divorce, illegitimacy, homelessness, and other problems caused by substance use and abuse will increase significantly and must be estimated in the Fiscal note. Front-line costs to local jurisdictions, who are immediately impacted, must also be estimated so the voters know what they are voting on. I very roughly estimate we are looking at well over $4 billion in costs to the State annually.**

E. Public Safety: IP 2020-125 will result in much higher rates of traffic fatalities, serious environmental risks.

- Pot advocates teach people to believe it is safe to drive stoned[70] when in fact it is dangerous.[71] As we might expect, drugged driving is now the leading cause of traffic deaths.[72]
- In Denver and at least 9 other American cities, laws banning the smoking of marijuana publicly are broadly ignored. Los Angeles just charged over 500 people running illegal pot businesses. Marijuana is being illegally grown in plain sight.
- Illegal grows on public lands are out of control and result in costly, dangerous environmental cleanups. [73]
- The stench[74] of both legal and illegal marijuana farming and its widepread use[75] are driving community disagreement[76] and property value loss.
- Misuse of fertilizer and herbicides poisons public lands, waterways, and kills animals.[77]

F. IP 2020-125 will not "protect health by ensuring the safety of marijuana and products containing marijuana". It will magnify and exacerbate existing health consequences of marijuana use and abuse.

- Psychoactive marijuana will never be a "safe drug". Its effects on individuals are almost entirely harmful with the impact to brain and motor functions extending days or weeks after use.
- THC causes permanent brain damage in individuals under age 24.
- THC causes paranoia and anxiety in many individuals.
- Cannabis-related deaths increased in Colorado by 66% after marijuana was legalized.[78]
- A highlighted 2017 CDOT survey found that 55% of marijuana users surveyed drove a vehicle within two hours of smoking pot with only 32% believing they were "safe to drive". [79]
- Violent crime increased by 40% in Denver since "medical marijuana" was "legalized"[80]
- Violent juvenile crime in Denver was up 11% between 2013 and 2015.[81]
- Chronic homelessness in Denver is at a 10-year high in 2017 [82] (homelessness began increasing as soon as "medical marijuana" was legalized in Colorado in 2008).
- Colorado had a 24% increase — the nation's largest increase — in homeless veterans, at a time when Veteran homelessness is declining nationally.[83]
- Homelessness grew exponentially in every state that legalized psychoactive marijuana. Domestic violence, gun violence, health care crises grew substantially in every state that legalized psychoactive marijuana.
- The problem of illegal street marijuana is so bad that in Colorado cities are forcing growers to spray junk DNA on their product so the State can identify legal vs illegal marijuana. This adds expense for both growers and the state (DNA tests are very expensive) – making legal marijuana even more uncompetitive against street marijuana. **Dangerous Health Risk:** The strains of custom junk DNA used for tracing grower identity have not been FDA tested or approved – creating a potentially serious public health risk that has not been tested or approved by the FDA.
- The KOMO News Special: Seattle is Dying[84] documented and proved that substance abuse – led by marijuana use – is driving a massive homelessness problem in Seattle. They are pushing for mandatory substance abuse treatment in prisons.

G. Marijuana legalization drives significant increases in youth educational, addiction, and school failure.

- In individuals under age 24, marijuana causes depression, functional problems, and educational failure.[85]
- Colorado's youth marijuana usage rate 74% higher than the national average[86] because it is seen as "safe" because it is legal.
- Rhode Island, which legalized medicinal use, tops the list for use by 12-17 year olds with rates 55% higher than the national average and 82% higher than Idaho (where marijuana is not legal). The percentage of youth aged 12-17 in Alaska that reported past month marijuana use is 80% higher than Idaho youth.[87]

H. Unconstitutional Overreach:

- IP 2020-125 Section 6.(2).(c).(iii) publicly admits that marijuana causes serious substance abuse and addiction *problems and provides funding to "help" citizens whose lives have been destroyed by drug abuse that will be sponsored by the State of Missouri via a constitutionally-protected public-private drug-dealing operation.*
- It is unconstitutional for the State to violate Article 2, Section 1 of the Missouri Constitution by going into business as a drug dealer, and going into business with drug dealers selling "recreational" Class-I drugs known to harm and addict Missouri Citizens.
- An IP that violates any provision of the Missouri Constitution cannot be added to the Missouri Constitution and must be procedurally rejected.
- We would never Constitutionally immunize doctors for recommending cigarettes[88] as they did nearly 60 years ago. We cannot now establish a Constitutional Right and Immunity for the State, drug dealers, and drug-dealing "businesses" to promote and profit from drug addiction.

I. The massive negative fiscal note provisions intentionally designed into IP 2020-125 render it unconstitutional. Section 6. of this IP will structurally impose massive unfunded fiscal mandates, fiscal liabilities, and imponderable policy quagmires on the State of Missouri, the Missouri Legislature, all local jurisdictions, businesses, and taxpayers; as follows:

Cite - IP 2020-125 Section 6. and subsections:

6. Taxation and Reporting.

(1) A tax shall be levied upon the retail sale of non-medical marijuana sold to consumers at marijuana facilities licensed pursuant to this section within the state. The tax shall be at a rate of fifteen percent of the retail price. The tax shall be collected by each licensed non-medical retail marijuana facility and paid to the department of revenue. After retaining no more than two percent of the total tax collected or its actual collection costs, whichever is less, amounts generated by the tax levied in this section shall be deposited by the department of revenue into the "Veterans, Infrastructure, and Health Fund") created under this subsection. Licensed entities making non-medical retail sales within the state shall be allowed approved credit for returns provided the tax was paid on the returned item and the purchaser was given the refund or credit.

(2) There is hereby created in the state treasury the "Veterans, Infrastructure, and Health Fund" which shall consist of taxes and fees collected under this section. The state treasurer shall be custodian of the fund, and he or she shall invest monies in the fund in the same manner as other funds are invested. Any interest and moneys earned on such investments shall be credited to the fund. Notwithstanding any other provision of law, any monies remaining in the fund at the end of a biennium shall not revert to the credit of the general revenue fund. The commissioner of administration is authorized to make cash operating transfers to the fund for purposes of meeting the cash requirements of the department in advance of it receiving annual application, licensing, and tax revenue, with any such transfers to be repaid as provided by law. The fund shall be a dedicated fund and shall be distributed as follows:

(a) First, to the department, an amount necessary for the department to carry out this section, including repayment of any cash operating transfers, payments made through contract or agreement with other state and public agencies necessary to carry out this section, and a reserve fund to maintain a reasonable working cash balance for the purpose of carrying out this section;

(b) Next, distributed to the local government where the retail sale occurred, three-fifteenths of the remaining fund balance.

(c) After the distribution to the local government where the retail sale occurred, the remaining fund balance shall be distributed in thirds as follows:

(i) One-third of the remainder of the fund balance shall be transferred to the Missouri veterans commission and allied state agencies, as determined by

(Continued next page)

appropriation, exclusively for health care and other services for military veterans and their dependent families;

(ii) One-third of the remainder of the fund balance to the State Road Fund created under article IV, section 30b of this Constitution for constructing and maintaining an adequate system of connected state highways; and

(iii) One-third of the remainder of the fund balance to the department to provide grants to existing agencies and not-for-profit organizations, whether government or community-based, to increase access to evidence-based low-barrier drug addiction treatment, prioritizing medically proven treatment and overdose prevention and reversal methods and public or private treatment options with an emphasis on reintegrating recipients into their local communities, to support overdose prevention education, and to support job placement, housing, and counseling for those with substance use disorders. Agencies and organizations serving populations with the highest rates of drug-related overdose shall be prioritized to receive the grants.

(d) All monies from the taxes and fees authorized hereunder shall provide additional dedicated funding for the purposes enumerated above and shall not replace existing dedicated funding.

(3) For all retail sales of marijuana, a record shall be kept by the seller of all amounts and types of marijuana involved in the sale and the total amount of money involved in the sale, including itemizations, taxes collected, and grand total sale amounts. All such records shall be kept on the premises in a readily available format and be made available for review by the department and the department of revenue upon request. Such records shall be retained for five years from the date of the sale.

(4) The tax levied pursuant to this subsection is separate from and in addition to any general state and local sales and use taxes that apply to retail sales, which shall continue to be collected and distributed as provided by general law.

(5) Except as authorized in this subsection, no additional taxes shall be imposed on the sale of marijuana.

The IP is unconstitutional for the following aggregate reasons:

A. IP 2020-125 provides no funding to pay for the massive fiscal note imposed on the state and local jurisdictions to cover costs of significant increases in homelessness, crime, violence, vehicle accidents, divorce, and other expensive problems that state-sponsored substance abuse has proven to have caused in other states.

B. IP 2020-125 Section 6(1) creates a 15% sales tax on recreational marijuana but intentionally denies funding to the State, local jurisdictions, and businesses to pay for costs of implementation and the diaspora of consequences of marijuana legalization including but not limited to homelessness, interdiction, prisons, environmental cleanup, crime, increased domestic and gun violence, property damage, increased medical, property, and vehicle insurance, OSHA compliance, testing of marijuana for safety, and state and local marijuana regulation infrastructure.

C. IP 2020-125 Section 6(2) forces all but a tiny percent of tax revenues to be donated a "Veterans, Infrastructure, and Health Fund" operating independently of the General Revenue fund, operating as follows:

1. The fund firstly pays for "carrying out" the IP. *It does not fund ongoing operations of state agencies to handle, pay for, or recover from the consequences of this IP or substance abuse.*
2. Funding to Veterans
3. Highway funding,
4. Addiction treatment done by psychiatrists, psychologists, and mental health individuals.

- The State Legislature has responsibility for and is constitutionally required to enact a balanced budget every year. Spending needs consistently outpace tax collections. This IP undermines the Legislature's constititutional right to establish and manage the state budget.

- The directed use of tax revenues defined in the IP are a "Christmas tree" of political buyoffs unrelated to the purpose of the IP. These buy-offs are intended to garner support for the initiative, but do not provide functional use of the revenues to carry out the IP.

- To pass constitutional muster, if the IP directs use of tax revenues, the funds must go to serve a narrowly-tailored purpose fully funding the provisions of the IP without imposing unfunded mandates or tying the hands of the Missouri Legislature to implement the State Budget.

- The majority of tax revenues will not be directed to pay for the costs, impacts, and consequences of marijuana legalization. This forms an unconstitutional unfunded mandate requiring rejection of the IP.

- Section 6. (5) prohibits enactment of any additional taxes on marijuana at the state or local levels to pay for unfunded costs, mandates, and consequences of marijuana legalization. The hands of the legislature, local jurisdictions, and courts are tied.

- The wording of IP 2020-125 Section 6. suggests that the Missouri Supreme Court could rule it unconstitutional for the City of St. Louis to enact a corporate head tax to pay for homelessness – which is caused by substance abuse, or any other tax to pay for problems caused by substance abuse

- I argue that it is unconstitutional for Citizens to force large invisible, un-itemized, un-estimated, unassigned, and unfunded mandates on the State, the Legislature, local jurisdictions, businesses, and Citizens via a Constitutional initiative not afforded strict scrutiny protections for race and sex and designed to procedurally serve and financially execute narrowly-tailored constitutional purpose.

- In Montana, the Marsy's Law IP was ruled unconstitutional by the Montana Supreme Court[89] because of unfunded mandates and an expansive list of unseen impacts that voters, the State, and local jurisdictions could not see or judge within the language of the IP..

> "Although well intentioned, the process leading to **CI-116's passage deprived Montana voters of the ability to consider the many, separate ways it changed Montana's constitution or explain the significant administrative, financial, and compliance burdens its unfunded mandates imposed upon state, county and local governments while jeopardizing the existing rights of everyone involved with the criminal justice system,"** wrote Lewis and Clark County Attorney Leo Gallagher, one of those initially named on the petition to void Marsy's Law, in a press release.

J. IP 2020-125 is unconstitutional in present form because:

A. It forces many unseen and unreconciled changes other state laws, administrative rules for many agencies, police, social services, and local laws that the voters cannot see or vote on.

B. It forces many unseen financial mandates on the state, local jurisdictions, schools, police, and other public institutions.

C. It forces exceptionally-large financial mandates on insurance companies. Insurance companies will be forced to pay for much higher rates of traffic accident, mental health, property, theft, and OSHA and employment-related claims and lawsuits, suicides, and life insurance.

D. It forces unfunded mandates on businesses who will:
- Be forced to deal with, pay for, and clean up after vagrancy, theft, crime, and loss of business caused by homeless encampments.
- Be forced to pay large "head taxes" and other brick-and-mortar taxes that have been imposed on businesses in Colorado, Washington, California, and New York to pay for homelessness and related increases in criminal costs.

E. I believe that the Montana ruling on the many administrative, financial, and compliance burdens imposed on state, local, police, courts, and administrative agencies, and the very large costs imposed on businesses and insurance companies prove that **IP 2020-125** is an unconstitutional Initiative in the form it is written, and must be rejected. Marijuana legalization is a complicated issue that must be handled and funded by the Missouri Legislature.

The cycle of community failure begins with substance abuse.

The cycle of urban success begins with families being empowered with choice-based policy to drive substance abuse out of their neighborhoods – *one family at a time.*

Fact: Substance Abuse is the primary driver of violence in America

- 76% of domestic violence involves an offender using drugs or alcohol **at the time of the offense. ***
- At least 50% of non-intimate violence involves an offender using drugs or alcohol **at the time of the offense. ***
- **Underreporting**: The BJS did not report how much violence involves individuals addicted to substances who were not "high" at the time of the offense. *

Among victims of violence who were able to describe the offender's use of drugs or alcohol, about two-thirds in an intimate relationship with the offender reported the offender's drinking at the time of the crime.

Victim-offender relationship	Total	Offender using: Alcohol	Drugs	Drugs or alcohol	Neither drugs nor alcohol
All victims of violence	100%	28%	7%	9%	56%
Intimate*	100	55	9	12	25
Nonmarital relative	100	38	14	12	36
Acquaintance	100	28	9	10	52
Stranger	100	24	6	7	63

*Includes current or former spouse, boyfriend, and girlfriend.

Figure 3

- 75% of people who begin treatment for drug addiction report performing acts of violence, including (but not limited to) mugging, physical assault, and using a weapon to attack another person.**
- Gun owners who have been convicted of an alcohol-related offense, such as driving under the influence or drunk and disorderly conduct, are up to five times more likely to be arrested for a violent or firearm-related crime than those who have not. ***

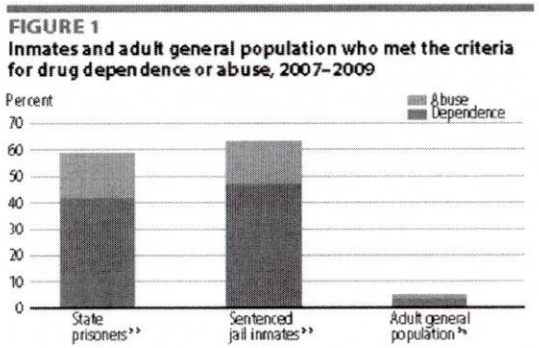
Fact: Substance Abuse is the primary driver of crime and violence in America

- About 60% of the prison population has met the DSM-IV criteria for drug dependence or abuse.*
- Almost 40% of people locked up for property crimes and 14% of those incarcerated for violent crimes reported that they had committed their most serious offense for drug-related reasons. *
- During 2007-09, prisoners (77%) and jail inmates (78%) reported having ever used marijuana/hashish, more than any other drug*



- NOTE: The above figures are understated because:
  1. Substance users tend to be reticent admitting to using substances .
  2. Substance users who were killed, escaped while committing a crime, or not arrested are not included in this data set.
  3. Individuals misusing prescription drugs are often not triaged until a deep investigation into a violent crime is specifically made.
  4. **Substance abuse causes symptoms presumed to be "mental illness" until diagnosed as a "substance use disorder".** ***An unknown but significant amount of substance abuse is undiagnosed, misreported as "mental illness", and improperly blamed on "mental illness".*** **The Sandy Hook case is an example of misreporting later corrected by deep police investigation.**

- **Psychiatric drug cover-up: There have been at least 27 school shootings committed by those taking or withdrawing from psychiatric drugs *such as opiates*, resulting in 162 wounded and 72 students and/or faculty killed ... *there has yet to be a federal investigation in the United States on the link between psychiatric drugs and acts of school or other mass shooting.* ****

* Results from the 2017 National Survey on Drug Use and Health (HHS Publication No. SMA 18-5068) Bureau Of Justice Statistics, September, 2018; https://www.bjs.gov/content/pub/pdf/dudaspji0709.pdf

Fact: Substance Abuse is also the primary driver of homelessness in America

- A 2008 survey by the United States Conference of Mayors asked 25 cities for their top three causes of homelessness. Substance abuse was the single largest cause of homelessness for single adults (reported by 68% of cities).[1]
- Scott Lindsay, a consultant to the Mayor of Seattle, investigated the cases of about 100 homeless people in Seattle and found that 100% of them had a substance abuse problem. Over 2/3 have been arrested for theft this year. Retailers are hit hard by theft. [2]

Why do substance abusers end up homeless?

- If you are a hard working person and you accidentally end up in hard times, your friends or your church will take you in or help you find a place to live until you get your feet back on the ground.
- But if you are a drug addict and end up divorced, unemployed, or destitute, nobody will help you or let you move in with them. You are on your own living on the streets unless you can find room in a homeless shelter.

Our Policy Meta-analysis:

- **Our extensive review of interdisciplinary literature indicates that the onset of substance abuse -- most often in the family -- is the predominant lifespan factor driving homelessness and many other serious longitudinal consequences for individuals and families.**
- **Homelessness cannot be managed via end-stage crisis-cleanup programs. Free housing, food, and support services are a formula for long-term dependence, not recovery and independence. *The emphasis must be on upstream substance abuse policy in the family.***
- **Substance abuse usually begins because of social and environmental factors. As substance abuse advances to addiction, epigenetic change to brain DNA takes place, modifying neural networks in ways that can persist beyond the time of drug intake and may become permanent.[3] *Therefore substance abuse treatment must occur near the onset of substance abuse, which is commonly the family.***
- **Homelessness can be effectively prevented via simple policies *healing early-stage substance abuse in families before irreversible chronic phase consequences and hopelessness have destroyed families.***

Impacting Substance Abuse in the family is the key to balancing local, state, and federal budgets

Substance abuse is the riverhead driving a long list of serious intergenerational consequences. Below is a partial list of costly consequences of unaddressed substance abuse in the family:

- Mass shootings (at least 80% correlation)
- Homelessness (nearly 100% correlation)
- Domestic Violence (at least 75% correlation)
- Gun Violence (at least 50% correlation)
- Car, Construction, Work, Other Accidents
- Crime, Property damage, related costs
- High medical, property, accident insurance
- High divorce, illegitimacy, related costs
- Lifelong debilitating mental and physical problems and longitudinal costs (all ages)
- Child Abuse and Neglect
- Educational failure
- "Failure to Launch" permanently-dependent adult children
- Permanent brain damage to children under age 24 caused by marijuana and other drugs
- Suicide by adults and children (600% higher)
- Long-term poverty for women and children
- **Double Governmental Jeopardy: Loss of tax income coupled with compounding demand spending**

Today there are no federal or state policies impacting substance abuse in the family.
Filling the "Recovery Gap" is the only way we can reverse the trend of costly, violent socioeconomic collapse

© Civitas Economic Engineering LLC, 2019

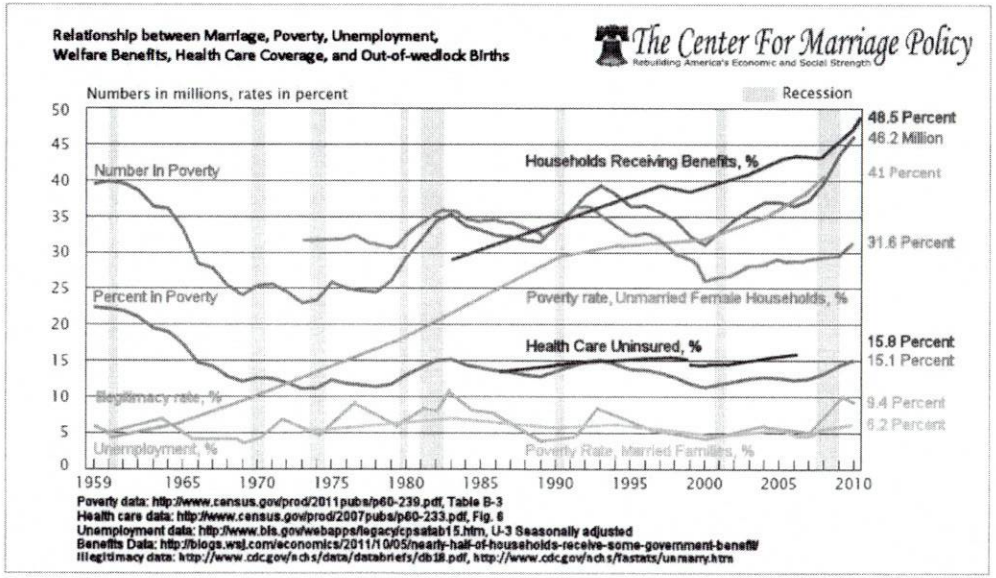
Ending family disruption driven by substance abuse is the key to balancing government budgets and maintaining a strong economy over time

- Marriage is the socioeconomic engine creating the motivated, educated, reliable work force that businesses want and need.
- Marriage guarantees the lowest crime rates, poverty rates, and means-tested welfare costs.
- Marriage guarantees the brightest social and economic outcomes for women and children.
- We either have big marriage or big government. *Marriage metrics report success or failure of social policy just like employment/unemployment metrics report success or failure of economic policy*. **Success in both sectors is required for a balanced budget.**
- Political parties are at loggerheads arguing about high crime rates, poverty, violence, and deficit spending. Our political system is overwhelmed and the rule of Constitutional law existentially threatened by the trickle-down consequences of substance abuse. **Government will be increasingly frantic, volatile, radical, and unproductive until we finally reverse the unaddressed trend of substance abuse.**
- Health care financial metrics will stabilize. Far fewer individuals will need free health care when mass substance abuse is obviated. National Health Care can be retired without a fight.
- Gun control will fall by the wayside as a national issue.

© Civitas Economic Engineering LLC, 2019

Why Building Marriage is the key to balancing budgets.

- **Despite welfare spending being the largest line item in the federal budget, the poverty rate for married families is consistently at least 450% to 600% lower than for unmarried female households.**
- ***This happens because married families have two income sources and twice the human resources.***
- **When we finally address substance abuse in the family, poverty and means-tested welfare spending will shrink naturally.**
- **The bonus prizes will be corresponding shrinkage of health care, criminal and educational costs.**



© Civitas Economic Engineering LLC, 2019

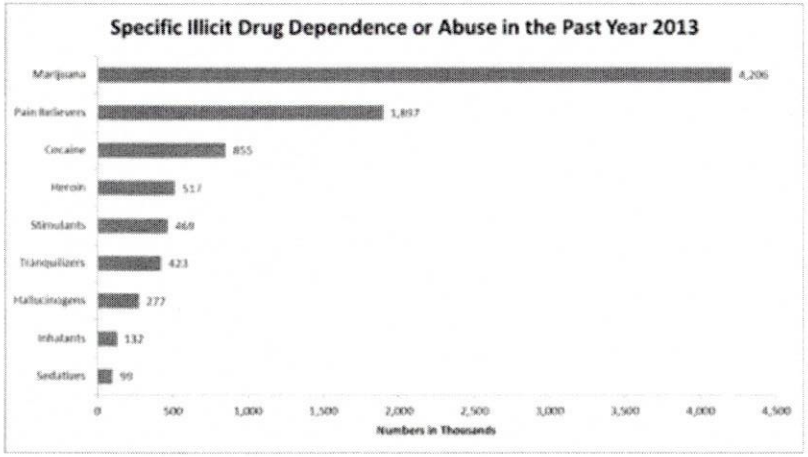
Why Building Marriage is the key to freeing up budget resources for education and infrastructure

- According to the Heritage Foundation, each divorce and case of illegitimacy costs the state an average of $20,000 in expenditures and lost revenues ***each year***
- The annual cost to the state of Missouri for 19,187 divorces and 29,134 children born out of wedlock in 2017 is conservatively estimated to be about $1.7 Billion – (5.8% of Missouri's 2019 budget). (UMC Regional and Fiscal Studies, CDC)
- A reduction of divorce and illegitimacy of only 10% will painlessly shrink demand spending in Missouri by at least $116-million, freeing up capital for education. Actual savings should be much higher.
- States will enjoy across-the-board spending reductions due to the wide span of programs with costs driven by substance abuse. Savings could be as high as $2-billion in Missouri depending on the amount invested in public outreach and subsequent media involvement.

© Civitas Economic Engineering LLC, 2019

Closing the "Treatment Gap" – In the Family [1]

- In 2015, the National Institute for Drug Abuse (NIDA) stated that an estimated 22.7 million Americans (8.6 percent) needed treatment for a problem related to drugs or alcohol, but only about 2.5 million people (about 11% of substance abusers) received treatment at a specialty facility.
- **Only 1 in 10 individuals addicted to substances are recovering from their addiction.**
  (The other 9 are bankrupting the United States and making it impossible to govern).
- NIDA calls this oversight the "**Treatment Gap".** Substance abuse occurs ***in the family***. The family is the only effective place to effect recovery – before people lose everything and become hopeless.
- The opiate and marijuana abuse crises will abate when people stop wanting drugs for recreational purposes. Policies aggressively reducing teen and young adult drug abuse – **in the family** – are overdue.



Binge and heavy drinking are more widespread among men than women. In 2013, 30.2 percent of men and 16.0 percent of women 12 and older reported binge drinking in the past month. And 9.5 percent of men and 3.3 percent of women reported heavy alcohol use.

Drug use is highest among people in their late teens and twenties. In 2013, 22.6 percent of 18- to 20-year-olds reported using an illicit drug in the past month.

The Family Substance-Abuse Restraining Order (FSRO) Process
How It Works

- **An FSRO is similar to what Drug Courts do, but brings about substance-abuse recovery in an intact family, at an early phase in the addiction cycle, and usually long before the substance abuser ends up in serious or irreversible trouble.**
- The spouse of a substance-abusing partner (or parents of a substance abusing child) files for a Family Substance-Abuse Restraining Order at the same court where domestic violence restraining orders are filed.
- For substance-abusing children, the parent coordinates with a children's home, which cooperatively handles or performs substance abuse counseling in a rigorous, disciplined, environment. Children will take recovery very seriously because they do not like living in the highly regimented "boot camp" of a children's home.
- The substance abuser is removed from the home and is not allowed to return until he/she has demonstrated a convincing level of sobriety. The Judge tells the substance abuser that they only have two choices – grow up or lose everything – to emphasize the importance of choosing recovery.
- Telephone-contact orders are encouraged to maintain communication so the responsible spouse can gauge recovery progress and keep firm but loving pressure on the substance abuser to recover.
- Recovery status is mailed to the court biweekly (or when indicated by an event) via forms using checkboxes indicating recovery progress and cooperation. This is similar to drug-court reporting methods (which make court appearances by recovery centers, A.A., and other counselors unnecessary).
- The FSRO is dropped when the court and spouse/parent are convinced that the respondent's has achieved a convincing level of sobriety.

The cost of substance abuse is very high.
Everyone is impacted socially, economically, and politically

- Every corporation pays for the costs of substance abuse via inflating HR costs, poor work performance, turnover, accidents, lawsuits, health and property insurance, property loss, and high taxes.
- Governments, OSHA-compliant businesses and agencies, and insurance companies have the highest direct-exposure out-of-pocket costs.
- "Death Profession" risks are significantly driven by substance abuse (both on and off the job), and job-related exposure to substance-abusers.
- Every taxpayer funds the high costs of government constantly reacting to, enabling, covering up, and cleaning up from substance-abuse related criminal, social, and economic consequences. Many innocent victims are robbed, injured, or killed by substance abusers.
- ***Marijuana "legalization" approximately quadruples the number of costly criminal prosecutions and incarcerations for illegal drug sales, smuggling, growing, and illegal production. Prisons fill up, not empty out and interdiction costs explode.***[1] ***This fact is opposite of claims made by marijuana activists.***
- The inability of politicians to manage out-of-control costs, deficits, human wreckage, and mass violence problems is why cities, states, and the federal government are drowning in debt, while politicians and media are in a war of words with no actionable answers on the horizon.

If you ask politicians or the media what is driving violence,
the chances are they will blame it on guns, poverty, police, gangs, mental health, racism, fatherlessness, video games, or income inequality.

If you ask police officers what is driving violence,
The chances are they will say drugs or substance abuse.

Politicians usually do not know what police officers know. They are not on the front lines. Politicians often hurriedly respond to angry constituents with costly crisis mop-up programs funding the *consequences* of substance abuse. This fixes nothing and fosters funding models that entitle and guarantee future drug abuse in the community.[1]

Harnessing the People to drive substance abuse out of communities,
one family at a time, is the only way for everyone to finally win.

The "system" knows that substance abuse drives crime and violence.
(Why Missouri Must Act Now)

In August, 2019, Federalist advocates at the National Council for Behavioral Health issued a 77-page study, "Mass Violence In America".[1]

They intend to misuse mass violence to "end the war on drugs", empty-out prisons, and establish a powerful new government agency combining national security, FBI, substance abuse, mental health, school, and family surveillance functions into one super-agency.

This new agency would move social and psychological services inside national security with unlimited "military" funding not presently available to social services.

The agency would have power to surveil families from schools and other government agencies. It is intended to eventually force substance abuse or mental health services on adults or children and expand common core agenda in our schools – in the name of public safety.

Our FSRO policy giving citizens the personal power to drive substance abuse out of their communities, one family at a time, is the only small-government, effective way to reverse the trend of mass substance abuse.
We must not let Federalists establish a new and dangerously powerful conglomerate agency.

The City of Saint Louis knows that substance abuse drives crime and violence.

So it is launching a $5M make-work "violence prevention" program that is a proven failure in other cities.

- **The City of Saint Louis is spending $5M on "Cure Violence",[1] a globalist[2] program replacing prisons by "using the methods and strategies associated with disease control" – using former gang members and drug dealers to act as conflict intervenors. The Mayor claims it will reduce shootings by 30% in one year.**
- **"Cure Violence"[2] issued false[3] data to the City about their program's crime decreases in Baltimore, New York City, New Orleans, and other cities to justify putting drug dealers back on the street.**
  - **In New York City, shootings increased by 4.7% in 2017, not a 63% reduction. [4]**
  - **Baltimore had an 11% increase in homicides in 2011, not a 56% reduction. [5]**
  - **New Orleans had the highest murder rate in the nation in 2017, not a 47% reduction in homicide. [6]**
  - **Philadelphia had a 24% decrease in shootings in 2017, [7] but a 14% increase in homicides.[8]**
  - **Cure Violence programs were shut down in Chicago and other parts of Illinois in 2012[9] and 2015 [10] due to a combination of ineffectiveness, high cost, lack of cooperation with police, and program workers getting into trouble.**

Fact: Public policy cannot put Humpty Dumpty back together again.
Substance abuse must be addressed in the family so that crime, violence, homelessness, and frightfully expensive crisis-cleanup demand spending does not overwhelm state and local budgets.

Where do we want Missouri to be in five years?

Every state that legalized THC-containing marijuana (in any form) has suffered crippling increases in serious social and budget problems due to crisis demand spending.

Local jurisdictions in states that legalized THC-containing marijuana (in any form) sustained imponderable increases in serious social and budget crises due to homelessness, crime, loss of tax income, unemployment, and more.

Constitutional Initiatives banning new marijuana taxes (*like enacted in Missouri*) forced legislatures and cities to invent tangential "head" and other "gotcha" taxes on businesses and innocent citizens to subsidize the State-run Drug Cartel.

Amazon abandoned plans to build its new headquarters buildings in Seattle and New York City because of costly marijuana-driven taxation schemes. Amazon is building its HQ in a small Virginia town where it cannot be soaked.

Missouri legalized high-power THC-containing "medical" marijuana in 2018.
1/3 of marijuana users have a life-impacting addiction problem. [1] ***Missouri's socioeconomic disaster will begin in 2020.***

The Family Substance-abuse Restraining Order (FSRO) legislation will improve Missouri's tax income and broadly reduce crisis-demand spending, making Missouri safer and more competitive than marijuana states.

Missouri's crime, substance abuse, and STD rates and costs can be the best in Nation -- not the worst.

Missouri must grant every responsible citizen in every Missouri family the personal power to drive substance abuse out of their community, *one family at a time.*

Empowering and Enlisting every responsible Missouri Citizen is the only way to put drug dealers out of business And to facilitate maximal capital Missouri needs for infrastructure, education and other growth priorities.

RE: Petition approval request from Charles Hurth regarding a proposed constitutional amendment to Article VIII (2020-124)

Dear Auditor Galloway:

Enclosed please find an initiative petition sample sheet for a proposal to amend the Missouri Constitution filed by Charles Hurth on October 1, 2019.

We are referring the enclosed petition sample sheet to you for the purposes of preparing a fiscal note and fiscal note summary as required by Section 116.332, RSMo. Section 116.175.2, RSMo requires the state auditor to forward the fiscal note and fiscal note summary to the attorney general within twenty days of receipt of the petition sample sheet.

Thank you for your immediate consideration of this request.

Sincerely,

John R. Ashcroft

Be it resolved by the people of the state of Missouri that the Constitution be amended:

Article XIV is amended by amending Section 1 of Article XIV and enacting one new section to be known as Section 2 of Article XIV, to read as follows:

XIV Section 1. Right to access medical marijuana. — 1. Purposes.

This section is intended to permit state-licensed physicians to recommend marijuana for medical purposes to patients with serious illnesses and medical conditions. The section allows patients with qualifying medical conditions the right to discuss freely with their physicians the possible benefits of medical marijuana use, the right of their physicians to provide professional advice concerning the same, and the right to use medical marijuana for treatment under the supervision of a physician.

This section is intended to make only those changes to Missouri laws that are necessary to protect patients, their primary caregivers, and their physicians from civil and criminal penalties, and to allow for the limited legal production, distribution, sale and purchase of marijuana for medical use. This section is not intended to change current civil and criminal laws governing the use of marijuana for nonmedical purposes. The section does not allow for the public use of marijuana and driving under the influence of marijuana.

2. Definitions.

(1) **"Administer"** means the direct application of marijuana to a qualifying patient by way of any of the following methods:

(a) Ingestion of capsules, teas, oils, and other marijuana-infused products;

(b) Vaporization or smoking of dried flowers, buds, plant material, extracts, or oils;

(c) Application of ointments or balms;

(d) Transdermal patches and suppositories;

(e) Consuming marijuana-infused food products; or

(f) Any other method recommended by a qualifying patient's physician.

(2) **"Department"** means the department of health and senior services, or its successor agency.

(3) **"Entity"** means a natural person, corporation, professional corporation, nonprofit corporation, cooperative corporation, unincorporated association, business trust, limited liability company, general or limited partnership, limited liability partnership, joint venture, or any other legal entity.

(4) **"Flowering plant"** means a marijuana plant from the time it exhibits the first signs of sexual maturity through harvest.

(5) **"Marijuana"** or **"marihuana"** means *Cannabis indica*, *Cannabis sativa*, and *Cannabis ruderalis*, hybrids of such species, and any other strains commonly understood within the scientific community to constitute marijuana, as well as resin extracted from the plant and marijuana-infused products. "Marijuana" or "marihuana" do not include industrial hemp containing a cropwide average tetrahydrocannabinol concentration that does not exceed three-tenths of one percent on a dry weight basis, or commodities or products manufactured from industrial hemp.

(6) **"Marijuana-infused products"** means products that are infused with marijuana or an extract thereof and are intended for use or consumption other than by smoking, including, but not limited to, edible products, ointments, tinctures and concentrates.

(7) **"Medical marijuana cultivation facility"** means a facility licensed by the department to acquire, cultivate, process, store, transport, and sell marijuana to a medical marijuana dispensary facility, medical marijuana testing facility, or to a medical marijuana-infused products manufacturing facility.

(8) **"Medical marijuana dispensary facility"** means a facility licensed by the department to acquire, store, sell, transport, and deliver marijuana, marijuana-infused products, and drug paraphernalia used to administer marijuana as provided for in this section to a qualifying patient, a primary caregiver, another medical marijuana dispensary facility, a medical marijuana testing facility, or a medical marijuana-infused products manufacturing facility.

(9) **"Medical marijuana-infused products manufacturing facility"** means a facility licensed by the department to acquire, store, manufacture, transport, and sell marijuana-infused products to a medical marijuana dispensary facility, a medical marijuana testing facility, or to another medical marijuana-infused products manufacturing facility.

(10) **"Medical marijuana testing facility"** means a facility certified by the department to acquire, test, certify, and transport marijuana.

(11) **"Medical use"** means the production, possession, delivery, distribution, transportation, or administration of marijuana or a marijuana-infused product, or drug paraphernalia used to administer marijuana or a marijuana-infused product, for the benefit of a qualifying patient to mitigate the symptoms or effects of the patient's qualifying medical condition.

(12) **"Physician"** means an individual who is licensed and in good standing to practice medicine or osteopathy under Missouri law.

(13) **"Physician certification"** means a document, whether handwritten, electronic or in another commonly used format, signed by a physician and stating that, in the physician's professional opinion, the patient suffers from a qualifying medical condition.

(14) **"Primary caregiver"** means an individual twenty-one years of age or older who has significant responsibility for managing the well-being of a qualifying patient and who is designated as such on the primary caregiver's application for an identification card under this section or in other written notification to the department.

(15) **"Qualifying medical condition"** means the condition of, symptoms related to, or side-effects from the treatment of:

(a) Cancer;

(b) Epilepsy;

(c) Glaucoma;

(d) Intractable migraines unresponsive to other treatment;

(e) A chronic medical condition that causes severe, persistent pain or persistent muscle spasms, including but not limited to those associated with multiple sclerosis, seizures, Parkinson's disease, and Tourette's syndrome;

(f) Debilitating psychiatric disorders, including, but not limited to, posttraumatic stress disorder, if diagnosed by a state licensed psychiatrist;

(g) Human immunodeficiency virus or acquired immune deficiency syndrome;

(h) A chronic medical condition that is normally treated with a prescription medication that could lead to physical or psychological dependence, when a physician determines that medical use of marijuana could be effective in treating that condition and would serve as a safer alternative to the prescription medication;

(i) Any terminal illness; or

(j) In the professional judgment of a physician, any other chronic, debilitating or other medical condition, including, but not limited to, hepatitis C, amyotrophic lateral sclerosis, inflammatory bowel disease, Crohn's disease, Huntington's disease, autism, neuropathies, sickle cell anemia, agitation of Alzheimer's disease, cachexia, and wasting syndrome.

(16) **"Qualifying patient"** means a Missouri resident diagnosed with at least one qualifying medical condition.

3. Creating Patient Access to Medical Marijuana.

(1) In carrying out the implementation of this section, the department shall have the authority to:

(a) Grant or refuse state licenses and certifications for the cultivation, manufacture, dispensing, sale, testing, tracking, and transportation of marijuana for medical use as provided by law; suspend, fine, restrict, or revoke such licenses and certifications upon a violation of this section or a rule promulgated pursuant to this section; and impose any administrative penalty authorized by this section or any rule promulgated pursuant to this section.

(b) Promulgate rules and emergency rules necessary for the proper regulation and control of the cultivation, manufacture, dispensing, and sale of marijuana for medical use and for the enforcement of this section so long as patient access is not restricted unreasonably and such rules are reasonably necessary for patient safety or to restrict access to only licensees and qualifying patients.

(c) Develop such forms, certificates, licenses, identification cards, and applications as are necessary for, or reasonably related to, the administration of this section or any of the rules promulgated under this section;

(d) Require a seed-to-sale tracking system that tracks medical marijuana from either the seed or immature plant stage until the medical marijuana or medical marijuana-infused product is sold to a qualifying patient or primary caregiver to ensure that no medical marijuana grown by a medical marijuana cultivation facility or manufactured by a medical marijuana-infused products manufacturing facility is sold or otherwise transferred except by a medical marijuana dispensary facility. The department shall certify, if possible, at least two commercially available systems to licensees as compliant with its tracking standards and issue standards for the creation or use of other systems by licensees.

(e) Issue standards for the secure transportation of marijuana and marijuana-infused products. The department shall certify entities which demonstrate compliance with its transportation standards to transport marijuana and marijuana-infused products to a medical marijuana cultivation facility, a medical marijuana-infused products manufacturing facility, a medical marijuana dispensary facility, a medical marijuana testing facility, or another entity with a transportation certification. The department shall develop or adopt from any other governmental agency such safety and security standards as are reasonably necessary for the transportation of marijuana. Any entity licensed or certified pursuant to this section shall be allowed to transport cannabis.

(f) The department may charge a fee not to exceed $5,000 for any certification issued pursuant to this section.

(g) Prepare and transmit annually a publicly available report accounting to the governor for the efficient discharge of all responsibilities assigned to the department under this section;

(h) Establish a system to numerically score competing medical marijuana licensee and certificate applicants, only in cases where more applicants apply than the minimum number of licenses or certificates as calculated by this section, which scoring shall be limited to an analysis of the following:

(i) the character, veracity, background, qualifications, and relevant experience of principal officers or managers;

(ii) the business plan proposed by the applicant, which in the case of cultivation facilities and dispensaries shall include the ability to maintain an adequate supply of marijuana, plans to ensure safety and security of qualifying patients and the community, procedures to be used to prevent diversion, and any plan for making marijuana available to low-income qualifying patients;

(iii) site security;

(iv) experience in a legal cannabis market;

(v) in the case of medical marijuana testing facilities, the experience of their personnel with testing marijuana, food or drugs for toxins and/or potency and health care industry experience;

(vi) the potential for positive economic impact in the site community;

(vii) in the case of medical marijuana cultivation facilities, capacity or experience with agriculture, horticulture, and health care;

(viii) in the case of medical marijuana dispensary facilities, capacity or experience with health care, the suitability of the proposed location, and its accessibility for patients;

(ix) in the case of medical marijuana-infused products manufacturing facilities, capacity or experience with food and beverage manufacturing; and

(x) maintaining competitiveness in the marijuana for medical use marketplace.

In ranking applicants and awarding licenses and certificates, the department may consult or contract with other public agencies with relevant expertise regarding these factors. The department shall lift or ease any limit on the number of licensees or certificate holders in order to meet the demand for marijuana for medical use by qualifying patients.

(2) The department shall issue any rules or emergency rules necessary for the implementation and enforcement of this section and to ensure the right to, availability, and safe use of marijuana for medical use by qualifying patients. In developing such rules or emergency rules, the department may consult with other public agencies. In addition to any other rules or emergency rules necessary to carry out the mandates of this section, the department may issue rules or emergency rules relating to the following subjects:

(a) Compliance with, enforcement of, or violation of any provision of this section or any rule issued pursuant to this section, including procedures and grounds for denying, suspending, fining, restricting, or revoking a state license or certification issued pursuant to this section;

(b) Specifications of duties of officers and employees of the department;

(c) Instructions or guidance for local authorities and law enforcement officers;

(d) Requirements for inspections, investigations, searches, seizures, and such additional enforcement activities as may become necessary from time to time;

(e) Creation of a range of administrative penalties for use by the department;

(f) Prohibition of misrepresentation and unfair practices;

(g) Control of informational and product displays on licensed premises provided that the rules may not prevent or unreasonably restrict appropriate signs on the property of the medical marijuana dispensary facility, product display and examination by the qualifying patient and/or primary caregiver, listings in business directories including phone books, listings in marijuana-related or medical publications, or the sponsorship of health or not for profit charity or advocacy events;

(h) Development of individual identification cards for owners, officers, managers, contractors, employees, and other support staff of entities licensed or certified pursuant to this

section, including a fingerprint-based federal and state criminal record check in accordance with U.S. Public Law 92-544, or its successor provisions, as may be required by the department prior to issuing a card and procedures to ensure that cards for new applicants are issued within fourteen days. Applicants licensed pursuant to this section shall submit fingerprints to the Missouri state highway patrol for the purpose of conducting a state and federal fingerprint-based criminal background check. The Missouri state highway patrol, if necessary, shall forward the fingerprints to the Federal Bureau of Investigation (FBI) for the purpose of conducting a fingerprint-based criminal background check. Fingerprints shall be submitted pursuant to 43.543 and fees shall be paid pursuant to 43.530;

(i) Security requirements for any premises licensed or certified pursuant to this section, including, at a minimum, lighting, physical security, video, alarm requirements, and other minimum procedures for internal control as deemed necessary by the department to properly administer and enforce the provisions of this section, including reporting requirements for changes, alterations, or modifications to the premises;

(j) Regulation of the storage of, warehouses for, and transportation of marijuana for medical use;

(k) Sanitary requirements for, including, but not limited to, the preparation of medical marijuana-infused products;

(l) The specification of acceptable forms of picture identification that a medical marijuana dispensary facility may accept when verifying a sale;

(m) Labeling and packaging standards;

(n) Records to be kept by licensees and the required availability of the records;

(o) State licensing procedures, including procedures for renewals, reinstatements, initial licenses, and the payment of licensing fees;

(p) The reporting and transmittal of tax payments;

(q) Authorization for the department of revenue to have access to licensing information to ensure tax payment and the effective administration of this section; and

(r) Such other matters as are necessary for the fair, impartial, stringent, and comprehensive administration of this section.

(3) The department shall issue rules or emergency rules for a medical marijuana and medical marijuana-infused products independent testing and certification program for medical marijuana licensees and requiring licensees to test medical marijuana using one or more impartial, independent laboratories to ensure, at a minimum, that products sold for human consumption do not contain contaminants that are injurious to health, to ensure correct labeling and measure potency. The department shall not require any medical marijuana or medical marijuana-infused products to be tested more than once prior to sale.

(4) The department shall issue rules or emergency rules to provide for the certification of and standards for medical marijuana testing facilities, including the requirements for equipment and qualifications for personnel, but shall not require certificate holders to have any federal agency licensing or have any relationship with a federally licensed testing facility. The department shall certify, if possible, at least two entities as medical marijuana testing facilities. No medical marijuana testing facility shall be owned by an entity under substantially common control, ownership, or management as a medical marijuana cultivation facility, medical marijuana-infused product manufacturing facility, or medical marijuana dispensary facility.

(5) [The department shall maintain the confidentiality of reports or other information obtained from an applicant or licensee containing any individualized data, information, or records related to the licensee or its operation, including sales information, financial records, tax returns, credit reports, cultivation information, testing results, and security information and plans, or revealing any patient information, or any other records that are exempt from public inspection

pursuant to state or federal law. Such reports or other information may be used only for a purpose authorized by this section. Any information released related to patients may be used only for a purpose authorized by federal law and this section, including verifying that a person who presented a patient identification card to a state or local law enforcement official is lawfully in possession of such card.] Beginning December 2, 2020, all public records produced or retained pursuant to this section are subject to the general provisions of the Missouri Sunshine Law, as amended from time to time. Notwithstanding the foregoing, records containing proprietary business information obtained from an applicant or licensee are subject to closure. For documents submitted on or after December 2, 2020, the applicant or licensee shall label business information it believes to be proprietary prior to submitting it to the department. For documents submitted prior to December 2, 2020, the applicant or licensee may advise the department, through a department approved process, of any records previously submitted by the applicant or licensee it believes contain proprietary business information. Proprietary business information shall include sales information, financial records, tax returns, credit reports, cultivation information unrelated to product safety, testing results unrelated to product safety, site security information and plans, and individualized consumer information. The presence of proprietary business information shall not justify the closure of public records:

(a) identifying the applicant or licensee;

(b) relating to any citation, notice of violation, tax delinquency, or other enforcement action;

(c) relating to any public official's support or opposition relative to any applicant, licensee, or their proposed or actual operations;

(d) where disclosure is reasonably necessary for the protection of public health or safety; or

(e) that are otherwise subject to public inspection under other applicable law.

(6) Within one hundred eighty days of December 6, 2018, the department shall make available to the public license application forms and application instructions for medical marijuana cultivation facilities, medical marijuana testing facilities, medical marijuana dispensary facilities, and medical marijuana-infused products manufacturing facilities.

(7) Within one hundred eighty days of December 6, 2018, the department shall make available to the public application forms and application instructions for qualifying patient, qualifying patient cultivation, and primary caregiver identification cards. Within two hundred ten days of December 6, 2018, the department shall begin accepting applications for such identification cards.

(8) An entity may apply to the department for and obtain one or more licenses to grow marijuana as a medical marijuana cultivation facility. Each facility in operation shall require a separate license, but multiple licenses may be utilized in a single facility. Each indoor facility utilizing artificial lighting may be limited by the department to thirty thousand square feet of flowering plant canopy space. Each outdoor facility utilizing natural lighting may be limited by the department to two thousand eight hundred flowering plants. Each greenhouse facility using a combination of natural and artificial lighting may be limited by the department, at the election of the licensee, to two thousand eight hundred flowering plants or thirty thousand square feet of flowering plant canopy. The license shall be valid for three years from its date of issuance and shall be renewable, except for good cause. The department shall charge each applicant a nonrefundable fee of ten thousand dollars per license application or renewal for all applicants filing an application within three years of December 6, 2018, and shall charge each applicant a nonrefundable fee of five thousand dollars per license application or renewal thereafter. Once granted, the department shall charge each licensee an annual fee of twenty-five thousand dollars per facility license. Application and license fees shall be increased or decreased each year by the percentage of increase or decrease from the end of the previous calendar year of the Consumer Price Index, or successor index as published by the U.S. Department of Labor, or its successor agency. No more than three medical marijuana cultivation facility licenses shall be issued to any entity under substantially common control, ownership, or management.

(9) An entity may apply to the department for and obtain one or more licenses to operate a medical marijuana dispensary facility. Each facility in operation shall require a separate license. A license shall be valid for three years from its date of issuance and shall be renewable, except for good cause. The department shall charge each applicant a nonrefundable fee of six thousand dollars per license application or renewal for each applicant filing an application within three years of December 6, 2018, and shall charge each applicant a nonrefundable fee of three thousand dollars per license application or renewal thereafter. Once granted, the department shall charge each licensee an annual fee of ten thousand dollars per facility license. Application and license fees shall be increased or decreased each year by the percentage of increase or decrease from the end of the previous calendar year of the Consumer Price Index, or successor index as published by the U.S. Department of Labor, or its successor agency. No more than five medical marijuana dispensary facility licenses shall be issued to any entity under substantially common control, ownership, or management.

(10) An entity may apply to the department for and obtain one or more licenses to operate a medical marijuana-infused products manufacturing facility. Each facility in operation shall require a separate license. A license shall be valid for three years from its date of issuance and shall be renewable, except for good cause. The department shall charge each applicant a nonrefundable fee of six thousand dollars per license application or renewal for each applicant filing an application within three years of December 6, 2018, and shall charge each applicant a nonrefundable fee of three thousand dollars per license application or renewal thereafter. Once granted, the department shall charge each licensee an annual fee of ten thousand dollars per facility license. Application and license fees shall be increased or decreased each year by the percentage of increase or decrease from the end of the previous calendar year of the Consumer Price Index, or successor index as published by the U.S. Department of Labor, or its successor agency. No more than three medical marijuana-infused products manufacturing facility licenses shall be issued to any entity under substantially common control, ownership, or management.

(11) Any applicant for a license authorized by this section may prefile their application fee with the department beginning 30 days after December 6, 2018.

(12) Except for good cause, a qualifying patient or his or her primary caregiver may obtain an identification card from the department to cultivate up to six flowering marijuana plants for the exclusive use of that qualifying patient. The card shall be valid for twelve months from its date of issuance and shall be renewable with the annual submittal of a new or updated physician's certification. The department shall charge an annual fee for the card of one hundred dollars, with such rate to be increased or decreased each year by the percentage of increase or decrease from the end of the previous calendar year of the Consumer Price Index, or successor index as published by the U.S. Department of Labor, or its successor agency.

(13) The department may set a limit on the amount of marijuana that may be purchased by or on behalf of a single qualifying patient in a thirty-day period, provided that limit is not less than four ounces of dried, unprocessed marijuana, or its equivalent. Any such limit shall not apply to a qualifying patient with written certification from two independent physicians that there are compelling reasons why the qualifying patient needs a greater amount than the limit established by the department.

(14) The department may set a limit on the amount of marijuana that may be possessed by or on behalf of each qualifying patient, provided that limit is not less than a sixty-day supply of dried, unprocessed marijuana, or its equivalent. A primary caregiver may possess a separate legal limit for each qualifying patient under their care and a separate legal limit for themselves if they are a qualifying patient. Qualifying patients cultivating marijuana for medical use may possess up to a ninety-day supply, so long as the supply remains on property under their control. Any such limit shall not apply to a qualifying patient with written certification from two independent physicians that there are compelling reasons for additional amounts. Possession of between the legal limit and up to twice the legal limit shall subject the possessor to department sanctions, including an administrative penalty and loss of their patient identification card for up to a year. Purposefully possessing amounts in excess of twice the legal limit shall be punishable by imprisonment of up to one year and a fine of up to two thousand dollars.

(15) The department may restrict the aggregate number of licenses granted for medical marijuana cultivation facilities, provided, however, that the number may not be limited to fewer

than one license per every one hundred thousand inhabitants, or any portion thereof, of the state of Missouri, according to the most recent census of the United States. A decrease in the number of inhabitants in the state of Missouri shall have no impact.

(16) The department may restrict the aggregate number of licenses granted for marijuana-infused products manufacturing facilities, provided, however, that the number may not be limited to fewer than one license per every seventy thousand inhabitants, or any portion thereof, of the state of Missouri, according to the most recent census of the United States. A decrease in the number of inhabitants in the state of Missouri shall have no impact.

(17) The department may restrict the aggregate number of licenses granted for medical marijuana dispensary facilities, provided, however, that the number may not be limited to fewer than twenty-four licenses in each United States congressional district in the state of Missouri pursuant to the map of each of the eight congressional districts as drawn and effective on December 6, 2018. Future changes to the boundaries of or the number of congressional districts shall have no impact.

(18) The department shall begin accepting license and certification applications for medical marijuana dispensary facilities, medical marijuana testing facilities, medical marijuana cultivation facilities, medical marijuana-infused products manufacturing facilities, seed-to-sale tracking systems, and for transportation of marijuana no later than two hundred forty days after December 6, 2018. Applications for licenses and certifications under this section shall be approved or denied by the department no later than one hundred fifty days after their submission. If the department fails to carry out its nondiscretionary duty to approve or deny an application within one hundred fifty days of submission, an applicant may immediately seek a court order compelling the department to approve or deny the application.

(19) Qualifying patients under this section shall obtain [and annually renew] an identification card or cards from the department. The department shall charge a fee of twenty-five dollars per year per card with such fee to be increased or decreased each year by the percentage of increase or decrease from the end of the previous calendar year of the Consumer Price Index, or successor index as published by the U.S. Department of Labor or its successor agency. Cards shall be valid for three years and may be renewed with a new physician's certification. Upon receiving an application for a qualifying patient identification card or qualifying patient cultivation identification card, the department shall, within thirty days, either issue the card or provide a written explanation for its denial. If the department fails to deny and fails to issue a card to an eligible qualifying patient within thirty days, then their physician certification shall serve as their qualifying patient identification card or qualifying patient cultivation identification card for up to one year from the date of physician certification. All initial applications for or renewals of a qualifying patient identification card or qualifying patient cultivation identification card shall be accompanied by a physician certification that is less than thirty days old.

(20) Primary caregivers under this section shall obtain [and annually renew] an identification card from the department. Cards shall be valid for three years. The department shall charge a fee of [twenty-five] seventy-five dollars [per year], with such fee to be increased or decreased each year by the percentage of increase or decrease from the end of the previous calendar year of the Consumer Price Index, or successor index as published by the U.S. Department of Labor, or its successor agency. Upon receiving an application for a primary caregiver identification card, the department shall, within thirty days, either issue the card or provide a written explanation for its denial.

(21) All marijuana for medical use sold in Missouri shall be cultivated in a licensed medical marijuana cultivation facility located in Missouri.

(22) All marijuana-infused products for medical use sold in the state of Missouri shall be manufactured in a medical marijuana-infused products manufacturing facility.

(23) The denial of a license, license renewal, or identification card by the department shall be appealable to the administrative hearing commission, or its successor entity. Following the exhaustion of administrative review, denial of a license, license renewal, or identification card by the department shall be subject to judicial review as provided by law.

(24) No elected official shall interfere directly or indirectly with the department's obligations and activities under this section.

(25) The department shall not have the authority to apply or enforce any rule or regulation that would impose an undue burden on any one or more licensees or certificate holders, any qualifying patients, or act to undermine the purposes of this section.

4. Taxation and Reporting.

(1) A tax is levied upon the retail sale of marijuana for medical use sold at medical marijuana dispensary facilities within the state. The tax shall be at a rate of four percent of the retail price. The tax shall be collected by each licensed medical marijuana dispensary facility and paid to the department of revenue. After retaining no more than five percent for its actual collection costs, amounts generated by the tax levied in this section shall be deposited by the department of revenue into the Missouri veterans' health and care fund. Licensed entities making retail sales within the state shall be allowed approved credit for returns provided the tax was paid on the returned item and the purchaser was given the refund or credit.

(2) There is hereby created in the state treasury the "Missouri Veterans' Health and Care Fund", which shall consist of taxes and fees collected under this section. The state treasurer shall be custodian of the fund, and he or she shall invest monies in the fund in the same manner as other funds are invested. Any interest and monies earned on such investments shall be credited to the fund. Notwithstanding any other provision of law, any monies remaining in the fund at the end of a biennium shall not revert to the credit of the general revenue fund. The commissioner of administration is authorized to make cash operating transfers to the fund for purposes of meeting the cash requirements of the department in advance of it receiving annual application, licensing, and tax revenue, with any such transfers to be repaid as provided by law. The fund shall be a dedicated fund and shall stand appropriated without further legislative action as follows:

(a) First, to the department, an amount necessary for the department to carry out this section, including repayment of any cash operating transfers, payments made through contract or agreement with other state and public agencies necessary to carry out this section, and a reserve fund to maintain a reasonable working cash balance for the purpose of carrying out this section;

(b) Next, the remainder of such funds shall be transferred to the Missouri veterans commission for health and care services for military veterans, including the following purposes: operations, maintenance and capital improvements of the Missouri veterans homes, the Missouri service officer's program, and other services for veterans approved by the commission, including, but not limited to, health care services, mental health services, drug rehabilitation services, housing assistance, job training, tuition assistance, and housing assistance to prevent homelessness. The Missouri veterans commission shall contract with other public agencies for the delivery of services beyond its expertise.

(c) All monies from the taxes authorized under this subsection shall provide additional dedicated funding for the purposes enumerated above and shall not replace existing dedicated funding.

(3) For all retail sales of marijuana for medical use, a record shall be kept by the seller which identifies, by secure and encrypted patient number issued by the seller to the qualifying patient involved in the sale, all amounts and types of marijuana involved in the sale and the total amount of money involved in the sale, including itemizations, taxes collected and grand total sale amounts. All such records shall be kept on the premises in a readily available format and be made available for review by the department and the department of revenue upon request. Such records shall be retained for five years from the date of the sale.

(4) The tax levied pursuant to this subsection is separate from, and in addition to, any general state and local sales and use taxes that apply to retail sales, which shall continue to be collected and distributed as provided by general law.

(5) Except as authorized in this subsection, no additional taxes shall be imposed on the sale of marijuana for medical use.

(6) The fees and taxes provided for in this Article XIV, Section 1 shall be fully enforceable notwithstanding any other provision in this Constitution purportedly prohibiting or restricting the taxes and fees provided for herein.

(7) The unexpended balance existing in the fund shall be exempt from the provisions of section 33.080 relating to the transfer of unexpended balances to the general revenue fund.

5. Additional Patient, Physician, Caregiver and Provider Protections.

(1) Except as provided in this section, the possession of marijuana in quantities less than the limits of this section, or established by the department, and transportation of marijuana from a medical marijuana dispensary facility to the qualifying patient's residence shall not subject the possessor to arrest, criminal or civil liability, or sanctions under Missouri law, provided that the possessor produces on demand to the appropriate authority a valid qualifying patient identification card; a valid qualifying patient cultivation identification card; a valid physician certification while making application for an identification card; or a valid primary caregiver identification card. Production of the respective equivalent identification card or authorization issued by another state or political subdivision of another state shall also meet the requirements of this subdivision and shall allow for the purchase of marijuana for use by a non-resident patient from a medical marijuana dispensary facility as permitted by this section and in compliance with department regulations.

(2) No patient shall be denied access to or priority for an organ transplant because they hold a qualifying patient identification card or use marijuana for medical use.

(3) A physician shall not be subject to criminal or civil liability or sanctions under Missouri law or discipline by the Missouri state board of registration for the healing arts, or its successor agency, for owning, operating, investing in, being employed by, or contracting with any entity licensed or certified pursuant to this section or issuing a physician certification to a patient diagnosed with a qualifying medical condition in a manner consistent with this section and legal standards of professional conduct.

(4) A health care provider shall not be subject to civil or criminal prosecution under Missouri law, denial of any right or privilege, civil or administrative penalty or sanction, or disciplinary action by any accreditation or licensing board or commission for owning, operating, investing in, being employed by, or contracting with any entity licensed or certified pursuant to this section or providing health care services that involve the medical use of marijuana consistent with this section and legal standards of professional conduct.

(5) A medical marijuana testing facility shall not be subject to civil or criminal prosecution under Missouri law, denial of any right or privilege, civil or administrative penalty or sanction, or disciplinary action by any accreditation or licensing board or commission for providing laboratory testing services that relate to the medical use of marijuana consistent with this section and otherwise meeting legal standards of professional conduct.

(6) A health care provider shall not be subject to mandatory reporting requirements for the medical use of marijuana by nonemancipated qualifying patients under eighteen years of age in a manner consistent with this section and with consent of a parent or guardian.

(7) A primary caregiver shall not be subject to criminal or civil liability or sanctions under Missouri law for purchasing, transporting, or administering marijuana for medical use to a qualifying patient or participating in the patient cultivation of up to six flowering marijuana plants per patient in a manner consistent with this section and generally established legal standards of personal or professional conduct.

(8) An attorney shall not be subject to disciplinary action by the state bar association or other professional licensing body for owning, operating, investing in, being employed by, contracting with, or providing legal assistance to prospective or licensed medical marijuana testing facilities, medical marijuana cultivation facilities, medical marijuana dispensary facilities, medical marijuana-infused products manufacturing facilities, qualifying patients, primary caregivers, physicians, health care providers or others related to activity that is no longer subject to criminal penalties under state law pursuant to this section.

(9) Actions and conduct by qualifying patients, primary caregivers, medical marijuana testing facilities, medical marijuana cultivation facilities, medical marijuana-infused products manufacturing facilities, or medical marijuana dispensary facilities licensed or registered with the department, or their employees or agents, as permitted by this section and in compliance with department regulations and other standards of legal conduct, shall not be subject to criminal or civil liability or sanctions under Missouri law, except as provided for by this section.

(10) Nothing in this section shall provide immunity for negligence, either common law or statutorily created, nor criminal immunities for operating a vehicle, aircraft, dangerous device, or navigating a boat under the influence of marijuana.

(11) It is the public policy of the state of Missouri that contracts related to marijuana for medical use that are entered into by qualifying patients, primary caregivers, medical marijuana testing facilities, medical marijuana cultivation facilities, medical marijuana-infused products manufacturing facilities, or medical marijuana dispensary facilities and those who allow property to be used by those entities, should be enforceable. It is the public policy of the state of Missouri that no contract entered into by qualifying patients, primary caregivers, medical marijuana testing facilities, medical marijuana cultivation facilities, medical marijuana-infused products manufacturing facilities, or medical marijuana dispensary facilities, or by a person who allows property to be used for activities that are exempt from state criminal penalties by this section, shall be unenforceable on the basis that activities related to medical marijuana may be prohibited by federal law.

6. Legislation.

Nothing in this section shall limit the general assembly from enacting laws consistent with this section, or otherwise effectuating the patient rights of this section. The legislature shall not enact laws that hinder the right of qualifying patients to access marijuana for medical use as granted by this section.

7. Additional Provisions.

(1) Nothing in this section permits a person to:

(a) Consume marijuana for medical use in a jail or correctional facility;

(b) Undertake any task under the influence of marijuana when doing so would constitute negligence or professional malpractice; or

(c) Operate, navigate, or be in actual physical control of any dangerous device or motor vehicle, aircraft or motorboat while under the influence of marijuana; or

(d) Bring a claim against any employer, former employer, or prospective employer for wrongful discharge, discrimination, or any similar cause of action or remedy, based on the employer, former employer, or prospective employer prohibiting the employee, former employee, or prospective employee from being under the influence of marijuana while at work or disciplining the employee or former employee, up to and including termination from employment, for working or attempting to work while under the influence of marijuana.

(2) No medical marijuana cultivation facility, medical marijuana testing facility, medical marijuana dispensary facility, or medical marijuana-infused products manufacturing facility, or entity with a transportation certification shall be owned, in whole or in part, or have as an officer, director, board member, manager, or employee, any individual with a disqualifying felony offense. A **"disqualifying felony offense"** is a violation of, and conviction or guilty plea to, state or federal law that is, or would have been, a felony under Missouri law, regardless of the sentence imposed, unless the department determines that:

(a) The person's conviction was for the medical use of marijuana or assisting in the medical use of marijuana; or

(b) The person's conviction was for a nonviolent crime for which he or she was not incarcerated and that is more than five years old; or

(c) More than five years have passed since the person was released from parole or probation, and he or she has not been convicted of any subsequent criminal offenses.

The department may consult with and rely on the records, advice and recommendations of the attorney general and the department of public safety, or their successor entities, in applying this subdivision.

(3) All medical marijuana cultivation facility, medical marijuana dispensary facility, and medical marijuana-infused products manufacturing facility licenses, entities with medical marijuana testing facility certifications, and entities with transportation certifications shall be held by entities that are majority owned, directly or indirectly, by natural persons who have been citizens of the state of Missouri for at least one year prior to the application for such license or certification. Notwithstanding the foregoing, persons or entities outside the state of Missouri may own a minority stake, directly or indirectly, in such entities.

(4) No medical marijuana cultivation facility, medical marijuana dispensary facility, or medical marijuana-infused products manufacturing facility shall manufacture, package or label marijuana or marijuana-infused products in a false or misleading manner. No person shall sell any product in a manner designed to cause confusion between a marijuana or marijuana-infused product and any product not containing marijuana. A violation of this subdivision shall be punishable by an appropriate and proportional department sanction, up to and including loss of license.

(5) All edible marijuana-infused products shall be sold in individual, child-resistant containers that are labeled with dosage amounts, instructions for use, and estimated length of effectiveness. All marijuana and marijuana-infused products shall be sold in containers clearly and conspicuously labeled as mandated by the department [, in a font size at least as large as the largest other font size used on the package,] as containing "Marijuana", or a "Marijuana-Infused Product". Violation of this prohibition shall subject the violator to department sanctions, including an administrative penalty.

(6) No individual shall serve as the primary caregiver for more than three qualifying patients.

(7) No qualifying patient shall consume marijuana for medical use in a public place, unless provided by law. Violation of this prohibition shall subject the violator to sanctions as provided by general law.

(8) No person shall extract resins from marijuana using dangerous materials or combustible gases without a medical marijuana-infused products manufacturing facility license. Violation of this prohibition shall subject the violator to department sanctions, including an administrative penalty and, if applicable, loss of their identification card, certificate, or license for up to one year.

(9) All qualifying patient cultivation shall take place in an enclosed, locked facility that is equipped with security devices that permit access only by the qualifying patient or by such patient's primary caregiver. Two qualifying patients, who both hold valid qualifying patient cultivation identification cards, may share one enclosed, locked facility. No more than twelve qualifying patient or primary caregiver cultivated flowering marijuana plants may be cultivated in a single, enclosed locked facility, except when a primary caregiver also holds a qualifying patient cultivation identification card, in which case no more than eighteen flowering marijuana plants may be cultivated in a single, enclosed, locked facility.

(10) No medical marijuana cultivation facility, medical marijuana dispensary facility, medical marijuana-infused products manufacturing facility, medical marijuana testing facility, or entity with a transportation certification shall assign, sell, give, lease, sublicense, or otherwise transfer its license or certificate to any other entity without the express consent of the department, not to be unreasonably withheld.

(11) Unless allowed by the local government, no new medical marijuana cultivation facility, medical marijuana testing facility, medical marijuana dispensary facility, or medical marijuana-infused products manufacturing facility shall be initially sited within one thousand feet of any then-existing elementary or secondary school, child day-care center, or church. No local

government shall prohibit medical marijuana cultivation facilities, medical marijuana testing facilities, medical marijuana-infused products manufacturing facilities, or medical marijuana dispensary facilities, or entities with a transportation certification either expressly or through the enactment of ordinances or regulations that make their operation unduly burdensome in the jurisdiction. However, local governments may enact ordinances or regulations not in conflict with this section, or with regulations enacted pursuant to this section, governing the time, place, and manner of operation of such facilities in the locality. A local government may establish civil penalties for violation of an ordinance or regulations governing the time, place, and manner of operation of a medical marijuana cultivation facility, medical marijuana testing facility, medical marijuana-infused products manufacturing facility, medical marijuana dispensary facility, or entity holding a transportation certification that may operate in such locality.

(12) Unless superseded by federal law or an amendment to this Constitution, a physician shall not certify a qualifying condition for a patient by any means other than providing a physician certification for the patient, whether handwritten, electronic, or in another commonly used format. [A qualifying patient must obtain a new physician certification at least annually.]

(13) A physician shall not issue a certification for the medical use of marijuana for a nonemancipated qualifying patient under the age of eighteen without the written consent of the qualifying patient's parent or legal guardian. The department shall not issue a qualifying patient identification card on behalf of a nonemancipated qualifying patient under the age of eighteen without the written consent of the qualifying patient's parent or legal guardian. Such card shall be issued to one of the parents or guardians and not directly to the patient. Only a parent or guardian may serve as a primary caregiver for a nonemancipated qualifying patient under the age of eighteen. Only the qualifying patient's parent or guardian shall purchase or possess medical marijuana for a nonemancipated qualifying patient under the age of eighteen. A parent or guardian shall supervise the administration of medical marijuana to a nonemancipated qualifying patient under the age of eighteen.

(14) Nothing in this section shall be construed as mandating health insurance coverage of medical marijuana for qualifying patient use.

(15) Real and personal property used in the cultivation, manufacture, transport, testing, distribution, sale, and administration of marijuana for medical use or for activities otherwise in compliance with this section shall not be subject to asset forfeiture solely because of that use.

8. Severability.

The provisions of this section are severable, and if any clause, sentence, paragraph or section of this measure, or an application thereof, is adjudged invalid by any court of competent jurisdiction, the other provisions shall continue to be in effect to the fullest extent possible.

9. Effective Date.

The provisions of this section shall become effective on December 6, 2018.

Section 2. Marijuana Legalization, Regulation, and Taxation

1. Purpose.

The purpose of this section is to make marijuana legal under state and local law for adults twenty-one years of age or older, and to control the commercial production and distribution of marijuana under a system that licenses, regulates, and taxes the businesses involved while protecting public health. The intent is to prevent arrest and penalty for personal possession and cultivation of limited amounts of marijuana by adults twenty-one years of age or older; remove the commercial production and distribution of marijuana from the illicit market; prevent revenue generated from commerce in marijuana from going to criminal enterprises; prevent the distribution of marijuana to persons under twenty-one years of age; prevent the diversion of marijuana to illicit markets; protect health by ensuring the safety of marijuana and products containing marijuana; and ensure the security of marijuana facilities. To the fullest extent possible, this section shall be interpreted in accordance with the purpose and intent set forth in this section.

This section is not intended to allow for the public use of marijuana, driving while intoxicated by marijuana, the use of marijuana in the workplace, or the use of marijuana by persons under twenty-one years of age.

2. Definitions.

(1) "Consumer" means a person who is at least twenty-one years of age.

(2) "Department" means the department of health and senior services, or its successor agency.

(3) "Entity" means a natural person, corporation, professional corporation, nonprofit corporation, cooperative corporation, unincorporated association, business trust, limited liability company, general or limited partnership, limited liability partnership, joint venture, or any other legal entity.

(4) "Flowering plant" means a marijuana plant from the time it exhibits the first signs of sexual maturity through harvest.

(5) "Local government" means, in the case of an incorporated area, a village, town, or city and, in the case of an unincorporated area, a county.

(6) "Marijuana" means *cannabis indica*, *cannabis sativa*, and *cannabis ruderalis*, hybrids of such species, and any other strains commonly understood within the scientific community to constitute marijuana or cannabis, as well as resin extracted from the plant and marijuana-infused products. "Marijuana" does not include industrial hemp including any part of that plant, including the seeds thereof and all derivatives, extracts, cannabinoids, isomers, acids, salts, and salts of isomers, whether growing or not with a delta-9 tetrahydrocannabinol concentration of not more than three-tenths of one percent on a dry weight basis, or commodities or products manufactured with industrial hemp, or any other ingredient combined with marijuana or marijuana to prepare topical or oral administrations, food, drink, or other products.

(7) "Marijuana accessories" means any equipment, product, material, or combination of equipment, products, or materials, which is specifically designed for use in planting, propagating, cultivating, growing, harvesting, manufacturing, compounding, converting, producing, processing, preparing, testing, analyzing, packaging, repackaging, storing, containing, ingesting, inhaling, or otherwise introducing marijuana into the human body.

(8) "Marijuana Cultivation Facility" means an entity licensed by the department to acquire, cultivate, process, store, transport, and sell marijuana to a marijuana dispensary facility, marijuana testing facility, or to a marijuana-infused products manufacturing facility.

(9) "Marijuana Dispensary Facility" means an entity licensed by the department to acquire, store, sell, transport, and deliver marijuana, marijuana-infused products, and marijuana accessories as provided for in this section to consumers.

(10) "Marijuana Facility" means a marijuana cultivation facility, marijuana dispensary facility, marijuana testing facility, a marijuana-infused products manufacturing facility, or a marijuana microbusiness facility, or any other type of marijuana-related facility or business licensed or certified by the department pursuant to this section.

(11) "Marijuana-Infused Products" means products that are infused with marijuana or an extract thereof and are intended for use or consumption other than by smoking, including, but not limited to, edible products, ointments, tinctures and concentrates.

(12) "Marijuana-Infused Products Manufacturing Facility" means an entity licensed by the department to acquire, store, manufacture, transport, and sell marijuana-infused products to a marijuana dispensary facility, a marijuana testing facility, or to another marijuana-infused products manufacturing facility.

(13) "Marijuana Microbusiness Facility" means an entity licensed to cultivate not more than one hundred and fifty flowering plants, process and package the marijuana it cultivates or that it obtains from another marijuana microbusiness facility, and acquire, store, transport, deliver, sell, or otherwise transfer marijuana and marijuana-infused products it cultivates and processes, or that it obtains from other marijuana microbusiness facilities, to marijuana dispensary facilities, marijuana testing facilities, other marijuana microbusiness facilities, or consumers.

(14) "Marijuana Testing Facility" means an entity certified by the department to acquire, test, certify, and transport marijuana.

(15) "Owner" means an officer, board member, or other individual who has a financial (other than a security interest, lien, or encumbrance) or voting interest in ten percent or greater of a marijuana facility.

(16) "Unduly burdensome" means that the measures necessary to comply with the rules or ordinances adopted pursuant to this section subject licensees or potential licensees to such a high investment of money, time, or any other resource or asset that a reasonably prudent businessperson would not operate the marijuana facility.

3. Limitations.

(1) Except as otherwise provided in this article, this section does not preclude, limit, or affect laws that assign liability relative to, prohibit, or otherwise regulate:

(a) Delivery or distribution of marijuana or marijuana accessories, with or without consideration, to a person younger than twenty-one years of age;

(b) Purchase, possession, use, or transport of marijuana or marijuana accessories by a person younger than twenty-one years of age;

(c) Consumption of marijuana by a person younger than twenty-one years of age;

(d) Operating or being in physical control of any motor vehicle, train, aircraft, motorboat, or other motorized form of transport while intoxicated by marijuana;

(e) Consumption of marijuana while operating or being in physical control of a motor vehicle, train, aircraft, motorboat, or other motorized form of transport, while it is being operated;

(f) Smoking marijuana within a motor vehicle, train, aircraft, motorboat, or other motorized form of transport while it is being operated;

(g) Possession or consumption of marijuana or possession of marijuana accessories on the grounds of a public or private preschool, elementary or secondary school, institution of higher education, in a school bus, or on the grounds of any correctional facility;

(h) Smoking marijuana in a location where smoking tobacco is prohibited;

(i) Consumption of marijuana in a public place, other than in an area licensed by the department for consumption;

(j) Conduct that endangers others;

(k) Undertaking any task while under the influence of marijuana, if doing so would constitute negligence or professional malpractice; or

(l) Performing solvent-based extractions on marijuana using solvents other than water, glycerin, propylene glycol, vegetable oil, or food grade ethanol, unless licensed for this activity by the department.

(2) This section does not limit any privileges, rights, immunities, or defenses of a person or entity as provided in section 1 of this article, or any other law of this state allowing for or regulating marijuana for medical use.

(3) This section does not require an employer to permit or accommodate conduct otherwise allowed by this section in any workplace or on the employer's property. This section does not prohibit an employer from disciplining an employee for violation of a workplace drug policy or for working while intoxicated by marijuana. This section does not prevent an employer from refusing to hire, discharging, disciplining, or otherwise taking an adverse employment action against a person with respect to hire, tenure, terms, conditions, or privileges of employment because of that person's violation of a workplace drug policy or because that person was working while intoxicated by marijuana.

(4) This section allows a person to prohibit or otherwise regulate the consumption, cultivation, distribution, processing, sale, or display of marijuana, marijuana-infused products, and marijuana accessories on private property the person owns, leases, occupies, or manages, except that a lease agreement executed after the enactment of this section may not prohibit a tenant from lawfully possessing and consuming marijuana by means other than smoking.

4. Regulation of Marijuana.

(1) In carrying out the implementation of this section, the department shall have the authority to:

(a) Grant or refuse state licenses for the cultivation, manufacture, dispensing, and sale of marijuana as provided by law; suspend, fine, restrict, or revoke such licenses upon a violation of this section or a rule promulgated pursuant to this section; and impose any reasonable administrative penalty authorized by this section or any rule promulgated pursuant to this section;

(b) Promulgate rules and emergency rules necessary for the proper regulation and control of the cultivation, manufacture, dispensing, and sale of marijuana and for the enforcement of this section so long as such rules are reasonable and not unduly burdensome;

(c) Develop such forms, certificates, licenses, identification cards, and applications as are necessary for, or reasonably related to, the administration of this section or any of the rules promulgated under this section;

(d) Require a seed-to-sale tracking system that tracks marijuana from either the seed or immature plant stage until the marijuana or marijuana-infused product is sold to a consumer to ensure that no marijuana grown by a marijuana cultivation facility or marijuana microbusiness facility or manufactured by a marijuana-infused products manufacturing facility or marijuana microbusiness facility is sold or otherwise transferred to a consumer except by a marijuana dispensary facility or a marijuana microbusiness facility. The department shall certify, if possible, at least two commercially available systems to licensees as compliant with its tracking standards and issue standards for the creation or use of other systems by licensees;

(e) Issue standards for the secure transportation of marijuana and marijuana-infused products. The department shall certify entities that demonstrate compliance with its transportation standards to transport marijuana and marijuana-infused products to a marijuana cultivation facility, marijuana-infused products manufacturing facility, marijuana dispensary facility, marijuana microbusiness facility, marijuana testing facility, or another entity with a transportation certification. The department shall develop or adopt from any other governmental agency such safety and security standards as are reasonably necessary for the transportation of marijuana. Any entity licensed or certified pursuant to this section shall be allowed to transport its own inventory and products in compliance with department transportation rules;

(f) Promulgate rules and emergency rules specific to the licensing, regulation, and oversight of marijuana microbusiness facilities;

(g) Provide for the issuance of additional types or classes of licenses to operate marijuana-related businesses, including licenses that allow for only limited cultivation, processing, transportation, delivery, storage, sale, or purchase of marijuana, licenses that allow for the consumption of marijuana within designated, age-restricted areas, licenses that allow for cultivation for purposes of propagation, and licenses intended to facilitate scientific research or education;

(h) Prepare and transmit annually a publicly available report accounting to the governor, the general assembly, and the public for the efficient discharge of all responsibilities assigned to the department under this section;

(i) Establish a system to numerically score competing marijuana license and certificate applicants, only in cases where more applicants apply than the number of licenses available, in which scoring shall be limited to an analysis of the following:

(i) The character, veracity, background, qualifications, and relevant experience of principal officers or managers;

(ii) The business plan proposed by the applicant, which in the case of cultivation facilities and dispensaries shall include the ability to maintain an adequate supply of marijuana, and for all facilities shall include procedures to be used to prevent product diversion;

(iii) Site security;

(iv) In the case of licenses other than the microbusiness license, testing license, or certification types, previous experience as an owner or employee of a marijuana microbusiness facility;

(v) In the case of marijuana testing facilities, the experience of their personnel with testing marijuana, food or drugs for toxins and potency and health care industry experience;

(vi) The potential for positive economic impact in the site community;

(vii) In the case of marijuana cultivation facilities and marijuana microbusiness facilities, capacity or experience with agriculture and horticulture;

(viii) In the case of marijuana dispensary facilities, the suitability of the proposed location for consumer access;

(ix) In the case of marijuana-infused products manufacturing facilities, capacity or experience with food and beverage manufacturing; and

(x) Maintaining competitiveness in the marijuana marketplace.

(j) In ranking applicants and awarding licenses and certificates, the department may consult or contract with other public agencies with relevant expertise regarding these factors.

(2) The department shall issue, at a minimum, the same number of marijuana cultivation facility licenses as are issued for medical marijuana cultivation facilities under section 1 of this article, the same number of marijuana-infused products manufacturing facility licenses as are issues for medical marijuana-infused products manufacturing facilities under section 1, the same number of marijuana dispensary facility licenses as are issued to medical marijuana dispensary facilities under section 1, in addition to the minimum number of marijuana microbusiness licenses as are required under this section. The department shall lift or ease any limit on the number of licensees or certificate holders in order to meet the demand for marijuana by consumers in the state and to ensure a competitive market while also preventing an over-concentration of marijuana facilities within the boundaries of any particular local government.

(3) If marijuana cultivation facility licenses, marijuana-infused products manufacturing facility licenses, or marijuana dispensary facility licenses become available so that the number of total licenses in any respective category falls below the minimum required under this article, section and subsection, the department shall first award the number of new licenses available to satisfy the minimum requirement to applicants who are qualified marijuana microbusiness license holders and who are at least fifty percent owned by natural persons who qualified as economically disadvantaged owners or disabled veterans at the time they applied for and received the marijuana microbusiness facility license, if such an applicant applies and qualifies for the license.

(4) The department may issue any rules or emergency rules necessary for the implementation and enforcement of this section and to ensure the right to, availability, and safe use of marijuana by consumers. In developing such rules or emergency rules, the department may consult or contract with other public agencies. In addition to any other rules or emergency rules necessary to carry out the mandates of this section, the department shall issue rules or emergency rules relating to the following subjects:

(a) Procedures for issuing a license and for renewing, suspending, and revoking a license;

(b) Qualifications for licensure that are directly and demonstrably related to the operation of a marijuana facility;

(c) Requirements and standards for safe cultivation, processing, and distribution of marijuana and marijuana-infused products by marijuana facilities, including health standards to ensure the safe preparation of marijuana-infused products and prohibitions on pesticides that are not safe for use on marijuana;

(d) Testing, packaging, and labeling standards, procedures, and requirements for marijuana and marijuana-infused products and a requirement that a representative sample of marijuana be tested by a marijuana testing facility to ensure public health;

(e) Labeling standards that protect public health by requiring the listing of pharmacologically active ingredients, including, but not limited to, tetrahydrocannabinol (THC), cannabidiol (CBD), and other cannabinoid content, the THC and other cannabinoid amount in milligrams per serving, and the number of servings per package;

(f) Requirements that packaging and labels shall not be made to be attractive to children and that marijuana and marijuana-infused products be sold in resealable, child-resistant packaging, to protect public health;

(g) Security requirements, including lighting, physical security, and alarm requirements, and requirements for securely transporting marijuana between marijuana facilities;

(h) Record keeping requirements for marijuana facilities and monitoring requirements to track the transfer of marijuana by licensees;

(i) Restrictions on advertising, marketing, and display of marijuana, marijuana-infused products, marijuana accessories, and marijuana facilities;

(j) A plan to promote and encourage ownership and employment in the marijuana industry by people from political subdivisions and districts that are economically distressed and to positively impact those political subdivisions and districts;

(k) Civil penalties for failure to comply with any rule promulgated pursuant to this section or for any violation of rules and regulations adopted pursuant to this section by a licensee, including civil fines and suspension, revocation, or restriction of a license. The licensee may choose to challenge any penalties imposed by the department through the Administrative Hearing Commission, or its successor entity. Pursuant to § 536.100 R.S.Mo., or successor provisions, any licensee who has exhausted all administrative remedies provided by law and who is aggrieved by a final decision in a contested case is entitled to judicial review;

(l) Reporting and transmittal of tax payments required under this section;

(m) Authorization for the department of revenue to have access to licensing information to ensure tax payment and the effective administration of this section; and

(n) Such other matters as are necessary for the fair, impartial, stringent, and comprehensive administration of this section.

(5) The department shall issue rules or emergency rules for marijuana and marijuana-infused products independent testing and certification program for marijuana facility licensees and requiring licensees to test marijuana using one or more impartial, independent laboratory or laboratories to ensure, at a minimum, correct labeling, potency measurement, and that products sold for human consumption do not contain contaminants that are potentially injurious to public health.

(6) The department shall issue rules or emergency rules to provide for the certification of and standards for marijuana testing facilities, including the requirements for equipment and qualifications for personnel, but shall not require certificate holders to have any federal agency licensing or have any relationship with a federally licensed testing facility. The department shall certify, if possible, at least two entities as marijuana testing facilities. No marijuana testing facility shall be owned by an entity under substantially common control, ownership, or management as a marijuana cultivation facility, marijuana-infused products manufacturing facility, marijuana microbusiness facility, or marijuana dispensary facility.

(7) All public records produced or retained pursuant to this section are subject to the general provisions of the Missouri Sunshine Law, as amended from time to time. Notwithstanding the foregoing, public records containing proprietary business information obtained from an applicant or licensee are subject to closure. The applicant or licensee shall label business information it believes to be proprietary prior to submitting it to the department. Proprietary business information shall include sales information, financial records, tax returns, credit reports, cultivation information unrelated to product safety, testing results unrelated to product safety, site security information and plans, and individualized consumer information. The presence of proprietary business information shall not justify the closure of public records:

(a) Identifying the applicant or licensee;

(b) Relating to any citation, notice of violation, tax delinquency, or other enforcement action;

(c) Relating to any public official's support or opposition relative to any applicant, licensee, or their proposed or actual operations;

(d) Where disclosure is reasonably necessary for the protection of public health or safety; or

(e) That are otherwise subject to public inspection under applicable law.

(8) Within two hundred and seventy days of the effective date of this section, the department shall make available to the public license application forms and application instructions for marijuana cultivation facilities, marijuana testing facilities, marijuana dispensary facilities, marijuana microbusiness facilities, marijuana-infused products manufacturing facilities, and any other license types and certifications it deems necessary.

(9) An entity may apply to the department for and obtain one or more licenses to grow marijuana as a marijuana cultivation facility. Each facility in operation shall require a separate license, but multiple licenses may be utilized in a single facility. Each indoor facility utilizing artificial lighting may be limited by the department to thirty thousand square feet of flowering plant canopy space. Each outdoor facility utilizing natural lighting may be limited by the department to two thousand eight hundred flowering plants. Each greenhouse facility using a combination of natural and artificial lighting may be limited by the department, at the election of the licensee, to two thousand eight hundred flowering plants or thirty thousand square feet of flowering plant canopy. The license shall be valid for three years from its date of issuance and shall be renewable, except for good cause. The department shall charge each applicant a non-refundable fee of ten thousand dollars per license application or renewal for all applicants filing an application within three years of the effective date of this section and shall charge each applicant a non-refundable fee of five thousand dollars per license application or renewal thereafter. Once granted, the department shall charge each licensee an annual fee of twenty-five thousand dollars per facility license. Application and license fees shall be increased or decreased each year by the percentage of increase or decrease from the end of the previous calendar year of the Consumer Price Index, or successor index as published by the U.S. Department of Labor, or its successor agency. An entity may not be an owner of more than three marijuana cultivation facility licenses.

(10) An entity may apply to the department for and obtain one or more licenses to operate a marijuana dispensary facility. Each facility in operation shall require a separate license. A license shall be valid for three years from its date of issuance and shall be renewable, except for good cause. The department shall charge each applicant a non-refundable fee of six thousand dollars per license application or renewal for each applicant filing an application within three years of the effective date of this section and shall charge each applicant a non-refundable fee of three thousand dollars per license application or renewal thereafter. Once granted, the department shall charge each licensee an annual fee of ten thousand dollars per facility license. Application and license fees shall be increased or decreased each year by the percentage of increase or decrease from the end of the previous calendar year of the Consumer Price Index, or successor index as published by the U.S. Department of Labor, or its successor agency. An entity may not be an owner of more than five marijuana dispensary facility licenses.

(11) An entity may apply to the department for and obtain one or more licenses to operate a marijuana-infused products manufacturing facility. Each facility in operation shall require a

separate license. A license shall be valid for three years from its date of issuance and shall be renewable, except for good cause. The department shall charge each applicant a non-refundable fee of six thousand dollars per license application or renewal for each applicant filing an application within three years of the effective date of this section and shall charge each applicant a non-refundable fee of three thousand dollars per license application or renewal thereafter. Once granted, the department shall charge each licensee an annual fee of ten thousand dollars per facility license. Application and license fees shall be increased or decreased each year by the percentage of increase or decrease from the end of the previous calendar year of the Consumer Price Index, or successor index as published by the U.S. Department of Labor, or its successor agency. An entity may not be an owner of more than three marijuana-infused products manufacturing facility licenses.

(12) An entity may apply to the department for and obtain only one license to operate a marijuana microbusiness facility. A marijuana microbusiness facility license shall allow the licensee to be vertically integrated. A marijuana microbusiness facility licensee may engage in all of the activities allowed under the license or it may apply for and engage in a subset of the activities allowed, if the applicant or license holder so chooses. A marijuana microbusiness facility licensee may sell marijuana it cultivates, processes, and packages to any marijuana dispensary facility, any other marijuana microbusiness facility, or directly to consumers. A marijuana microbusiness facility may also process and sell to consumers marijuana and marijuana-infused products it obtains from another marijuana microbusiness facility. A license shall be valid for three years from its date of issuance and shall be renewable, except for good cause. The department shall charge each applicant a non-refundable fee of one thousand five hundred dollars per license application or renewal for each applicant filing an application within three years of the effective date of this section and shall charge each applicant a non-refundable fee of two thousand five hundred dollars per license application or renewal thereafter. Once granted, the department shall charge each licensee an annual fee of two thousand five hundred dollars per facility license. Application and license fees shall be increased or decreased each year by the percentage of increase or decrease from the end of the previous calendar year of the Consumer Price Index, or successor index as published by the U.S. Department of Labor, or its successor agency. An entity may not be an owner of more than one marijuana microbusiness facility license. An owner of a marijuana microbusiness facility may not also be an owner of another licensed marijuana facility or medical marijuana facility regulated under this article. However, the owner of a marijuana microbusiness facility may apply for a license or licenses for other marijuana or medical marijuana facilities under this article. If granted one or more of these licenses, the marijuana microbusiness facility owner may transition to other licensed operations on a reasonably practical timetable established by the department. In addition to other requirements established by this section, a marijuana microbusiness facility must be majority-owned by natural persons who have been citizens of the state of Missouri for at least one year prior to the application for such license. The majority owner or owners must be economically disadvantaged persons, as defined by the department, or disabled veterans, as defined by the department.

(13) The department may restrict the aggregate number of licenses granted for marijuana microbusiness facilities, provided, however, that the number may not be limited to fewer than the following number of licenses in each United States congressional district in the state of Missouri pursuant to the map of each of the eight congressional districts as drawn and effective on December 6, 2018:

_____(a) Six once the department begins issuing licenses for marijuana facilities under this subsection;

_____(b) An additional six following the first two hundred and seventy days after the department begins issuing licenses for marijuana facilities under this subsection; and

_____(c) An additional six after the first five hundred and forty-eight days after the department begins issuing licenses for marijuana facilities under this subsection, but only after the department conducts an analysis and determines that there is a market for additional microbusiness licenses.

Future changes to the boundaries or the number of congressional districts shall have no impact.

(14) The department shall begin accepting license and certification applications for marijuana dispensary facilities, marijuana testing facilities, marijuana cultivation facilities, marijuana-infused products manufacturing facilities, marijuana microbusiness facilities, seed-to-sale tracking systems, and for transportation of marijuana no later than three hundred and sixty-five days after the effective date of this section. Applications for licenses under this section shall be approved or denied by the department no later than one hundred fifty days after their submission. If the department fails to carry out its non-discretionary duty to approve or deny an application within one hundred fifty days of submission, an applicant may immediately seek a court order compelling the department to approve or deny the application.

(15) With the exception of microbusiness licenses, and consistent with any limitations set forth in this section, for the first five hundred and forty-eight days after the department begins issuing license for marijuana facilities, the department may only issue a license:

(a) For a marijuana cultivation facility to an entity holding a medical marijuana cultivation facility license issued pursuant to section 1 of this article seeking licensure to operate a marijuana cultivation facility at the same location;

(b) For a marijuana dispensary facility to an entity holding a medical marijuana dispensary facility license issued pursuant to section 1 of this article seeking licensure to operate a marijuana dispensary facility at the same location;

(c) For a marijuana-infused products manufacturing facility to an entity holding a medical marijuana-infused products manufacturing facility license issued pursuant to section 1 of this article seeking licensure to operate a marijuana-infused product manufacturing facility at the same location; and

(d) For a marijuana testing facility to an entity holding a medical marijuana testing facility license issued pursuant to section 1 of this article seeking licensure to operate a marijuana testing facility at the same location.

(16) The department shall issue a license to each applicant for a marijuana facility pursuant to subdivision (15) of this subsection if the applicant is in good standing with the department and has reasonably complied with this article and all of the rules and regulations promulgated pursuant to this article.

(17) If an existing medical marijuana dispensary facility is located in a jurisdiction that bans marijuana dispensary facilities under this section, the medical marijuana dispensary facility may apply to the department for a marijuana dispensary license pursuant to subdivision (15) of this subsection in a new location, and such application shall be granted so long as the applicant meets all the requirements of this section and department regulation.

(18) For the first five hundred and forty-eight days after the department begins issuing licenses for marijuana facilities under this section, the department shall issue a license for a marijuana microbusiness facility to any qualified applicant consistent with the qualifications and limitations set forth in this section.

(19) A medical marijuana cultivation facility that is issued a marijuana cultivation facility license pursuant to subdivision (15) of this subsection is limited under both licenses to the total cultivation amount allowed pursuant to its medical marijuana facility license. A marijuana cultivation facility license issued pursuant to subdivision (15) of this subsection allows that entity to sell marijuana to medical marijuana facilities and marijuana facilities consistent with any limitations set forth in this section or department regulation.

(20) In addition to the foregoing, the department may issue a non-medical license pursuant to this section to a medical marijuana cultivation facility, medical marijuana-infused products manufacturing facility, or medical marijuana dispensary facility, only after the department determines that doing so will not limit or restrict access by qualifying patients, as defined in section 1 of this article, to an adequate supply of marijuana and marijuana-infused products at a reasonable cost.

(21) The department may not promulgate a rule prohibiting a marijuana facility from operating at the same location as a medical marijuana facility of the same license type operating pursuant to section 1 of this article.

(22) Marijuana facilities licensed to distribute marijuana, marijuana-infused products, and marijuana accessories directly to consumers pursuant to this section may also distribute marijuana, marijuana-infused products, and marijuana accessories to qualifying patients and primary caregivers consistent with section 1 of this article and department regulation.

(23) The department may charge a fee not to exceed five thousand dollars for any certification issued pursuant to this section.

(24) Until such time that federal law permits otherwise, all marijuana sold in Missouri shall be cultivated in a marijuana cultivation facility or a marijuana microbusiness facility located in Missouri. If allowed by federal law, marijuana may be exported from Missouri.

(25) Until such time that federal law permits otherwise, all marijuana-infused products sold in the state of Missouri shall be manufactured in a marijuana-infused products manufacturing facility or a marijuana microbusiness facility located in Missouri. If allowed by federal law, marijuana-infused products may be exported from Missouri.

(26) The denial of a license or license renewal by the department shall be appealable. The applicant may choose to challenge any denial by the department through the Administrative Hearing Commission, or successor entity. Pursuant to § 536.100 R.S.Mo., or successor provisions, any licensee who has exhausted all administrative remedies provided by law and who is aggrieved by a final decision in a contested case is entitled to judicial review.

(27) No elected official shall interfere directly or indirectly with the department's obligations and activities under this section.

(28) To minimize the potential for undue political influence in awarding licenses, the department shall review license applications using reasonable safeguards that ensure the name of the applicant and its principal owners, officers, and managers are not identified to the application scorers.

(29) The department shall have the sole authority within the state of Missouri to issue licenses for marijuana facilities and certifications pursuant to this section.

(30) The department shall not have the authority to promulgate, apply, or enforce any rule or regulation that is unduly burdensome or act to undermine the purposes of this section.

5. Local Control.

(1) Except as provided in this subsection, a local government may prohibit the operation of all non-medical retail marijuana facilities regulated under this section from being located within its jurisdiction through voter approval of a ballot question submitted to the qualified voters of the local government, provided that any ballot measure shall be voted on only during the regularly scheduled general election held on the first Tuesday after the first Monday in November of an even-numbered year starting in 2022, thereby avoiding any additional local governmental cost or expense. Until the first general election following the general election held November 3, 2020, a local government may through local ordinance temporarily prohibit non-medical retail marijuana facilities regulated under this section from being located within its jurisdiction. When a ballot question prohibiting non-medical retail marijuana facilities regulated under this section is submitted to voters, the following question shall be presented to the voters in the area subject to the prohibition, "Shall (insert name of local government) ban all non-medical retail marijuana facilities from being located within (insert name of local government and, where applicable, its "unincorporated areas") and forgo any additional related local tax revenue? ( ) Yes ( ) No." If a majority of the votes cast on the question by the qualified voters voting thereon are in favor of the question, then the ban shall go into effect as provided by law. If a question receives less than the required majority, then the jurisdiction shall have no power to ban new non-medical retail marijuana facilities regulated under this section, unless voters at a subsequent election on the first Tuesday after the first Monday in November of an even-numbered year approve a ban on new non-medical retail marijuana facilities submitted to them by the governing body. A local government may repeal an existing ban by its own ordinance or by a vote of the people, either through referral of a ballot question to the voters by the governing body or through citizen petition. In the case of a referral of a ballot question by the governing body or citizen's petition to repeal an existing ban, the question shall be voted on only during the regularly scheduled

general election held on the first Tuesday after the first Monday in November of an even-numbered year. A citizen's petition to repeal an existing ban shall be signed by at least five percent of the qualified voters in the area subject to the ban, determined on the basis of the number of votes cast for governor in such locale at the last gubernatorial election held prior to the filing of the petition. The local government shall count the petition signatures and give legal notice of the election as provided by applicable law. Denial of ballot access shall be subject to judicial review. Whether submitted by the governing body or by citizen's petition, the question shall be submitted in the following form: "Shall (insert name of local government) allow non-medical retail marijuana facilities to be located within (insert name of local government and where applicable, its "unincorporated areas") as regulated by state law? ( ) Yes ( ) No." If a majority of the votes cast on the question by the qualified voters voting thereon are in favor of the question, then the ban shall be repealed.

(2) Unless allowed by the local government, no new marijuana facility shall be initially sited within one thousand feet of any then-existing elementary or secondary school, child day-care center, or church. Except as otherwise provided in this subsection, no local government shall prohibit marijuana facilities or entities with a transportation certification either expressly or through the enactment of ordinances or regulations that make their operation unduly burdensome in the jurisdiction. However, local governments may enact ordinances or regulations not in conflict with this section, or with regulations enacted pursuant to this section, governing the time, place, and manner of operation of such facilities in the locality. A local government may establish civil penalties for violation of an ordinance or regulations governing the time, place, and manner of operation of a marijuana facility, or entity holding a transportation certification that may operate in such locality.

6. Taxation and Reporting.

(1) A tax shall be levied upon the retail sale of non-medical marijuana sold to consumers at marijuana facilities licensed pursuant to this section within the state. The tax shall be at a rate of fifteen percent of the retail price. The tax shall be collected by each licensed non-medical retail marijuana facility and paid to the department of revenue. After retaining no more than two percent of the total tax collected or its actual collection costs, whichever is less, amounts generated by the tax levied in this section shall be deposited by the department of revenue into the "Veterans, Infrastructure, and Health Fund") created under this subsection. Licensed entities making non-medical retail sales within the state shall be allowed approved credit for returns provided the tax was paid on the returned item and the purchaser was given the refund or credit.

(2) There is hereby created in the state treasury the "Veterans, Infrastructure, and Health Fund" which shall consist of taxes and fees collected under this section. The state treasurer shall be custodian of the fund, and he or she shall invest monies in the fund in the same manner as other funds are invested. Any interest and moneys earned on such investments shall be credited to the fund. Notwithstanding any other provision of law, any monies remaining in the fund at the end of a biennium shall not revert to the credit of the general revenue fund. The commissioner of administration is authorized to make cash operating transfers to the fund for purposes of meeting the cash requirements of the department in advance of it receiving annual application, licensing, and tax revenue, with any such transfers to be repaid as provided by law. The fund shall be a dedicated fund and shall be distributed as follows:

(a) First, to the department, an amount necessary for the department to carry out this section, including repayment of any cash operating transfers, payments made through contract or agreement with other state and public agencies necessary to carry out this section, and a reserve fund to maintain a reasonable working cash balance for the purpose of carrying out this section;

(b) Next, distributed to the local government where the retail sale occurred, three-fifteenths of the remaining fund balance.

(c) After the distribution to the local government where the retail sale occurred, the remaining fund balance shall be distributed in thirds as follows:

(i) One-third of the remainder of the fund balance shall be transferred to the Missouri veterans commission and allied state agencies, as determined by

appropriation, exclusively for health care and other services for military veterans and their dependent families;

(ii) One-third of the remainder of the fund balance to the State Road Fund created under article IV, section 30b of this Constitution for constructing and maintaining an adequate system of connected state highways; and

(iii) One-third of the remainder of the fund balance to the department to provide grants to existing agencies and not-for-profit organizations, whether government or community-based, to increase access to evidence-based low-barrier drug addiction treatment, prioritizing medically proven treatment and overdose prevention and reversal methods and public or private treatment options with an emphasis on reintegrating recipients into their local communities, to support overdose prevention education, and to support job placement, housing, and counseling for those with substance use disorders. Agencies and organizations serving populations with the highest rates of drug-related overdose shall be prioritized to receive the grants.

(d) All monies from the taxes and fees authorized hereunder shall provide additional dedicated funding for the purposes enumerated above and shall not replace existing dedicated funding.

(3) For all retail sales of marijuana, a record shall be kept by the seller of all amounts and types of marijuana involved in the sale and the total amount of money involved in the sale, including itemizations, taxes collected, and grand total sale amounts. All such records shall be kept on the premises in a readily available format and be made available for review by the department and the department of revenue upon request. Such records shall be retained for five years from the date of the sale.

(4) The tax levied pursuant to this subsection is separate from and in addition to any general state and local sales and use taxes that apply to retail sales, which shall continue to be collected and distributed as provided by general law.

(5) Except as authorized in this subsection, no additional taxes shall be imposed on the sale of marijuana.

(6) The fees and taxes provided for in this section shall be fully enforceable notwithstanding any other provision in this Constitution purportedly prohibiting or restricting the taxes and fees provided for herein.

7. Additional Protections.

(1) A marijuana testing facility shall not be subject to civil or criminal prosecution, denial of any right or privilege, civil or administrative penalty or sanction, or disciplinary action by any accreditation or licensing board or commission for providing laboratory testing services that relate to marijuana consistent with this section and otherwise meeting legal standards of professional conduct.

(2) An attorney shall not be subject to disciplinary action by the state bar association or other professional licensing body for owning, operating, investing in, being employed by, contracting with, or providing legal assistance to any person related to activity that is no longer subject to criminal penalties under state law pursuant to this section.

(3) Actions and conduct by marijuana facilities licensed or otherwise certified by the department, or their employees or agents, as permitted by this section and in compliance with department regulations and other standards of legal conduct, shall not be subject to criminal or civil liability or sanctions under Missouri law, except as provided for by this section.

(4) The department may not promulgate a rule that requires a consumer to provide a marijuana facility with identifying information other than identification to determine the consumer's age or requires the marijuana facility to acquire or record personal information about consumers other than information typically required in a retail transaction.

(5) It is the public policy of the state of Missouri that contracts related to marijuana that are entered into by marijuana facilities and those who allow property to be used by those entities, should be enforceable. It is the public policy of the state of Missouri that no contract entered into by marijuana facilities, or by a person who allows property to be used for activities that are exempt from state criminal penalties by this section, shall be unenforceable on the basis that activities related to marijuana may be prohibited by federal law.

8. Legislation.

Nothing in this section shall limit the general assembly from enacting laws consistent with the purposes of this section.

9. Additional Provisions.

(1) No owner of a marijuana facility or entity with a transportation certification shall be an individual with a disqualifying felony offense. A "disqualifying felony offense" is a violation of, and conviction or guilty plea to, state or federal law that is, or would have been, a felony under Missouri law, regardless of the sentence imposed, unless the department determines that:

(a) The person's conviction was for a marijuana offense, other than provision of marijuana to a minor; or

(b) The person's conviction was for a non-violent crime for which he or she was not incarcerated and that is more than five years old; or

(c) More than five years have passed since the person was released from parole or probation, and he or she has not been convicted of any subsequent criminal offenses.

The department may consult with and rely on the records, advice, and recommendations of the attorney general and the department of public safety, or their successor entities, in carrying out the provisions of this subdivision.

(2) All marijuana facilities and certificates shall be held by entities that are majority owned, directly or indirectly, by natural persons who have been citizens of the state of Missouri for at least one year prior to the application for such license or certification. Notwithstanding the foregoing, persons or entities outside the state of Missouri may own a minority stake, directly or indirectly, in such entities.

(3) No marijuana facility shall manufacture, package, or label marijuana or marijuana-infused products in a false or misleading manner. No person shall sell any product in a manner designed to cause confusion between a marijuana or marijuana-infused product and any product not containing marijuana. A violation of this subdivision shall be punishable by an appropriate and proportional department sanction, up to and including loss of license.

(4) No marijuana facility may sell edible marijuana-infused candy in shapes or packages that are attractive to children or that are easily confused with commercially sold candy that does not contain marijuana.

(5) All marijuana and marijuana-infused products shall be sold in individual, child-resistant containers that are labeled with serving amounts, instructions for use, and estimated length of effectiveness. All marijuana and marijuana-infused products shall be sold in containers clearly and conspicuously labeled, as mandated by the department, as containing "Marijuana," or a "Marijuana-Infused Product." Violation of this subdivision shall subject the violator to department sanctions, including an administrative penalty.

(6) A marijuana facility may not allow cultivation, processing, sale, or display of marijuana, marijuana-infused products, or marijuana accessories to be visible from a public place outside of the marijuana facility without the use of binoculars, aircraft, or other optical aids.

(7) A marijuana facility may not cultivate, process, test, or store marijuana at any location other than a physical address approved by the department and within an enclosed area that is secured in a manner that prevents access by persons not permitted by the marijuana facility to access the area.

(8) A marijuana facility shall secure every entrance to the facility so that access to areas containing marijuana is restricted to employees and other persons permitted by the marijuana facility to access the area and to agents of the department or state and local law enforcement officers and emergency personnel and shall secure its inventory and equipment during and after operating hours to deter and prevent theft of marijuana, marijuana-infused products, and marijuana accessories.

(9) No marijuana facility may refuse representatives of the department the right during the hours of operation to inspect the licensed premises or to audit the books and records of the marijuana facility.

(10) No marijuana facility may allow a person under twenty-one years of age to volunteer or work for the marijuana facility.

(11) No marijuana facility, or entity with a certification, shall assign, sell, give, lease, sublicense, or otherwise transfer its license or certificate to any other entity without the express consent of the department, not to be unreasonably withheld.

(12) To the fullest extent allowed by the Constitution of the United States, the Constitution of Missouri, and federal law, no unsolicited advertisements for marijuana, marijuana-infused products, or marijuana accessories are permitted and no off-site advertisement or marketing for marijuana, marijuana-infused products, or marijuana accessories may be placed on any billboard within the state or in any location exposed to view from a public place within one thousand feet of an elementary or secondary school, child daycare center, or church.

(13) Real and personal property used in the cultivation, manufacture, transport, testing, distribution, sale, and administration of marijuana for activities otherwise in compliance with this section shall not be subject to asset forfeiture solely because of that use.

(14) No person shall extract resins from marijuana using dangerous materials or combustible gases without a marijuana-infused products manufacturing facility license. Violation of this prohibition shall subject the violator to department sanctions, including an administrative penalty and, if applicable, loss of certificate or license for up to one year.

10. Personal Use of Marijuana.

(1) Subject to the limitations in subsection 3 of this section, the following acts by a person at least twenty-one years of age are not unlawful and shall not be an offense under state law or the laws of any local government within the state or be subject to a civil fine, penalty, or sanction, or be a basis for detention, search, or arrest, or to deny any right or privilege, or to seize or forfeit assets under state law or the laws of any local government:

(a) Possessing, using, ingesting, inhaling, processing, transporting, delivering without consideration, or distributing without consideration one ounce or less of marijuana, except that not more than the equivalent of one ounce of marijuana, as determined by the department, may be in a concentrated form;

(b) Possessing, planting, cultivating, harvesting, drying, processing, or manufacturing one-half the number of plants a qualifying patient is permitted to cultivate pursuant to section 1 of this article and department regulation, provided:

a. The plants and any marijuana produced by the plants in excess of one ounce are kept at one private residence, are in a locked space, and are not visible by normal, unaided vision from a public place; and
b. Not more than twice the number of allowable plants under paragraph (b) of this subdivision are kept in or on the grounds of a private residence at one time.

(c) Assisting another person who is at least twenty-one years of age in, or allowing property to be used for, any of the acts permitted by this section; and

(d) Possessing, using, delivering, distributing, manufacturing, transferring, or selling to persons twenty-one years of age or older marijuana accessories.

(2) A person who, pursuant to this section, cultivates marijuana plants that are visible by normal, unaided vision from a public place is subject to a civil penalty not exceeding two hundred and fifty dollars and forfeiture of the marijuana.

(3) A person who, pursuant to this section, cultivates marijuana plants that are not kept in a locked space is subject to a civil penalty not exceeding two hundred and fifty dollars and forfeiture of the marijuana.

(4) A person who smokes marijuana in a public place, other than in an area licensed for such activity by the department, is subject to a civil penalty not exceeding one hundred dollars and forfeiture of the marijuana.

(5) A person who is under twenty-one years of age who possesses, uses, ingests, inhales, transports, delivers without consideration or distributes without consideration one ounce or less of marijuana, or possesses, delivers without consideration, or distributes without consideration marijuana accessories is subject to a civil penalty not to exceed one hundred dollars and forfeiture of the marijuana. Any such person shall be provided the option of attending up to four hours of drug education or counseling in lieu of the fine.

(6) Subject to the limitations of this section, a person who possesses not more than twice the amount of marijuana allowed pursuant to this subsection, produces not more than twice the amount of marijuana allowed pursuant to this subsection, delivers without receiving any consideration or remuneration to a person who is at least twenty-one years of age not more than twice the amount of marijuana allowed by this subsection, or possesses with intent to deliver not more than twice the amount of marijuana allowed by this subsection:

(a) For a first violation, is subject to an infraction punishable by a civil penalty not exceeding two hundred and fifty dollars and forfeiture of the marijuana;

(b) For a second violation, is subject to an infraction punishable by a civil penalty not exceeding five hundred dollars and forfeiture of the marijuana;

(c) For a third or subsequent violation, is subject to a misdemeanor punishable by a fine not exceeding one-thousand dollars and forfeiture of the marijuana; and

(d) For a person under twenty-one years of age, is subject to a civil penalty not to exceed two hundred and fifty dollars. Any such person shall be provided the option of attending up to eight hours of drug education or counseling in lieu of the fine.

(7) Any person currently serving a sentence for a conviction, whether by trial or open or negotiated plea, who would not have been guilty of an adult or juvenile offense, or who would have been guilty of a lesser adult or juvenile offense had sections 1 and 2 of this article been in effect at the time of the offense, may petition for a recall or dismissal of sentence before the trial court that entered the judgement of conviction in the person's case to request resentencing or dismissal consistent with sections 1 and 2 of this article with credit for time and supervision period already served and such petition shall be granted.

(8) A person arrested, charged, or found guilty, whether by trial or open or negotiated plea, for any offense that is no longer a crime after the effective dates of sections 1 and 2 of this article may apply for expungement upon the effective date of this section and such expungement shall be granted and the records expunged from all government records absent good cause for denial. The effect of such order shall be to restore such person to the status the person occupied prior to such arrest, plea or conviction and as if such event had never taken place. No person for whom such order has been entered shall be held thereafter under any provision of any law to be guilty of perjury or otherwise giving a false statement by reason of the person's failure to recite or acknowledge such arrest, plea, trial, conviction, or expungement in response to any inquiry made of the person for any purpose whatsoever, and no such inquiry shall be made for information relating to an expungement.

(9) A person shall not be denied adoption, custody, or visitation rights relative to a minor solely for conduct that is permitted by this section, unless the person's behavior is such that granting the rights is not in the best interests of the child, as determined by other applicable law and procedures.

(10) No person shall be denied access to or priority for an organ transplant for conduct that is permitted by this section.

11. Severability.

The provisions of this section are severable, and if any clause, sentence, paragraph or section of this measure, or an application thereof, is adjudged invalid by any court of competent jurisdiction, the other provisions shall continue to be in effect to the fullest extent possible.

12. Effective Date.

The provisions of this section shall become effective on December 3, 2020, as provided by this Constitution.

RE: Petition approval request from DeeAnn Aull regarding a proposed constitutional amendment to Article IX, version 2 (2020-122)

Dear Auditor Galloway:

Enclosed please find an initiative petition sample sheet for a proposal to amend the Missouri Constitution filed by DeeAnn Aull on September 12, 2019.

We are referring the enclosed petition sample sheet to you for the purposes of preparing a fiscal note and fiscal note summary as required by Section 116.332, RSMo. Section 116.175.2, RSMo requires the state auditor to forward the fiscal note and fiscal note summary to the attorney general within twenty days of receipt of the petition sample sheet.

Thank you for your immediate consideration of this request.

Sincerely,

John R. Ashcroft

cc: Hon. Eric S. Schmitt
Sheri Hoffman
Trish Vincent

It is a class A misdemeanor punishable, notwithstanding the provisions of section 560.021, RSMo, to the contrary, for a term of imprisonment not to exceed one year in the county jail or a fine not to exceed ten thousand dollars or both, for anyone to sign any initiative petition with any name other than his or her own, or knowingly to sign his or her name more than once for the same measure for the same election, or to sign a petition when such person knows he or she is not a registered voter.

NOTICE: The proposed amendment revises Article IX of the Constitution by amending Sections 1(a) and 3(b) and adopting two new sections to be known as Article IX, Sections 1(c) and 11.

Be it resolved by the people of the state of Missouri that the Constitution be amended:

Section A. Article IX of the Constitution is revised by amending Sections 1(a) and 3(b), and adopting two new sections to be known as Article IX, Sections 1(c) and 11 to read as follows:

Section 1(a). A general diffusion of knowledge and intelligence being essential to the preservation of the rights and liberties of the people, [the general assembly shall establish and maintain] equality of educational opportunity, as described in this section, is a fundamental right. The general assembly shall ensure the equality of educational opportunity for all persons in this state through the establishment and maintenance of a uniformly regulated, thorough, appropriate, and adequate system of free public schools for the gratuitous instruction of all persons in this state within ages not in excess of twenty-one years as prescribed by law. The general assembly shall have an affirmative duty to adequately and equitably fund the free public schools established by this article.

Section 1(c). Any voluntary early childhood education program established by a publicly elected school board for persons between the ages of three and five years shall be funded as part of the free public schools established by this article.

Section 3(b). In event the public school fund provided and set apart by law for the support of free public schools, shall be insufficient to sustain free public schools that satisfy all requirements of this article [at least eight months in every year in each school district of the state], the general assembly shall [may] provide for such deficiency. Notwithstanding any other provision of law to the contrary, new or increased taxes or fees enacted by the general assembly for the purpose of funding free public schools as established in this article, are not subject to the provisions of article X of this constitution. [; but in] In no case shall there be set apart less than twenty-five percent of the state revenue, exclusive of interest and sinking fund, to be applied annually to the support of the free public schools. The provisions of this section and section 1(a) may be enforced by a private cause of action brought by or on behalf of any taxpayer, student of a public school, or school district within this state against the general assembly in a circuit court of proper venue and, if the suit is sustained, the plaintiff or plaintiffs shall receive from the state any costs, including attorneys' fees incurred by the plaintiff or plaintiffs in maintaining such suit.

Section 11. Appropriations made for the purpose of satisfying this article by the general assembly or any county, city, town, township, school district, or other municipal corporation shall only be to aid, support, or sustain the system of free public schools and in no event shall any appropriation be made, funds expended, or tax credits or other tax expenditures enacted after January 1, 2020 for the benefit of private schools. Nothing in this section shall prevent a contract for services between a public school and a private entity where necessary to meet the requirements of this article.

MISSOURI STATE AUDITOR'S OFFICE
FISCAL NOTE (20-122)

Subject

Initiative petition from DeeAnn Aull regarding a proposed constitutional amendment to Article IX. (Received September 13, 2019)

Date

October 3, 2019

Description

This proposal would amend Article IX of the Missouri Constitution.

The amendment is to be voted on in November 2020.

Public comments and other input

The State Auditor's office requested input from the **Attorney General's office,** the **Department of Agriculture,** the **Department of Economic Development,** the **Department of Elementary and Secondary Education,** the **Department of Higher Education and Workforce Development,** the **Department of Health and Senior Services,** the **Department of Commerce and Insurance,** the **Department of Mental Health,** the **Department of Natural Resources,** the **Department of Corrections,** the **Department of Labor and Industrial Relations,** the **Department of Revenue,** the **Department of Public Safety,** the **Department of Social Services,** the **Governor's office,** the **Missouri House of Representatives,** the **Department of Conservation,** the **Department of Transportation,** the **Office of Administration,** the **Office of State Courts Administrator,** the **Missouri Senate,** the **Secretary of State's office,** the **Office of the State Public Defender,** the **State Treasurer's office, Adair County, Boone County, Callaway County, Cass County, Clay County, Cole County, Greene County, Jackson County, Jasper County, St. Charles County, St. Louis County, Taney County,** the **City of Cape Girardeau,** the **City of Columbia,** the **City of Jefferson,** the **City of Joplin,** the **City of Kansas City,** the **City of Kirksville,** the **City of Mexico,** the **City of Raymore,** the **City of St. Joseph,** the **City of St. Louis,** the **City of Springfield,** the **City of Union,** the **City of Wentzville,** the **City of West Plains, Cape Girardeau 63 School District, Hannibal 60 School District, Malta Bend R-V School District, Mehlville School District, Wellsville-Middletown R-1 School District, State Technical College of Missouri, Metropolitan Community College, University of Missouri,** and **St. Louis Community College.**

Michael Podgursky, PhD provided information as an opponent of the proposal to the State Auditor's office.

Assumptions

Officials from the **Attorney General's office** indicated this provision seeks to create a private cause of action against the Missouri General Assembly with respect to enforcement of the provision's terms. To the extent a successful plaintiff may be entitled to costs, including attorneys' fees, incurred in maintaining their suit, there is the possibility of additional liability upon the State Legal Expense Fund ("LEF"). Similarly, if the Attorney General's Office is required to defend the General Assembly in such lawsuits, such representation could likely be accomplished with existing resources, though some amount of additional personnel services funding may be required to provide representation in these lawsuits. Neither the potential LEF exposure nor the additional amounts potentially required for personnel services can be estimated at this time.

Officials from the **Department of Agriculture** indicated no fiscal impact on their department.

Officials from the **Department of Economic Development** indicated no impact to their department.

Officials from the **Department of Elementary and Secondary Education** indicated:

Section A. Article IX. Section 1(c)

Using FY 2019 K-12 enrollment of 880,025, adding two more grade level cohorts could result in an additional 135,388 students to be included in the Foundation Formula. Using an average attendance percentage of 94% this would result in an Average Daily Attendance (ADA) of 127,265 if all children ages 3 to 5 were enrolled in a full-time pre-kindergarten program. This 127,265 less the 6,872 pre-kindergarten ADA used in the FY 2021 budget projections results in 120,393 additional ADA to be included in the Foundation Formula payment. This could result in up to $767,505,375 additional dollars to be required to be paid out through the Foundation Formula.

(120,393 multiplied by the State Adequacy Target (SAT) of $6,375)

This is an estimate for an increase in the formula cost that would continue annually and have the potential to further increase in future years depending on various components of the foundation formula.

Officials the **Department of Higher Education and Workforce Development** indicated they report no cost for this initiative petition.

Officials from the **Department of Health and Senior Services** indicated this initiative petition has no impact on their department.

Officials from the **Department of Commerce and Insurance** indicated this petition, if passed, will have no cost or savings to their department.

Officials from the **Department of Mental Health** indicated this proposal creates no direct obligations or requirements to their department that would result in a fiscal impact.

Officials from the **Department of Natural Resources** indicated they would not anticipate a direct fiscal impact from this proposal.

Officials from the **Department of Corrections** indicated no impact.

Officials from the **Department of Labor and Industrial Relations** indicated they assume no fiscal impact for this initiative petition.

Officials from the **Department of Revenue** indicated this initiative petition, as it is currently set forth, would have no impact on their department.

Officials from the **Department of Public Safety - Office of the Director** indicated they see no fiscal impact due to this initiative petition.

Officials from the **Department of Social Services** indicated they do not anticipate a fiscal impact due to this initiative petition.

Officials from the **Governor's office** indicated there should be no added costs or savings to their office.

Officials from the **Missouri House of Representatives** indicated an unknown fiscal impact could be realized if the general assembly were sued and ultimately found liable for any damages and/or fees.

Officials from the **Department of Conservation** indicated there is no anticipated fiscal impact (cost or savings) to their department associated with this initiative petition.

Officials from the **Department of Transportation** indicated this initiative petition would have no fiscal impact to their department/Missouri Highways and Transportation Commission.

Officials from the **Office of Administration** indicated this proposal amends Article IX of the Constitution of Missouri by amending Sections 1(a) and 3(b) and adopting two new sections.

Proposed language in Section 1(a) requires the General Assembly to ensure the equality of educational opportunity for all persons in the State of Missouri through a uniformly regulated, thorough, appropriate, and adequate system of free public schools and to adequately and equitably fund free public schools.

Proposed language in Section 1(c) requires that voluntary early childhood education programs established by a public school board for children ages three to five years old be funded as part of free public schools. Currently, Section 163.018, RSMo, allows districts

to include three to five year olds in their Average Daily Attendance (ADA) up to a specified cap-- four percent of the total number of pupils who are eligible for Free and Reduced Price Lunch between the ages of five and eighteen. Budget and Planning (B&P) defers to the Department of Elementary and Secondary Education for the impact of this provision.

Proposed language in Section 3(b) states that new or increased taxes or fees enacted by the General Assembly for the purpose of funding free public schools are not subject to the provisions of Article X of the Missouri Constitution. B&P notes that Article X, Section 18(a-d) of the Missouri Constitution establishes a revenue and spending limit on state government. The limit is 5.6 percent of Missouri personal income, based on the relationship between personal income and total state revenues when the limit was established and approved by voters in November 1980. Calculations made pursuant to Article X of the Missouri Constitution show that total state revenues for Fiscal Year 2017 were below the total state revenue limit by over $4.1 billion. In addition, Article X, Section 18(e) of the Missouri Constitution states the General Assembly shall not increase taxes or fees in any fiscal year, without voter approval, that in total produce net new annual revenues greater than $50 million, adjusted annually by the percentage change in the personal income of Missouri for the second previous year, or one percent of total state revenues for the second fiscal year prior to the General Assembly's action, whichever is less. For Fiscal Year 2019, these calculations are $128.1 million for the personal income amount and $105.0 million for the one percent of total state revenues amount.

Proposed language in Section 11 prohibits any appropriation be made, funds expended, or tax credits or other tax expenditures enacted after January 1, 2020 for the benefit of private schools.

This proposal should not impact their office.

Officials from the **Office of State Courts Administrator** indicated there is no fiscal impact on the courts.

Officials from the **Missouri Senate** indicated they anticipate no fiscal impact.

Officials from the **Secretary of State's office** indicated unless a special election is called for the purpose, Referendums are submitted to the people at the next general election. Article III section 52(b) of the Missouri Constitution authorizes the general assembly to order a special election for measures referred to the people. If a special election is called to submit a Referendum to a vote of the people, Section 115.063.2 RSMo. requires the state to pay the costs. The cost of the special election has been estimated to be $7.8 million based on the cost of the 2016 Presidential Preference Primary.

Their office is required to pay for publishing in local newspapers the full text of each statewide ballot measure as directed by Article XII, Section 2(b) of the Missouri Constitution and Section 116.230-116.290, RSMo. Funding for this item is adjusted each year depending upon the election cycle. A new decision item is requested in odd numbered fiscal years and the amount requested is dependent upon the estimated number of ballot

measures that will be approved by the General Assembly and the initiative petitions certified for the ballot. In (fiscal year) FY 2014, the General Assembly changed the appropriation so that it was no longer an estimated appropriation.

In FY19, over $5.8 million was spent to publish the full text of the measures for the August and November elections. They estimate $65,000 per page for the costs of publications based on the actual cost incurred for the one referendum that was on the August 2018 ballot.

Their office will continue to assume, for the purposes of this fiscal note, that it should have the full appropriation authority it needs to meet the publishing requirements. Because these requirements are mandatory, they reserve the right to request funding to meet the cost of their publishing requirements if the Governor and the General Assembly again change the amount or continue to not designate it as an estimated appropriation.

Officials from the **Office of the State Public Defender** indicated this initiative petition will not have any significant impact on their office.

Officials from the **State Treasurer's office** indicated no fiscal impact to their office.

Officials from **Greene County** indicated there are no estimated costs or savings to report from their county for this initiative petition.

Officials from **St. Louis County** indicated they do not see a fiscal impact upon their county in the event this is ultimately adopted.

Officials from the **City of Kansas City** indicated this proposed amendment will have no fiscal impact on their city.

Officials from **Wellsville-Middletown R-1 School District** indicated if this petition were to be voted on and passed, it would appear to have a positive fiscal impact on their school's finances. However, it appears to be setting the stage for some sort of general tax increase to raise the needed revenues. They are also concerned that this may lead to a strong push to consolidate small schools that would be very detrimental to the wellbeing of many of the small rural communities, as well as putting kids on buses for a longer period of time than they already are.

Of course, with any state law the devil is always in the details. If any of these initiatives (Initiative Petitions 20-117 through 20-122) pass the potential positive fiscal impact they would hope for is a stabilization of education funding that would guarantee that all schools receive equitable levels of resources. Some of these petitions call for fully funding pre-school programs. This would be a big boost to their bottom line. Some of these petitions call for a ban on the use of any public monies for any private schools. This will help protect the level of funding for public schools.

Their biggest concern with these petitions is that in order to reduce costs, an effort will be made to consolidate/eliminate small school districts, which will be (in their opinion) very detrimental to their small rural communities.

Officials from **Metropolitan Community College** indicated no fiscal impact.

Michael Podgursky, PhD provided the following information as an opponent of this initiative petition.

Missouri State Auditor Nicole Galloway, CPA
PO Box 869
Jefferson City, MO 65102

paul.harper@auditor.mo.gov

RE: Fiscal Analysis for Initiative Petitions 117,118,119, 120, 121 and 122

Dear Auditor Galloway,

I am an opponent of the above initiative petitions and submit the following fiscal analysis pursuant to section 116.175 RSMo.

Fiscal Note

MNEA Petitions 117-122

Prepared by Michael Podgursky, PhD[1]

Petitions 117-122 amend the Missouri State Constitution in a variety of ways. In this fiscal note I focus on the two changes that have the most direct, and largest, potential fiscal consequences.

1. Adequacy

In all versions of the petitions, Section 1(a) of the Constitution is amended to change the duty of the state to provide "free" public schools, to provide "equality of educational opportunity for all persons in this state through the establishment and maintenance of uniformly regulated, thorough, appropriate, and adequate system of free public schools… The general assembly shall have an affirmative duty to adequately and equitably fund the free public schools established by this article."

On the face of it, addition of "thorough, appropriate, and adequate" do not have direct fiscal consequences. However, addition of these terms to the Constitution would very likely overturn the recent school finance court case (CEE vs MO, 2009), wherein the Missouri Supreme Court found that the current school funding formula had a rational basis in law, and, in particular, that there was no duty on the part of the legislature to provide an "adequate" level of spending beyond the 25 percent of revenue requirement:

Notably, the introductory clause in section 1(a) concerning the "diffusion of knowledge" outlines the purpose and subject of Missouri's public education system. But, it provides no specific

[1] Chancellor's Professor of Economics, University of Missouri – Columbia and Director, Sinquefield Center for Applied Economic Research, Saint Louis University.

directive or standard for how the State must accomplish a "diffusion of knowledge." Plaintiffs are attempting to read a separate funding requirement into section 1(a) that would require the legislature to provide "adequate" education funding in excess of the 25-percent requirement contained in section 3(b). Such language does not exist.

https://www.courtlistener.com/opinion/1789805/committee-for-educational-equality-v-state/

In CEE vs MO, the plaintiffs commissioned reports and provided testimony from a variety of experts who opined regarding the shortcomings of Missouri school spending and what an "adequate" education would cost in Missouri. Two witnesses in particular provided evidence of overall costs using two different methods (professional judgement panels and cost functions) to provide quantitative dollar value gaps between current expenditures and "adequate" expenditures.

Since it is the clear intent of the petitioners to open the door to future "adequacy" lawsuits and overturn CEE vs MO, a reasonable estimate of the fiscal cost of such a Constitutional change would be to update these adequacy estimates (i.e., expenditure shortfalls) from the 2008 trial. This is based on the assumption, implied in the quote above, that had this language been in the Constitution in 2008, the plaintiffs would have won, and the adequacy estimates provided by their experts would have formed the basis for a remedy. Indeed, this is what has occurred in numerous other school finance lawsuits in states where plaintiffs have won.

Based on "professional judgement" panels in Missouri, and evidence from other states, Dr. Kern Alexander stated in his trial testimony (p. 7525, and elsewhere) that Missouri was roughly one billion dollars short of adequate spending in academic year 2005-06.[2] Thus, in one set of estimates I update Alexander's estimate to 2019.

A second adequacy estimate was provided by Dr. Bruce Baker. Baker estimated "education cost functions" and used them to compute a measure of adequate expenditures district by district.[3] I took the excel file he submitted with his report and totaled the expenditure shortfall for all districts he determined to have had inadequate spending in 2004-05. This totaled $466,370,600.

I then updated both of these estimates to Fall 2019 values in the following ways.

- Enrollment adjustment. Total Missouri public school enrollment has fallen slightly since 2004-05 when these estimates were made. I assume that this would lower both cost estimates by a factor of .993

[2] Testimony of Dr. Kern Alexander. CEE vs MO. Testimony. Feb 21, 2007. Vol. 30, p 7525.

[3] Bruce D. Baker. 2006. Missouri's School Finance Formula Fails to Guarantee Equal or Minimally Adequate Educational Opportunity to Missouri Schoolchildren. Report Prepared on Behalf of Committee for Educational Equality.

- CPI Inflation adjustment. In one set of estimates I simply updated these figures (after enrollment adjustment) to Fall, 2019 values using inflation estimates based on the BLS Consumer Price Index. This resulted in an adjustment factor of 1.35 for Baker and 1.29 for Alexander.
- Relative spending adjustment. It may be that the relevant inflation adjustment is not household consumer prices, but Missouri school operating expenditures (e.g. reflecting educator salaries and benefits and other school input costs). In this case, I computed the Alexander and Baker estimates of the shortfall of current expenditures in 2005 and 2006 (13.2 and 6.6 percent respectively) and applied them to estimated Fall, 2019 current operating expenditures along with the enrollment adjustment noted above.

The results of these exercises produced a minimum estimate (Baker) of $625,779,201 and a maximum estimate (Alexander) of $1,289,645,735.

2. Free Early Childhood Education

Three versions of the petitions (118, 120, 122) include the following amendment to the state Constitution:

Section 1 (c) Any voluntary early childhood education program established by a publically funded elected school board for persons between the ages of three and five years shall be funded as part of the free public schools established by this article.

If this sentence, combined with the amended language regarding adequacy in 1(a), is interpreted as creating a right to free public preschool education in Missouri, this would produce a substantial increase in public K-12 expenditures. I have estimated these costs in the following manner. Using data from the 2017 American Community Survey I estimate that there are 204,182 children aged 3-5 eligible for this program.[4] I make two assumptions regarding the take-up rate: 60 percent and 90 percent.[5]

Regarding cost per student, I use the current state adequacy rate ($6,316). This gives a range of cost estimates from a low (60 percent take-up) of $773,766,970 to a high (90 percent take up) of $1,160,650,455.

3. Cost Summary

[4] 2017 is the most recent available ACS data. This estimate only includes five year olds who would not be eligible for public kindergarten.

[5] The currently 54 percent of 3 and 4 year olds participate in either public or private preschool. Since most of this is currently paid for by parents it is reasonable to assume that many of these parents would choose a free public option and many more, not currently participating, would do so as well.
https://nces.ed.gov/programs/digest/d18/tables/dt18_202.10.asp?current=yes

Table 1 provides fiscal estimates of the lower and upper bound of costs for each version of the petition based on whether it included just adequacy (A) or adequacy and preschool (A+P).

Sincerely,

/s/ *Michael Podgursky*

Michael Podgursky, PhD

Table 1: Summary Cost Calculations

Petition		Low	High
117	A	$625,779,201	$1,289,645,735
118	A+P	$1,399,546,172	$2,450,296,190
119	A	$625,779,201	$1,289,645,735
120	A+P	$1,399,546,172	$2,450,296,190
121	A	$625,779,201	$1,289,645,735
122	A+P	$1,399,546,172	$2,450,296,190

A = Adequacy only, A+P = Adequacy + Pre-school

The State Auditor's office did not receive a response from **Adair County, Boone County, Callaway County, Cass County, Clay County, Cole County, Jackson County, Jasper County, St. Charles County, Taney County,** the **City of Cape Girardeau,** the **City of Columbia,** the **City of Jefferson,** the **City of Joplin,** the **City of Kirksville,** the **City of Mexico,** the **City of Raymore,** the **City of St. Joseph,** the **City of St. Louis,** the **City of Springfield,** the **City of Union,** the **City of Wentzville,** the **City of West Plains, Cape Girardeau 63 School District, Hannibal 60 School District, Malta Bend R-V School District, Mehlville School District, State Technical College of Missouri, University of Missouri,** and **St. Louis Community College.**

Fiscal Note Summary

Costs to the state are unknown but may be up to $2.45 billion annually. School districts may have a positive fiscal impact.

RE: Petition approval request from DeeAnn Aull regarding a proposed constitutional amendment to Article IX, version 1 (2020-121)

Dear Auditor Galloway:

Enclosed please find an initiative petition sample sheet for a proposal to amend the Missouri Constitution filed by DeeAnn Aull on September 12, 2019.

We are referring the enclosed petition sample sheet to you for the purposes of preparing a fiscal note and fiscal note summary as required by Section 116.332, RSMo. Section 116.175.2, RSMo requires the state auditor to forward the fiscal note and fiscal note summary to the attorney general within twenty days of receipt of the petition sample sheet.

Thank you for your immediate consideration of this request.

Sincerely,

John R. Ashcroft

20-121

NOTICE: The proposed amendment revises Article IX of the Constitution by amending Sections 1(a) and 3(b) and adopting one new section to be known as Article IX, Section 11.

Be it resolved by the people of the state of Missouri that the Constitution be amended:

Section A. Article IX of the Constitution is revised by amending Sections 1(a) and 3(b), and adopting one new section to be known as Article IX, Section 11 to read as follows:

Section 1(a). A general diffusion of knowledge and intelligence being essential to the preservation of the rights and liberties of the people, [the general assembly shall establish and maintain] equality of educational opportunity, as described in this section, is a fundamental right. The general assembly shall ensure the equality of educational opportunity for all persons in this state through the establishment and maintenance of a uniformly regulated, thorough, appropriate, and adequate system of free public schools for the gratuitous instruction of all persons in this state within ages not in excess of twenty-one years as prescribed by law. The general assembly shall have an affirmative duty to adequately and equitably fund the free public schools established by this article.

Section 3(b). In event the public school fund provided and set apart by law for the support of free public schools, shall be insufficient to sustain free public schools that satisfy all requirements of this article [at least eight months in every year in each school district of the state], the general assembly shall [may] provide for such deficiency. Notwithstanding any other provision of law to the contrary, new or increased taxes or fees enacted by the general assembly for the purpose of funding free public schools as established in this article, are not subject to the provisions of article X of this constitution. [; but in] In no case shall there be set apart less than twenty-five percent of the state revenue, exclusive of interest and sinking fund, to be applied annually to the support of the free public schools. The provisions of this section and section 1(a) may be enforced by a private cause of action brought by or on behalf of any taxpayer, student of a public school, or school district within this state against the general assembly in a circuit court of proper venue and, if the suit is sustained, the plaintiff or plaintiffs shall receive from the state any costs, including attorneys' fees incurred by the plaintiff or plaintiffs in maintaining such suit.

Section 11. Appropriations made for the purpose of satisfying this article by the general assembly or any county, city, town, township, school district, or other municipal corporation shall only be to aid, support, or sustain the system of free public schools and in no event shall any appropriation be made, funds expended, or tax credits or other tax expenditures enacted after January 1, 2020 for the benefit of private schools. Nothing in this section shall prevent a contract for services between a public school and a private entity where necessary to meet the requirements of this article.

MISSOURI STATE AUDITOR'S OFFICE
FISCAL NOTE (20-121)

Subject

Initiative petition from DeeAnn Aull regarding a proposed constitutional amendment to Article IX. (Received September 13, 2019)

Date

October 3, 2019

Description

This proposal would amend Article IX of the Missouri Constitution.

The amendment is to be voted on in November 2020.

Public comments and other input

The State Auditor's office requested input from the **Attorney General's office,** the **Department of Agriculture,** the **Department of Economic Development,** the **Department of Elementary and Secondary Education,** the **Department of Higher Education and Workforce Development,** the **Department of Health and Senior Services,** the **Department of Commerce and Insurance,** the **Department of Mental Health,** the **Department of Natural Resources,** the **Department of Corrections,** the **Department of Labor and Industrial Relations,** the **Department of Revenue,** the **Department of Public Safety,** the **Department of Social Services,** the **Governor's office,** the **Missouri House of Representatives,** the **Department of Conservation,** the **Department of Transportation,** the **Office of Administration,** the **Office of State Courts Administrator,** the **Missouri Senate,** the **Secretary of State's office,** the **Office of the State Public Defender,** the **State Treasurer's office, Adair County, Boone County, Callaway County, Cass County, Clay County, Cole County, Greene County, Jackson County, Jasper County, St. Charles County, St. Louis County, Taney County,** the **City of Cape Girardeau,** the **City of Columbia,** the **City of Jefferson,** the **City of Joplin,** the **City of Kansas City,** the **City of Kirksville,** the **City of Mexico,** the **City of Raymore,** the **City of St. Joseph,** the **City of St. Louis,** the **City of Springfield,** the **City of Union,** the **City of Wentzville,** the **City of West Plains, Cape Girardeau 63 School District, Hannibal 60 School District, Malta Bend R-V School District, Mehlville School District, Wellsville-Middletown R-1 School District, State Technical College of Missouri, Metropolitan Community College, University of Missouri,** and **St. Louis Community College.**

Michael Podgursky, PhD provided information as an opponent of the proposal to the State Auditor's office.

Assumptions

Officials from the **Attorney General's office** indicated this provision seeks to create a private cause of action against the Missouri General Assembly with respect to enforcement of the provision's terms. To the extent a successful plaintiff may be entitled to costs, including attorneys' fees, incurred in maintaining their suit, there is the possibility of additional liability upon the State Legal Expense Fund ("LEF"). Similarly, if the Attorney General's Office is required to defend the General Assembly in such lawsuits, such representation could likely be accomplished with existing resources, though some amount of additional personnel services funding may be required to provide representation in these lawsuits. Neither the potential LEF exposure nor the additional amounts potentially required for personnel services can be estimated at this time.

Officials from the **Department of Agriculture** indicated no fiscal impact on their department.

Officials from the **Department of Economic Development** indicated no impact to their department.

Officials from the **Department of Elementary and Secondary Education** indicated a total estimated net effect on all state funds of $0 for fiscal year 2020, $0 for fiscal year 2021, and $0 for fiscal year 2022.

Officials the **Department of Higher Education and Workforce Development** indicated they report no cost for this initiative petition.

Officials from the **Department of Health and Senior Services** indicated this initiative petition has no impact on their department.

Officials from the **Department of Commerce and Insurance** indicated this petition, if passed, will have no cost or savings to their department.

Officials from the **Department of Mental Health** indicated this proposal creates no direct obligations or requirements to their department that would result in a fiscal impact.

Officials from the **Department of Natural Resources** indicated they would not anticipate a direct fiscal impact from this proposal.

Officials from the **Department of Corrections** indicated no impact.

Officials from the **Department of Labor and Industrial Relations** indicated they assume no fiscal impact for this initiative petition.

Officials from the **Department of Revenue** indicated this initiative petition, as it is currently set forth, would have no impact on their department.

Officials from the **Department of Public Safety - Office of the Director** indicated they see no fiscal impact due to this initiative petition.

Officials from the **Department of Social Services** indicated they do not anticipate a fiscal impact due to this initiative petition.

Officials from the **Governor's office** indicated there should be no added costs or savings to their office.

Officials from the **Missouri House of Representatives** indicated an unknown fiscal impact could be realized if the general assembly were sued and ultimately found liable for any damages and/or fees.

Officials from the **Department of Conservation** indicated there is no anticipated fiscal impact (cost or savings) to their department associated with this initiative petition.

Officials from the **Department of Transportation** indicated this initiative petition would have no fiscal impact to their department/Missouri Highways and Transportation Commission.

Officials from the **Office of Administration** indicated this proposal amends Article IX of the Constitution of Missouri by amending Sections 1(a) and 3(b) and adopting one new section.

Proposed language in Section 1(a) requires the General Assembly to ensure the equality of educational opportunity for all persons in the State of Missouri through a uniformly regulated, thorough, appropriate, and adequate system of free public schools and to adequately and equitably fund free public schools.

Proposed language in Section 3(b) states that new or increased taxes or fees enacted by the General Assembly for the purpose of funding free public schools are not subject to the provisions of Article X of the Missouri Constitution. Budget and Planning (B&P) notes that Article X, Section 18(a-d) of the Missouri Constitution establishes a revenue and spending limit on state government. The limit is 5.6 percent of Missouri personal income, based on the relationship between personal income and total state revenues when the limit was established and approved by voters in November 1980. Calculations made pursuant to Article X of the Missouri Constitution show that total state revenues for Fiscal Year 2017 were below the total state revenue limit by over $4.1 billion. In addition, Article X, Section 18(e) of the Missouri Constitution states the General Assembly shall not increase taxes or fees in any fiscal year, without voter approval, that in total produce net new annual revenues greater than $50 million, adjusted annually by the percentage change in the personal income of Missouri for the second previous year, or one percent of total state revenues for the second fiscal year prior to the General Assembly's action, whichever is less. For Fiscal Year 2019, these calculations are $128.1 million for the personal income amount and $105.0 million for the one percent of total state revenues amount.

Proposed language in Section 11 prohibits any appropriation be made, funds expended, or tax credits or other tax expenditures enacted after January 1, 2020 for the benefit of private schools.

This proposal should not impact their office.

Officials from the **Office of State Courts Administrator** indicated there is no fiscal impact on the courts.

Officials from the **Missouri Senate** indicated they anticipate no fiscal impact.

Officials from the **Secretary of State's office** indicated unless a special election is called for the purpose, Referendums are submitted to the people at the next general election. Article III section 52(b) of the Missouri Constitution authorizes the general assembly to order a special election for measures referred to the people. If a special election is called to submit a Referendum to a vote of the people, Section 115.063.2 RSMo. requires the state to pay the costs. The cost of the special election has been estimated to be $7.8 million based on the cost of the 2016 Presidential Preference Primary.

Their office is required to pay for publishing in local newspapers the full text of each statewide ballot measure as directed by Article XII, Section 2(b) of the Missouri Constitution and Section 116.230-116.290, RSMo. Funding for this item is adjusted each year depending upon the election cycle. A new decision item is requested in odd numbered fiscal years and the amount requested is dependent upon the estimated number of ballot measures that will be approved by the General Assembly and the initiative petitions certified for the ballot. In (fiscal year) FY 2014, the General Assembly changed the appropriation so that it was no longer an estimated appropriation.

In FY19, over $5.8 million was spent to publish the full text of the measures for the August and November elections. They estimate $65,000 per page for the costs of publications based on the actual cost incurred for the one referendum that was on the August 2018 ballot.

Their office will continue to assume, for the purposes of this fiscal note, that it should have the full appropriation authority it needs to meet the publishing requirements. Because these requirements are mandatory, they reserve the right to request funding to meet the cost of their publishing requirements if the Governor and the General Assembly again change the amount or continue to not designate it as an estimated appropriation.

Officials from the **Office of the State Public Defender** indicated this initiative petition will not have any significant impact on their office.

Officials from the **State Treasurer's office** indicated no fiscal impact to their office.

Officials from **Greene County** indicated there are no estimated costs or savings to report from their county for this initiative petition.

Officials from **St. Louis County** indicated they do not see a fiscal impact upon their county in the event this is ultimately adopted.

Officials from the **City of Kansas City** indicated this proposed amendment will have no fiscal impact on their city.

Officials from **Wellsville-Middletown R-1 School District** indicated if this petition were to be voted on and passed, it would appear to have a positive fiscal impact on their school's finances. However, it appears to be setting the stage for some sort of general tax increase to raise the needed revenues. They are also concerned that this may lead to a strong push to consolidate small schools that would be very detrimental to the wellbeing of many of the small rural communities, as well as putting kids on buses for a longer period of time than they already are.

Of course, with any state law the devil is always in the details. If any of these initiatives (Initiative Petitions 20-117 through 20-122) pass the potential positive fiscal impact they would hope for is a stabilization of education funding that would guarantee that all schools receive equitable levels of resources. Some of these petitions call for fully funding pre-school programs. This would be a big boost to their bottom line. Some of these petitions call for a ban on the use of any public monies for any private schools. This will help protect the level of funding for public schools.

Their biggest concern with these petitions is that in order to reduce costs, an effort will be made to consolidate/eliminate small school districts, which will be (in their opinion) very detrimental to their small rural communities.

Officials from **Metropolitan Community College** indicated no fiscal impact.

Michael Podgursky, PhD provided the following information as an opponent of this initiative petition.

Missouri State Auditor Nicole Galloway, CPA
PO Box 869
Jefferson City, MO 65102

paul.harper@auditor.mo.gov

RE: Fiscal Analysis for Initiative Petitions 117,118,119, 120, 121 and 122

Dear Auditor Galloway,

I am an opponent of the above initiative petitions and submit the following fiscal analysis pursuant to section 116.175 RSMo.

Fiscal Note

MNEA Petitions 117-122

Prepared by Michael Podgursky, PhD[1]

Petitions 117-122 amend the Missouri State Constitution in a variety of ways. In this fiscal note I focus on the two changes that have the most direct, and largest, potential fiscal consequences.

1. Adequacy

In all versions of the petitions, Section 1(a) of the Constitution is amended to change the duty of the state to provide "free" public schools, to provide "equality of educational opportunity for all persons in this state through the establishment and maintenance of uniformly regulated, thorough, appropriate, and adequate system of free public schools… The general assembly shall have an affirmative duty to adequately and equitably fund the free public schools established by this article."

On the face of it, addition of "thorough, appropriate, and adequate" do not have direct fiscal consequences. However, addition of these terms to the Constitution would very likely overturn the recent school finance court case (CEE vs MO, 2009), wherein the Missouri Supreme Court found that the current school funding formula had a rational basis in law, and, in particular, that there was no duty on the part of the legislature to provide an "adequate" level of spending beyond the 25 percent of revenue requirement:

Notably, the introductory clause in section 1(a) concerning the "diffusion of knowledge" outlines the purpose and subject of Missouri's public education system. But, it provides no specific

[1] Chancellor's Professor of Economics, University of Missouri – Columbia and Director, Sinquefield Center for Applied Economic Research, Saint Louis University.

directive or standard for how the State must accomplish a "diffusion of knowledge." Plaintiffs are attempting to read a separate funding requirement into section 1(a) that would require the legislature to provide "adequate" education funding in excess of the 25-percent requirement contained in section 3(b). Such language does not exist.

https://www.courtlistener.com/opinion/1789805/committee-for-educational-equality-v-state/

In CEE vs MO, the plaintiffs commissioned reports and provided testimony from a variety of experts who opined regarding the shortcomings of Missouri school spending and what an "adequate" education would cost in Missouri. Two witnesses in particular provided evidence of overall costs using two different methods (professional judgement panels and cost functions) to provide quantitative dollar value gaps between current expenditures and "adequate" expenditures.

Since it is the clear intent of the petitioners to open the door to future "adequacy" lawsuits and overturn CEE vs MO, a reasonable estimate of the fiscal cost of such a Constitutional change would be to update these adequacy estimates (i.e., expenditure shortfalls) from the 2008 trial. This is based on the assumption, implied in the quote above, that had this language been in the Constitution in 2008, the plaintiffs would have won, and the adequacy estimates provided by their experts would have formed the basis for a remedy. Indeed, this is what has occurred in numerous other school finance lawsuits in states where plaintiffs have won.

Based on "professional judgement" panels in Missouri, and evidence from other states, Dr. Kern Alexander stated in his trial testimony (p. 7525, and elsewhere) that Missouri was roughly one billion dollars short of adequate spending in academic year 2005-06.[2] Thus, in one set of estimates I update Alexander's estimate to 2019.

A second adequacy estimate was provided by Dr. Bruce Baker. Baker estimated "education cost functions" and used them to compute a measure of adequate expenditures district by district.[3] I took the excel file he submitted with his report and totaled the expenditure shortfall for all districts he determined to have had inadequate spending in 2004-05. This totaled $466,370,600.

I then updated both of these estimates to Fall 2019 values in the following ways.

- Enrollment adjustment. Total Missouri public school enrollment has fallen slightly since 2004-05 when these estimates were made. I assume that this would lower both cost estimates by a factor of .993

[2] Testimony of Dr. Kern Alexander. CEE vs MO. Testimony. Feb 21, 2007. Vol. 30, p 7525.

[3] Bruce D. Baker. 2006. Missouri's School Finance Formula Fails to Guarantee Equal or Minimally Adequate Educational Opportunity to Missouri Schoolchildren. Report Prepared on Behalf of Committee for Educational Equality.

- CPI Inflation adjustment. In one set of estimates I simply updated these figures (after enrollment adjustment) to Fall, 2019 values using inflation estimates based on the BLS Consumer Price Index. This resulted in an adjustment factor of 1.35 for Baker and 1.29 for Alexander.
- Relative spending adjustment. It may be that the relevant inflation adjustment is not household consumer prices, but Missouri school operating expenditures (e.g. reflecting educator salaries and benefits and other school input costs). In this case, I computed the Alexander and Baker estimates of the shortfall of current expenditures in 2005 and 2006 (13.2 and 6.6 percent respectively) and applied them to estimated Fall, 2019 current operating expenditures along with the enrollment adjustment noted above.

The results of these exercises produced a minimum estimate (Baker) of $625,779,201 and a maximum estimate (Alexander) of $1,289,645,735.

2. Free Early Childhood Education

Three versions of the petitions (118, 120, 122) include the following amendment to the state Constitution:

Section 1 (c) Any voluntary early childhood education program established by a publically funded elected school board for persons between the ages of three and five years shall be funded as part of the free public schools established by this article.

If this sentence, combined with the amended language regarding adequacy in 1(a), is interpreted as creating a right to free public preschool education in Missouri, this would produce a substantial increase in public K-12 expenditures. I have estimated these costs in the following manner. Using data from the 2017 American Community Survey I estimate that there are 204,182 children aged 3-5 eligible for this program.[4] I make two assumptions regarding the take-up rate: 60 percent and 90 percent.[5]

Regarding cost per student, I use the current state adequacy rate ($6,316). This gives a range of cost estimates from a low (60 percent take-up) of $773,766,970 to a high (90 percent take up) of $1,160,650,455.

3. Cost Summary

[4] 2017 is the most recent available ACS data. This estimate only includes five year olds who would not be eligible for public kindergarten.

[5] The currently 54 percent of 3 and 4 year olds participate in either public or private preschool. Since most of this is currently paid for by parents it is reasonable to assume that many of these parents would choose a free public option and many more, not currently participating, would do so as well.
https://nces.ed.gov/programs/digest/d18/tables/dt18_202.10.asp?current=yes

Table 1 provides fiscal estimates of the lower and upper bound of costs for each version of the petition based on whether it included just adequacy (A) or adequacy and preschool (A+P).

Sincerely,

/s/ *Michael Podgursky*

Michael Podgursky, PhD

Table 1: Summary Cost Calculations

Petition		Low	High
117	A	$625,779,201	$1,289,645,735
118	A+P	$1,399,546,172	$2,450,296,190
119	A	$625,779,201	$1,289,645,735
120	A+P	$1,399,546,172	$2,450,296,190
121	A	$625,779,201	$1,289,645,735
122	A+P	$1,399,546,172	$2,450,296,190

A = Adequacy only, A+P = Adequacy + Pre-school

The State Auditor's office did not receive a response from **Adair County, Boone County, Callaway County, Cass County, Clay County, Cole County, Jackson County, Jasper County, St. Charles County, Taney County,** the **City of Cape Girardeau,** the **City of Columbia,** the **City of Jefferson,** the **City of Joplin,** the **City of Kirksville,** the **City of Mexico,** the **City of Raymore,** the **City of St. Joseph,** the **City of St. Louis,** the **City of Springfield,** the **City of Union,** the **City of Wentzville,** the **City of West Plains, Cape Girardeau 63 School District, Hannibal 60 School District, Malta Bend R-V School District, Mehlville School District, State Technical College of Missouri, University of Missouri,** and **St. Louis Community College.**

Fiscal Note Summary

Costs to the state are unknown but may be up to $1.29 billion annually. School districts may have a positive fiscal impact.

RE: Petition approval request from DeeAnn Aull regarding a proposed constitutional amendment to Article IX, version 4 (2020-120)

Dear Auditor Galloway:

Enclosed please find an initiative petition sample sheet for a proposal to amend the Missouri Constitution filed by DeeAnn Aull on September 9, 2019.

We are referring the enclosed petition sample sheet to you for the purposes of preparing a fiscal note and fiscal note summary as required by Section 116.332, RSMo. Section 116.175.2, RSMo requires the state auditor to forward the fiscal note and fiscal note summary to the attorney general within twenty days of receipt of the petition sample sheet.

Thank you for your immediate consideration of this request.

Sincerely,

John R. Ashcroft

NOTICE: The proposed amendment revises Article IX of the Constitution by amending Sections 1(a) and 3(b) and adopting two new sections to be known as Article IX, Sections 1(c) and 11.

Be it resolved by the people of the state of Missouri that the Constitution be amended:

Section A. Article IX of the Constitution is revised by amending Sections 1(a) and 3(b), and adopting two new sections to be known as Article IX, Sections 1(c) and 11 to read as follows:

Section 1(a). A general diffusion of knowledge and intelligence being essential to the preservation of the rights and liberties of the people, [the general assembly shall establish and maintain] equality of educational opportunity, as described in this section, is a fundamental right. The general assembly shall ensure the equality of educational opportunity for all persons in this state through the establishment and maintenance of a uniformly regulated, thorough, appropriate, and adequate system of free public schools governed by publicly elected school boards for the gratuitous instruction of all persons in this state within ages not in excess of twenty-one years as prescribed by law. The general assembly shall have an affirmative duty to adequately and equitably fund the free public schools established by this article.

Section 1(c). Any voluntary early childhood education program established by a publicly elected school board for persons between the ages of three and five years shall be funded as part of the free public schools established by this article.

Section 3(b). In event the public school fund provided and set apart by law for the support of free public schools, shall be insufficient to sustain free public schools that satisfy all requirements of this article [at least eight months in every year in each school district of the state], the general assembly shall [may] provide for such deficiency. Notwithstanding any other provision of law to the contrary, new or increased taxes or fees enacted by the general assembly for the purpose of funding free public schools as established in this article, are not subject to the provisions of article X of this constitution. [; but in] In no case shall there be set apart less than twenty-five percent of the state revenue, exclusive of interest and sinking fund, to be applied annually to the support of the free public schools. For the purpose of calculating state income tax rates, state net general revenue shall not include funds used solely to meet the requirements of providing free public schools. The provisions of this section and section 1(a) may be enforced by a private cause of action brought by or on behalf of any taxpayer, student of a public school, or school district within this state against the general assembly in a circuit court of proper venue and, if the suit is sustained, the plaintiff or plaintiffs shall receive from the state any costs, including attorneys' fees incurred by the plaintiff or plaintiffs in maintaining such suit.

Section 11. Appropriations made for the purpose of satisfying this article by the general assembly or any county, city, town, township, school district, or other municipal corporation shall only be to aid, support, or sustain the system of free public schools and in no event shall any appropriation be made, funds expended, or tax credits or other tax expenditures enacted after January 1, 2020 for the benefit of private schools. Nothing in this section shall prevent a contract for services between a public school and a private entity where necessary to meet the requirements of this article.

MISSOURI STATE AUDITOR'S OFFICE
FISCAL NOTE (20-120)

Subject

Initiative petition from DeeAnn Aull regarding a proposed constitutional amendment to Article IX. (Received September 10, 2019)

Date

September 30, 2019

Description

This proposal would amend Article IX of the Missouri Constitution.

The amendment is to be voted on in November 2020.

Public comments and other input

The State Auditor's office requested input from the **Attorney General's office,** the **Department of Agriculture,** the **Department of Economic Development,** the **Department of Elementary and Secondary Education,** the **Department of Higher Education and Workforce Development,** the **Department of Health and Senior Services,** the **Department of Commerce and Insurance,** the **Department of Mental Health,** the **Department of Natural Resources,** the **Department of Corrections,** the **Department of Labor and Industrial Relations,** the **Department of Revenue,** the **Department of Public Safety,** the **Department of Social Services,** the **Governor's office,** the **Missouri House of Representatives,** the **Department of Conservation,** the **Department of Transportation,** the **Office of Administration,** the **Office of State Courts Administrator,** the **Missouri Senate,** the **Secretary of State's office,** the **Office of the State Public Defender,** the **State Treasurer's office, Adair County, Boone County, Callaway County, Cass County, Clay County, Cole County, Greene County, Jackson County, Jasper County, St. Charles County, St. Louis County, Taney County,** the **City of Cape Girardeau,** the **City of Columbia,** the **City of Jefferson,** the **City of Joplin,** the **City of Kansas City,** the **City of Kirksville,** the **City of Mexico,** the **City of Raymore,** the **City of St. Joseph,** the **City of St. Louis,** the **City of Springfield,** the **City of Union,** the **City of Wentzville,** the **City of West Plains, Cape Girardeau 63 School District, Hannibal 60 School District, Malta Bend R-V School District, Mehlville School District, Wellsville-Middletown R-1 School District, State Technical College of Missouri, Metropolitan Community College, University of Missouri,** and **St. Louis Community College.**

Michael Podgursky, PhD provided information as an opponent of the proposal to the State Auditor's office.

Assumptions

Officials from the **Attorney General's office** indicated this provision seeks to create a private cause of action against the Missouri General Assembly with respect to enforcement of the provision's terms. To the extent a successful plaintiff may be entitled to costs, including attorneys' fees, incurred in maintaining their suit, there is the possibility of additional liability upon the State Legal Expense Fund ("LEF"). Similarly, if the Attorney General's Office is required to defend the General Assembly in such lawsuits, such representation could likely be accomplished with existing resources, though some amount of additional personnel services funding may be required to provide representation in these lawsuits. Neither the potential LEF exposure nor the additional amounts potentially required for personnel services can be estimated at this time.

Officials from the **Department of Agriculture** indicated no fiscal impact on their department.

Officials from the **Department of Economic Development** indicated no impact to their department.

Officials from the **Department of Elementary and Secondary Education** indicated:

Section A. Article IX. Section 1(c)

Using FY 2019 K-12 enrollment of 880,025, adding two more grade level cohorts could result in an additional 135,388 students to be included in the Foundation Formula. Using an average attendance percentage of 94% this would result in an Average Daily Attendance (ADA) of 127,265 if all children ages 3 to 5 were enrolled in a full-time pre-kindergarten program. This 127,265 less the 6,872 pre-kindergarten ADA used in the FY 2021 budget projections results in 120,393 additional ADA to be included in the Foundation Formula payment. This could result in up to $767,505,375 additional dollars to be required to be paid out through the Foundation Formula.

(120,393 multiplied by the State Adequacy Target (SAT) of $6,375)

This is an estimate for an increase in the formula cost that would continue annually and have the potential to further increase in future years depending on various components of the foundation formula.

Officials the **Department of Higher Education and Workforce Development** indicated they report no cost for this initiative petition.

Officials from the **Department of Health and Senior Services** indicated this initiative petition has no impact on their department.

Officials from the **Department of Commerce and Insurance** indicated this petition, if passed, will have no cost or savings to their department.

Officials from the **Department of Mental Health** indicated this proposal creates no direct obligations or requirements to their department that would result in a fiscal impact.

Officials from the **Department of Natural Resources** indicated they would not anticipate a direct fiscal impact from this proposal.

Officials from the **Department of Corrections** indicated no impact.

Officials from the **Department of Labor and Industrial Relations** indicated this initiative petition has no fiscal impact on their department.

Officials from the **Department of Revenue** indicated this initiative petition, as it is currently set forth, would have no impact on their department.

Officials from the **Department of Public Safety - Office of the Director** indicated they see no fiscal impact due to this legislation.

Officials from the **Department of Social Services** indicated they do not anticipate a fiscal impact due to this initiative petition.

Officials from the **Governor's office** indicated there should be no added costs or savings to their office.

Officials from the **Missouri House of Representatives** indicated an unknown fiscal impact could be realized if the general assembly were sued and ultimately found liable for any damages and/or fees.

Officials from the **Department of Conservation** indicated there is no anticipated fiscal impact (cost or savings) to their department associated with this initiative petition.

Officials from the **Department of Transportation** indicated this fiscal note is anticipated to have no fiscal impact to their department/Missouri Highways and Transportation Commission.

Officials from the **Office of Administration** indicated this proposal amends Article IX of the Constitution of Missouri by amending Sections 1(a) and 3(b) and adopting two new sections.

Proposed language in Section 1(a) requires the General Assembly to ensure the equality of educational opportunity for all persons in the State of Missouri through a uniformly regulated, thorough, appropriate, and adequate system of free public schools and to adequately and equitably fund free public schools.

Proposed language in Section 1(c) requires that voluntary early childhood education programs established by a public school board for children ages three to five years old be funded as part of free public schools. Currently, Section 163.018, RSMo, allows districts

to include three to five year olds in their Average Daily Attendance (ADA) up to a specified cap-- four percent of the total number of pupils who are eligible for Free and Reduced Price Lunch between the ages of five and eighteen. Budget and Planning (B&P) defers to the Department of Elementary and Secondary Education for the impact of this provision.

Proposed language in Section 3(b) states that new or increased taxes or fees enacted by the General Assembly for the purpose of funding free public schools are not subject to the provisions of Article X of the Missouri Constitution. B&P notes that Article X, Section 18(a-d) of the Missouri Constitution establishes a revenue and spending limit on state government. The limit is 5.6 percent of Missouri personal income, based on the relationship between personal income and total state revenues when the limit was established and approved by voters in November 1980. Calculations made pursuant to Article X of the Missouri Constitution show that total state revenues for Fiscal Year 2017 were below the total state revenue limit by over $4.1 billion. In addition, Article X, Section 18(e) of the Missouri Constitution states the General Assembly shall not increase taxes or fees in any fiscal year, without voter approval, that in total produce net new annual revenues greater than $50 million, adjusted annually by the percentage change in the personal income of Missouri for the second previous year, or one percent of total state revenues for the second fiscal year prior to the General Assembly's action, whichever is less. For Fiscal Year 2019, these calculations are $128.1 million for the personal income amount and $105.0 million for the one percent of total state revenues amount.

Proposed language in Section 3(b) further specifies that for the purpose of state income tax rate calculations, state net general revenue shall not include funds used solely to meet the requirements of providing free public schools. This provision could impact the calculation pursuant to SB 509 (2014) contained in Section 143.011, RSMo, as well as future changes to state income tax rates. Section 143.011, RSMo, contains an automatic income tax reduction when the previous fiscal year's net general revenue collections exceed the highest of the three prior fiscal years by at least $150 million. It is unclear what "funds used solely to meet the requirements of providing free public schools" would encompass. If this means that GR expenditures made toward providing free public schools are deducted from the net general revenue calculation, the proposed language would reduce the amount of state net general revenue used in determining whether the growth trigger pursuant to Section 143.011, RSMo, has been met. The following table details historical GR expenditures on the provision of free public schools:

Historical Spending on Free Public Schools	
Fiscal Year	**GR Expenditures**
FY 2016	$2,229,988,335
FY 2017	$2,278,929,780
FY 2018	$2,336,487,108
FY 2019	$2,445,388,593
FY 2020 Approp	$2,480,877,793

Proposed language in Section 11 prohibits any appropriation be made, funds expended, or tax credits or other tax expenditures enacted after January 1, 2020 for the benefit of private schools.

This proposal should not impact their office.

Officials from the **Office of State Courts Administrator** indicated there is no fiscal impact on the courts.

Officials from the **Missouri Senate** indicated they anticipate no fiscal impact.

Officials from the **Secretary of State's office** indicated unless a special election is called for the purpose, Referendums are submitted to the people at the next general election. Article III section 52(b) of the Missouri Constitution authorizes the general assembly to order a special election for measures referred to the people. If a special election is called to submit a Referendum to a vote of the people, Section 115.063.2 RSMo. requires the state to pay the costs. The cost of the special election has been estimated to be $7.8 million based on the cost of the 2016 Presidential Preference Primary.

Their office is required to pay for publishing in local newspapers the full text of each statewide ballot measure as directed by Article XII, Section 2(b) of the Missouri Constitution and Section 116.230-116.290, RSMo. Funding for this item is adjusted each year depending upon the election cycle. A new decision item is requested in odd numbered fiscal years and the amount requested is dependent upon the estimated number of ballot measures that will be approved by the General Assembly and the initiative petitions certified for the ballot. In (fiscal year) FY 2014, the General Assembly changed the appropriation so that it was no longer an estimated appropriation.

In FY19, over $5.8 million was spent to publish the full text of the measures for the August and November elections. They estimate $65,000 per page for the costs of publications based on the actual cost incurred for the one referendum that was on the August 2018 ballot.

Their office will continue to assume, for the purposes of this fiscal note, that it should have the full appropriation authority it needs to meet the publishing requirements. Because these requirements are mandatory, they reserve the right to request funding to meet the cost of their publishing requirements if the Governor and the General Assembly again change the amount or continue to not designate it as an estimated appropriation.

Officials from the **Office of the State Public Defender** indicated this initiative petition will not have any significant impact on their office.

Officials from the **State Treasurer's office** indicated no fiscal impact to their office.

Officials from **Greene County** indicated there are no estimated costs or savings to report from their county for this initiative petition.

Officials from **St. Louis County** indicated they do not see that this initiative petition, if voter-approved and adopted, would have a fiscal impact on the operations of their county government.

Officials from the **City of Kansas City** indicated this initiative petition will have no fiscal impact on their city.

Officials from **Wellsville-Middletown R-1 School District** indicated if this petition were to be voted on and passed, it would appear to have a positive fiscal impact on their school's finances. However, it appears to be setting the stage for some sort of general tax increase to raise the needed revenues. They are also concerned that this may lead to a strong push to consolidate small schools that would be very detrimental to the wellbeing of many of the small rural communities, as well as putting kids on buses for a longer period of time than they already are.

Of course, with any state law the devil is always in the details. If any of these initiatives (Initiative Petitions 20-117 through 20-122) pass the potential positive fiscal impact they would hope for is a stabilization of education funding that would guarantee that all schools receive equitable levels of resources. Some of these petitions call for fully funding pre-school programs. This would be a big boost to their bottom line. Some of these petitions call for a ban on the use of any public monies for any private schools. This will help protect the level of funding for public schools.

Their biggest concern with these petitions is that in order to reduce costs, an effort will be made to consolidate/eliminate small school districts, which will be (in their opinion) very detrimental to their small rural communities.

Officials from **Metropolitan Community College** indicated no fiscal impact.

Michael Podgursky, PhD provided the following information as an opponent of this initiative petition.

Missouri State Auditor Nicole Galloway, CPA
PO Box 869
Jefferson City, MO 65102
And via email to: moaudit.mo.gov; barb.wood@auditor.mo.gov;
paul.harper@auditor.mo.gov

RE: Fiscal Analysis for Initiative Petitions 117,118,119, 120, 121 and 122

Dear Auditor Galloway,

I am an opponent of the above initiative petitions and submit the following fiscal analysis pursuant to section 116.175 RSMo.

Fiscal Note

MNEA Petitions 117-122

Prepared by Michael Podgursky, PhD[1]

Petitions 117-122 amend the Missouri State Constitution in a variety of ways. In this fiscal note I focus on the two changes that have the most direct, and largest, potential fiscal consequences.

1. Adequacy

In all versions of the petitions, Section 1(a) of the Constitution is amended to change the duty of the state to provide "free" public schools, to provide "equality of educational opportunity for all persons in this state through the establishment and maintenance of uniformly regulated, thorough, appropriate, and adequate system of free public schools… The general assembly shall have an affirmative duty to adequately and equitably fund the free public schools established by this article."

On the face of it, addition of "thorough, appropriate, and adequate" do not have direct fiscal consequences. However, addition of these terms to the Constitution would very likely overturn the recent school finance court case (CEE vs MO, 2009), wherein the Missouri Supreme Court found that the current school funding formula had a rational basis in law, and, in particular, that there was no duty on the part of the legislature to provide an "adequate" level of spending beyond the 25 percent of revenue requirement:

Notably, the introductory clause in section 1(a) concerning the "diffusion of knowledge" outlines the purpose and subject of Missouri's public education system. But, it provides no specific

[1] Chancellor's Professor of Economics, University of Missouri – Columbia and Director, Sinquefield Center for Applied Economic Research, Saint Louis University.

directive or standard for how the State must accomplish a "diffusion of knowledge." Plaintiffs are attempting to read a separate funding requirement into section 1(a) that would require the legislature to provide "adequate" education funding in excess of the 25-percent requirement contained in section 3(b). Such language does not exist.

https://www.courtlistener.com/opinion/1789805/committee-for-educational-equality-v-state/

In CEE vs MO, the plaintiffs commissioned reports and provided testimony from a variety of experts who opined regarding the shortcomings of Missouri school spending and what an "adequate" education would cost in Missouri. Two witnesses in particular provided evidence of overall costs using two different methods (professional judgement panels and cost functions) to provide quantitative dollar value gaps between current expenditures and "adequate" expenditures.

Since it is the clear intent of the petitioners to open the door to future "adequacy" lawsuits and overturn CEE vs MO, a reasonable estimate of the fiscal cost of such a Constitutional change would be to update these adequacy estimates (i.e., expenditure shortfalls) from the 2008 trial. This is based on the assumption, implied in the quote above, that had this language been in the Constitution in 2008, the plaintiffs would have won, and the adequacy estimates provided by their experts would have formed the basis for a remedy. Indeed, this is what has occurred in numerous other school finance lawsuits in states where plaintiffs have won.

Based on "professional judgement" panels in Missouri, and evidence from other states, Dr. Kern Alexander stated in his trial testimony (p. 7525, and elsewhere) that Missouri was roughly one billion dollars short of adequate spending in academic year 2005-06.[2] Thus, in one set of estimates I update Alexander's estimate to 2019.

A second adequacy estimate was provided by Dr. Bruce Baker. Baker estimated "education cost functions" and used them to compute a measure of adequate expenditures district by district.[3] I took the excel file he submitted with his report and totaled the expenditure shortfall for all districts he determined to have had inadequate spending in 2004-05. This totaled $466,370,600.

I then updated both of these estimates to Fall 2019 values in the following ways.

- Enrollment adjustment. Total Missouri public school enrollment has fallen slightly since 2004-05 when these estimates were made. I assume that this would lower both cost estimates by a factor of .993

[2] Testimony of Dr. Kern Alexander. CEE vs MO. Testimony. Feb 21, 2007. Vol. 30, p 7525.

[3] Bruce D. Baker. 2006. Missouri's School Finance Formula Fails to Guarantee Equal or Minimally Adequate Educational Opportunity to Missouri Schoolchildren. Report Prepared on Behalf of Committee for Educational Equality.

- CPI Inflation adjustment. In one set of estimates I simply updated these figures (after enrollment adjustment) to Fall, 2019 values using inflation estimates based on the BLS Consumer Price Index. This resulted in an adjustment factor of 1.35 for Baker and 1.29 for Alexander.
- Relative spending adjustment. It may be that the relevant inflation adjustment is not household consumer prices, but Missouri school operating expenditures (e.g. reflecting educator salaries and benefits and other school input costs). In this case, I computed the Alexander and Baker estimates of the shortfall of current expenditures in 2005 and 2006 (13.2 and 6.6 percent respectively) and applied them to estimated Fall, 2019 current operating expenditures along with the enrollment adjustment noted above.

The results of these exercises produced a minimum estimate (Baker) of $625,779,201 and a maximum estimate (Alexander) of $1,289,645,735.

2. Free Early Childhood Education

Three versions of the petitions (118, 120, 122) include the following amendment to the state Constitution:

Section 1 (c) Any voluntary early childhood education program established by a publically funded elected school board for persons between the ages of three and five years shall be funded as part of the free public schools established by this article.

If this sentence, combined with the amended language regarding adequacy in 1(a), is interpreted as creating a right to free public preschool education in Missouri, this would produce a substantial increase in public K-12 expenditures. I have estimated these costs in the following manner. Using data from the 2017 American Community Survey I estimate that there are 204,182 children aged 3-5 eligible for this program.[4] I make two assumptions regarding the take-up rate: 60 percent and 90 percent.[5]

Regarding cost per student, I use the current state adequacy rate ($6,316). This gives a range of cost estimates from a low (60 percent take-up) of $773,766,970 to a high (90 percent take up) of $1,160,650,455.

3. Cost Summary

[4] 2017 is the most recent available ACS data. This estimate only includes five year olds who would not be eligible for public kindergarten.

[5] The currently 54 percent of 3 and 4 year olds participate in either public or private preschool. Since most of this is currently paid for by parents it is reasonable to assume that many of these parents would choose a free public option and many more, not currently participating, would do so as well.
https://nces.ed.gov/programs/digest/d18/tables/dt18_202.10.asp?current=yes

Table 1 provides fiscal estimates of the lower and upper bound of costs for each version of the petition based on whether it included just adequacy (A) or adequacy and preschool (A+P).

Sincerely,

/s/ *Michael Podgursky*

Michael Podgursky, PhD

Table 1: Summary Cost Calculations

Petition		Low	High
117	A	$625,779,201	$1,289,645,735
118	A+P	$1,399,546,172	$2,450,296,190
119	A	$625,779,201	$1,289,645,735
120	A+P	$1,399,546,172	$2,450,296,190
121	A	$625,779,201	$1,289,645,735
122	A+P	$1,399,546,172	$2,450,296,190

A = Adequacy only, A+P = Adequacy + Pre-school

The State Auditor's office did not receive a response from **Adair County, Boone County, Callaway County, Cass County, Clay County, Cole County, Jackson County, Jasper County, St. Charles County, Taney County,** the **City of Cape Girardeau,** the **City of Columbia,** the **City of Jefferson,** the **City of Joplin,** the **City of Kirksville,** the **City of Mexico,** the **City of Raymore,** the **City of St. Joseph,** the **City of St. Louis,** the **City of Springfield,** the **City of Union,** the **City of Wentzville,** the **City of West Plains, Cape Girardeau 63 School District, Hannibal 60 School District, Malta Bend R-V School District, Mehlville School District, State Technical College of Missouri, University of Missouri,** and **St. Louis Community College.**

Fiscal Note Summary

State governmental entities anticipate possible changes to state general revenue of an unknown amount. Costs to the state are unknown but may be up to $2.45 billion annually. School districts may have a positive fiscal impact.

RE: Petition approval request from DeeAnn Aull regarding a proposed constitutional amendment to Article IX, version 3 (2020-119)

Dear Auditor Galloway:

Enclosed please find an initiative petition sample sheet for a proposal to amend the Missouri Constitution filed by DeeAnn Aull on September 9, 2019.

We are referring the enclosed petition sample sheet to you for the purposes of preparing a fiscal note and fiscal note summary as required by Section 116.332, RSMo. Section 116.175.2, RSMo requires the state auditor to forward the fiscal note and fiscal note summary to the attorney general within twenty days of receipt of the petition sample sheet.

Thank you for your immediate consideration of this request.

Sincerely,

John R. Ashcroft

NOTICE: The proposed amendment revises Article IX of the Constitution by amending Sections 1(a) and 3(b) and adopting one new section to be known as Article IX, Section 11.

Be it resolved by the people of the state of Missouri that the Constitution be amended:

Section A. Article IX of the Constitution is revised by amending Sections 1(a) and 3(b), and adopting one new section to be known as Article IX, Section 11 to read as follows:

Section 1(a). A general diffusion of knowledge and intelligence being essential to the preservation of the rights and liberties of the people, [the general assembly shall establish and maintain] equality of educational opportunity, as described in this section, is a fundamental right. The general assembly shall ensure the equality of educational opportunity for all persons in this state through the establishment and maintenance of a uniformly regulated, thorough, appropriate, and adequate system of free public schools governed by publicly elected school boards for the gratuitous instruction of all persons in this state within ages not in excess of twenty-one years as prescribed by law. The general assembly shall have an affirmative duty to adequately and equitably fund the free public schools established by this article.

Section 3(b). In event the public school fund provided and set apart by law for the support of free public schools, shall be insufficient to sustain free public schools that satisfy all requirements of this article [at least eight months in every year in each school district of the state], the general assembly shall [may] provide for such deficiency. Notwithstanding any other provision of law to the contrary, new or increased taxes or fees enacted by the general assembly for the purpose of funding free public schools as established in this article, are not subject to the provisions of article X of this constitution. [; but in] In no case shall there be set apart less than twenty-five percent of the state revenue, exclusive of interest and sinking fund, to be applied annually to the support of the free public schools. For the purpose of calculating state income tax rates, state net general revenue shall not include funds used solely to meet the requirements of providing free public schools. The provisions of this section and section 1(a) may be enforced by a private cause of action brought by or on behalf of any taxpayer, student of a public school, or school district within this state against the general assembly in a circuit court of proper venue and, if the suit is sustained, the plaintiff or plaintiffs shall receive from the state any costs, including attorneys' fees incurred by the plaintiff or plaintiffs in maintaining such suit.

Section 11. Appropriations made for the purpose of satisfying this article by the general assembly or any county, city, town, township, school district, or other municipal corporation shall only be to aid, support, or sustain the system of free public schools and in no event shall any appropriation be made, funds expended, or tax credits or other tax expenditures enacted after January 1, 2020 for the benefit of private schools. Nothing in this section shall prevent a contract for services between a public school and a private entity where necessary to meet the requirements of this article.

MISSOURI STATE AUDITOR'S OFFICE
FISCAL NOTE (20-119)

Subject

Initiative petition from DeeAnn Aull regarding a proposed constitutional amendment to Article IX. (Received September 10, 2019)

Date

September 30, 2019

Description

This proposal would amend Article IX of the Missouri Constitution.

The amendment is to be voted on in November 2020.

Public comments and other input

The State Auditor's office requested input from the **Attorney General's office,** the **Department of Agriculture,** the **Department of Economic Development,** the **Department of Elementary and Secondary Education,** the **Department of Higher Education and Workforce Development,** the **Department of Health and Senior Services,** the **Department of Commerce and Insurance,** the **Department of Mental Health,** the **Department of Natural Resources,** the **Department of Corrections,** the **Department of Labor and Industrial Relations,** the **Department of Revenue,** the **Department of Public Safety,** the **Department of Social Services,** the **Governor's office,** the **Missouri House of Representatives,** the **Department of Conservation,** the **Department of Transportation,** the **Office of Administration,** the **Office of State Courts Administrator,** the **Missouri Senate,** the **Secretary of State's office,** the **Office of the State Public Defender,** the **State Treasurer's office, Adair County, Boone County, Callaway County, Cass County, Clay County, Cole County, Greene County, Jackson County, Jasper County, St. Charles County, St. Louis County, Taney County,** the **City of Cape Girardeau,** the **City of Columbia,** the **City of Jefferson,** the **City of Joplin,** the **City of Kansas City,** the **City of Kirksville,** the **City of Mexico,** the **City of Raymore,** the **City of St. Joseph,** the **City of St. Louis,** the **City of Springfield,** the **City of Union,** the **City of Wentzville,** the **City of West Plains, Cape Girardeau 63 School District, Hannibal 60 School District, Malta Bend R-V School District, Mehlville School District, Wellsville-Middletown R-1 School District, State Technical College of Missouri, Metropolitan Community College, University of Missouri,** and **St. Louis Community College.**

Michael Podgursky, PhD provided information as an opponent of the proposal to the State Auditor's office.

Assumptions

Officials from the **Attorney General's office** indicated this provision seeks to create a private cause of action against the Missouri General Assembly with respect to enforcement of the provision's terms. To the extent a successful plaintiff may be entitled to costs, including attorneys' fees, incurred in maintaining their suit, there is the possibility of additional liability upon the State Legal Expense Fund ("LEF"). Similarly, if the Attorney General's Office is required to defend the General Assembly in such lawsuits, such representation could likely be accomplished with existing resources, though some amount of additional personnel services funding may be required to provide representation in these lawsuits. Neither the potential LEF exposure nor the additional amounts potentially required for personnel services can be estimated at this time.

Officials from the **Department of Agriculture** indicated no fiscal impact on their department.

Officials from the **Department of Economic Development** indicated no impact to their department.

Officials from the **Department of Elementary and Secondary Education** indicated a total estimated net effect on all state funds of $0 for fiscal year 2020, $0 for fiscal year 2021, and $0 for fiscal year 2022.

Officials the **Department of Higher Education and Workforce Development** indicated they report no cost for this initiative petition.

Officials from the **Department of Health and Senior Services** indicated this initiative petition has no impact on their department.

Officials from the **Department of Commerce and Insurance** indicated this petition, if passed, will have no cost or savings to their department.

Officials from the **Department of Mental Health** indicated this proposal creates no direct obligations or requirements to their department that would result in a fiscal impact.

Officials from the **Department of Natural Resources** indicated they would not anticipate a direct fiscal impact from this proposal.

Officials from the **Department of Corrections** indicated no impact.

Officials from the **Department of Labor and Industrial Relations** indicated this initiative petition has no fiscal impact on their department.

Officials from the **Department of Revenue** indicated this initiative petition, as it is currently set forth, would have no impact on their department.

Officials from the **Department of Public Safety - Office of the Director** indicated they see no fiscal impact due to this legislation.

Officials from the **Department of Social Services** indicated they do not anticipate a fiscal impact due to this initiative petition.

Officials from the **Governor's office** indicated there should be no added costs or savings to their office.

Officials from the **Missouri House of Representatives** indicated an unknown fiscal impact could be realized if the general assembly were sued and ultimately found liable for any damages and/or fees.

Officials from the **Department of Conservation** indicated there is no anticipated fiscal impact (cost or savings) to their department associated with this initiative petition.

Officials from the **Department of Transportation** indicated this fiscal note is anticipated to have no fiscal impact to their department/Missouri Highways and Transportation Commission.

Officials from the **Office of Administration** indicated this proposal amends Article IX of the Constitution of Missouri by amending Sections 1(a) and 3(b) and adopting one new section.

Proposed language in Section 1(a) requires the General Assembly to ensure the equality of educational opportunity for all persons in the State of Missouri through a uniformly regulated, thorough, appropriate, and adequate system of free public schools and to adequately and equitably fund free public schools.

Proposed language in Section 3(b) states that new or increased taxes or fees enacted by the General Assembly for the purpose of funding free public schools are not subject to the provisions of Article X of the Missouri Constitution. Budget and Planning (B&P) notes that Article X, Section 18(a-d) of the Missouri Constitution establishes a revenue and spending limit on state government. The limit is 5.6 percent of Missouri personal income, based on the relationship between personal income and total state revenues when the limit was established and approved by voters in November 1980. Calculations made pursuant to Article X of the Missouri Constitution show that total state revenues for Fiscal Year 2017 were below the total state revenue limit by over $4.1 billion. In addition, Article X, Section 18(e) of the Missouri Constitution states the General Assembly shall not increase taxes or fees in any fiscal year, without voter approval, that in total produce net new annual revenues greater than $50 million, adjusted annually by the percentage change in the personal income of Missouri for the second previous year, or one percent of total state revenues for the second fiscal year prior to the General Assembly's action, whichever is less. For Fiscal Year 2019, these calculations are $128.1 million for the personal income amount and $105.0 million for the one percent of total state revenues amount.

Proposed language in Section 3(b) further specifies that for the purpose of state income tax rate calculations, state net general revenue shall not include funds used solely to meet the requirements of providing free public schools. This provision could impact the calculation pursuant to SB 509 (2014) contained in Section 143.011, RSMo, as well as future changes to state income tax rates. Section 143.011, RSMo, contains an automatic income tax reduction when the previous fiscal year's net general revenue collections exceed the highest of the three prior fiscal years by at least $150 million. It is unclear what "funds used solely to meet the requirements of providing free public schools" would encompass. If this means that GR expenditures made toward providing free public schools are deducted from the net general revenue calculation, the proposed language would reduce the amount of state net general revenue used in determining whether the growth trigger pursuant to Section 143.011, RSMo, has been met. The following table details historical GR expenditures on the provision of free public schools:

Historical Spending on Free Public Schools	
Fiscal Year	**GR Expenditures**
FY 2016	$2,229,988,335
FY 2017	$2,278,929,780
FY 2018	$2,336,487,108
FY 2019	$2,445,388,593
FY 2020 Approp	$2,480,877,793

Proposed language in Section 11 prohibits any appropriation be made, funds expended, or tax credits or other tax expenditures enacted after January 1, 2020 for the benefit of private schools.

This proposal should not impact their office.

Officials from the **Office of State Courts Administrator** indicated there is no fiscal impact on the courts.

Officials from the **Missouri Senate** indicated they anticipate no fiscal impact.

Officials from the **Secretary of State's office** indicated unless a special election is called for the purpose, Referendums are submitted to the people at the next general election. Article III section 52(b) of the Missouri Constitution authorizes the general assembly to order a special election for measures referred to the people. If a special election is called to submit a Referendum to a vote of the people, Section 115.063.2 RSMo. requires the state to pay the costs. The cost of the special election has been estimated to be $7.8 million based on the cost of the 2016 Presidential Preference Primary.

Their office is required to pay for publishing in local newspapers the full text of each statewide ballot measure as directed by Article XII, Section 2(b) of the Missouri Constitution and Section 116.230-116.290, RSMo. Funding for this item is adjusted each year depending upon the election cycle. A new decision item is requested in odd numbered fiscal years and the amount requested is dependent upon the estimated number of ballot

measures that will be approved by the General Assembly and the initiative petitions certified for the ballot. In (fiscal year) FY 2014, the General Assembly changed the appropriation so that it was no longer an estimated appropriation.

In FY19, over $5.8 million was spent to publish the full text of the measures for the August and November elections. They estimate $65,000 per page for the costs of publications based on the actual cost incurred for the one referendum that was on the August 2018 ballot.

Their office will continue to assume, for the purposes of this fiscal note, that it should have the full appropriation authority it needs to meet the publishing requirements. Because these requirements are mandatory, they reserve the right to request funding to meet the cost of their publishing requirements if the Governor and the General Assembly again change the amount or continue to not designate it as an estimated appropriation.

Officials from the **Office of the State Public Defender** indicated this initiative petition will not have any significant impact on their office.

Officials from the **State Treasurer's office** indicated no fiscal impact to their office.

Officials from **Greene County** indicated there are no estimated costs or savings to report from their county for this initiative petition.

Officials from **St. Louis County** indicated they do not see that this initiative petition, if voter-approved and adopted, would have a fiscal impact on the operations of their county government.

Officials from the **City of Kansas City** indicated this initiative petition will have no fiscal impact on their city.

Officials from **Wellsville-Middletown R-1 School District** indicated if this petition were to be voted on and passed, it would appear to have a positive fiscal impact on their school's finances. However, it appears to be setting the stage for some sort of general tax increase to raise the needed revenues. They are also concerned that this may lead to a strong push to consolidate small schools that would be very detrimental to the wellbeing of many of the small rural communities, as well as putting kids on buses for a longer period of time than they already are.

Of course, with any state law the devil is always in the details. If any of these initiatives (Initiative Petitions 20-117 through 20-122) pass the potential positive fiscal impact they would hope for is a stabilization of education funding that would guarantee that all schools receive equitable levels of resources. Some of these petitions call for fully funding pre-school programs. This would be a big boost to their bottom line. Some of these petitions call for a ban on the use of any public monies for any private schools. This will help protect the level of funding for public schools.

Their biggest concern with these petitions is that in order to reduce costs, an effort will be made to consolidate/eliminate small school districts, which will be (in their opinion) very detrimental to their small rural communities.

Officials from **Metropolitan Community College** indicated no fiscal impact.

Michael Podgursky, PhD provided the following information as an opponent of this initiative petition.

Missouri State Auditor Nicole Galloway, CPA

paul.harper@auditor.mo.gov

RE: Fiscal Analysis for Initiative Petitions 117,118,119, 120, 121 and 122

Dear Auditor Galloway,

I am an opponent of the above initiative petitions and submit the following fiscal analysis pursuant to section 116.175 RSMo.

Fiscal Note

MNEA Petitions 117-122

Prepared by Michael Podgursky, PhD[1]

Petitions 117-122 amend the Missouri State Constitution in a variety of ways. In this fiscal note I focus on the two changes that have the most direct, and largest, potential fiscal consequences.

1. Adequacy

In all versions of the petitions, Section 1(a) of the Constitution is amended to change the duty of the state to provide "free" public schools, to provide "equality of educational opportunity for all persons in this state through the establishment and maintenance of uniformly regulated, thorough, appropriate, and adequate system of free public schools… The general assembly shall have an affirmative duty to adequately and equitably fund the free public schools established by this article."

On the face of it, addition of "thorough, appropriate, and adequate" do not have direct fiscal consequences. However, addition of these terms to the Constitution would very likely overturn the recent school finance court case (CEE vs MO, 2009), wherein the Missouri Supreme Court found that the current school funding formula had a rational basis in law, and, in particular, that there was no duty on the part of the legislature to provide an "adequate" level of spending beyond the 25 percent of revenue requirement:

Notably, the introductory clause in section 1(a) concerning the "diffusion of knowledge" outlines the purpose and subject of Missouri's public education system. But, it provides no specific

[1] Chancellor's Professor of Economics, University of Missouri – Columbia and Director, Sinquefield Center for Applied Economic Research, Saint Louis University.

directive or standard for how the State must accomplish a "diffusion of knowledge." Plaintiffs are attempting to read a separate funding requirement into section 1(a) that would require the legislature to provide "adequate" education funding in excess of the 25-percent requirement contained in section 3(b). Such language does not exist.

https://www.courtlistener.com/opinion/1789805/committee-for-educational-equality-v-state/

In CEE vs MO, the plaintiffs commissioned reports and provided testimony from a variety of experts who opined regarding the shortcomings of Missouri school spending and what an "adequate" education would cost in Missouri. Two witnesses in particular provided evidence of overall costs using two different methods (professional judgement panels and cost functions) to provide quantitative dollar value gaps between current expenditures and "adequate" expenditures.

Since it is the clear intent of the petitioners to open the door to future "adequacy" lawsuits and overturn CEE vs MO, a reasonable estimate of the fiscal cost of such a Constitutional change would be to update these adequacy estimates (i.e., expenditure shortfalls) from the 2008 trial. This is based on the assumption, implied in the quote above, that had this language been in the Constitution in 2008, the plaintiffs would have won, and the adequacy estimates provided by their experts would have formed the basis for a remedy. Indeed, this is what has occurred in numerous other school finance lawsuits in states where plaintiffs have won.

Based on "professional judgement" panels in Missouri, and evidence from other states, Dr. Kern Alexander stated in his trial testimony (p. 7525, and elsewhere) that Missouri was roughly one billion dollars short of adequate spending in academic year 2005-06.[2] Thus, in one set of estimates I update Alexander's estimate to 2019.

A second adequacy estimate was provided by Dr. Bruce Baker. Baker estimated "education cost functions" and used them to compute a measure of adequate expenditures district by district.[3] I took the excel file he submitted with his report and totaled the expenditure shortfall for all districts he determined to have had inadequate spending in 2004-05. This totaled $466,370,600.

I then updated both of these estimates to Fall 2019 values in the following ways.

- Enrollment adjustment. Total Missouri public school enrollment has fallen slightly since 2004-05 when these estimates were made. I assume that this would lower both cost estimates by a factor of .993

[2] Testimony of Dr. Kern Alexander. CEE vs MO. Testimony. Feb 21, 2007. Vol. 30, p 7525.

[3] Bruce D. Baker. 2006. Missouri's School Finance Formula Fails to Guarantee Equal or Minimally Adequate Educational Opportunity to Missouri Schoolchildren. Report Prepared on Behalf of Committee for Educational Equality.

- CPI Inflation adjustment. In one set of estimates I simply updated these figures (after enrollment adjustment) to Fall, 2019 values using inflation estimates based on the BLS Consumer Price Index. This resulted in an adjustment factor of 1.35 for Baker and 1.29 for Alexander.
- Relative spending adjustment. It may be that the relevant inflation adjustment is not household consumer prices, but Missouri school operating expenditures (e.g. reflecting educator salaries and benefits and other school input costs). In this case, I computed the Alexander and Baker estimates of the shortfall of current expenditures in 2005 and 2006 (13.2 and 6.6 percent respectively) and applied them to estimated Fall, 2019 current operating expenditures along with the enrollment adjustment noted above.

The results of these exercises produced a minimum estimate (Baker) of $625,779,201 and a maximum estimate (Alexander) of $1,289,645,735.

2. Free Early Childhood Education

Three versions of the petitions (118, 120, 122) include the following amendment to the state Constitution:

Section 1 (c) Any voluntary early childhood education program established by a publically funded elected school board for persons between the ages of three and five years shall be funded as part of the free public schools established by this article.

If this sentence, combined with the amended language regarding adequacy in 1(a), is interpreted as creating a right to free public preschool education in Missouri, this would produce a substantial increase in public K-12 expenditures. I have estimated these costs in the following manner. Using data from the 2017 American Community Survey I estimate that there are 204,182 children aged 3-5 eligible for this program.[4] I make two assumptions regarding the take-up rate: 60 percent and 90 percent.[5]

Regarding cost per student, I use the current state adequacy rate ($6,316). This gives a range of cost estimates from a low (60 percent take-up) of $773,766,970 to a high (90 percent take up) of $1,160,650,455.

3. Cost Summary

[4] 2017 is the most recent available ACS data. This estimate only includes five year olds who would not be eligible for public kindergarten.

[5] The currently 54 percent of 3 and 4 year olds participate in either public or private preschool. Since most of this is currently paid for by parents it is reasonable to assume that many of these parents would choose a free public option and many more, not currently participating, would do so as well.
https://nces.ed.gov/programs/digest/d18/tables/dt18_202.10.asp?current=yes

Table 1 provides fiscal estimates of the lower and upper bound of costs for each version of the petition based on whether it included just adequacy (A) or adequacy and preschool (A+P).

Sincerely,

/s/ *Michael Podgursky*

Michael Podgursky, PhD

Table 1: Summary Cost Calculations

Petition		Low	High
117	A	$625,779,201	$1,289,645,735
118	A+P	$1,399,546,172	$2,450,296,190
119	A	$625,779,201	$1,289,645,735
120	A+P	$1,399,546,172	$2,450,296,190
121	A	$625,779,201	$1,289,645,735
122	A+P	$1,399,546,172	$2,450,296,190

A = Adequacy only, A+P = Adequacy + Pre-school

The State Auditor's office did not receive a response from **Adair County, Boone County, Callaway County, Cass County, Clay County, Cole County, Jackson County, Jasper County, St. Charles County, Taney County,** the **City of Cape Girardeau,** the **City of Columbia,** the **City of Jefferson,** the **City of Joplin,** the **City of Kirksville,** the **City of Mexico,** the **City of Raymore,** the **City of St. Joseph,** the **City of St. Louis,** the **City of Springfield,** the **City of Union,** the **City of Wentzville,** the **City of West Plains, Cape Girardeau 63 School District, Hannibal 60 School District, Malta Bend R-V School District, Mehlville School District, State Technical College of Missouri, University of Missouri,** and **St. Louis Community College.**

Fiscal Note Summary

State governmental entities anticipate possible changes to state general revenue of an unknown amount. Costs to the state are unknown but may be up to $1.29 billion annually. School districts may have a positive fiscal impact.

RE: Petition approval request from DeeAnn Aull regarding a proposed constitutional amendment to Article IX, version 2 (2020-118)

Dear Auditor Galloway:

Enclosed please find an initiative petition sample sheet for a proposal to amend the Missouri Constitution filed by DeeAnn Aull on September 9, 2019.

We are referring the enclosed petition sample sheet to you for the purposes of preparing a fiscal note and fiscal note summary as required by Section 116.332, RSMo. Section 116.175.2, RSMo requires the state auditor to forward the fiscal note and fiscal note summary to the attorney general within twenty days of receipt of the petition sample sheet.

Thank you for your immediate consideration of this request.

Sincerely,

John R. Ashcroft

NOTICE: The proposed amendment revises Article IX of the Constitution by amending Sections 1(a) and 3(b) and adopting two new sections to be known as Article IX, Sections 1(c) and 11.

Be it resolved by the people of the state of Missouri that the Constitution be amended:

Section A. Article IX of the Constitution is revised by amending Sections 1(a) and 3(b), and adopting two new sections to be known as Article IX, Sections 1(c) and 11 to read as follows:

Section 1(a). A general diffusion of knowledge and intelligence being essential to the preservation of the rights and liberties of the people, [the general assembly shall establish and maintain] equality of educational opportunity, as described in this section, is a fundamental right. The general assembly shall ensure the equality of educational opportunity for all persons in this state through the establishment and maintenance of a uniformly regulated, thorough, appropriate, and adequate system of free public schools for the gratuitous instruction of all persons in this state within ages not in excess of twenty-one years as prescribed by law. The general assembly shall have an affirmative duty to adequately and equitably fund the free public schools established by this article.

Section 1(c). Any voluntary early childhood education program established by a publicly elected school board for persons between the ages of three and five years shall be funded as part of the free public schools established by this article.

Section 3(b). In event the public school fund provided and set apart by law for the support of free public schools, shall be insufficient to sustain free public schools that satisfy all requirements of this article [at least eight months in every year in each school district of the state], the general assembly shall [may] provide for such deficiency. Notwithstanding any other provision of law to the contrary, new or increased taxes or fees enacted by the general assembly for the purpose of funding free public schools as established in this article, are not subject to the provisions of article X of this constitution. [; but in] In no case shall there be set apart less than twenty-five percent of the state revenue, exclusive of interest and sinking fund, to be applied annually to the support of the free public schools. For the purpose of calculating state income tax rates, state net general revenue shall not include funds used solely to meet the requirements of providing free public schools. The provisions of this section and section 1(a) may be enforced by a private cause of action brought by or on behalf of any taxpayer, student of a public school, or school district within this state against the general assembly in a circuit court of proper venue and, if the suit is sustained, the plaintiff or plaintiffs shall receive from the state any costs, including attorneys' fees incurred by the plaintiff or plaintiffs in maintaining such suit.

Section 11. Appropriations made for the purpose of satisfying this article by the general assembly or any county, city, town, township, school district, or other municipal corporation shall only be to aid, support, or sustain the system of free public schools and in no event shall any appropriation be made, funds expended, or tax credits or other tax expenditures enacted after January 1, 2020 for the benefit of private schools. Nothing in this section shall prevent a contract for services between a public school and a private entity where necessary to meet the requirements of this article.

MISSOURI STATE AUDITOR'S OFFICE
FISCAL NOTE (20-118)

Subject

Initiative petition from DeeAnn Aull regarding a proposed constitutional amendment to Article IX. (Received September 10, 2019)

Date

September 30, 2019

Description

This proposal would amend Article IX of the Missouri Constitution.

The amendment is to be voted on in November 2020.

Public comments and other input

The State Auditor's office requested input from the **Attorney General's office,** the **Department of Agriculture,** the **Department of Economic Development,** the **Department of Elementary and Secondary Education,** the **Department of Higher Education and Workforce Development,** the **Department of Health and Senior Services,** the **Department of Commerce and Insurance,** the **Department of Mental Health,** the **Department of Natural Resources,** the **Department of Corrections,** the **Department of Labor and Industrial Relations,** the **Department of Revenue,** the **Department of Public Safety,** the **Department of Social Services,** the **Governor's office,** the **Missouri House of Representatives,** the **Department of Conservation,** the **Department of Transportation,** the **Office of Administration,** the **Office of State Courts Administrator,** the **Missouri Senate,** the **Secretary of State's office,** the **Office of the State Public Defender,** the **State Treasurer's office, Adair County, Boone County, Callaway County, Cass County, Clay County, Cole County, Greene County, Jackson County, Jasper County, St. Charles County, St. Louis County, Taney County,** the **City of Cape Girardeau,** the **City of Columbia,** the **City of Jefferson,** the **City of Joplin,** the **City of Kansas City,** the **City of Kirksville,** the **City of Mexico,** the **City of Raymore,** the **City of St. Joseph,** the **City of St. Louis,** the **City of Springfield,** the **City of Union,** the **City of Wentzville,** the **City of West Plains, Cape Girardeau 63 School District, Hannibal 60 School District, Malta Bend R-V School District, Mehlville School District, Wellsville-Middletown R-1 School District, State Technical College of Missouri, Metropolitan Community College, University of Missouri,** and **St. Louis Community College.**

Michael Podgursky, PhD provided information as an opponent of the proposal to the State Auditor's office.

Assumptions

Officials from the **Attorney General's office** indicated this provision seeks to create a private cause of action against the Missouri General Assembly with respect to enforcement of the provision's terms. To the extent a successful plaintiff may be entitled to costs, including attorneys' fees, incurred in maintaining their suit, there is the possibility of additional liability upon the State Legal Expense Fund ("LEF"). Similarly, if the Attorney General's Office is required to defend the General Assembly in such lawsuits, such representation could likely be accomplished with existing resources, though some amount of additional personnel services funding may be required to provide representation in these lawsuits. Neither the potential LEF exposure nor the additional amounts potentially required for personnel services can be estimated at this time.

Officials from the **Department of Agriculture** indicated no fiscal impact on their department.

Officials from the **Department of Economic Development** indicated no impact to their department.

Officials from the **Department of Elementary and Secondary Education** indicated:

Section A. Article IX. Section 1(c)

Using FY 2019 K-12 enrollment of 880,025, adding two more grade level cohorts could result in an additional 135,388 students to be included in the Foundation Formula. Using an average attendance percentage of 94% this would result in an Average Daily Attendance (ADA) of 127,265 if all children ages 3 to 5 were enrolled in a full-time pre-kindergarten program. This 127,265 less the 6,872 pre-kindergarten ADA used in the FY 2021 budget projections results in 120,393 additional ADA to be included in the Foundation Formula payment. This could result in up to $767,505,375 additional dollars to be required to be paid out through the Foundation Formula.

(120,393 multiplied by the State Adequacy Target (SAT) of $6,375)

This is an estimate for an increase in the formula cost that would continue annually and have the potential to further increase in future years depending on various components of the foundation formula.

Officials the **Department of Higher Education and Workforce Development** indicated they report no cost for this initiative petition.

Officials from the **Department of Health and Senior Services** indicated this initiative petition has no impact on their department.

Officials from the **Department of Commerce and Insurance** indicated this petition, if passed, will have no cost or savings to their department.

Officials from the **Department of Mental Health** indicated this proposal creates no direct obligations or requirements to their department that would result in a fiscal impact.

Officials from the **Department of Natural Resources** indicated they would not anticipate a direct fiscal impact from this proposal.

Officials from the **Department of Corrections** indicated no impact.

Officials from the **Department of Labor and Industrial Relations** indicated this initiative petition has no fiscal impact on their department.

Officials from the **Department of Revenue** indicated this initiative petition, as it is currently set forth, would have no impact on their department.

Officials from the **Department of Public Safety - Office of the Director** indicated they see no fiscal impact due to this legislation.

Officials from the **Department of Social Services** indicated they do not anticipate a fiscal impact due to this initiative petition.

Officials from the **Governor's office** indicated there should be no added costs or savings to their office.

Officials from the **Missouri House of Representatives** indicated an unknown fiscal impact could be realized if the general assembly were sued and ultimately found liable for any damages and/or fees.

Officials from the **Department of Conservation** indicated there is no anticipated fiscal impact (cost or savings) to their department associated with this initiative petition.

Officials from the **Department of Transportation** indicated this fiscal note is anticipated to have no fiscal impact to their department/Missouri Highways and Transportation Commission.

Officials from the **Office of Administration** indicated this proposal amends Article IX of the Constitution of Missouri by amending Sections 1(a) and 3(b) and adopting two new sections.

Proposed language in Section 1(a) requires the General Assembly to ensure the equality of educational opportunity for all persons in the State of Missouri through a uniformly regulated, thorough, appropriate, and adequate system of free public schools and to adequately and equitably fund free public schools.

Proposed language in Section 1(c) requires that voluntary early childhood education programs established by a public school board for children ages three to five years old be funded as part of free public schools. Currently, Section 163.018, RSMo, allows districts

to include three to five year olds in their Average Daily Attendance (ADA) up to a specified cap-- four percent of the total number of pupils who are eligible for Free and Reduced Price Lunch between the ages of five and eighteen. Budget and Planning (B&P) defers to the Department of Elementary and Secondary Education for the impact of this provision.

Proposed language in Section 3(b) states that new or increased taxes or fees enacted by the General Assembly for the purpose of funding free public schools are not subject to the provisions of Article X of the Missouri Constitution. B&P notes that Article X, Section 18(a-d) of the Missouri Constitution establishes a revenue and spending limit on state government. The limit is 5.6 percent of Missouri personal income, based on the relationship between personal income and total state revenues when the limit was established and approved by voters in November 1980. Calculations made pursuant to Article X of the Missouri Constitution show that total state revenues for Fiscal Year 2017 were below the total state revenue limit by over $4.1 billion. In addition, Article X, Section 18(e) of the Missouri Constitution states the General Assembly shall not increase taxes or fees in any fiscal year, without voter approval, that in total produce net new annual revenues greater than $50 million, adjusted annually by the percentage change in the personal income of Missouri for the second previous year, or one percent of total state revenues for the second fiscal year prior to the General Assembly's action, whichever is less. For Fiscal Year 2019, these calculations are $128.1 million for the personal income amount and $105.0 million for the one percent of total state revenues amount.

Proposed language in Section 3(b) further specifies that for the purpose of state income tax rate calculations, state net general revenue shall not include funds used solely to meet the requirements of providing free public schools. This provision could impact the calculation pursuant to SB 509 (2014) contained in Section 143.011, RSMo, as well as future changes to state income tax rates. Section 143.011, RSMo, contains an automatic income tax reduction when the previous fiscal year's net general revenue collections exceed the highest of the three prior fiscal years by at least $150 million. It is unclear what "funds used solely to meet the requirements of providing free public schools" would encompass. If this means that GR expenditures made toward providing free public schools are deducted from the net general revenue calculation, the proposed language would reduce the amount of state net general revenue used in determining whether the growth trigger pursuant to Section 143.011, RSMo, has been met. The following table details historical GR expenditures on the provision of free public schools:

Historical Spending on Free Public Schools	
Fiscal Year	**GR Expenditures**
FY 2016	$2,229,988,335
FY 2017	$2,278,929,780
FY 2018	$2,336,487,108
FY 2019	$2,445,388,593
FY 2020 Approp	$2,480,877,793

Proposed language in Section 11 prohibits any appropriation be made, funds expended, or tax credits or other tax expenditures enacted after January 1, 2020 for the benefit of private schools.

This proposal should not impact their office.

Officials from the **Office of State Courts Administrator** indicated there is no fiscal impact on the courts.

Officials from the **Missouri Senate** indicated they anticipate no fiscal impact.

Officials from the **Secretary of State's office** indicated unless a special election is called for the purpose, Referendums are submitted to the people at the next general election. Article III section 52(b) of the Missouri Constitution authorizes the general assembly to order a special election for measures referred to the people. If a special election is called to submit a Referendum to a vote of the people, Section 115.063.2 RSMo. requires the state to pay the costs. The cost of the special election has been estimated to be $7.8 million based on the cost of the 2016 Presidential Preference Primary.

Their office is required to pay for publishing in local newspapers the full text of each statewide ballot measure as directed by Article XII, Section 2(b) of the Missouri Constitution and Section 116.230-116.290, RSMo. Funding for this item is adjusted each year depending upon the election cycle. A new decision item is requested in odd numbered fiscal years and the amount requested is dependent upon the estimated number of ballot measures that will be approved by the General Assembly and the initiative petitions certified for the ballot. In (fiscal year) FY 2014, the General Assembly changed the appropriation so that it was no longer an estimated appropriation.

In FY19, over $5.8 million was spent to publish the full text of the measures for the August and November elections. They estimate $65,000 per page for the costs of publications based on the actual cost incurred for the one referendum that was on the August 2018 ballot.

Their office will continue to assume, for the purposes of this fiscal note, that it should have the full appropriation authority it needs to meet the publishing requirements. Because these requirements are mandatory, they reserve the right to request funding to meet the cost of their publishing requirements if the Governor and the General Assembly again change the amount or continue to not designate it as an estimated appropriation.

Officials from the **Office of the State Public Defender** indicated this initiative petition will not have any significant impact on their office.

Officials from the **State Treasurer's office** indicated no fiscal impact to their office.

Officials from **Greene County** indicated there are no estimated costs or savings to report from their county for this initiative petition.

Officials from **St. Louis County** indicated they do not see that this initiative petition, if voter-approved and adopted, would have a fiscal impact on the operations of their county government.

Officials from the **City of Kansas City** indicated this initiative petition will have no fiscal impact on their city.

Officials from **Wellsville-Middletown R-1 School District** indicated if this petition were to be voted on and passed, it would appear to have a positive fiscal impact on their school's finances. However, it appears to be setting the stage for some sort of general tax increase to raise the needed revenues. They are also concerned that this may lead to a strong push to consolidate small schools that would be very detrimental to the wellbeing of many of the small rural communities, as well as putting kids on buses for a longer period of time than they already are.

Of course, with any state law the devil is always in the details. If any of these initiatives (Initiative Petitions 20-117 through 20-122) pass the potential positive fiscal impact they would hope for is a stabilization of education funding that would guarantee that all schools receive equitable levels of resources. Some of these petitions call for fully funding pre-school programs. This would be a big boost to their bottom line. Some of these petitions call for a ban on the use of any public monies for any private schools. This will help protect the level of funding for public schools.

Their biggest concern with these petitions is that in order to reduce costs, an effort will be made to consolidate/eliminate small school districts, which will be (in their opinion) very detrimental to their small rural communities.

Officials from **Metropolitan Community College** indicated no fiscal impact.

Michael Podgursky, PhD provided the following information as an opponent of this initiative petition.

Missouri State Auditor Nicole Galloway, CPA

paul.harper@auditor.mo.gov

RE: Fiscal Analysis for Initiative Petitions 117,118,119, 120, 121 and 122

Dear Auditor Galloway,

I am an opponent of the above initiative petitions and submit the following fiscal analysis pursuant to section 116.175 RSMo.

Fiscal Note

MNEA Petitions 117-122

Prepared by Michael Podgursky, PhD[1]

Petitions 117-122 amend the Missouri State Constitution in a variety of ways. In this fiscal note I focus on the two changes that have the most direct, and largest, potential fiscal consequences.

1. Adequacy

In all versions of the petitions, Section 1(a) of the Constitution is amended to change the duty of the state to provide "free" public schools, to provide "equality of educational opportunity for all persons in this state through the establishment and maintenance of uniformly regulated, thorough, appropriate, and adequate system of free public schools… The general assembly shall have an affirmative duty to adequately and equitably fund the free public schools established by this article."

On the face of it, addition of "thorough, appropriate, and adequate" do not have direct fiscal consequences. However, addition of these terms to the Constitution would very likely overturn the recent school finance court case (CEE vs MO, 2009), wherein the Missouri Supreme Court found that the current school funding formula had a rational basis in law, and, in particular, that there was no duty on the part of the legislature to provide an "adequate" level of spending beyond the 25 percent of revenue requirement:

Notably, the introductory clause in section 1(a) concerning the "diffusion of knowledge" outlines the purpose and subject of Missouri's public education system. But, it provides no specific

[1] Chancellor's Professor of Economics, University of Missouri – Columbia and Director, Sinquefield Center for Applied Economic Research, Saint Louis University.

directive or standard for how the State must accomplish a "diffusion of knowledge." Plaintiffs are attempting to read a separate funding requirement into section 1(a) that would require the legislature to provide "adequate" education funding in excess of the 25-percent requirement contained in section 3(b). Such language does not exist.

https://www.courtlistener.com/opinion/1789805/committee-for-educational-equality-v-state/

In CEE vs MO, the plaintiffs commissioned reports and provided testimony from a variety of experts who opined regarding the shortcomings of Missouri school spending and what an "adequate" education would cost in Missouri. Two witnesses in particular provided evidence of overall costs using two different methods (professional judgement panels and cost functions) to provide quantitative dollar value gaps between current expenditures and "adequate" expenditures.

Since it is the clear intent of the petitioners to open the door to future "adequacy" lawsuits and overturn CEE vs MO, a reasonable estimate of the fiscal cost of such a Constitutional change would be to update these adequacy estimates (i.e., expenditure shortfalls) from the 2008 trial. This is based on the assumption, implied in the quote above, that had this language been in the Constitution in 2008, the plaintiffs would have won, and the adequacy estimates provided by their experts would have formed the basis for a remedy. Indeed, this is what has occurred in numerous other school finance lawsuits in states where plaintiffs have won.

Based on "professional judgement" panels in Missouri, and evidence from other states, Dr. Kern Alexander stated in his trial testimony (p. 7525, and elsewhere) that Missouri was roughly one billion dollars short of adequate spending in academic year 2005-06.[2] Thus, in one set of estimates I update Alexander's estimate to 2019.

A second adequacy estimate was provided by Dr. Bruce Baker. Baker estimated "education cost functions" and used them to compute a measure of adequate expenditures district by district.[3] I took the excel file he submitted with his report and totaled the expenditure shortfall for all districts he determined to have had inadequate spending in 2004-05. This totaled $466,370,600.

I then updated both of these estimates to Fall 2019 values in the following ways.

- Enrollment adjustment. Total Missouri public school enrollment has fallen slightly since 2004-05 when these estimates were made. I assume that this would lower both cost estimates by a factor of .993

[2] Testimony of Dr. Kern Alexander. CEE vs MO. Testimony. Feb 21, 2007. Vol. 30, p 7525.

[3] Bruce D. Baker. 2006. Missouri's School Finance Formula Fails to Guarantee Equal or Minimally Adequate Educational Opportunity to Missouri Schoolchildren. Report Prepared on Behalf of Committee for Educational Equality.

- CPI Inflation adjustment. In one set of estimates I simply updated these figures (after enrollment adjustment) to Fall, 2019 values using inflation estimates based on the BLS Consumer Price Index. This resulted in an adjustment factor of 1.35 for Baker and 1.29 for Alexander.
- Relative spending adjustment. It may be that the relevant inflation adjustment is not household consumer prices, but Missouri school operating expenditures (e.g. reflecting educator salaries and benefits and other school input costs). In this case, I computed the Alexander and Baker estimates of the shortfall of current expenditures in 2005 and 2006 (13.2 and 6.6 percent respectively) and applied them to estimated Fall, 2019 current operating expenditures along with the enrollment adjustment noted above.

The results of these exercises produced a minimum estimate (Baker) of $625,779,201 and a maximum estimate (Alexander) of $1,289,645,735.

2. Free Early Childhood Education

Three versions of the petitions (118, 120, 122) include the following amendment to the state Constitution:

Section 1 (c) Any voluntary early childhood education program established by a publically funded elected school board for persons between the ages of three and five years shall be funded as part of the free public schools established by this article.

If this sentence, combined with the amended language regarding adequacy in 1(a), is interpreted as creating a right to free public preschool education in Missouri, this would produce a substantial increase in public K-12 expenditures. I have estimated these costs in the following manner. Using data from the 2017 American Community Survey I estimate that there are 204,182 children aged 3-5 eligible for this program.[4] I make two assumptions regarding the take-up rate: 60 percent and 90 percent.[5]

Regarding cost per student, I use the current state adequacy rate ($6,316). This gives a range of cost estimates from a low (60 percent take-up) of $773,766,970 to a high (90 percent take up) of $1,160,650,455.

3. Cost Summary

[4] 2017 is the most recent available ACS data. This estimate only includes five year olds who would not be eligible for public kindergarten.

[5] The currently 54 percent of 3 and 4 year olds participate in either public or private preschool. Since most of this is currently paid for by parents it is reasonable to assume that many of these parents would choose a free public option and many more, not currently participating, would do so as well.
https://nces.ed.gov/programs/digest/d18/tables/dt18_202.10.asp?current=yes

Table 1 provides fiscal estimates of the lower and upper bound of costs for each version of the petition based on whether it included just adequacy (A) or adequacy and preschool (A+P).

Sincerely,

/s/ *Michael Podgursky*

Michael Podgursky, PhD

Table 1: Summary Cost Calculations

Petition		Low	High
117	A	$625,779,201	$1,289,645,735
118	A+P	$1,399,546,172	$2,450,296,190
119	A	$625,779,201	$1,289,645,735
120	A+P	$1,399,546,172	$2,450,296,190
121	A	$625,779,201	$1,289,645,735
122	A+P	$1,399,546,172	$2,450,296,190

A = Adequacy only, A+P = Adequacy + Pre-school

The State Auditor's office did not receive a response from **Adair County, Boone County, Callaway County, Cass County, Clay County, Cole County, Jackson County, Jasper County, St. Charles County, Taney County,** the **City of Cape Girardeau,** the **City of Columbia,** the **City of Jefferson,** the **City of Joplin,** the **City of Kirksville,** the **City of Mexico,** the **City of Raymore,** the **City of St. Joseph,** the **City of St. Louis,** the **City of Springfield,** the **City of Union,** the **City of Wentzville,** the **City of West Plains, Cape Girardeau 63 School District, Hannibal 60 School District, Malta Bend R-V School District, Mehlville School District, State Technical College of Missouri, University of Missouri,** and **St. Louis Community College.**

Fiscal Note Summary

State governmental entities anticipate possible changes to state general revenue of an unknown amount. Costs to the state are unknown but may be up to $2.45 billion annually. School districts may have a positive fiscal impact.

RE: Petition approval request from DeeAnn Aull regarding a proposed constitutional amendment to Article IX, version 1 (2020-117)

Dear Auditor Galloway:

Enclosed please find an initiative petition sample sheet for a proposal to amend the Missouri Constitution filed by DeeAnn Aull on September 9, 2019.

We are referring the enclosed petition sample sheet to you for the purposes of preparing a fiscal note and fiscal note summary as required by Section 116.332, RSMo. Section 116.175.2, RSMo requires the state auditor to forward the fiscal note and fiscal note summary to the attorney general within twenty days of receipt of the petition sample sheet.

Thank you for your immediate consideration of this request.

Sincerely,

John R. Ashcroft

NOTICE: The proposed amendment revises Article IX of the Constitution by amending Sections 1(a) and 3(b) and adopting one new section to be known as Article IX, Section 11.

Be it resolved by the people of the state of Missouri that the Constitution be amended:

Section A. Article IX of the Constitution is revised by amending Sections 1(a) and 3(b), and adopting one new section to be known as Article IX, Section 11 to read as follows:

Section 1(a). A general diffusion of knowledge and intelligence being essential to the preservation of the rights and liberties of the people, [the general assembly shall establish and maintain] equality of educational opportunity, as described in this section, is a fundamental right. The general assembly shall ensure the equality of educational opportunity for all persons in this state through the establishment and maintenance of a uniformly regulated, thorough, appropriate, and adequate system of free public schools for the gratuitous instruction of all persons in this state within ages not in excess of twenty-one years as prescribed by law. The general assembly shall have an affirmative duty to adequately and equitably fund the free public schools established by this article.

Section 3(b). In event the public school fund provided and set apart by law for the support of free public schools, shall be insufficient to sustain free public schools that satisfy all requirements of this article [at least eight months in every year in each school district of the state], the general assembly shall [may] provide for such deficiency. Notwithstanding any other provision of law to the contrary, new or increased taxes or fees enacted by the general assembly for the purpose of funding free public schools as established in this article, are not subject to the provisions of article X of this constitution. [; but in] In no case shall there be set apart less than twenty-five percent of the state revenue, exclusive of interest and sinking fund, to be applied annually to the support of the free public schools. For the purpose of calculating state income tax rates, state net general revenue shall not include funds used solely to meet the requirements of providing free public schools. The provisions of this section and section 1(a) may be enforced by a private cause of action brought by or on behalf of any taxpayer, student of a public school, or school district within this state against the general assembly in a circuit court of proper venue and, if the suit is sustained, the plaintiff or plaintiffs shall receive from the state any costs, including attorneys' fees incurred by the plaintiff or plaintiffs in maintaining such suit.

Section 11. Appropriations made for the purpose of satisfying this article by the general assembly or any county, city, town, township, school district, or other municipal corporation shall only be to aid, support, or sustain the system of free public schools and in no event shall any appropriation be made, funds expended, or tax credits or other tax expenditures enacted after January 1, 2020 for the benefit of private schools. Nothing in this section shall prevent a contract for services between a public school and a private entity where necessary to meet the requirements of this article.

MISSOURI STATE AUDITOR'S OFFICE
FISCAL NOTE (20-117)

Subject

Initiative petition from DeeAnn Aull regarding a proposed constitutional amendment to Article IX. (Received September 10, 2019)

Date

September 30, 2019

Description

This proposal would amend Article IX of the Missouri Constitution.

The amendment is to be voted on in November 2020.

Public comments and other input

The State Auditor's office requested input from the **Attorney General's office,** the **Department of Agriculture,** the **Department of Economic Development,** the **Department of Elementary and Secondary Education,** the **Department of Higher Education and Workforce Development,** the **Department of Health and Senior Services,** the **Department of Commerce and Insurance,** the **Department of Mental Health,** the **Department of Natural Resources,** the **Department of Corrections,** the **Department of Labor and Industrial Relations,** the **Department of Revenue,** the **Department of Public Safety,** the **Department of Social Services,** the **Governor's office,** the **Missouri House of Representatives,** the **Department of Conservation,** the **Department of Transportation,** the **Office of Administration,** the **Office of State Courts Administrator,** the **Missouri Senate,** the **Secretary of State's office,** the **Office of the State Public Defender,** the **State Treasurer's office, Adair County, Boone County, Callaway County, Cass County, Clay County, Cole County, Greene County, Jackson County, Jasper County, St. Charles County, St. Louis County, Taney County,** the **City of Cape Girardeau,** the **City of Columbia,** the **City of Jefferson,** the **City of Joplin,** the **City of Kansas City,** the **City of Kirksville,** the **City of Mexico,** the **City of Raymore,** the **City of St. Joseph,** the **City of St. Louis,** the **City of Springfield,** the **City of Union,** the **City of Wentzville,** the **City of West Plains, Cape Girardeau 63 School District, Hannibal 60 School District, Malta Bend R-V School District, Mehlville School District, Wellsville-Middletown R-1 School District, State Technical College of Missouri, Metropolitan Community College, University of Missouri,** and **St. Louis Community College.**

Michael Podgursky, PhD provided information as an opponent of the proposal to the State Auditor's office.

Assumptions

Officials from the **Attorney General's office** indicated this provision seeks to create a private cause of action against the Missouri General Assembly with respect to enforcement of the provision's terms. To the extent a successful plaintiff may be entitled to costs, including attorneys' fees, incurred in maintaining their suit, there is the possibility of additional liability upon the State Legal Expense Fund ("LEF"). Similarly, if the Attorney General's Office is required to defend the General Assembly in such lawsuits, such representation could likely be accomplished with existing resources, though some amount of additional personnel services funding may be required to provide representation in these lawsuits. Neither the potential LEF exposure nor the additional amounts potentially required for personnel services can be estimated at this time.

Officials from the **Department of Agriculture** indicated no fiscal impact on their department.

Officials from the **Department of Economic Development** indicated no impact to their department.

Officials from the **Department of Elementary and Secondary Education** indicated a total estimated net effect on all state funds of $0 for fiscal year 2020, $0 for fiscal year 2021, and $0 for fiscal year 2022.

Officials the **Department of Higher Education and Workforce Development** indicated they report no cost for this initiative petition.

Officials from the **Department of Health and Senior Services** indicated this initiative petition has no impact on their department.

Officials from the **Department of Commerce and Insurance** indicated this petition, if passed, will have no cost or savings to their department.

Officials from the **Department of Mental Health** indicated this proposal creates no direct obligations or requirements to their department that would result in a fiscal impact.

Officials from the **Department of Natural Resources** indicated they would not anticipate a direct fiscal impact from this proposal.

Officials from the **Department of Corrections** indicated no impact.

Officials from the **Department of Labor and Industrial Relations** indicated this initiative petition has no fiscal impact on their department.

Officials from the **Department of Revenue** indicated this initiative petition, as it is currently set forth, would have no impact on their department.

Officials from the **Department of Public Safety - Office of the Director** indicated they see no fiscal impact due to this legislation.

Officials from the **Department of Social Services** indicated they do not anticipate a fiscal impact due to this initiative petition.

Officials from the **Governor's office** indicated there should be no added costs or savings to their office.

Officials from the **Missouri House of Representatives** indicated an unknown fiscal impact could be realized if the general assembly were sued and ultimately found liable for any damages and/or fees.

Officials from the **Department of Conservation** indicated there is no anticipated fiscal impact (cost or savings) to their department associated with this initiative petition.

Officials from the **Department of Transportation** indicated this fiscal note is anticipated to have no fiscal impact to their department/Missouri Highways and Transportation Commission.

Officials from the **Office of Administration** indicated this proposal amends Article IX of the Constitution of Missouri by amending Sections 1(a) and 3(b) and adopting one new section.

Proposed language in Section 1(a) requires the General Assembly to ensure the equality of educational opportunity for all persons in the State of Missouri through a uniformly regulated, thorough, appropriate, and adequate system of free public schools and to adequately and equitably fund free public schools.

Proposed language in Section 3(b) states that new or increased taxes or fees enacted by the General Assembly for the purpose of funding free public schools are not subject to the provisions of Article X of the Missouri Constitution. Budget and Planning (B&P) notes that Article X, Section 18(a-d) of the Missouri Constitution establishes a revenue and spending limit on state government. The limit is 5.6 percent of Missouri personal income, based on the relationship between personal income and total state revenues when the limit was established and approved by voters in November 1980. Calculations made pursuant to Article X of the Missouri Constitution show that total state revenues for Fiscal Year 2017 were below the total state revenue limit by over $4.1 billion. In addition, Article X, Section 18(e) of the Missouri Constitution states the General Assembly shall not increase taxes or fees in any fiscal year, without voter approval, that in total produce net new annual revenues greater than $50 million, adjusted annually by the percentage change in the personal income of Missouri for the second previous year, or one percent of total state revenues for the second fiscal year prior to the General Assembly's action, whichever is less. For Fiscal Year 2019, these calculations are $128.1 million for the personal income amount and $105.0 million for the one percent of total state revenues amount.

Proposed language in Section 3(b) further specifies that for the purpose of state income tax rate calculations, state net general revenue shall not include funds used solely to meet the requirements of providing free public schools. This provision could impact the calculation pursuant to SB 509 (2014) contained in Section 143.011, RSMo, as well as future changes to state income tax rates. Section 143.011, RSMo, contains an automatic income tax reduction when the previous fiscal year's net general revenue collections exceed the highest of the three prior fiscal years by at least $150 million. It is unclear what "funds used solely to meet the requirements of providing free public schools" would encompass. If this means that GR expenditures made toward providing free public schools are deducted from the net general revenue calculation, the proposed language would reduce the amount of state net general revenue used in determining whether the growth trigger pursuant to Section 143.011, RSMo, has been met. The following table details historical GR expenditures on the provision of free public schools:

Historical Spending on Free Public Schools	
Fiscal Year	**GR Expenditures**
FY 2016	$2,229,988,335
FY 2017	$2,278,929,780
FY 2018	$2,336,487,108
FY 2019	$2,445,388,593
FY 2020 Approp	$2,480,877,793

Proposed language in Section 11 prohibits any appropriation be made, funds expended, or tax credits or other tax expenditures enacted after January 1, 2020 for the benefit of private schools.

This proposal should not impact their office.

Officials from the **Office of State Courts Administrator** indicated there is no fiscal impact on the courts.

Officials from the **Missouri Senate** indicated they anticipate no fiscal impact.

Officials from the **Secretary of State's office** indicated unless a special election is called for the purpose, Referendums are submitted to the people at the next general election. Article III section 52(b) of the Missouri Constitution authorizes the general assembly to order a special election for measures referred to the people. If a special election is called to submit a Referendum to a vote of the people, Section 115.063.2 RSMo. requires the state to pay the costs. The cost of the special election has been estimated to be $7.8 million based on the cost of the 2016 Presidential Preference Primary.

Their office is required to pay for publishing in local newspapers the full text of each statewide ballot measure as directed by Article XII, Section 2(b) of the Missouri Constitution and Section 116.230-116.290, RSMo. Funding for this item is adjusted each year depending upon the election cycle. A new decision item is requested in odd numbered fiscal years and the amount requested is dependent upon the estimated number of ballot

measures that will be approved by the General Assembly and the initiative petitions certified for the ballot. In (fiscal year) FY 2014, the General Assembly changed the appropriation so that it was no longer an estimated appropriation.

In FY19, over $5.8 million was spent to publish the full text of the measures for the August and November elections. They estimate $65,000 per page for the costs of publications based on the actual cost incurred for the one referendum that was on the August 2018 ballot.

Their office will continue to assume, for the purposes of this fiscal note, that it should have the full appropriation authority it needs to meet the publishing requirements. Because these requirements are mandatory, they reserve the right to request funding to meet the cost of their publishing requirements if the Governor and the General Assembly again change the amount or continue to not designate it as an estimated appropriation.

Officials from the **Office of the State Public Defender** indicated this initiative petition will not have any significant impact on their office.

Officials from the **State Treasurer's office** indicated no fiscal impact to their office.

Officials from **Greene County** indicated there are no estimated costs or savings to report from their county for this initiative petition.

Officials from **St. Louis County** indicated they do not see that this initiative petition, if voter-approved and adopted, would have a fiscal impact on the operations of their county government.

Officials from the **City of Kansas City** indicated this initiative petition will have no fiscal impact on their city.

Officials from **Wellsville-Middletown R-1 School District** indicated if this petition were to be voted on and passed, it would appear to have a positive fiscal impact on their school's finances. However, it appears to be setting the stage for some sort of general tax increase to raise the needed revenues. They are also concerned that this may lead to a strong push to consolidate small schools that would be very detrimental to the wellbeing of many of the small rural communities, as well as putting kids on buses for a longer period of time than they already are.

Of course, with any state law the devil is always in the details. If any of these initiatives (Initiative Petitions 20-117 through 20-122) pass the potential positive fiscal impact they would hope for is a stabilization of education funding that would guarantee that all schools receive equitable levels of resources. Some of these petitions call for fully funding pre-school programs. This would be a big boost to their bottom line. Some of these petitions call for a ban on the use of any public monies for any private schools. This will help protect the level of funding for public schools.

Their biggest concern with these petitions is that in order to reduce costs, an effort will be made to consolidate/eliminate small school districts, which will be (in their opinion) very detrimental to their small rural communities.

Officials from **Metropolitan Community College** indicated no fiscal impact.

Michael Podgursky, PhD provided the following information as an opponent of this initiative petition.

Missouri State Auditor Nicole Galloway, CPA

paul.harper@auditor.mo.gov

RE: Fiscal Analysis for Initiative Petitions 117,118,119, 120, 121 and 122

Dear Auditor Galloway,

I am an opponent of the above initiative petitions and submit the following fiscal analysis pursuant to section 116.175 RSMo.

Fiscal Note

MNEA Petitions 117-122

Prepared by Michael Podgursky, PhD[1]

Petitions 117-122 amend the Missouri State Constitution in a variety of ways. In this fiscal note I focus on the two changes that have the most direct, and largest, potential fiscal consequences.

1. Adequacy

In all versions of the petitions, Section 1(a) of the Constitution is amended to change the duty of the state to provide "free" public schools, to provide "equality of educational opportunity for all persons in this state through the establishment and maintenance of uniformly regulated, thorough, appropriate, and adequate system of free public schools… The general assembly shall have an affirmative duty to adequately and equitably fund the free public schools established by this article."

On the face of it, addition of "thorough, appropriate, and adequate" do not have direct fiscal consequences. However, addition of these terms to the Constitution would very likely overturn the recent school finance court case (CEE vs MO, 2009), wherein the Missouri Supreme Court found that the current school funding formula had a rational basis in law, and, in particular, that there was no duty on the part of the legislature to provide an "adequate" level of spending beyond the 25 percent of revenue requirement:

Notably, the introductory clause in section 1(a) concerning the "diffusion of knowledge" outlines the purpose and subject of Missouri's public education system. But, it provides no specific

[1] Chancellor's Professor of Economics, University of Missouri – Columbia and Director, Sinquefield Center for Applied Economic Research, Saint Louis University.

directive or standard for how the State must accomplish a "diffusion of knowledge." Plaintiffs are attempting to read a separate funding requirement into section 1(a) that would require the legislature to provide "adequate" education funding in excess of the 25-percent requirement contained in section 3(b). Such language does not exist.

https://www.courtlistener.com/opinion/1789805/committee-for-educational-equality-v-state/

In CEE vs MO, the plaintiffs commissioned reports and provided testimony from a variety of experts who opined regarding the shortcomings of Missouri school spending and what an "adequate" education would cost in Missouri. Two witnesses in particular provided evidence of overall costs using two different methods (professional judgement panels and cost functions) to provide quantitative dollar value gaps between current expenditures and "adequate" expenditures.

Since it is the clear intent of the petitioners to open the door to future "adequacy" lawsuits and overturn CEE vs MO, a reasonable estimate of the fiscal cost of such a Constitutional change would be to update these adequacy estimates (i.e., expenditure shortfalls) from the 2008 trial. This is based on the assumption, implied in the quote above, that had this language been in the Constitution in 2008, the plaintiffs would have won, and the adequacy estimates provided by their experts would have formed the basis for a remedy. Indeed, this is what has occurred in numerous other school finance lawsuits in states where plaintiffs have won.

Based on "professional judgement" panels in Missouri, and evidence from other states, Dr. Kern Alexander stated in his trial testimony (p. 7525, and elsewhere) that Missouri was roughly one billion dollars short of adequate spending in academic year 2005-06.[2] Thus, in one set of estimates I update Alexander's estimate to 2019.

A second adequacy estimate was provided by Dr. Bruce Baker. Baker estimated "education cost functions" and used them to compute a measure of adequate expenditures district by district.[3] I took the excel file he submitted with his report and totaled the expenditure shortfall for all districts he determined to have had inadequate spending in 2004-05. This totaled $466,370,600.

I then updated both of these estimates to Fall 2019 values in the following ways.

- Enrollment adjustment. Total Missouri public school enrollment has fallen slightly since 2004-05 when these estimates were made. I assume that this would lower both cost estimates by a factor of .993

[2] Testimony of Dr. Kern Alexander. CEE vs MO. Testimony. Feb 21, 2007. Vol. 30, p 7525.

[3] Bruce D. Baker. 2006. Missouri's School Finance Formula Fails to Guarantee Equal or Minimally Adequate Educational Opportunity to Missouri Schoolchildren. Report Prepared on Behalf of Committee for Educational Equality.

- CPI Inflation adjustment. In one set of estimates I simply updated these figures (after enrollment adjustment) to Fall, 2019 values using inflation estimates based on the BLS Consumer Price Index. This resulted in an adjustment factor of 1.35 for Baker and 1.29 for Alexander.
- Relative spending adjustment. It may be that the relevant inflation adjustment is not household consumer prices, but Missouri school operating expenditures (e.g. reflecting educator salaries and benefits and other school input costs). In this case, I computed the Alexander and Baker estimates of the shortfall of current expenditures in 2005 and 2006 (13.2 and 6.6 percent respectively) and applied them to estimated Fall, 2019 current operating expenditures along with the enrollment adjustment noted above.

The results of these exercises produced a minimum estimate (Baker) of $625,779,201 and a maximum estimate (Alexander) of $1,289,645,735.

2. Free Early Childhood Education

Three versions of the petitions (118, 120, 122) include the following amendment to the state Constitution:

Section 1 (c) Any voluntary early childhood education program established by a publically funded elected school board for persons between the ages of three and five years shall be funded as part of the free public schools established by this article.

If this sentence, combined with the amended language regarding adequacy in 1(a), is interpreted as creating a right to free public preschool education in Missouri, this would produce a substantial increase in public K-12 expenditures. I have estimated these costs in the following manner. Using data from the 2017 American Community Survey I estimate that there are 204,182 children aged 3-5 eligible for this program.[4] I make two assumptions regarding the take-up rate: 60 percent and 90 percent.[5]

Regarding cost per student, I use the current state adequacy rate ($6,316). This gives a range of cost estimates from a low (60 percent take-up) of $773,766,970 to a high (90 percent take up) of $1,160,650,455.

3. Cost Summary

[4] 2017 is the most recent available ACS data. This estimate only includes five year olds who would not be eligible for public kindergarten.

[5] The currently 54 percent of 3 and 4 year olds participate in either public or private preschool. Since most of this is currently paid for by parents it is reasonable to assume that many of these parents would choose a free public option and many more, not currently participating, would do so as well.
https://nces.ed.gov/programs/digest/d18/tables/dt18_202.10.asp?current=yes

Table 1 provides fiscal estimates of the lower and upper bound of costs for each version of the petition based on whether it included just adequacy (A) or adequacy and preschool (A+P).

Sincerely,

/s/ *Michael Podgursky*

Michael Podgursky, PhD

Table 1: Summary Cost Calculations

Petition		Low	High
117	A	$625,779,201	$1,289,645,735
118	A+P	$1,399,546,172	$2,450,296,190
119	A	$625,779,201	$1,289,645,735
120	A+P	$1,399,546,172	$2,450,296,190
121	A	$625,779,201	$1,289,645,735
122	A+P	$1,399,546,172	$2,450,296,190

A = Adequacy only, A+P = Adequacy + Pre-school

The State Auditor's office did not receive a response from **Adair County, Boone County, Callaway County, Cass County, Clay County, Cole County, Jackson County, Jasper County, St. Charles County, Taney County,** the **City of Cape Girardeau,** the **City of Columbia,** the **City of Jefferson,** the **City of Joplin,** the **City of Kirksville,** the **City of Mexico,** the **City of Raymore,** the **City of St. Joseph,** the **City of St. Louis,** the **City of Springfield,** the **City of Union,** the **City of Wentzville,** the **City of West Plains, Cape Girardeau 63 School District, Hannibal 60 School District, Malta Bend R-V School District, Mehlville School District, State Technical College of Missouri, University of Missouri,** and **St. Louis Community College.**

Fiscal Note Summary

State governmental entities anticipate possible changes to state general revenue of an unknown amount. Costs to the state are unknown but may be up to $1.29 billion annually. School districts may have a positive fiscal impact.

RE: Petition approval request from James Owen regarding a proposed statutory amendment to Chapters 393 and 386, version 4 (2020-116)

Dear Auditor Galloway:

Enclosed please find an initiative petition sample sheet for a proposal to amend the Revised Statutes of Missouri filed by James Owen on September 3, 2019.

We are referring the enclosed petition sample sheet to you for the purposes of preparing a fiscal note and fiscal note summary as required by Section 116.332, RSMo. Section 116.175.2, RSMo requires the state auditor to forward the fiscal note and fiscal note summary to the attorney general within twenty days of receipt of the petition sample sheet.

Thank you for your immediate consideration of this request.

Sincerely,

John R. Ashcroft

Be it enacted by the people of the state of Missouri:

Sections 393.1025 through 393.1030 and 386.890, RSMo. are amended to read as follows:

393.1025. As used in sections 393.1020 to 393.1030, the following terms mean:

(1) "Commission", the public service commission;

(2) "Department", the department of [economic development] natural resources;

(3) "Electric utility", any electrical corporation as defined by section 386.020;

(4) "Renewable energy credit" or "REC", a tradeable certificate of proof that one megawatt-hour of electricity has been generated from renewable energy sources; and

(5) "Renewable energy resources", electric energy produced from wind, solar thermal sources, photovoltaic cells and panels, [dedicated crops grown for energy production, cellulosic agricultural residues, plant residues, methane from landfills, from agricultural operations, or from wastewater treatment, thermal depolymerization or pyrolysis for converting waste material to energy, clean and untreated wood such as pallets, hydropower (not including pumped storage) that does not require a new diversion or impoundment of water and that has a total facility nameplate rating capacity of ten megawatts or less, fuel cells using hydrogen produced by one of the above-named renewable energy sources,] and other sources of energy not including nuclear that become available after November 4, 2008, and are certified as renewable by rule by the department.

393.1030. 1. The commission shall, in consultation with the department, prescribe by rule a portfolio requirement for all electric utilities to generate or purchase electricity generated from renewable energy resources. Such portfolio requirement shall provide that electricity from renewable energy resources shall constitute the following portions of each electric utility's sales:

(1) No less than [two] twenty percent for calendar years [2011] 2022 through [2013] 2024;

(2) No less than [five] twenty-seven percent for calendar years [2014] 2025 through [2017] 2027;

(3) No less than [ten] thirty-five percent for calendar years [2018] 2028 through [2020] 2030; [and]

(4) No less than forty-two percent for calendar years 2031 through 2034;

[(4)] (5) No less than [fifteen] fifty percent [in each] for calendar years [beginning in 2021.] 2035 through 2039; and

(6) No less than one hundred percent for calendar year 2050 and each year thereafter.

At least two percent of each portfolio requirement shall be derived from solar energy. The portfolio requirements shall apply to all power sold to Missouri consumers whether such power is self-generated or purchased from another source in or outside of this state. [A utility may comply with the standard in whole or in part by purchasing RECs.] Each kilowatt-hour of eligible energy generated in Missouri shall count as 1.25 kilowatt-hours for purposes of compliance.

2. Notwithstanding any other provisions of this section, an electric utility may comply with this section using energy savings captured due to energy efficiency or demand-side measures. As part of its rulemaking authority pursuant to subsection 7 of this section, the commission shall prescribe a rule allowing an electric utility to comply with the portfolio requirements of subsection 1 of this section using verified megawatt-hour savings captured due to commission-approved demand-side programs under section 393.1075 during each compliance year, whether such annual energy savings is due to measures installed in that compliance year or in previous compliance years beginning with 2022. For purposes of this section, one megawatt-hour of verified energy savings captured through utility-sponsored energy efficiency programs shall count as one megawatt-hour of renewable energy generated, and an electric utility may count such savings as compliance with this section for the duration of the measure life of the energy efficiency measure.

[2] 3. The commission, in consultation with the department and within one year of November 4, 2008, shall select a program for tracking and verifying the trading of renewable energy credits. An unused credit may exist for up to three years from the date of its creation. A credit may be used only once to comply with sections 393.1020 to 393.1030 and may not also be used to satisfy any similar nonfederal requirement. An electric utility may comply with the standard in whole or in part by purchasing RECs, provided that such RECs are associated with electricity produced or procured by the electric utility and sold to Missouri customers. An electric utility may not use a credit derived from a green pricing program towards compliance with the standard. Certificates from net-metered sources shall initially be owned by the customer-generator. The commission, except where the department is specified, shall make whatever rules are necessary to enforce the renewable energy standard. Such rules shall include:

(1) A maximum average retail rate increase of one percent determined by estimating and comparing the electric utility's cost of compliance with least-cost renewable generation and the cost of continuing to generate or purchase

electricity from entirely nonrenewable sources, taking into proper account future environmental regulatory risk including the risk of greenhouse gas regulation. Notwithstanding the foregoing, until June 30, 2020, if the maximum average retail rate increase would be less than or equal to one percent if an electric utility's investment in solar-related projects initiated, owned or operated by the electric utility is ignored for purposes of calculating the increase, then additional solar rebates shall be paid and included in rates in an amount up to the amount that would produce a retail rate increase equal to the difference between a one percent retail rate increase and the retail rate increase calculated when ignoring an electric utility's investment in solar-related projects initiated, owned, or operated by the electric utility. Notwithstanding any provision to the contrary in this section, even if the payment of additional solar rebates will produce a maximum average retail rate increase of greater than one percent when an electric utility's investment in solar-related projects initiated, owned or operated by the electric utility are included in the calculation, the additional solar rebate costs shall be included in the prudently incurred costs to be recovered as contemplated by subdivision (4) of this subsection;

(2) Penalties of at least twice the average market value of renewable energy credits for the compliance period for failure to meet the targets of subsection 1 of this section. An electric utility will be excused if it proves to the commission that failure was due to events beyond its reasonable control that could not have been reasonably mitigated, or that the maximum average retail rate increase has been reached. Penalties shall not be recovered from customers. Amounts forfeited under this section shall be remitted to the department to purchase renewable energy credits needed for compliance. Any excess forfeited revenues shall be used by the division of energy solely for renewable energy and energy efficiency projects;

(3) Provisions for an annual report to be filed by each electric utility in a format sufficient to document its progress in meeting the targets;

(4) Provision for recovery outside the context of a regular rate case of prudently incurred costs and the pass-through of benefits to customers of any savings achieved by an electrical corporation in meeting the requirements of this section.

[3] 4. As provided for in this section, [except for those electrical corporations that qualify for an exemption under section 393.1050,] each electric utility shall make available to its retail customers a solar rebate for new or expanded solar electric systems sited on customers' premises, up to a maximum of twenty-five kilowatts per system, measured in direct current that were confirmed by the electric utility to have become operational in compliance with the provisions of section 386.890. The solar rebates shall be two dollars per watt for systems becoming operational on or before June 30, 2014; one dollar and fifty cents per watt for systems becoming operational between July 1, 2014, and June 30, 2015; one dollar per watt for systems becoming operational between July 1, 2015, and June 30, 2016; fifty cents per watt for systems becoming operational between July 1, 2016, and June 30, 2017; fifty cents per watt for systems becoming operational between July 1, 2017, and June 30, 2019; twenty-five cents per watt for systems becoming operational between July 1, 2019, and June 30, 2020; and zero cents per watt for systems becoming operational after June 30, 2020. An electric utility may, through its tariffs, require applications for rebates to be submitted up to one hundred eighty-two days prior to the June thirtieth operational date. Nothing in this section shall prevent an electrical corporation from offering rebates after July 1, 2020, through an approved tariff. If the electric utility determines the maximum average retail rate increase provided for in subdivision (1) of subsection [2] 3 of this section will be reached in any calendar year, the electric utility shall be entitled to cease paying rebates to the extent necessary to avoid exceeding the maximum average retail rate increase if the electrical corporation files with the commission to suspend its rebate tariff for the remainder of that calendar year at least sixty days prior to the change taking effect. The filing with the commission to suspend the electrical corporation's rebate tariff shall include the calculation reflecting that the maximum average retail rate increase will be reached and supporting documentation reflecting that the maximum average retail rate increase will be reached. The commission shall rule on the suspension filing within sixty days of the date it is filed. If the commission determines that the maximum average retail rate increase will be reached, the commission shall approve the tariff suspension. The electric utility shall continue to process and pay applicable solar rebates until a final commission ruling; however, if the continued payment causes the electric utility to pay rebates that cause it to exceed the maximum average retail rate increase, the expenditures shall be considered prudently incurred costs as contemplated by subdivision (4) of subsection [2] 3 of this section and shall be recoverable as such by the electric utility. As a condition of receiving a rebate, customers shall transfer to the electric utility all right, title, and interest in and to the renewable energy credits associated with the new or expanded solar electric system that qualified the customer for the solar rebate for a period of ten years from the date the electric utility confirmed that the solar electric system was installed and operational.

[4] 5. The department shall, in consultation with the commission, establish by rule a certification process for electricity generated from renewable resources and used to fulfill the requirements of subsection 1 of this section. Certification criteria for renewable energy generation shall be determined by factors that include fuel type, technology, and the environmental impacts of the generating facility. Renewable energy facilities shall not cause undue adverse air, water, or land use impacts, including impacts associated with the gathering of generation feedstocks. If any amount of fossil fuel is used with renewable energy resources, only the portion of electrical output attributable to renewable energy resources shall be used to fulfill the portfolio requirements.

[5. In carrying out the provisions of this section, the commission and the department shall include methane generated from the anaerobic digestion of farm animal waste and thermal depolymerization or pyrolysis for converting waste material to energy as renewable energy resources for purposes of this section.]

6. The commission shall have the authority to promulgate rules for the implementation of this section, but only to the extent such rules are consistent with, and do not delay the implementation of, the provisions of this section. [Any rule or portion of a rule, as that term is defined in section 536.010, that is created under the authority delegated in this section shall become effective only if it complies with and is subject to all of the provisions of chapter 536 and, if applicable, section 536.028. This section and chapter 536 are nonseverable and if any of the powers vested with the general assembly pursuant to chapter 536 to review, to delay the effective date, or to disapprove and annul a rule are subsequently held

unconstitutional, then the grant of rulemaking authority and any rule proposed or adopted after August 28, 2013, shall be invalid and void.]

386.890. 1. This section shall be known and may be cited as the "Net Metering and Easy Connection Act".

2. As used in this section, the following terms shall mean:

(1) "Avoided fuel cost", the current average cost of fuel for the entity generating electricity, as defined by the governing body with jurisdiction over any municipal electric utility, rural electric cooperative as provided in chapter 394, or electrical corporation as provided in this chapter;

(2) "Commission", the public service commission of the state of Missouri;

(3) "Customer-generator", the owner or operator of a qualified electric energy generation unit which:

(a) Is powered by a renewable energy resource;

(b) Has an electrical generating system with a capacity of not more than [one hundred] two thousand kilowatts;

(c) Is located on a premises owned, operated, leased, or otherwise controlled by the customer-generator;

(d) Is interconnected and operates in parallel phase and synchronization with a retail electric supplier and has been approved by said retail electric supplier;

(e) Is intended primarily to offset part or all of the customer-generator's own electrical energy requirements;

(f) Meets all applicable safety, performance, interconnection, and reliability standards established by the National Electrical Code, the National Electrical Safety Code, the Institute of Electrical and Electronics Engineers, Underwriters Laboratories, the Federal Energy Regulatory Commission, and any local governing authorities; and

(g) Contains a mechanism that automatically disables the unit and interrupts the flow of electricity back onto the supplier's electricity lines in the event that service to the customer-generator is interrupted;

(4) "Department", the department of economic development;

(5) "Net metering", using metering equipment sufficient to measure the difference between the electrical energy supplied to a customer-generator by a retail electric supplier and the electrical energy supplied by the customer-generator to the retail electric supplier over the applicable billing period;

(6) "Renewable energy resources", electrical energy produced from wind, solar thermal sources, hydroelectric sources, photovoltaic cells and panels, [fuel cells using hydrogen produced by one of the above-named electrical energy sources,] and other sources of energy that become available after August 28, 2007, and are certified as renewable by the department;

(7) "Retail electric supplier" or "supplier", any municipal utility, electrical corporation regulated under this chapter, or rural electric cooperative under chapter 394 that provides retail electric service in this state.

3. A retail electric supplier shall:

(1) Make net metering available to customer-generators on a first-come, first-served basis until the total rated generating capacity of net metering systems equals [five] ten percent of the utility's single-hour peak load during the previous year, after which the commission for a public utility or the governing body for other electric utilities may increase the total rated generating capacity of net metering systems to an amount above [five] ten percent. However, in a given calendar year, no retail electric supplier shall be required to approve any application for interconnection if the total rated generating capacity of all applications for interconnection already approved to date by said supplier in said calendar year equals or exceeds one percent of said supplier's single-hour peak load for the previous calendar year;

(2) Offer to the customer-generator a tariff or contract that is identical in electrical energy rates, rate structure, and monthly charges to the contract or tariff that the customer would be assigned if the customer were not an eligible customer-generator but shall not charge the customer-generator any additional standby, capacity, interconnection, or other fee or charge that would not otherwise be charged if the customer were not an eligible customer-generator; and

(3) Disclose annually the availability of the net metering program to each of its customers with the method and manner of disclosure being at the discretion of the supplier.

4. A customer-generator's facility shall be equipped with sufficient metering equipment that can measure the net amount of electrical energy produced or consumed by the customer-generator. If the customer-generator's existing meter equipment does not meet these requirements or if it is necessary for the electric supplier to install additional distribution equipment to accommodate the customer-generator's facility, the customer-generator shall reimburse the retail electric supplier for the costs to purchase and install the necessary additional equipment. At the request of the customer-generator, such costs may be initially paid for by the retail electric supplier, and any amount up to the total costs and a reasonable interest charge may be recovered from the customer-generator over the course of up to twelve billing cycles. Any

subsequent meter testing, maintenance or meter equipment change necessitated by the customer-generator shall be paid for by the customer-generator.

5. Consistent with the provisions in this section, the net electrical energy measurement shall be calculated in the following manner:

(1) For a customer-generator, a retail electric supplier shall measure the net electrical energy produced or consumed during the billing period in accordance with normal metering practices for customers in the same rate class, either by employing a single, bidirectional meter that measures the amount of electrical energy produced and consumed, or by employing multiple meters that separately measure the customer-generator's consumption and production of electricity;

(2) If the electricity supplied by the supplier exceeds the electricity generated by the customer-generator during a billing period, the customer-generator shall be billed for the net electricity supplied by the supplier in accordance with normal practices for customers in the same rate class;

(3) If the electricity generated by the customer-generator exceeds the electricity supplied by the supplier during a billing period, the customer-generator shall be billed for the appropriate customer charges for that billing period in accordance with subsection 3 of this section and [shall be credited an amount at least equal to the avoided fuel cost of the excess kilowatt-hours generated during the billing period, with this credit applied to the following billing period] all net excess kilowatt-hours generated shall be recorded as net excess energy credits per kilowatt-hour and those credits shall be carried forward from month-to-month and credited at a ratio of one-to-one against the customer-generator's energy consumption in subsequent billing periods;

(4) Any net excess energy credits granted by this subsection shall expire without any compensation at the earlier of either [twelve months after their issuance] March 1st of each calendar year or when the customer-generator disconnects service or terminates the net metering relationship with the supplier;

(5) For any rural electric cooperative under chapter 394, or municipal utility, upon agreement of the wholesale generator supplying electric energy to the retail electric supplier, at the option of the retail electric supplier, the credit to the customer-generator may be provided by the wholesale generator.

6. (1) Each qualified electric energy generation unit used by a customer-generator shall meet all applicable safety, performance, interconnection, and reliability standards established by any local code authorities, the National Electrical Code, the National Electrical Safety Code, the Institute of Electrical and Electronics Engineers, and Underwriters Laboratories for distributed generation. No supplier shall impose any fee, charge, or other requirement not specifically authorized by this section or the rules promulgated under subsection 9 of this section unless the fee, charge, or other requirement would apply to similarly situated customers who are not customer-generators, except that a retail electric supplier may require that a customer-generator's system contain a switch, circuit breaker, fuse, or other easily accessible device or feature located in immediate proximity to the customer-generator's metering equipment that would allow a utility worker the ability to manually and instantly disconnect the unit from the utility's electric distribution system.

(2) For systems of ten kilowatts or less, a customer-generator whose system meets the standards and rules under subdivision (1) of this subsection shall not be required to install additional controls, perform or pay for additional tests or distribution equipment, or purchase additional liability insurance beyond what is required under subdivision (1) of this subsection and subsection 4 of this section.

(3) For customer-generator systems of greater than ten kilowatts, the commission for public utilities and the governing body for other utilities shall, by rule or equivalent formal action by each respective governing body:

(a) Set forth safety, performance, and reliability standards and requirements; and

(b) Establish the qualifications for exemption from a requirement to install additional controls, perform or pay for additional tests or distribution equipment, or purchase additional liability insurance.

7. (1) Applications by a customer-generator for interconnection of a qualified electric energy generation unit meeting the requirements of subdivision (3) of subsection 2 of this section to the distribution system shall be accompanied by the plan for the customer-generator's electrical generating system, including but not limited to a wiring diagram and specifications for the generating unit, and shall be reviewed and responded to by the retail electric supplier within thirty days of receipt for systems ten kilowatts or less and within ninety days of receipt for all other systems. Prior to the interconnection of the qualified generation unit to the supplier's system, the customer-generator will furnish the retail electric supplier a certification from a qualified professional electrician or engineer that the installation meets the requirements of subdivision (1) of subsection 6 of this section. If the application for interconnection is approved by the retail electric supplier and the customer-generator does not complete the interconnection within one year after receipt of notice of the approval, the approval shall expire and the customer-generator shall be responsible for filing a new application.

(2) Upon the change in ownership of a qualified electric energy generation unit, the new customer-generator shall be responsible for filing a new application under subdivision (1) of this subsection.

8. Each commission-regulated supplier shall submit an annual net metering report to the commission, and all other nonregulated suppliers shall submit the same report to their respective governing body and make said report available to a consumer of the supplier upon request, including the following information for the previous calendar year:

(1) The total number of customer-generator facilities;

(2) The total estimated generating capacity of its net-metered customer-generators; and

(3) The total estimated net kilowatt-hours received from customer-generators.

9. The commission shall, within nine months of January 1, 2008, promulgate initial rules necessary for the administration of this section for public utilities, which shall include regulations ensuring that simple contracts will be used for interconnection and net metering. For systems of ten kilowatts or less, the application process shall use an all-in-one document that includes a simple interconnection request, simple procedures, and a brief set of terms and conditions. [Any rule or portion of a rule, as that term is defined in section 536.010, that is created under the authority delegated in this section shall become effective only if it complies with and is subject to all of the provisions of chapter 536 and, if applicable, section 536.028. This section and chapter 536 are nonseverable and if any of the powers vested with the general assembly under chapter 536 to review, to delay the effective date, or to disapprove and annul a rule are subsequently held unconstitutional, then the grant of rulemaking authority and any rule proposed or adopted after August 28, 2007, shall be invalid and void.]

10. The governing body of a rural electric cooperative or municipal utility shall, within nine months of January 1, 2008, adopt policies establishing a simple contract to be used for interconnection and net metering. For systems of ten kilowatts or less, the application process shall use an all-in-one document that includes a simple interconnection request, simple procedures, and a brief set of terms and conditions.

11. For any cause of action relating to any damages to property or person caused by the generation unit of a customer-generator or the interconnection thereof, the retail electric supplier shall have no liability absent clear and convincing evidence of fault on the part of the supplier.

12. The estimated generating capacity of all net metering systems operating under the provisions of this section shall count towards the respective retail electric supplier's accomplishment of any renewable energy portfolio target or mandate adopted by the Missouri general assembly.

13. The sale of qualified electric generation units to any customer-generator shall be subject to the provisions of sections 407.700 to 407.720. The attorney general shall have the authority to promulgate in accordance with the provisions of chapter 536 rules regarding mandatory disclosures of information by sellers of qualified electric generation units. Any interested person who believes that the seller of any electric generation unit is misrepresenting the safety or performance standards of any such systems, or who believes that any electric generation unit poses a danger to any property or person, may report the same to the attorney general, who shall be authorized to investigate such claims and take any necessary and appropriate actions.

14. Any costs incurred under this act by a retail electric supplier shall be recoverable in that utility's rate structure.

15. No consumer shall connect or operate an electric generation unit in parallel phase and synchronization with any retail electric supplier without written approval by said supplier that all of the requirements under subdivision (1) of subsection 7 of this section have been met. For a consumer who violates this provision, a supplier may immediately and without notice disconnect the electric facilities of said consumer and terminate said consumer's electric service.

16. The manufacturer of any electric generation unit used by a customer-generator may be held liable for any damages to property or person caused by a defect in the electric generation unit of a customer-generator.

17. The seller, installer, or manufacturer of any electric generation unit who knowingly misrepresents the safety aspects of an electric generation unit may be held liable for any damages to property or person caused by the electric generation unit of a customer-generator.

MISSOURI STATE AUDITOR'S OFFICE
FISCAL NOTE (20-116)

Subject

Initiative petition from James Owen regarding a proposed amendment to Chapters 393 and 386 of the Revised Statutes of Missouri. (Received September 4, 2019)

Date

September 24, 2019

Description

This proposal would amend Chapters 393 and 386 of the Revised Statutes of Missouri.

The amendment is to be voted on in November 2020.

Public comments and other input

The State Auditor's office requested input from the **Attorney General's office,** the **Department of Agriculture,** the **Department of Economic Development,** the **Department of Elementary and Secondary Education,** the **Department of Higher Education and Workforce Development,** the **Department of Health and Senior Services,** the **Department of Commerce and Insurance,** the **Department of Mental Health,** the **Department of Natural Resources,** the **Department of Corrections,** the **Department of Labor and Industrial Relations,** the **Department of Revenue,** the **Department of Public Safety,** the **Department of Social Services,** the **Governor's office,** the **Missouri House of Representatives,** the **Department of Conservation,** the **Department of Transportation,** the **Office of Administration,** the **Office of State Courts Administrator,** the **Missouri Senate,** the **Secretary of State's office,** the **Office of the State Public Defender,** the **State Treasurer's office, Adair County, Boone County, Callaway County, Cass County, Clay County, Cole County, Greene County, Jackson County, Jasper County, St. Charles County, St. Louis County, Taney County,** the **City of Cape Girardeau,** the **City of Columbia,** the **City of Jefferson,** the **City of Joplin,** the **City of Kansas City,** the **City of Kirksville,** the **City of Mexico,** the **City of Raymore,** the **City of St. Joseph,** the **City of St. Louis,** the **City of Springfield,** the **City of Union,** the **City of Wentzville,** the **City of West Plains, Cape Girardeau 63 School District, Hannibal 60 School District, Malta Bend R-V School District, Mehlville School District, Wellsville-Middletown R-1 School District, State Technical College of Missouri, Metropolitan Community College, University of Missouri, St. Louis Community College,** and the **Missouri Joint Municipal Electric Utility Commission**.

Assumptions

Officials from the **Attorney General's office** indicated they expect that, to the extent that the enactment of this proposal would result in increased litigation, they can absorb the costs associated with that increased litigation using existing resources. However, if the enactment of this proposal were to result in substantial additional litigation, they may request additional appropriations.

Officials from the **Department of Agriculture** indicated no fiscal impact on their department.

Officials from the **Department of Economic Development** indicated no impact to their department.

Officials from the **Department of Elementary and Secondary Education** indicated this legislation does not impact their department.

Officials the **Department of Higher Education and Workforce Development** indicated they report no cost for this initiative petition.

Officials from the **Department of Health and Senior Services** indicated this initiative petition has no impact on their department.

Officials from the **Department of Commerce and Insurance** indicated this petition, if passed, will have no cost or savings to their department.

Officials from the **Department of Mental Health** indicated this proposal creates no direct obligations or requirements to their department that would result in a fiscal impact.

Officials from the **Department of Natural Resources** indicated increased operating costs in the General Revenue Fund of $51,249 for fiscal year 2021, $87,538 for fiscal year 2022, and $88,355 for fiscal year 2023.

This initiative petition would also affect the activities of the Public Service Commission (PSC) and the Office of the Public Counsel (OPC).

This initiative petition would increase the Renewable Energy Standard requirement without changing the maximum average retail utility rate increase of one percent in current law. If this cap has not already been reached, then the proposed increases in portfolio standards could result in rate increases up to the cap.

Passed in 2008 by initiative petition, the current Renewable Energy Standard (RES) requires Missouri's regulated electric utilities to meet defined percentages of total retail electrical sales by renewable resources, increasing to 15% by 2021. The Public Service Commission (PSC) determines compliance and has promulgated rule 20 CSR 4240-20.100 to implement the RES provisions.

The Division of Energy's (DE) statutory authority under the RES law includes:

1. Certifying new eligible renewable resources (Section 393.1025(5), RSMo.); and
2. Certifying no undue adverse impacts of renewable electric generation facilities on air, water or land use, including impacts associated with the gathering of generation feedstocks (Section 393.1030.4, RSMo.).

DE has promulgated a rule to implement these provisions at 4 CSR 340-8.010.

Section 393.1025, RSMo. – This section alters the definition of "department" to reflect the transition of DE from the Department of Economic Development to the Department of Natural Resources. This section also modifies the description of "renewable energy resources," which would require a revision to DE's RES rule.

Section 393.1030, RSMo. – The current RES statute requires renewable generation to be 15% of a utility's generation (megawatt-hours) portfolio by January 1, 2021. This language would increase the requirements to the following:

1. No less than 20% for calendar years 2022 through 2024;
2. No less than 27% for calendar years 2025 through 2027;
3. No less than 35% for calendar years 2028 through 2030;
4. No less than 42% for calendar years 2031 through 2034;
5. No less than 50% for calendar years 2035 through 2039; and
6. No less than 100% for calendar year 2050 and each year thereafter.

The proposal would allow a utility to comply using verified energy savings captured due to energy efficiency or demand-side measures that are approved by the Public Service Commission.

Section 386.890, RSMo. – This section modifies the Net Metering and Easy Connection Act. The definition of "customer-generator" is altered so that the qualified electric energy generation unit can have a capacity up to 2,000 kW. A utility's total rated generating capacity of net metering systems limit would be increased to 10% of the utilities single-hour peak load from the previous year. When customer's generation exceeds electricity supplied during a billing period, all net excess kilowatt-hours generated is carried forward and is credited at a ratio of one-to-one against the customer-generator's energy consumption in future billing periods. This could result in an increase in customer generation and utilization of the Net Metering and Easy Connection Act.

A rulemaking would be necessary to implement the changes relating to the definition of "renewable energy resources," the changes in the required percentages of renewable generation, and the addition of energy efficiency and demand-side programs to the list of eligible measures. Both the increases in the required generation percentages and the eligibility of energy efficiency and demand-side programs would result in a greater number, and new types, of resources needing certification and may require highly technical assessments, which would necessitate one Planner I/II FTE.

Officials from the **Department of Corrections** indicated the fiscal impact is unknown. They are unable to estimate the impact of this legislation on their utility costs. However, based on research, including research completed by the Heritage Foundation, the proposed regulatory changes would be difficult to implement and could significantly increase costs to their department.

Officials from the **Department of Labor and Industrial Relations** indicated this initiative petition is expected to have no fiscal impact on their department.

Officials from the **Department of Revenue** indicated this initiative petition, as it is currently set forth, would have no impact on their department.

Officials from the **Department of Public Safety - Office of the Director** indicated they see no fiscal impact due to this legislation.

Officials from the **Department of Social Services** indicated this initiative petition will not have a fiscal impact to their department.

Officials from the **Governor's office** indicated there should be no added costs or savings to their office.

Officials from the **Missouri House of Representatives** indicated no fiscal impact to their office.

Officials from the **Department of Conservation** indicated no adverse fiscal impact to their department would be expected as a result of this proposal.

Officials from the **Department of Transportation** indicated this initiative petition is anticipated to have no fiscal impact to their department/Missouri Highways and Transportation Commission.

Officials from the **Office of Administration** indicated this proposal would change the renewable energy statutes enacted pursuant to the Missouri Clean Energy Act (Proposition C) in November 2008. This should have no impact on Total State Revenue or the calculation under Article X, Section 18(e) of the Missouri Constitution.

OA-FMDC assumes that Missouri electric providers would be required to install new renewable energy sources to meet the requirements of this petition. According to the U.S. Energy Information Administration, renewable energy resources accounted for only 5.5% of Missouri's net electricity generation in 2018. https://www.eia.gov/state/?sid=MO. OA-FMDC assumes that capital costs for installing renewable energy equipment would make it more costly for electric providers to meet the requirements of this petition and that some of those costs would be passed along to consumers.

For the Office of Administration, OA-FMDC assumes that this petition would result in higher electricity costs for state facilities; however, OA-FMDC has no way of calculating how much that increase would be.

Officials from the **Office of State Courts Administrator** indicated there is no fiscal impact on the courts.

Officials from the **Missouri Senate** indicated they anticipate no fiscal impact.

Officials from the **Secretary of State's office** indicated unless a special election is called for the purpose, Referendums are submitted to the people at the next general election. Article III section 52(b) of the Missouri Constitution authorizes the general assembly to order a special election for measures referred to the people. If a special election is called to submit a Referendum to a vote of the people, Section 115.063.2 RSMo. requires the state to pay the costs. The cost of the special election has been estimated to be $7.8 million based on the cost of the 2016 Presidential Preference Primary.

Their office is required to pay for publishing in local newspapers the full text of each statewide ballot measure as directed by Article XII, Section 2(b) of the Missouri Constitution and Section 116.230-116.290, RSMo. Funding for this item is adjusted each year depending upon the election cycle. A new decision item is requested in odd numbered fiscal years and the amount requested is dependent upon the estimated number of ballot measures that will be approved by the General Assembly and the initiative petitions certified for the ballot. In (fiscal year) FY 2014, the General Assembly changed the appropriation so that it was no longer an estimated appropriation.

In FY19, over $5.8 million was spent to publish the full text of the measures for the August and November elections. They estimate $65,000 per page for the costs of publications based on the actual cost incurred for the one referendum that was on the August 2018 ballot.

Their office will continue to assume, for the purposes of this fiscal note, that it should have the full appropriation authority it needs to meet the publishing requirements. Because these requirements are mandatory, they reserve the right to request funding to meet the cost of their publishing requirements if the Governor and the General Assembly again change the amount or continue to not designate it as an estimated appropriation.

Officials from the **Office of the State Public Defender** indicated this initiative petition will not have a significant impact on their office.

Officials from the **State Treasurer's office** indicated no fiscal impact to their office.

Officials from **Greene County** indicated there are no estimated costs or savings to report from their county for this initiative petition.

Officials from **St. Louis County** indicated they do not think this proposed statutory amendment, if enacted, would have a fiscal impact on their county government.

Officials from the **City of Kansas City** indicated this initiative petition will have no fiscal impact on their city.

Officials from **Wellsville-Middletown R-1 School District** indicated they have no way of determining an actual cost or savings benefit to their school from this petition's proposals; however, they are fairly confident that there will be a substantial cost to all rate-payers in the state for the development of the infrastructure and technology needed to comply with this.

Officials from **Metropolitan Community College** indicated unknown fiscal impact. Additional expenses are always passed down to the consumer (assuming the electric utilities have additional expense converting energy sources). Without knowing the cost to the utility company(ies) and the downhill affect, it is difficult to know how it will affect their college. Last fiscal year (7/1/18-6/30/19), they paid $2.3 million for electricity. The smallest increase could easily have a significant impact. For example, a 1% increase would result in $23,000 ongoing additional expense.

The State Auditor's office did not receive a response from **Adair County, Boone County, Callaway County, Cass County, Clay County, Cole County, Jackson County, Jasper County, St. Charles County, Taney County,** the **City of Cape Girardeau,** the **City of Columbia,** the **City of Jefferson,** the **City of Joplin,** the **City of Kirksville,** the **City of Mexico,** the **City of Raymore,** the **City of St. Joseph,** the **City of St. Louis,** the **City of Springfield,** the **City of Union,** the **City of Wentzville,** the **City of West Plains, Cape Girardeau 63 School District, Hannibal 60 School District, Malta Bend R-V School District, Mehlville School District, State Technical College of Missouri, University of Missouri, St. Louis Community College,** and the **Missouri Joint Municipal Electric Utility Commission**.

Fiscal Note Summary

State governmental entities estimate additional employment costs of approximately $88,000 annually. Additionally, state and local governmental entities anticipate possible increased costs of electricity, but the amount is unknown.

JOHN R. ASHCROFT

STATE AUDITORS OFFICE

The Honorable Nicole Galloway
State Auditor
State Capitol Building
Jefferson City, MO 65101

RE: Petition approval request from James Owen regarding a proposed statutory amendment to Chapter 393, version 3 (2020-115)

Dear Auditor Galloway:

Enclosed please find an initiative petition sample sheet for a proposal to amend the Revised Statutes of Missouri filed by James Owen on September 3, 2019.

We are referring the enclosed petition sample sheet to you for the purposes of preparing a fiscal note and fiscal note summary as required by Section 116.332, RSMo. Section 116.175.2, RSMo requires the state auditor to forward the fiscal note and fiscal note summary to the attorney general within twenty days of receipt of the petition sample sheet.

Thank you for your immediate consideration of this request.

Sincerely,

John R. Ashcroft

Notary Public (Seal) My commission expires _____

Be it enacted by the people of the state of Missouri:

Sections 393.1025 through 393.1030, RSMo. are amended to read as follows:

393.1025. As used in sections 393.1020 to 393.1030, the following terms mean:

(1) "Commission", the public service commission;

(2) "Department", the department of [economic development] natural resources;

(3) "Electric utility", any electrical corporation as defined by section 386.020;

(4) "Renewable energy credit" or "REC", a tradeable certificate of proof that one megawatt-hour of electricity has been generated from renewable energy sources; and

(5) "Renewable energy resources", electric energy produced from wind, solar thermal sources, photovoltaic cells and panels, [dedicated crops grown for energy production, cellulosic agricultural residues, plant residues, methane from landfills, from agricultural operations, or from wastewater treatment, thermal depolymerization or pyrolysis for converting waste material to energy, clean and untreated wood such as pallets, hydropower (not including pumped storage) that does not require a new diversion or impoundment of water and that has a total facility nameplate rating capacity of ten megawatts or less, fuel cells using hydrogen produced by one of the above-named renewable energy sources,] and other sources of energy not including nuclear that become available after November 4, 2008, and are certified as renewable by rule by the department.

393.1030. 1. The commission shall, in consultation with the department, prescribe by rule a portfolio requirement for all electric utilities to generate or purchase electricity generated from renewable energy resources. Such portfolio requirement shall provide that electricity from renewable energy resources shall constitute the following portions of each electric utility's sales:

(1) No less than [two] twenty percent for calendar years [2011] 2022 through [2013] 2024;

(2) No less than [five] twenty-seven percent for calendar years [2014] 2025 through [2017] 2027;

(3) No less than [ten] thirty-five percent for calendar years [2018] 2028 through [2020] 2030; [and]

(4) No less than forty-two percent for calendar years 2031 through 2034;

[(4)] (5) No less than [fifteen] fifty percent [in each] for calendar years [beginning in 2021.] 2035 through 2039; and

(6) No less than one hundred percent for calendar year 2050 and each year thereafter.

At least two percent of each portfolio requirement shall be derived from solar energy. The portfolio requirements shall apply to all power sold to Missouri consumers whether such power is self-generated or purchased from another source in or outside of this state. [A utility may comply with the standard in whole or in part by purchasing RECs.] Each kilowatt-hour of eligible energy generated in Missouri shall count as 1.25 kilowatt-hours for purposes of compliance.

2. Notwithstanding any other provisions of this section, an electric utility may comply with this section using energy savings captured due to energy efficiency or demand-side measures. As part of its rulemaking authority pursuant to subsection 7 of this section, the commission shall prescribe a rule allowing an electric utility to comply with the portfolio requirements of subsection 1 of this section using verified megawatt-hour savings captured due to commission-approved demand-side programs under section 393.1075 during each compliance year, whether such annual energy savings is due to measures installed in that compliance year or in previous compliance years beginning with 2022. For purposes of this section, one megawatt-hour of verified energy savings captured through utility-sponsored energy efficiency programs shall count as one megawatt-hour of renewable energy generated, and an electric utility may count such savings as compliance with this section for the duration of the measure life of the energy efficiency measure.

[2] 3. The commission, in consultation with the department and within one year of November 4, 2008, shall select a program for tracking and verifying the trading of renewable energy credits. An unused credit may exist for up to three years from the date of its creation. A credit may be used only once to comply with sections 393.1020 to 393.1030 and may not also be used to satisfy any similar nonfederal requirement. An electric utility may comply with the standard in whole or in part by purchasing RECs, provided that such RECs are associated with electricity produced or procured by the electric utility and sold to Missouri customers. An electric utility may not use a credit derived from a green pricing program towards compliance with the standard. Certificates from net-metered sources shall initially be owned by the customer-generator. The commission, except where the department is specified, shall make whatever rules are necessary to enforce the renewable energy standard. Such rules shall include:

(1) A maximum average retail rate increase of one percent determined by estimating and comparing the electric utility's cost of compliance with least-cost renewable generation and the cost of continuing to generate or purchase electricity from entirely nonrenewable sources, taking into proper account future environmental regulatory risk including the risk of greenhouse gas regulation. Notwithstanding the foregoing, until June 30, 2020, if the maximum average retail

rate increase would be less than or equal to one percent if an electric utility's investment in solar-related projects initiated, owned or operated by the electric utility is ignored for purposes of calculating the increase, then additional solar rebates shall be paid and included in rates in an amount up to the amount that would produce a retail rate increase equal to the difference between a one percent retail rate increase and the retail rate increase calculated when ignoring an electric utility's investment in solar-related projects initiated, owned, or operated by the electric utility. Notwithstanding any provision to the contrary in this section, even if the payment of additional solar rebates will produce a maximum average retail rate increase of greater than one percent when an electric utility's investment in solar-related projects initiated, owned or operated by the electric utility are included in the calculation, the additional solar rebate costs shall be included in the prudently incurred costs to be recovered as contemplated by subdivision (4) of this subsection;

(2) Penalties of at least twice the average market value of renewable energy credits for the compliance period for failure to meet the targets of subsection 1 of this section. An electric utility will be excused if it proves to the commission that failure was due to events beyond its reasonable control that could not have been reasonably mitigated, or that the maximum average retail rate increase has been reached. Penalties shall not be recovered from customers. Amounts forfeited under this section shall be remitted to the department to purchase renewable energy credits needed for compliance. Any excess forfeited revenues shall be used by the division of energy solely for renewable energy and energy efficiency projects;

(3) Provisions for an annual report to be filed by each electric utility in a format sufficient to document its progress in meeting the targets;

(4) Provision for recovery outside the context of a regular rate case of prudently incurred costs and the pass-through of benefits to customers of any savings achieved by an electrical corporation in meeting the requirements of this section.

[3] 4. As provided for in this section, [except for those electrical corporations that qualify for an exemption under section 393.1050,] each electric utility shall make available to its retail customers a solar rebate for new or expanded solar electric systems sited on customers' premises, up to a maximum of twenty-five kilowatts per system, measured in direct current that were confirmed by the electric utility to have become operational in compliance with the provisions of section 386.890. The solar rebates shall be two dollars per watt for systems becoming operational on or before June 30, 2014; one dollar and fifty cents per watt for systems becoming operational between July 1, 2014, and June 30, 2015; one dollar per watt for systems becoming operational between July 1, 2015, and June 30, 2016; fifty cents per watt for systems becoming operational between July 1, 2016, and June 30, 2017; fifty cents per watt for systems becoming operational between July 1, 2017, and June 30, 2019; twenty-five cents per watt for systems becoming operational between July 1, 2019, and June 30, 2020; and zero cents per watt for systems becoming operational after June 30, 2020. An electric utility may, through its tariffs, require applications for rebates to be submitted up to one hundred eighty-two days prior to the June thirtieth operational date. Nothing in this section shall prevent an electrical corporation from offering rebates after July 1, 2020, through an approved tariff. If the electric utility determines the maximum average retail rate increase provided for in subdivision (1) of subsection [2] 3 of this section will be reached in any calendar year, the electric utility shall be entitled to cease paying rebates to the extent necessary to avoid exceeding the maximum average retail rate increase if the electrical corporation files with the commission to suspend its rebate tariff for the remainder of that calendar year at least sixty days prior to the change taking effect. The filing with the commission to suspend the electrical corporation's rebate tariff shall include the calculation reflecting that the maximum average retail rate increase will be reached and supporting documentation reflecting that the maximum average retail rate increase will be reached. The commission shall rule on the suspension filing within sixty days of the date it is filed. If the commission determines that the maximum average retail rate increase will be reached, the commission shall approve the tariff suspension. The electric utility shall continue to process and pay applicable solar rebates until a final commission ruling; however, if the continued payment causes the electric utility to pay rebates that cause it to exceed the maximum average retail rate increase, the expenditures shall be considered prudently incurred costs as contemplated by subdivision (4) of subsection [2] 3 of this section and shall be recoverable as such by the electric utility. As a condition of receiving a rebate, customers shall transfer to the electric utility all right, title, and interest in and to the renewable energy credits associated with the new or expanded solar electric system that qualified the customer for the solar rebate for a period of ten years from the date the electric utility confirmed that the solar electric system was installed and operational.

[4] 5. The department shall, in consultation with the commission, establish by rule a certification process for electricity generated from renewable resources and used to fulfill the requirements of subsection 1 of this section. Certification criteria for renewable energy generation shall be determined by factors that include fuel type, technology, and the environmental impacts of the generating facility. Renewable energy facilities shall not cause undue adverse air, water, or land use impacts, including impacts associated with the gathering of generation feedstocks. If any amount of fossil fuel is used with renewable energy resources, only the portion of electrical output attributable to renewable energy resources shall be used to fulfill the portfolio requirements.

[5. In carrying out the provisions of this section, the commission and the department shall include methane generated from the anaerobic digestion of farm animal waste and thermal depolymerization or pyrolysis for converting waste material to energy as renewable energy resources for purposes of this section.]

6. The commission shall have the authority to promulgate rules for the implementation of this section, but only to the extent such rules are consistent with, and do not delay the implementation of, the provisions of this section. [Any rule or portion of a rule, as that term is defined in section 536.010, that is created under the authority delegated in this section shall become effective only if it complies with and is subject to all of the provisions of chapter 536 and, if applicable, section 536.028. This section and chapter 536 are nonseverable and if any of the powers vested with the general assembly pursuant to chapter 536 to review, to delay the effective date, or to disapprove and annul a rule are subsequently held unconstitutional, then the grant of rulemaking authority and any rule proposed or adopted after August 28, 2013, shall be invalid and void.]

MISSOURI STATE AUDITOR'S OFFICE
FISCAL NOTE (20-115)

Subject

Initiative petition from James Owen regarding a proposed amendment to Chapter 393 of the Revised Statutes of Missouri. (Received September 4, 2019)

Date

September 24, 2019

Description

This proposal would amend Chapter 393 of the Revised Statutes of Missouri.

The amendment is to be voted on in November 2020.

Public comments and other input

The State Auditor's office requested input from the **Attorney General's office,** the **Department of Agriculture,** the **Department of Economic Development,** the **Department of Elementary and Secondary Education,** the **Department of Higher Education and Workforce Development,** the **Department of Health and Senior Services,** the **Department of Commerce and Insurance,** the **Department of Mental Health,** the **Department of Natural Resources,** the **Department of Corrections,** the **Department of Labor and Industrial Relations,** the **Department of Revenue,** the **Department of Public Safety,** the **Department of Social Services,** the **Governor's office,** the **Missouri House of Representatives,** the **Department of Conservation,** the **Department of Transportation,** the **Office of Administration,** the **Office of State Courts Administrator,** the **Missouri Senate,** the **Secretary of State's office,** the **Office of the State Public Defender,** the **State Treasurer's office, Adair County, Boone County, Callaway County, Cass County, Clay County, Cole County, Greene County, Jackson County, Jasper County, St. Charles County, St. Louis County, Taney County,** the **City of Cape Girardeau,** the **City of Columbia,** the **City of Jefferson,** the **City of Joplin,** the **City of Kansas City,** the **City of Kirksville,** the **City of Mexico,** the **City of Raymore,** the **City of St. Joseph,** the **City of St. Louis,** the **City of Springfield,** the **City of Union,** the **City of Wentzville,** the **City of West Plains, Cape Girardeau 63 School District, Hannibal 60 School District, Malta Bend R-V School District, Mehlville School District, Wellsville-Middletown R-1 School District, State Technical College of Missouri, Metropolitan Community College, University of Missouri, St. Louis Community College,** and the **Missouri Joint Municipal Electric Utility Commission**.

Assumptions

Officials from the **Attorney General's office** indicated they expect that, to the extent that the enactment of this proposal would result in increased litigation, they can absorb the costs associated with that increased litigation using existing resources. However, if the enactment of this proposal were to result in substantial additional litigation, they may request additional appropriations.

Officials from the **Department of Agriculture** indicated no fiscal impact on their department.

Officials from the **Department of Economic Development** indicated no impact to their department.

Officials from the **Department of Elementary and Secondary Education** indicated this legislation does not impact their department.

Officials the **Department of Higher Education and Workforce Development** indicated they report no cost for this initiative petition.

Officials from the **Department of Health and Senior Services** indicated this initiative petition has no impact on their department.

Officials from the **Department of Commerce and Insurance** indicated this petition, if passed, will have no cost or savings to their department.

Officials from the **Department of Mental Health** indicated this proposal creates no direct obligations or requirements to their department that would result in a fiscal impact.

Officials from the **Department of Natural Resources** indicated increased operating costs in the General Revenue Fund of $51,249 for fiscal year 2021, $87,538 for fiscal year 2022, and $88,355 for fiscal year 2023.

This initiative petition would also affect the activities of the Public Service Commission (PSC) and the Office of the Public Counsel (OPC).

This initiative petition would increase the Renewable Energy Standard requirement without changing the maximum average retail utility rate increase of one percent in current law. If this cap has not already been reached, then the proposed increases in portfolio standards could result in rate increases up to the cap.

Passed in 2008 by initiative petition, the current Renewable Energy Standard (RES) requires Missouri's regulated electric utilities to meet defined percentages of total retail electrical sales by renewable resources, increasing to 15% by 2021. The Public Service Commission (PSC) determines compliance and has promulgated rule 20 CSR 4240-20.100 to implement the RES provisions.

The Division of Energy's (DE) statutory authority under the RES law includes:

1. Certifying new eligible renewable resources (Section 393.1025(5), RSMo.); and
2. Certifying no undue adverse impacts of renewable electric generation facilities on air, water or land use, including impacts associated with the gathering of generation feedstocks (Section 393.1030.4, RSMo.).

DE has promulgated a rule to implement these provisions at 4 CSR 340-8.010.

Section 393.1025, RSMo. – This section alters the definition of "department" to reflect the transition of DE from the Department of Economic Development to the Department of Natural Resources. This section also modifies the description of "renewable energy resources," which would require a revision to DE's RES rule.

Section 393.1030, RSMo. – The current RES statute requires renewable generation to be 15% of a utility's generation (megawatt-hours) portfolio by January 1, 2021. This language would increase the requirements to the following:

1. No less than 20% for calendar years 2022 through 2024;
2. No less than 27% for calendar years 2025 through 2027;
3. No less than 35% for calendar years 2028 through 2030;
4. No less than 42% for calendar years 2031 through 2034;
5. No less than 50% for calendar years 2035 through 2039; and
6. No less than 100% for calendar year 2050 and each year thereafter.

In addition, the proposal would allow a utility to comply using verified energy savings captured due to energy efficiency or demand-side measures that are approved by the Public Service Commission.

A rulemaking would be necessary to implement the changes relating to the definition of "renewable energy resources," the changes in the required percentages of renewable generation, and the addition of energy efficiency and demand-side programs to the list of eligible measures. Both the increases in the required generation percentages and the eligibility of energy efficiency and demand-side programs would result in a greater number, and new types, of resources needing certification and may require highly technical assessments, which would necessitate one Planner I/II FTE.

Officials from the **Department of Corrections** indicated the fiscal impact is unknown. They are unable to estimate the impact of this legislation on their utility costs. However, based on research, including research completed by the Heritage Foundation, the proposed regulatory changes would be difficult to implement and could significantly increase costs to their department.

Officials from the **Department of Labor and Industrial Relations** indicated this initiative petition is expected to have no fiscal impact on their department.

Officials from the **Department of Revenue** indicated this initiative petition, as it is currently set forth, would have no impact on their department.

Officials from the **Department of Public Safety - Office of the Director** indicated they see no fiscal impact due to this legislation.

Officials from the **Department of Social Services** indicated this initiative petition will not have a fiscal impact to their department.

Officials from the **Governor's office** indicated there should be no added costs or savings to their office.

Officials from the **Missouri House of Representatives** indicated no fiscal impact to their office.

Officials from the **Department of Conservation** indicated no adverse fiscal impact to their department would be expected as a result of this proposal.

Officials from the **Department of Transportation** indicated this initiative petition is anticipated to have no fiscal impact to their department/Missouri Highways and Transportation Commission.

Officials from the **Office of Administration** indicated this proposal would change the renewable energy statutes enacted pursuant to the Missouri Clean Energy Act (Proposition C) in November 2008. This should have no impact on Total State Revenue or the calculation under Article X, Section 18(e) of the Missouri Constitution.

OA-FMDC assumes that Missouri electric providers would be required to install new renewable energy sources to meet the requirements of this petition. According to the U.S. Energy Information Administration, renewable energy resources accounted for only 5.5% of Missouri's net electricity generation in 2018. https://www.eia.gov/state/?sid=MO. OA-FMDC assumes that capital costs for installing renewable energy equipment would make it more costly for electric providers to meet the requirements of this petition and that some of those costs would be passed along to consumers.

For the Office of Administration, OA-FMDC assumes that this petition would result in higher electricity costs for state facilities; however, OA-FMDC has no way of calculating how much that increase would be.

Officials from the **Office of State Courts Administrator** indicated there is no fiscal impact on the courts.

Officials from the **Missouri Senate** indicated they anticipate no fiscal impact.

Officials from the **Secretary of State's office** indicated unless a special election is called for the purpose, Referendums are submitted to the people at the next general election.

Article III section 52(b) of the Missouri Constitution authorizes the general assembly to order a special election for measures referred to the people. If a special election is called to submit a Referendum to a vote of the people, Section 115.063.2 RSMo. requires the state to pay the costs. The cost of the special election has been estimated to be $7.8 million based on the cost of the 2016 Presidential Preference Primary.

Their office is required to pay for publishing in local newspapers the full text of each statewide ballot measure as directed by Article XII, Section 2(b) of the Missouri Constitution and Section 116.230-116.290, RSMo. Funding for this item is adjusted each year depending upon the election cycle. A new decision item is requested in odd numbered fiscal years and the amount requested is dependent upon the estimated number of ballot measures that will be approved by the General Assembly and the initiative petitions certified for the ballot. In (fiscal year) FY 2014, the General Assembly changed the appropriation so that it was no longer an estimated appropriation.

In FY19, over $5.8 million was spent to publish the full text of the measures for the August and November elections. They estimate $65,000 per page for the costs of publications based on the actual cost incurred for the one referendum that was on the August 2018 ballot.

Their office will continue to assume, for the purposes of this fiscal note, that it should have the full appropriation authority it needs to meet the publishing requirements. Because these requirements are mandatory, they reserve the right to request funding to meet the cost of their publishing requirements if the Governor and the General Assembly again change the amount or continue to not designate it as an estimated appropriation.

Officials from the **Office of the State Public Defender** indicated this initiative petition will not have a significant impact on their office.

Officials from the **State Treasurer's office** indicated no fiscal impact to their office.

Officials from **Greene County** indicated there are no estimated costs or savings to report from their county for this initiative petition.

Officials from **St. Louis County** indicated they do not think this proposed statutory amendment, if enacted, would have a fiscal impact on their county government.

Officials from the **City of Kansas City** indicated this initiative petition will have no fiscal impact on their city.

Officials from **Wellsville-Middletown R-1 School District** indicated they have no way of determining an actual cost or savings benefit to their school from this petition's proposals; however, they are fairly confident that there will be a substantial cost to all rate-payers in the state for the development of the infrastructure and technology needed to comply with this.

Officials from **Metropolitan Community College** indicated unknown fiscal impact. Additional expenses are always passed down to the consumer (assuming the electric

utilities have additional expense converting energy sources). Without knowing the cost to the utility company(ies) and the downhill affect, it is difficult to know how it will affect their college. Last fiscal year (7/1/18-6/30/19), they paid $2.3 million for electricity. The smallest increase could easily have a significant impact. For example, a 1% increase would result in $23,000 ongoing additional expense.

The State Auditor's office did not receive a response from **Adair County, Boone County, Callaway County, Cass County, Clay County, Cole County, Jackson County, Jasper County, St. Charles County, Taney County,** the **City of Cape Girardeau,** the **City of Columbia,** the **City of Jefferson,** the **City of Joplin,** the **City of Kirksville,** the **City of Mexico,** the **City of Raymore,** the **City of St. Joseph,** the **City of St. Louis,** the **City of Springfield,** the **City of Union,** the **City of Wentzville,** the **City of West Plains, Cape Girardeau 63 School District, Hannibal 60 School District, Malta Bend R-V School District, Mehlville School District, State Technical College of Missouri, University of Missouri, St. Louis Community College,** and the **Missouri Joint Municipal Electric Utility Commission**.

Fiscal Note Summary

State governmental entities estimate additional employment costs of approximately $88,000 annually. Additionally, state and local governmental entities anticipate possible increased costs of electricity, but the amount is unknown.

JOHN R. ASHCROFT

STATE AUDITORS OFFICE

The Honorable Nicole Galloway
State Auditor
State Capitol Building
Jefferson City, MO 65101

RE: Petition approval request from James Owen regarding a proposed statutory amendment to Chapter 393, version 2 (2020-114)

Dear Auditor Galloway:

Enclosed please find an initiative petition sample sheet for a proposal to amend the Revised Statutes of Missouri filed by James Owen on September 3, 2019.

We are referring the enclosed petition sample sheet to you for the purposes of preparing a fiscal note and fiscal note summary as required by Section 116.332, RSMo. Section 116.175.2, RSMo requires the state auditor to forward the fiscal note and fiscal note summary to the attorney general within twenty days of receipt of the petition sample sheet.

Thank you for your immediate consideration of this request.

Sincerely,

John R. Ashcroft

Be it enacted by the people of the state of Missouri:

Sections 393.1025 through 393.1030, RSMo. are amended to read as follows:

393.1025. As used in sections 393.1020 to 393.1030, the following terms mean:

(1) "Commission", the public service commission;

(2) "Department", the department of [economic development] natural resources;

(3) "Electric utility", any electrical corporation as defined by section 386.020;

(4) "Renewable energy credit" or "REC", a tradeable certificate of proof that one megawatt-hour of electricity has been generated from renewable energy sources; and

(5) "Renewable energy resources", electric energy produced from wind, solar thermal sources, photovoltaic cells and panels, [dedicated crops grown for energy production, cellulosic agricultural residues, plant residues, methane from landfills, from agricultural operations, or from wastewater treatment, thermal depolymerization or pyrolysis for converting waste material to energy, clean and untreated wood such as pallets, hydropower (not including pumped storage) that does not require a new diversion or impoundment of water and that has a total facility nameplate rating capacity of ten megawatts or less, fuel cells using hydrogen produced by one of the above-named renewable energy sources,] and other sources of energy not including nuclear that become available after November 4, 2008, and are certified as renewable by rule by the department.

393.1030. 1. The commission shall, in consultation with the department, prescribe by rule a portfolio requirement for all electric utilities to generate or purchase electricity generated from renewable energy resources. Such portfolio requirement shall provide that electricity from renewable energy resources shall constitute the following portions of each electric utility's sales:

(1) No less than [two] twenty percent for calendar years [2011] 2022 through [2013] 2024;

(2) No less than [five] twenty-seven percent for calendar years [2014] 2025 through [2017] 2027;

(3) No less than [ten] thirty-five percent for calendar years [2018] 2028 through [2020] 2030; [and]

(4) No less than forty-two percent for calendar years 2031 through 2034; and

[(4)] (5) No less than [fifteen] fifty percent [in each] for calendar year [beginning in 2021] 2035 and each year thereafter.

At least two percent of each portfolio requirement shall be derived from solar energy. The portfolio requirements shall apply to all power sold to Missouri consumers whether such power is self-generated or purchased from another source in or outside of this state. [A utility may comply with the standard in whole or in part by purchasing RECs.] Each kilowatt-hour of eligible energy generated in Missouri shall count as 1.[2]5 kilowatt-hours for purposes of compliance.

2. Notwithstanding any other provisions of this section, an electric utility may comply with this section using energy savings captured due to energy efficiency or demand-side measures. As part of its rulemaking authority pursuant to subsection 7 of this section, the commission shall prescribe a rule allowing an electric utility to comply with the portfolio requirements of subsection 1 of this section using verified megawatt-hour savings captured due to commission-approved demand-side programs under section 393.1075 during each compliance year, whether such annual energy savings is due to measures installed in that compliance year or in previous compliance years beginning with 2022. For purposes of this section, one megawatt-hour of verified energy savings captured through utility-sponsored energy efficiency programs shall count as one megawatt-hour of renewable energy generated, and an electric utility may count such savings as compliance with this section for the duration of the measure life of the energy efficiency measure.

[2] 3. The commission, in consultation with the department and within one year of November 4, 2008, shall select a program for tracking and verifying the trading of renewable energy credits. An unused credit may exist for up to three years from the date of its creation. A credit may be used only once to comply with sections 393.1020 to 393.1030 and may not also be used to satisfy any similar nonfederal requirement. An electric utility may comply with the standard in whole or in part by purchasing RECs, provided that such RECs are associated with electricity produced or procured by the electric utility and sold to Missouri customers. At least fifty percent of the energy or RECs offered for compliance each year shall come from resources not owned by the electric utility or an electric utility affiliate. An electric utility may not use a credit derived from a green pricing program towards compliance with the standard. Certificates from net-metered sources shall initially be owned by the customer-generator. The commission, except where the department is specified, shall make whatever rules are necessary to enforce the renewable energy standard. Such rules shall include:

(1) A maximum average retail rate increase of one percent determined by estimating and comparing the electric utility's cost of compliance with least-cost renewable generation and the cost of continuing to generate or purchase electricity from entirely nonrenewable sources, taking into proper account future environmental regulatory risk including the risk of greenhouse gas regulation. Notwithstanding the foregoing, until June 30, 2020, if the maximum average retail

rate increase would be less than or equal to one percent if an electric utility's investment in solar-related projects initiated, owned or operated by the electric utility is ignored for purposes of calculating the increase, then additional solar rebates shall be paid and included in rates in an amount up to the amount that would produce a retail rate increase equal to the difference between a one percent retail rate increase and the retail rate increase calculated when ignoring an electric utility's investment in solar-related projects initiated, owned, or operated by the electric utility. Notwithstanding any provision to the contrary in this section, even if the payment of additional solar rebates will produce a maximum average retail rate increase of greater than one percent when an electric utility's investment in solar-related projects initiated, owned or operated by the electric utility are included in the calculation, the additional solar rebate costs shall be included in the prudently incurred costs to be recovered as contemplated by subdivision (4) of this subsection;

(2) Penalties of at least twice the average market value of renewable energy credits for the compliance period for failure to meet the targets of subsection 1 of this section. An electric utility will be excused if it proves to the commission that failure was due to events beyond its reasonable control that could not have been reasonably mitigated, or that the maximum average retail rate increase has been reached. Penalties shall not be recovered from customers. Amounts forfeited under this section shall be remitted to the department to purchase renewable energy credits needed for compliance. Any excess forfeited revenues shall be used by the division of energy solely for renewable energy and energy efficiency projects;

(3) Provisions for an annual report to be filed by each electric utility in a format sufficient to document its progress in meeting the targets;

(4) Provision for recovery outside the context of a regular rate case of prudently incurred costs and the pass-through of benefits to customers of any savings achieved by an electrical corporation in meeting the requirements of this section.

[3] 4. As provided for in this section, [except for those electrical corporations that qualify for an exemption under section 393.1050,] each electric utility shall make available to its retail customers a solar rebate for new or expanded solar electric systems sited on customers' premises, up to a maximum of twenty-five kilowatts per system, measured in direct current that were confirmed by the electric utility to have become operational in compliance with the provisions of section 386.890. The solar rebates shall be two dollars per watt for systems becoming operational on or before June 30, 2014; one dollar and fifty cents per watt for systems becoming operational between July 1, 2014, and June 30, 2015; one dollar per watt for systems becoming operational between July 1, 2015, and June 30, 2016; fifty cents per watt for systems becoming operational between July 1, 2016, and June 30, 2017; fifty cents per watt for systems becoming operational between July 1, 2017, and June 30, 2019; twenty-five cents per watt for systems becoming operational between July 1, 2019, and June 30, 2020; and zero cents per watt for systems becoming operational after June 30, 2020. An electric utility may, through its tariffs, require applications for rebates to be submitted up to one hundred eighty-two days prior to the June thirtieth operational date. Nothing in this section shall prevent an electrical corporation from offering rebates after July 1, 2020, through an approved tariff. If the electric utility determines the maximum average retail rate increase provided for in subdivision (1) of subsection [2] 3 of this section will be reached in any calendar year, the electric utility shall be entitled to cease paying rebates to the extent necessary to avoid exceeding the maximum average retail rate increase if the electrical corporation files with the commission to suspend its rebate tariff for the remainder of that calendar year at least sixty days prior to the change taking effect. The filing with the commission to suspend the electrical corporation's rebate tariff shall include the calculation reflecting that the maximum average retail rate increase will be reached and supporting documentation reflecting that the maximum average retail rate increase will be reached. The commission shall rule on the suspension filing within sixty days of the date it is filed. If the commission determines that the maximum average retail rate increase will be reached, the commission shall approve the tariff suspension. The electric utility shall continue to process and pay applicable solar rebates until a final commission ruling; however, if the continued payment causes the electric utility to pay rebates that cause it to exceed the maximum average retail rate increase, the expenditures shall be considered prudently incurred costs as contemplated by subdivision (4) of subsection [2] 3 of this section and shall be recoverable as such by the electric utility. As a condition of receiving a rebate, customers shall transfer to the electric utility all right, title, and interest in and to the renewable energy credits associated with the new or expanded solar electric system that qualified the customer for the solar rebate for a period of ten years from the date the electric utility confirmed that the solar electric system was installed and operational.

[4] 5. The department shall, in consultation with the commission, establish by rule a certification process for electricity generated from renewable resources and used to fulfill the requirements of subsection 1 of this section. Certification criteria for renewable energy generation shall be determined by factors that include fuel type, technology, and the environmental impacts of the generating facility. Renewable energy facilities shall not cause undue adverse air, water, or land use impacts, including impacts associated with the gathering of generation feedstocks. If any amount of fossil fuel is used with renewable energy resources, only the portion of electrical output attributable to renewable energy resources shall be used to fulfill the portfolio requirements.

[5. In carrying out the provisions of this section, the commission and the department shall include methane generated from the anaerobic digestion of farm animal waste and thermal depolymerization or pyrolysis for converting waste material to energy as renewable energy resources for purposes of this section.]

6. The commission shall have the authority to promulgate rules for the implementation of this section, but only to the extent such rules are consistent with, and do not delay the implementation of, the provisions of this section. [Any rule or portion of a rule, as that term is defined in section 536.010, that is created under the authority delegated in this section shall become effective only if it complies with and is subject to all of the provisions of chapter 536 and, if applicable, section 536.028. This section and chapter 536 are nonseverable and if any of the powers vested with the general assembly pursuant to chapter 536 to review, to delay the effective date, or to disapprove and annul a rule are subsequently held unconstitutional, then the grant of rulemaking authority and any rule proposed or adopted after August 28, 2013, shall be invalid and void.]

MISSOURI STATE AUDITOR'S OFFICE
FISCAL NOTE (20-114)

Subject

Initiative petition from James Owen regarding a proposed amendment to Chapter 393 of the Revised Statutes of Missouri. (Received September 4, 2019)

Date

September 24, 2019

Description

This proposal would amend Chapter 393 of the Revised Statutes of Missouri.

The amendment is to be voted on in November 2020.

Public comments and other input

The State Auditor's office requested input from the **Attorney General's office,** the **Department of Agriculture,** the **Department of Economic Development,** the **Department of Elementary and Secondary Education,** the **Department of Higher Education and Workforce Development,** the **Department of Health and Senior Services,** the **Department of Commerce and Insurance,** the **Department of Mental Health,** the **Department of Natural Resources,** the **Department of Corrections,** the **Department of Labor and Industrial Relations,** the **Department of Revenue,** the **Department of Public Safety,** the **Department of Social Services,** the **Governor's office,** the **Missouri House of Representatives,** the **Department of Conservation,** the **Department of Transportation,** the **Office of Administration,** the **Office of State Courts Administrator,** the **Missouri Senate,** the **Secretary of State's office,** the **Office of the State Public Defender,** the **State Treasurer's office, Adair County, Boone County, Callaway County, Cass County, Clay County, Cole County, Greene County, Jackson County, Jasper County, St. Charles County, St. Louis County, Taney County,** the **City of Cape Girardeau,** the **City of Columbia,** the **City of Jefferson,** the **City of Joplin,** the **City of Kansas City,** the **City of Kirksville,** the **City of Mexico,** the **City of Raymore,** the **City of St. Joseph,** the **City of St. Louis,** the **City of Springfield,** the **City of Union,** the **City of Wentzville,** the **City of West Plains, Cape Girardeau 63 School District, Hannibal 60 School District, Malta Bend R-V School District, Mehlville School District, Wellsville-Middletown R-1 School District, State Technical College of Missouri, Metropolitan Community College, University of Missouri, St. Louis Community College,** and the **Missouri Joint Municipal Electric Utility Commission**.

Assumptions

Officials from the **Attorney General's office** indicated they expect that, to the extent that the enactment of this proposal would result in increased litigation, they can absorb the costs associated with that increased litigation using existing resources. However, if the enactment of this proposal were to result in substantial additional litigation, they may request additional appropriations.

Officials from the **Department of Agriculture** indicated no fiscal impact on their department.

Officials from the **Department of Economic Development** indicated no impact to their department.

Officials from the **Department of Elementary and Secondary Education** indicated this legislation does not impact their department.

Officials the **Department of Higher Education and Workforce Development** indicated they report no cost for this initiative petition.

Officials from the **Department of Health and Senior Services** indicated this initiative petition has no impact on their department.

Officials from the **Department of Commerce and Insurance** indicated this petition, if passed, will have no cost or savings to their department.

Officials from the **Department of Mental Health** indicated this proposal creates no direct obligations or requirements to their department that would result in a fiscal impact.

Officials from the **Department of Natural Resources** indicated increased operating costs in the General Revenue Fund of $51,249 for fiscal year 2021, $87,538 for fiscal year 2022, and $88,355 for fiscal year 2023.

This initiative petition would also affect the activities of the Public Service Commission (PSC) and the Office of the Public Counsel (OPC).

This initiative petition would increase the Renewable Energy Standard requirement without changing the maximum average retail utility rate increase of one percent in current law. If this cap has not already been reached, then the proposed increases in portfolio standards could result in rate increases up to the cap.

Passed in 2008 by initiative petition, the current Renewable Energy Standard (RES) requires Missouri's regulated electric utilities to meet defined percentages of total retail electrical sales by renewable resources, increasing to 15% by 2021. The Public Service Commission (PSC) determines compliance and has promulgated rule 20 CSR 4240-20.100 to implement the RES provisions.

The Division of Energy's (DE) statutory authority under the RES law includes:

1. Certifying new eligible renewable resources (Section 393.1025(5), RSMo.); and
2. Certifying no undue adverse impacts of renewable electric generation facilities on air, water or land use, including impacts associated with the gathering of generation feedstocks (Section 393.1030.4, RSMo.).

DE has promulgated a rule to implement these provisions at 4 CSR 340-8.010.

Section 393.1025, RSMo. – This section alters the definition of "department" to reflect the transition of DE from the Department of Economic Development to the Department of Natural Resources. This section also modifies the description of "renewable energy resources," which would require a revision to DE's RES rule.

Section 393.1030, RSMo. – The current RES statute requires renewable generation to be 15% of a utility's generation (megawatt-hours) portfolio by January 1, 2021. This language would increase the requirements to the following:

1. No less than 20% for calendar years 2022 through 2024;
2. No less than 27% for calendar years 2025 through 2027;
3. No less than 35% for calendar years 2028 through 2030;
4. No less than 42% for calendar years 2031 through 2034;
5. No less than 50% for calendar year 2035 and each year thereafter.

In addition, the proposal would allow a utility to comply using verified energy savings captured due to energy efficiency or demand-side measures that are approved by the Public Service Commission.

A rulemaking would be necessary to implement the changes relating to the definition of "renewable energy resources," the changes in the required percentages of renewable generation, and the addition of energy efficiency and demand-side programs to the list of eligible measures. Both the increases in the required generation percentages and the eligibility of energy efficiency and demand-side programs would result in a greater number, and new types, of resources needing certification and may require highly technical assessments, which would necessitate one Planner I/II FTE.

Officials from the **Department of Corrections** indicated the fiscal impact is unknown. They are unable to estimate the impact of this legislation on their utility costs. However, based on research, including research completed by the Heritage Foundation, the proposed regulatory changes would be difficult to implement and could significantly increase costs to their department.

Officials from the **Department of Labor and Industrial Relations** indicated this initiative petition is expected to have no fiscal impact on their department.

Officials from the **Department of Revenue** indicated this initiative petition, as it is currently set forth, would have no impact on their department.

Officials from the **Department of Public Safety - Office of the Director** indicated they see no fiscal impact due to this legislation.

Officials from the **Department of Social Services** indicated this initiative petition will not have a fiscal impact to their department.

Officials from the **Governor's office** indicated there should be no added costs or savings to their office.

Officials from the **Missouri House of Representatives** indicated no fiscal impact to their office.

Officials from the **Department of Conservation** indicated no adverse fiscal impact to their department would be expected as a result of this proposal.

Officials from the **Department of Transportation** indicated this initiative petition is anticipated to have no fiscal impact to their department/Missouri Highways and Transportation Commission.

Officials from the **Office of Administration** indicated this proposal would change the renewable energy statutes enacted pursuant to the Missouri Clean Energy Act (Proposition C) in November 2008. This should have no impact on Total State Revenue or the calculation under Article X, Section 18(e) of the Missouri Constitution.

OA-FMDC assumes that Missouri electric providers would be required to install new renewable energy sources to meet the requirements of this petition. According to the U.S. Energy Information Administration, renewable energy resources accounted for only 5.5% of Missouri's net electricity generation in 2018. https://www.eia.gov/state/?sid=MO. OA-FMDC assumes that capital costs for installing renewable energy equipment would make it more costly for electric providers to meet the requirements of this petition and that some of those costs would be passed along to consumers.

For the Office of Administration, OA-FMDC assumes that this petition would result in higher electricity costs for state facilities; however, OA-FMDC has no way of calculating how much that increase would be.

Officials from the **Office of State Courts Administrator** indicated there is no fiscal impact on the courts.

Officials from the **Missouri Senate** indicated they anticipate no fiscal impact.

Officials from the **Secretary of State's office** indicated unless a special election is called for the purpose, Referendums are submitted to the people at the next general election. Article III section 52(b) of the Missouri Constitution authorizes the general assembly to order a special election for measures referred to the people. If a special election is called to submit a Referendum to a vote of the people, Section 115.063.2 RSMo. requires the state

to pay the costs. The cost of the special election has been estimated to be $7.8 million based on the cost of the 2016 Presidential Preference Primary.

Their office is required to pay for publishing in local newspapers the full text of each statewide ballot measure as directed by Article XII, Section 2(b) of the Missouri Constitution and Section 116.230-116.290, RSMo. Funding for this item is adjusted each year depending upon the election cycle. A new decision item is requested in odd numbered fiscal years and the amount requested is dependent upon the estimated number of ballot measures that will be approved by the General Assembly and the initiative petitions certified for the ballot. In (fiscal year) FY 2014, the General Assembly changed the appropriation so that it was no longer an estimated appropriation.

In FY19, over $5.8 million was spent to publish the full text of the measures for the August and November elections. They estimate $65,000 per page for the costs of publications based on the actual cost incurred for the one referendum that was on the August 2018 ballot.

Their office will continue to assume, for the purposes of this fiscal note, that it should have the full appropriation authority it needs to meet the publishing requirements. Because these requirements are mandatory, they reserve the right to request funding to meet the cost of their publishing requirements if the Governor and the General Assembly again change the amount or continue to not designate it as an estimated appropriation.

Officials from the **Office of the State Public Defender** indicated this initiative petition will not have a significant impact on their office.

Officials from the **State Treasurer's office** indicated no fiscal impact to their office.

Officials from **Greene County** indicated there are no estimated costs or savings to report from their county for this initiative petition.

Officials from **St. Louis County** indicated they do not think this proposed statutory amendment, if enacted, would have a fiscal impact on their county government.

Officials from the **City of Kansas City** indicated this initiative petition will have no fiscal impact on their city.

Officials from **Wellsville-Middletown R-1 School District** indicated they have no way of determining an actual cost or savings benefit to their school from this petition's proposals; however, they are fairly confident that there will be a substantial cost to all rate-payers in the state for the development of the infrastructure and technology needed to comply with this.

Officials from **Metropolitan Community College** indicated unknown fiscal impact. Additional expenses are always passed down to the consumer (assuming the electric utilities have additional expense converting energy sources). Without knowing the cost to the utility company(ies) and the downhill affect, it is difficult to know how it will affect their college. Last fiscal year (7/1/18-6/30/19), they paid $2.3 million for electricity. The

smallest increase could easily have a significant impact. For example, a 1% increase would result in $23,000 ongoing additional expense.

The State Auditor's office did not receive a response from **Adair County, Boone County, Callaway County, Cass County, Clay County, Cole County, Jackson County, Jasper County, St. Charles County, Taney County,** the **City of Cape Girardeau,** the **City of Columbia,** the **City of Jefferson,** the **City of Joplin,** the **City of Kirksville,** the **City of Mexico,** the **City of Raymore,** the **City of St. Joseph,** the **City of St. Louis,** the **City of Springfield,** the **City of Union,** the **City of Wentzville,** the **City of West Plains, Cape Girardeau 63 School District, Hannibal 60 School District, Malta Bend R-V School District, Mehlville School District, State Technical College of Missouri, University of Missouri, St. Louis Community College,** and the **Missouri Joint Municipal Electric Utility Commission**.

Fiscal Note Summary

State governmental entities estimate additional employment costs of approximately $88,000 annually. Additionally, state and local governmental entities anticipate possible increased costs of electricity, but the amount is unknown.

The Honorable Nicole Galloway
State Auditor
State Capitol Building
Jefferson City, MO 65101

RE: Petition approval request from James Owen regarding a proposed statutory amendment to Chapter 393, version 1 (2020-113)

Dear Auditor Galloway:

Enclosed please find an initiative petition sample sheet for a proposal to amend the Revised Statutes of Missouri filed by James Owen on September 3, 2019.

We are referring the enclosed petition sample sheet to you for the purposes of preparing a fiscal note and fiscal note summary as required by Section 116.332, RSMo. Section 116.175.2, RSMo requires the state auditor to forward the fiscal note and fiscal note summary to the attorney general within twenty days of receipt of the petition sample sheet.

Thank you for your immediate consideration of this request.

Sincerely,

John R. Ashcroft

Be it enacted by the people of the state of Missouri:

Sections 393.1025 through 393.1030, RSMo. are amended to read as follows:

393.1025. As used in sections 393.1020 to 393.1030, the following terms mean:

(1) "Commission", the public service commission;

(2) "Department", the department of [economic development] natural resources;

(3) "Electric utility", any electrical corporation as defined by section 386.020;

(4) "Renewable energy credit" or "REC", a tradeable certificate of proof that one megawatt-hour of electricity has been generated from renewable energy sources; and

(5) "Renewable energy resources", electric energy produced from wind, solar thermal sources, photovoltaic cells and panels, [dedicated crops grown for energy production, cellulosic agricultural residues, plant residues, methane from landfills, from agricultural operations, or from wastewater treatment, thermal depolymerization or pyrolysis for converting waste material to energy, clean and untreated wood such as pallets, hydropower (not including pumped storage) that does not require a new diversion or impoundment of water and that has a total facility nameplate rating capacity of ten megawatts or less, fuel cells using hydrogen produced by one of the above-named renewable energy sources,] and other sources of energy not including nuclear that become available after November 4, 2008, and are certified as renewable by rule by the department.

393.1030. 1. The commission shall, in consultation with the department, prescribe by rule a portfolio requirement for all electric utilities to generate or purchase electricity generated from renewable energy resources. Such portfolio requirement shall provide that electricity from renewable energy resources shall constitute the following portions of each electric utility's sales:

(1) No less than [two] twenty percent for calendar years [2011] 2022 through [2013] 2024;

(2) No less than [five] twenty-five percent for calendar years [2014] 2025 through [2017] 2027;

(3) No less than [ten] thirty percent for calendar years [2018] 2028 through [2020] 2030; [and]

(4) No less than thirty-five percent for calendar years 2031 through 2033;

(5) No less than forty percent for calendar years 2034 through 2036;

(6) No less than forty-five percent for calendar years 2037 through 2039; and

[(4)] (7) No less than [fifteen] fifty percent [in each] for calendar year [beginning in 2021] 2040 and each year thereafter.

At least two percent of each portfolio requirement shall be derived from solar energy. The portfolio requirements shall apply to all power sold to Missouri consumers whether such power is self-generated or purchased from another source in or outside of this state. [A utility may comply with the standard in whole or in part by purchasing RECs.] Each kilowatt-hour of eligible energy generated in Missouri shall count as 1.25 kilowatt-hours for purposes of compliance.

2. Notwithstanding any other provisions of this section, an electric utility may comply with this section using energy savings captured due to energy efficiency or demand-side measures. As part of its rulemaking authority pursuant to subsection 7 of this section, the commission shall prescribe a rule allowing an electric utility to comply with the portfolio requirements of subsection 1 of this section using verified megawatt-hour savings captured due to commission-approved demand-side programs under section 393.1075 during each compliance year, whether such annual energy savings is due to measures installed in that compliance year or in previous compliance years beginning with 2022. For purposes of this section, one megawatt-hour of verified energy savings captured through utility-sponsored energy efficiency programs shall count as one megawatt-hour of renewable energy generated, and an electric utility may count such savings as compliance with this section for the duration of the measure life of the energy efficiency measure.

[2] 3. The commission, in consultation with the department and within one year of November 4, 2008, shall select a program for tracking and verifying the trading of renewable energy credits. An unused credit may exist for up to three years from the date of its creation. A credit may be used only once to comply with sections 393.1020 to 393.1030 and may not also be used to satisfy any similar nonfederal requirement. An electric utility may comply with the standard in whole or in part by purchasing RECs, provided that such RECs are associated with electricity produced or procured by the electric utility and sold to Missouri customers. An electric utility may not use a credit derived from a green pricing program towards compliance with the standard. Certificates from net-metered sources shall initially be owned by the customer-generator. The commission, except where the department is specified, shall make whatever rules are necessary to enforce the renewable energy standard. Such rules shall include:

(1) A maximum average retail rate increase of one percent determined by estimating and comparing the electric utility's cost of compliance with least-cost renewable generation and the cost of continuing to generate or purchase electricity from entirely nonrenewable sources, taking into proper account future environmental regulatory risk including the risk of greenhouse gas regulation. Notwithstanding the foregoing, until June 30, 2020, if the maximum average retail

rate increase would be less than or equal to one percent if an electric utility's investment in solar-related projects initiated, owned or operated by the electric utility is ignored for purposes of calculating the increase, then additional solar rebates shall be paid and included in rates in an amount up to the amount that would produce a retail rate increase equal to the difference between a one percent retail rate increase and the retail rate increase calculated when ignoring an electric utility's investment in solar-related projects initiated, owned, or operated by the electric utility. Notwithstanding any provision to the contrary in this section, even if the payment of additional solar rebates will produce a maximum average retail rate increase of greater than one percent when an electric utility's investment in solar-related projects initiated, owned or operated by the electric utility are included in the calculation, the additional solar rebate costs shall be included in the prudently incurred costs to be recovered as contemplated by subdivision (4) of this subsection;

(2) Penalties of at least twice the average market value of renewable energy credits for the compliance period for failure to meet the targets of subsection 1 of this section. An electric utility will be excused if it proves to the commission that failure was due to events beyond its reasonable control that could not have been reasonably mitigated, or that the maximum average retail rate increase has been reached. Penalties shall not be recovered from customers. Amounts forfeited under this section shall be remitted to the department to purchase renewable energy credits needed for compliance. Any excess forfeited revenues shall be used by the division of energy solely for renewable energy and energy efficiency projects;

(3) Provisions for an annual report to be filed by each electric utility in a format sufficient to document its progress in meeting the targets;

(4) Provision for recovery outside the context of a regular rate case of prudently incurred costs and the pass-through of benefits to customers of any savings achieved by an electrical corporation in meeting the requirements of this section.

[3] 4. As provided for in this section, [except for those electrical corporations that qualify for an exemption under section 393.1050,] each electric utility shall make available to its retail customers a solar rebate for new or expanded solar electric systems sited on customers' premises, up to a maximum of twenty-five kilowatts per system, measured in direct current that were confirmed by the electric utility to have become operational in compliance with the provisions of section 386.890. The solar rebates shall be two dollars per watt for systems becoming operational on or before June 30, 2014; one dollar and fifty cents per watt for systems becoming operational between July 1, 2014, and June 30, 2015; one dollar per watt for systems becoming operational between July 1, 2015, and June 30, 2016; fifty cents per watt for systems becoming operational between July 1, 2016, and June 30, 2017; fifty cents per watt for systems becoming operational between July 1, 2017, and June 30, 2019; twenty-five cents per watt for systems becoming operational between July 1, 2019, and June 30, 2020; and zero cents per watt for systems becoming operational after June 30, 2020. An electric utility may, through its tariffs, require applications for rebates to be submitted up to one hundred eighty-two days prior to the June thirtieth operational date. Nothing in this section shall prevent an electrical corporation from offering rebates after July 1, 2020, through an approved tariff. If the electric utility determines the maximum average retail rate increase provided for in subdivision (1) of subsection [2] 3 of this section will be reached in any calendar year, the electric utility shall be entitled to cease paying rebates to the extent necessary to avoid exceeding the maximum average retail rate increase if the electrical corporation files with the commission to suspend its rebate tariff for the remainder of that calendar year at least sixty days prior to the change taking effect. The filing with the commission to suspend the electrical corporation's rebate tariff shall include the calculation reflecting that the maximum average retail rate increase will be reached and supporting documentation reflecting that the maximum average retail rate increase will be reached. The commission shall rule on the suspension filing within sixty days of the date it is filed. If the commission determines that the maximum average retail rate increase will be reached, the commission shall approve the tariff suspension. The electric utility shall continue to process and pay applicable solar rebates until a final commission ruling; however, if the continued payment causes the electric utility to pay rebates that cause it to exceed the maximum average retail rate increase, the expenditures shall be considered prudently incurred costs as contemplated by subdivision (4) of subsection [2] 3 of this section and shall be recoverable as such by the electric utility. As a condition of receiving a rebate, customers shall transfer to the electric utility all right, title, and interest in and to the renewable energy credits associated with the new or expanded solar electric system that qualified the customer for the solar rebate for a period of ten years from the date the electric utility confirmed that the solar electric system was installed and operational.

[4] 5. The department shall, in consultation with the commission, establish by rule a certification process for electricity generated from renewable resources and used to fulfill the requirements of subsection 1 of this section. Certification criteria for renewable energy generation shall be determined by factors that include fuel type, technology, and the environmental impacts of the generating facility. Renewable energy facilities shall not cause undue adverse air, water, or land use impacts, including impacts associated with the gathering of generation feedstocks. If any amount of fossil fuel is used with renewable energy resources, only the portion of electrical output attributable to renewable energy resources shall be used to fulfill the portfolio requirements.

[5. In carrying out the provisions of this section, the commission and the department shall include methane generated from the anaerobic digestion of farm animal waste and thermal depolymerization or pyrolysis for converting waste material to energy as renewable energy resources for purposes of this section.]

6. The commission shall have the authority to promulgate rules for the implementation of this section, but only to the extent such rules are consistent with, and do not delay the implementation of, the provisions of this section. [Any rule or portion of a rule, as that term is defined in section 536.010, that is created under the authority delegated in this section shall become effective only if it complies with and is subject to all of the provisions of chapter 536 and, if applicable, section 536.028. This section and chapter 536 are nonseverable and if any of the powers vested with the general assembly pursuant to chapter 536 to review, to delay the effective date, or to disapprove and annul a rule are subsequently held unconstitutional, then the grant of rulemaking authority and any rule proposed or adopted after August 28, 2013, shall be invalid and void.]

MISSOURI STATE AUDITOR'S OFFICE
FISCAL NOTE (20-113)

Subject

Initiative petition from James Owen regarding a proposed amendment to Chapter 393 of the Revised Statutes of Missouri. (Received September 4, 2019)

Date

September 24, 2019

Description

This proposal would amend Chapter 393 of the Revised Statutes of Missouri.

The amendment is to be voted on in November 2020.

Public comments and other input

The State Auditor's office requested input from the **Attorney General's office,** the **Department of Agriculture,** the **Department of Economic Development,** the **Department of Elementary and Secondary Education,** the **Department of Higher Education and Workforce Development,** the **Department of Health and Senior Services,** the **Department of Commerce and Insurance,** the **Department of Mental Health,** the **Department of Natural Resources,** the **Department of Corrections,** the **Department of Labor and Industrial Relations,** the **Department of Revenue,** the **Department of Public Safety,** the **Department of Social Services,** the **Governor's office,** the **Missouri House of Representatives,** the **Department of Conservation,** the **Department of Transportation,** the **Office of Administration,** the **Office of State Courts Administrator,** the **Missouri Senate,** the **Secretary of State's office,** the **Office of the State Public Defender,** the **State Treasurer's office, Adair County, Boone County, Callaway County, Cass County, Clay County, Cole County, Greene County, Jackson County, Jasper County, St. Charles County, St. Louis County, Taney County,** the **City of Cape Girardeau,** the **City of Columbia,** the **City of Jefferson,** the **City of Joplin,** the **City of Kansas City,** the **City of Kirksville,** the **City of Mexico,** the **City of Raymore,** the **City of St. Joseph,** the **City of St. Louis,** the **City of Springfield,** the **City of Union,** the **City of Wentzville,** the **City of West Plains, Cape Girardeau 63 School District, Hannibal 60 School District, Malta Bend R-V School District, Mehlville School District, Wellsville-Middletown R-1 School District, State Technical College of Missouri, Metropolitan Community College, University of Missouri, St. Louis Community College,** and the **Missouri Joint Municipal Electric Utility Commission**.

Assumptions

Officials from the **Attorney General's office** indicated they expect that, to the extent that the enactment of this proposal would result in increased litigation, they can absorb the costs associated with that increased litigation using existing resources. However, if the enactment of this proposal were to result in substantial additional litigation, they may request additional appropriations.

Officials from the **Department of Agriculture** indicated no fiscal impact on their department.

Officials from the **Department of Economic Development** indicated no impact to their department.

Officials from the **Department of Elementary and Secondary Education** indicated this legislation does not impact their department.

Officials the **Department of Higher Education and Workforce Development** indicated they report no cost for this initiative petition.

Officials from the **Department of Health and Senior Services** indicated this initiative petition has no impact on their department.

Officials from the **Department of Commerce and Insurance** indicated this petition, if passed, will have no cost or savings to their department.

Officials from the **Department of Mental Health** indicated this proposal creates no direct obligations or requirements to their department that would result in a fiscal impact.

Officials from the **Department of Natural Resources** indicated increased operating costs in the General Revenue Fund of $51,249 for fiscal year 2021, $87,538 for fiscal year 2022, and $88,355 for fiscal year 2023.

This initiative petition would also affect the activities of the Public Service Commission (PSC) and the Office of the Public Counsel (OPC).

This initiative petition would increase the Renewable Energy Standard requirement without changing the maximum average retail utility rate increase of one percent in current law. If this cap has not already been reached, then the proposed increases in portfolio standards could result in rate increases up to the cap.

Passed in 2008 by initiative petition, the current Renewable Energy Standard (RES) requires Missouri's regulated electric utilities to meet defined percentages of total retail electrical sales by renewable resources, increasing to 15% by 2021. The Public Service Commission (PSC) determines compliance and has promulgated rule 20 CSR 4240-20.100 to implement the RES provisions.

The Division of Energy's (DE) statutory authority under the RES law includes:

1. Certifying new eligible renewable resources (Section 393.1025(5), RSMo.); and
2. Certifying no undue adverse impacts of renewable electric generation facilities on air, water or land use, including impacts associated with the gathering of generation feedstocks (Section 393.1030.4, RSMo.).

DE has promulgated a rule to implement these provisions at 4 CSR 340-8.010.

Section 393.1025, RSMo. – This section alters the definition of "department" to reflect the transition of DE from the Department of Economic Development to the Department of Natural Resources. This section also modifies the description of "renewable energy resources," which would require a revision to DE's RES rule.

Section 393.1030, RSMo. – The current RES statute requires renewable generation to be 15% of a utility's generation (megawatt-hours) portfolio by January 1, 2021. This language would increase the requirements to the following:

1. No less than 20% for calendar years 2022 through 2024;
2. No less than 25% for calendar years 2025 through 2027;
3. No less than 30% for calendar years 2028 through 2030;
4. No less than 35% for calendar years 2031 through 2033;
5. No less than 40% for calendar years 2034 through 2036;
6. No less than 45% for calendar years 2037 through 2039; and
7. No less than 50% for calendar year 2040 and each year thereafter.

In addition, the proposal would allow a utility to comply using verified energy savings captured due to energy efficiency or demand-side measures that are approved by the Public Service Commission.

A rulemaking would be necessary to implement the changes relating to the definition of "renewable energy resources," the changes in the required percentages of renewable generation, and the addition of energy efficiency and demand-side programs to the list of eligible measures. Both the increases in the required generation percentages and the eligibility of energy efficiency and demand-side programs would result in a greater number, and new types, of resources needing certification and may require highly technical assessments, which would necessitate one Planner I/II FTE.

Officials from the **Department of Corrections** indicated the fiscal impact is unknown. They are unable to estimate the impact of this legislation on their utility costs. However, based on research, including research completed by the Heritage Foundation, the proposed regulatory changes would be difficult to implement and could significantly increase costs to their department.

Officials from the **Department of Labor and Industrial Relations** indicated this initiative petition is expected to have no fiscal impact on their department.

Officials from the **Department of Revenue** indicated this initiative petition, as it is currently set forth, would have no impact on their department.

Officials from the **Department of Public Safety - Office of the Director** indicated they see no fiscal impact due to this legislation.

Officials from the **Department of Social Services** indicated this initiative petition will not have a fiscal impact to their department.

Officials from the **Governor's office** indicated there should be no added costs or savings to their office.

Officials from the **Missouri House of Representatives** indicated no fiscal impact to their office.

Officials from the **Department of Conservation** indicated no adverse fiscal impact to their department would be expected as a result of this proposal.

Officials from the **Department of Transportation** indicated this initiative petition is anticipated to have no fiscal impact to their department/Missouri Highways and Transportation Commission.

Officials from the **Office of Administration** indicated this proposal would change the renewable energy statutes enacted pursuant to the Missouri Clean Energy Act (Proposition C) in November 2008. This should have no impact on Total State Revenue or the calculation under Article X, Section 18(e) of the Missouri Constitution.

OA-FMDC assumes that Missouri electric providers would be required to install new renewable energy sources to meet the requirements of this petition. According to the U.S. Energy Information Administration, renewable energy resources accounted for only 5.5% of Missouri's net electricity generation in 2018. https://www.eia.gov/state/?sid=MO. OA-FMDC assumes that capital costs for installing renewable energy equipment would make it more costly for electric providers to meet the requirements of this petition and that some of those costs would be passed along to consumers.

For the Office of Administration, OA-FMDC assumes that this petition would result in higher electricity costs for state facilities; however, OA-FMDC has no way of calculating how much that increase would be.

Officials from the **Office of State Courts Administrator** indicated there is no fiscal impact on the courts.

Officials from the **Missouri Senate** indicated they anticipate no fiscal impact.

Officials from the **Secretary of State's office** indicated unless a special election is called for the purpose, Referendums are submitted to the people at the next general election.

Article III section 52(b) of the Missouri Constitution authorizes the general assembly to order a special election for measures referred to the people. If a special election is called to submit a Referendum to a vote of the people, Section 115.063.2 RSMo. requires the state to pay the costs. The cost of the special election has been estimated to be $7.8 million based on the cost of the 2016 Presidential Preference Primary.

Their office is required to pay for publishing in local newspapers the full text of each statewide ballot measure as directed by Article XII, Section 2(b) of the Missouri Constitution and Section 116.230-116.290, RSMo. Funding for this item is adjusted each year depending upon the election cycle. A new decision item is requested in odd numbered fiscal years and the amount requested is dependent upon the estimated number of ballot measures that will be approved by the General Assembly and the initiative petitions certified for the ballot. In (fiscal year) FY 2014, the General Assembly changed the appropriation so that it was no longer an estimated appropriation.

In FY19, over $5.8 million was spent to publish the full text of the measures for the August and November elections. They estimate $65,000 per page for the costs of publications based on the actual cost incurred for the one referendum that was on the August 2018 ballot.

Their office will continue to assume, for the purposes of this fiscal note, that it should have the full appropriation authority it needs to meet the publishing requirements. Because these requirements are mandatory, they reserve the right to request funding to meet the cost of their publishing requirements if the Governor and the General Assembly again change the amount or continue to not designate it as an estimated appropriation.

Officials from the **Office of the State Public Defender** indicated this initiative petition will not have a significant impact on their office.

Officials from the **State Treasurer's office** indicated no fiscal impact to their office.

Officials from **Greene County** indicated there are no estimated costs or savings to report from their county for this initiative petition.

Officials from **St. Louis County** indicated they do not think this proposed statutory amendment, if enacted, would have a fiscal impact on their county government.

Officials from the **City of Kansas City** indicated this initiative petition will have no fiscal impact on their city.

Officials from **Wellsville-Middletown R-1 School District** indicated they have no way of determining an actual cost or savings benefit to their school from this petition's proposals; however, they are fairly confident that there will be a substantial cost to all rate-payers in the state for the development of the infrastructure and technology needed to comply with this.

Officials from **Metropolitan Community College** indicated unknown fiscal impact. Additional expenses are always passed down to the consumer (assuming the electric

utilities have additional expense converting energy sources). Without knowing the cost to the utility company(ies) and the downhill affect, it is difficult to know how it will affect their college. Last fiscal year (7/1/18-6/30/19), they paid $2.3 million for electricity. The smallest increase could easily have a significant impact. For example, a 1% increase would result in $23,000 ongoing additional expense.

The State Auditor's office did not receive a response from **Adair County, Boone County, Callaway County, Cass County, Clay County, Cole County, Jackson County, Jasper County, St. Charles County, Taney County,** the **City of Cape Girardeau,** the **City of Columbia,** the **City of Jefferson,** the **City of Joplin,** the **City of Kirksville,** the **City of Mexico,** the **City of Raymore,** the **City of St. Joseph,** the **City of St. Louis,** the **City of Springfield,** the **City of Union,** the **City of Wentzville,** the **City of West Plains, Cape Girardeau 63 School District, Hannibal 60 School District, Malta Bend R-V School District, Mehlville School District, State Technical College of Missouri, University of Missouri, St. Louis Community College,** and the **Missouri Joint Municipal Electric Utility Commission**.

Fiscal Note Summary

State governmental entities estimate additional employment costs of approximately $88,000 annually. Additionally, state and local governmental entities anticipate possible increased costs of electricity, but the amount is unknown.

STATE AUDITORS OFFICE

RE: Petition approval request from Mary Anne Sedey regarding a proposed constitutional amendment to Article VIII, version 8 (2020-112)

Dear Auditor Galloway:

Enclosed please find an initiative petition sample sheet for a proposal to amend the Missouri Constitution filed by Mary Anne Sedey on August 8, 2019.

We are referring the enclosed petition sample sheet to you for the purposes of preparing a fiscal note and fiscal note summary as required by Section 116.332, RSMo. Section 116.175.2, RSMo requires the state auditor to forward the fiscal note and fiscal note summary to the attorney general within twenty days of receipt of the petition sample sheet.

Thank you for your immediate consideration of this request.

Sincerely,

John R. Ashcroft

NOTICE: You are advised that the proposed constitutional amendment may change, repeal, or modify by implication or may be construed by some persons to change, repeal, or modify by implication, the following Sections of the Missouri Revised Statutes: Sections 115.003 through 115.960. The proposed amendment revises Article VIII of the Constitution by amending Sections 5 and 7, and adopting three new sections to be known as Article VIII, Sections 24, 25, and 26.

Be it resolved by the people of the state of Missouri that the Constitution be amended:

Section A. Article VIII of the Constitution is revised by amending Sections 5 and 7, and adopting three new sections to be known as Article VIII, Sections 24, 25, and 26 to read as follows:

Section 5. Registration of voters [may be provided for by law] shall occur as specified herein. All laws governing registration shall be interpreted liberally to ensure, to the extent possible, that all eligible citizens be allowed to register to vote and to vote.

(1) The secretary of state shall establish a process to conduct automatic voter registration based on driver's license information and state issued nondriver's license information.

(2) The department of revenue shall, on at least a weekly basis, provide the secretary of state with a list of eligible citizens who have applied for, applied to renew, or changed the address related to a driver's license or state issued nondriver's license, are citizens of the United States, residents of Missouri, and meet the legal criteria to be eligible to vote in the State of Missouri. Such list shall contain any information required to register to vote under applicable law, and any available electronic signature information.

(3) The secretary of state shall designate the department of social services and the department of conservation to serve as sources for lists of citizens who are eligible to vote, any available electronic signature information, and any other information required to register to vote under applicable law.

(4) The secretary of state shall designate additional state agencies including:

(a) all agencies that have current data on citizenship, residency, and age of individuals;

(b) any agency that does or could provide applicants with the opportunity to affirm voter eligibility criteria as part of their agency transaction;

(c) any agency that has records of eligible citizens who would not otherwise be registered to vote; and

(d) any agency that is required to offer voter registration services under any other provision of law, including but not limited to Section 7 of the National Voter Registration Act, as amended.

(5) Based on the lists received under this section, the secretary of state shall provide lists of citizens who are presumptively eligible to vote to local election authorities. These lists shall be sent to local election authorities as often as required by law, but at least every thirty days, and fourteen days prior to any election. These lists shall include the names of presumptively eligible voters, the information required to determine whether an individual is eligible to vote, and any available electronic signature information. The local election authorities shall include such presumptively eligible voters on voter registration lists subject to existing verification procedures for determining whether an individual is eligible to vote. Local election authorities shall retain full jurisdiction and power to decline to register individuals not verified to be eligible to vote, and in accordance with applicable state and federal law, may remove the names of individuals who are no longer eligible to vote from voter registration lists.

(6) Regardless of the amount of time it takes to process the registration, an individual shall be deemed registered to vote on the day the local election authority receives the information from the secretary of state provided that such individual is later determined eligible to vote by the local election authority. Within seven business days of the local election authority receiving an individual's information from the secretary of state, the local election authority shall update its list of eligible voters and send notice of automatic registration to newly registered voters and provide the opportunity to decline registration. Such notice may be sent in the same manner and at the same time as voter identification cards or other communication required by law. If, after a period of thirty days, the notice declining registration is not returned to the local election authority, the individual's name shall remain on the voter registration list. Any time an individual declines registration the individual's name shall be removed from the voter registration list. This subsection shall not be construed to prevent removal from voter registration lists by any other method allowed under state and federal law.

(7) The provisions of this section shall not be interpreted to invalidate any other method for voter registration.

(8) No individual who does not meet the legal criteria to be eligible to vote shall be considered to have caused a false or fictitious voter registration, if the record and signature of such individual is transmitted by the secretary of state to a local election authority pursuant to this section without the individual's affirmative consent. If such an individual is added to the voter registration list, the individual shall not be subject to any penalty under law. Upon determining such individual is not eligible to vote, the local election authority shall remove the individual from the voter registration list.

2. In order to vote in any election for which registration is required, the deadline for a person to be registered to vote in the jurisdiction of his or her residence shall be no earlier than 5:00 p.m. on the second Tuesday prior to the election, except with regard to covered voters and intrastate voters as defined by general election law. Intrastate voters may vote in their new jurisdiction if they are registered to vote in the State of Missouri.

3. Nothing in this section shall be interpreted to conflict with the Voting Rights Act of 1965, The National Voter Registration Act of 1993, The Help America Vote Act of 2002, or any other applicable federal law or regulation.

Section 7. All qualified [electors] voters of the state [who are absent, whether within or without the state,] may [be enabled by general law to] vote by absentee ballot without providing a reason at all elections by the people either in person or by mail starting forty-two days before an election. For the purposes of this section, the early voting period shall be the period when eligible voters may cast an absentee ballot in person. Procedures for voting by absentee ballot shall be the same as provided in general election law, except as provided herein.

(1) Voters who choose to vote by absentee ballot shall have the option to receive the absentee ballot in the mail or to vote in person using an absentee ballot during the early voting period. Voters who receive an absentee ballot in the mail shall be allowed to return their completed ballot and envelope by mail, or by dropping it off at any officially designated voting location during the early voting period or on election day. The local election authority may also provide additional options for returning or casting absentee ballots. Nothing in this section shall be construed to prevent a person who has received a ballot in the mail but has not returned a completed ballot from casting a regular or provisional ballot in person during the early voting period or on election day.

(2) Each local election authority shall make one or more locations available to issue absentee ballots and to receive completed absentee ballots during the early voting period. Any such designated location shall be open during the local election authority's regularly scheduled business hours and for at least eight hours on the Saturday and eight hours on the Sunday immediately prior to the election, except that the location shall be open for two hours before and two hours after regularly scheduled business hours during each of the six days before election day.

(3) Local election authorities may make absentee ballots available for voting in person during the early voting period at additional times and places beyond what is designated in subsection (2).

(4) Notwithstanding any other provision of law to the contrary, voters who cast an absentee ballot by mail shall be required to attest to and sign, whether by signature or mark, the following statement:

> I state under penalty of perjury that I am an eligible voter; that my signature and name are as shown on this envelope; that I will not cast more than one vote in this election; and that my ballot is enclosed in accordance with the provisions of the constitution and laws of this state.

However, there shall be no requirement that such signature be notarized or sworn to before the election official receiving the ballot, a notary public, other officer authorized by law to administer oaths, or any other witness.

(5) All qualified voters of the state shall be provided the opportunity to request to permanently receive absentee ballots in the mail for all future elections. An opportunity to sign up to permanently receive absentee ballots shall be provided, at a minimum, on the application for voter registration, via electronic means, and on the application to receive an absentee ballot.

(6) Absentee ballots postmarked or bearing an intelligent mail barcode traceable to a date of entry into the federal mail system on or before the day before election day shall be counted by the local election authority.

(7) Notwithstanding any other provision of law to the contrary, if an absentee ballot envelope is found to have a deficiency, the local election authority shall immediately notify the voter and shall allow the voter an opportunity to cure the deficiency at any time, but no later than seven days after the election. Notification to a voter shall first be attempted by phone or email, if the local election authority has such information, and then by first class mail.

(8) The secretary of state and all local election authorities shall make available a list of all voters who cast ballots under this section or Article VIII, section 24 of this Constitution. Such list shall include voter information that is a matter of public record. This list shall be provided in the same manner required by general election law.

Section 24. An absentee ballot of an overseas or uniformed services voter, as defined by general election law, shall be counted by the local election authority so long as the ballot is dated on or before election day and received by the local election authority within seven days of election day.

Section 25. The secretary of state in conjunction with the state auditor shall provide a recommendation to local election authorities for the best method to conduct a risk-limiting audit of election returns. Each local election authority shall adopt a method of risk-limiting audit for auditing election returns.

Section 26. All provisions of this Act are severable. If any portion, clause, or phrase of this Act is, for any reason, held to be invalid or unconstitutional by a court of competent jurisdiction, the remaining portions, clauses, and phrases shall not be affected, but shall remain in full force and effect.

MISSOURI STATE AUDITOR'S OFFICE
FISCAL NOTE (20-112)

Subject

Initiative petition from Mary Ann Sedey regarding a proposed constitutional amendment to Article VIII. (Received August 9, 2019)

Date

August 29, 2019

Description

This proposal would amend Article VIII of the Missouri Constitution.

The amendment is to be voted on in November 2020.

Public comments and other input

The State Auditor's office requested input from the **Attorney General's office,** the **Department of Agriculture,** the **Department of Economic Development,** the **Department of Elementary and Secondary Education,** the **Department of Higher Education,** the **Department of Health and Senior Services,** the **Department of Insurance, Financial Institutions and Professional Registration,** the **Department of Mental Health,** the **Department of Natural Resources,** the **Department of Corrections,** the **Department of Labor and Industrial Relations,** the **Department of Revenue,** the **Department of Public Safety,** the **Department of Social Services,** the **Governor's office,** the **Missouri House of Representatives,** the **Department of Conservation,** the **Department of Transportation,** the **Office of Administration,** the **Office of State Courts Administrator,** the **Missouri Senate,** the **Secretary of State's office,** the **Office of the State Public Defender,** the **State Treasurer's office, Adair County, Boone County, Callaway County, Cass County, Clay County, Cole County, Greene County, Jackson County, Jasper County, St. Charles County, St. Louis County, Taney County,** the **City of Cape Girardeau,** the **City of Columbia,** the **City of Jefferson,** the **City of Joplin,** the **City of Kansas City,** the **City of Kirksville,** the **City of Mexico,** the **City of Raymore,** the **City of St. Joseph,** the **City of St. Louis,** the **City of Springfield,** the **City of Union,** the **City of Wentzville,** the **City of West Plains, Cape Girardeau 63 School District, Hannibal 60 School District, Malta Bend R-V School District, Mehlville School District, Wellsville-Middletown R-1 School District, State Technical College of Missouri, Metropolitan Community College, University of Missouri, St. Louis Community College,** the **St. Louis County Board of Elections,** the **Board of Election Commissioners City of St. Louis,** the **Kansas City Board of Election Commissioners,** the **Platte County Board of Elections,** the **Jackson County Election Board,** the **Clay County Board of Election Commissioners,** and the **State Auditor's office.**

Andrew Bergerson and Jared Wight provided information to the State Auditor's office.

Assumptions

Officials from the **Attorney General's office** indicated they expect that, to the extent that the enactment of this proposal would result in increased litigation, their office can absorb the costs associated with that increased litigation using existing resources. However, if the enactment of this proposal were to result in substantial additional litigation, their office may request additional appropriations.

Officials from the **Department of Agriculture** indicated no fiscal impact on their department.

Officials from the **Department of Economic Development** indicated no impact to their department.

Officials from the **Department of Elementary and Secondary Education** indicated this legislation does not impact their department.

Officials from the **Department of Health and Senior Services** indicated this initiative petition has no impact on their department.

Officials from the **Department of Insurance, Financial Institutions and Professional Registration** indicated that this petition, if passed, will have no cost or savings to their department.

Officials from the **Department of Mental Health** indicated this proposal creates no direct obligations or requirements to their department that would result in a fiscal impact.

Officials from the **Department of Natural Resources** indicated they would not anticipate a direct fiscal impact from this proposal.

Officials from the **Department of Corrections** indicated no impact.

Officials from the **Department of Labor and Industrial Relations** indicated this initiative petition does not appear to have a fiscal impact on their department.

Officials from the **Department of Revenue** indicated this initiative petition would cause increased operating costs in the General Revenue Fund of $64,852 for fiscal year (FY) 2021 for salary cots and Office of Administration - Information Technology Services Division (OA)-ITSD costs.

The Department of Social Services, Department of Conservation, Department of Corrections, and other state agencies as described in Section 5 (4) are also affected by this proposal.

IT Consultants	75	708.48	53,136

Section 5 (2)

The proposed language requires the Department to provide, on at least a weekly basis, a list of eligible citizens who have applied for, applied to renew, or changed the address related to a driver license or nondriver license, are citizens of the United States, residents of Missouri, and meet the legal criteria to be eligible to vote in the State of Missouri. Such list shall contain any information required to register to vote and any available electronic signature information.

The Department assumes they will provide a regularly scheduled file of all driver license, nondriver license, and permit applicants who meet the minimum age criteria and who, based on application data entered, have submitted documents verifying United States citizenship. This file would include applicants who responded that they were currently registered to vote, applicants who responded that they were not registered and did not want to register to vote, and applicants who completed the voter registration applications at the time of license or permit application.

The "necessary" information is not defined, however the Department assumes that it will be required to send name, date of birth, address, at a minimum the last 4 digits of the social security number, and a copy of the applicant's signature for final voter registration processing.

The proposed language will require the Department to amend the current data files posted to the Secretary of State or develop a new file specific to automatic voter registration to include the digital image of the signature.

The requirement to submit a copy of the individual's signature will require the Department to amend current programs for on-line requests for change of mailing address since identity verification and signature collection are not currently required in this process.

The Department would be required to:

- Coordinate with the Secretary of State to develop requirements for the data and signature file specifications and file submission schedule.
- OA-ITSD must develop a data pull process for defining records for submission to Secretary of State.
- OA-ITSD must develop a secure process for tying the required signature file to the data file for submission to the Secretary of State.
- Test the file generation and transfer process to ensure all required data elements and signature are sent as required.
- Develop website information to link inquirers to the Secretary of State for information regarding the new automatic voter registration and provisions for declining automatic registration.
- Amend current programs for on-line requests for change of mailing address since identity verification and signature collection are not currently required in this process.

Administrative Impact

To implement provisions of Section 5 (2) the administrative cost may be estimated as:

Personnel Services Bureau FY 2021

Update Webpage - Administrative Analyst III	10 hrs. x $19.80 =	$198.00

Driver License Bureau FY 2021

Requirements development and testing:

Administrative Analyst II –	240 hrs. x $17.13 per hr. =	$4,111.20
Management Analyst Spec. II –	320 hrs. x $20.57 per hr. =	$6,582.40
Revenue Manager -	40 hrs. x $20.59 per hr. =	$ 824.00

Total = $11,716

OA-ITSD

The department also provided the following comments:

Section 5 (2)
For purpose of this fiscal note the Department assumes that they will apply the same requirements related to automatic voter registration specified for new and renewal applicants to individuals applying for a duplicate, reprint or replica driver license, nondriver license, instruction permit, or commercial learners permit. If it is not the sponsor's intent to include duplicate transactions, the Department recommends the sponsor amend the language to specifically prohibit.

The Department assumes it is not the sponsor's intent to forward record updates derived from other mailing address updates sources such as National Change of Address files, courts or documentation received from sources other than the applicant.

The proposed language will require the Department to amend the current data files posted to the Secretary of State or develop a new file specific to automatic voter registration to include the digital image of the signature when the application or request for update included collection of the individual's signature.

The requirement to submit a copy of the individual's signature will require the Department to amend current programs for on-line requests for change of mailing address since identity verification and signature collection are not required in this process.

Officials from the **Department of Public Safety - Office of the Director** indicated they see no fiscal impact due to this initiative petition.

Officials from the **Department of Social Services** indicated they do not anticipate a fiscal impact as a result of this initiative petition.

Officials from the **Governor's office** indicated there should be no added costs or savings to their office.

Officials from the **House of Representatives** indicated no fiscal impact to their office.

Officials from **Department of Conservation** indicated no adverse fiscal impact to their department would be expected as a result of this proposal.

Officials from the **Department of Transportation/Missouri Highways and Transportation Commission** indicated this initiative petition will have no fiscal impact, as Article IV, Section 30(b) of the Missouri Constitution limits the use of state revenue derived from highway users (SRHU). Registering citizens to vote does not relate to the design, construction, maintenance, and operation of the state highway system.

Officials from the **Office of Administration** indicated this proposal amends Article VIII of the Constitution of Missouri by amending Sections 5 and 7 and adopting three new sections.

This proposal requires the Secretary of State to establish a process to conduct automatic voter registration based on driver's license information and state issued nondriver's license information. Applicable state agencies shall provide to the Secretary of State lists of citizens eligible to vote, any available electronic signature information, and any other information required to register to vote. The Secretary of State shall provide lists of citizens who are presumptively eligible to vote to local election authorities. Local election authorities shall include such presumptively eligible voters on voter registration lists subject to existing verification procedures for voter eligibility. Individuals automatically registered to vote shall be provided an opportunity to decline registration. Individuals automatically registered to vote who are not eligible to vote shall not be subject to any penalty, and the local election authority shall remove any such individuals from the voter registration list. The deadline for voter registration shall be no earlier than 5:00 p.m. on the second Tuesday prior to the election, except with regard to covered voters and intrastate voters. Intrastate voters may vote in their new jurisdiction if they are registered to vote in Missouri.

This proposal provides that all qualified voters of the state may vote by absentee ballot without providing a reason either in person or by mail starting 42 days before an election and specifies how local election authorities are to administer absentee ballots. All qualified voters of the state shall be provided the opportunity to request to permanently receive absentee ballots in the mail for all future elections. An absentee ballot of an overseas or uniformed services voter shall be counted by the local election authority so long as the ballot is dated on or before election day and received by the election authority within 7 days of election day. The Secretary of State and all local election authorities shall make available a list of all voters who cast absentee ballots.

This proposal requires the Secretary of State in conjunction with the State Auditor to provide a recommendation to local election authorities for the best method to conduct a risk-limiting audit of election returns. Each local election authority shall adopt a method of risk-limiting audit for auditing election returns.

This proposal should not result in additional costs for their office.

Officials from the **Office of State Courts Administrator** indicated there is no fiscal impact on the courts.

Officials from the **Missouri Senate** indicated they anticipate no fiscal impact.

Officials from the **Secretary of State's office** indicated this petition would implement an automatic voter registration program. The bill would require the Department of Revenue (DOR) and other agencies to transmit to the Secretary of State (SOS) records containing information of eligible voters, based on agency records (such as driver's license applications in the case of DOR). This information is then made available to each local election authority, which will then send notice to each person giving them the opportunity to decline to be registered. For the purposes of this fiscal note, their office assumes that this information will be transmitted in an electronic format.

To implement these requirements, significant programming changes would need to be made to the centralized voter registration database (MCVR) to develop multiple new interfaces, to allow electronic transmission of electronic agency data, to sync agency data with currently existing voter information in MCVR, to allow local election authorities to generate and send notices of opportunity to decline registration, to create a queue of individuals who have been sent notice of opportunity to decline registration, and to allow information to be transferred between counties. Based on the implementation of similar systems in other states, this section would result in an estimated one-time cost of $1,000,000 in fiscal year (FY) 2021.

This bill requires local election authorities to send notice of opportunity to decline registration to each individual that is not currently a registered voter. This is a new responsibility that must be funded by the state under Article X, Section 21 of the Missouri Constitution. Based on a recent comparison of voter records to driver's license records, a total of 743,280 individuals were found to have a driver's license but were not identified as registered voters. Sending notice to each individual would cost $0.90 to mail ($0.55 for outgoing postage as of January 2019, $0.35 for the endorsement on the paid return postcard) plus the costs of printing. Postage would amount to $668,952 and printing is estimated at $33,270, for a total that could reach or exceed $702,222 (depending on the specific number of persons identified by DOR and other agencies) beginning in FY 2021.

Future notice mailings would incur costs to the state of Missouri. The cost of notice mailings in future fiscal years is unknown due to several variable factors including voter registration rates and postage cost increases.

This petition also requires local election authorities to maintain one or more locations for eight hours on the Saturday and Sunday before each election to facilitate absentee voting. While each local election authority already maintains four hours of Saturday operation as required by current law, this increase would require additional staffing costs for the equivalent of 348 judge-days statewide (two judges for 1.5 days in 116 jurisdictions). Assuming an average payment of $125 per judge-day, this would amount to $43,500 per election beginning in FY 2021.

Additionally, this petition requires local election authorities to maintain office hours for two hours earlier and two hours later than their normal business hours for six days prior to an election (while the wording is ambiguous, their assumption is that this refers to normal business days). This increase would require additional staffing costs for the equivalent of 696 judge-days statewide (two judges for the equivalent of 3 days in 116 jurisdictions). Again assuming an average payment of $125 per judge-day, this would amount to $87,000 per election beginning in FY 2021.

Their office is being conservative in assuming all new costs will be subject to Article X though there may be some legal uncertainties on this point.

Officials from the **Office of the State Public Defender** indicated this initiative petition will not have any impact on their office.

Officials from the **State Treasurer's office** indicated no fiscal impact to their office.

Officials from **Greene County** indicated the following estimate is based on U.S. Census Data that estimates current county population at **291,923**. It is estimated that **20.9%** of the population is under **18** years old, which accounts for **60,957** residents. They have on average **190,000** registered voters, of which about **30,000** (**16%)** are inactive, meaning their address is no longer verified but registered nonetheless and so they are included as part of the number below.

R's = Residents
RV's = Registered Voters
yrs = Years
PV's = Potential Voters
MC = Mailing Cost
CPC2P = Cost Per Card to Process
FTH = Fulltime Hire
AP = Annual Pay

291,923 R's – 60,957 R's under **18 yrs** = **230,966 R's 18 yrs** or older

230,966 R's 18 yrs or older – **190,000 RV's = 40,966 PV's**

40,966 PV's x .50 MC = $20,483

40,966 PV x 1.06 CPC2P = $43,423.96

If they have approximately **40,966 PV's** not registered based on the number above, and a Voter ID card is mailed to each voter as stated in the petition language at **.50** apiece, it will be a **$20,483 MC**. How will that cost be delineated in subsequent mailings is very hard to predict, but they do anticipate it will be reduced over time from the original estimate as more residents become registered.

The actual time spent to fully process any new Voter ID card is estimated at **$1.06 CPC2P**. This adds an additional **$43,423.96** to the cost when it is multiplied by the estimated **40,966** voters eligible to be registered.

There is also in the petition language additional requirements. This includes allowing new voters to register up to 2 weeks prior to an election, absentee mailing changes and risk-limited auditing requirements post-election. These additional requirements will at a minimum require an additional **2 FTH** for the office to ensure the ongoing administrative duties the petition requires will be completed on time for voters. This additional cost will be **$24,689.60** per hire for their annual pay. The total annual cost for two fulltime hires will be **$49,379.20.**

40,966 PV's x .50 MC	**= $20,483**
40,966 PV's x 1.06 CPC2P	**= $43,423.96**
2 FTH x $24,689.60 AP	**= $49,379.20**
Total:	**= $113,286.16**

The total estimated initial cost for Greene County for **IP 20-112** proposing to amend Article VIII, version 8, will cost Greene County **$113,286.16** with a minimum ongoing cost of **$49,379.20** for personnel. There will be other ongoing cost to include COLA increases, Step increases for employee pay as well as anticipated ongoing administrative cost that cannot be predicted at this time.

Officials from **St. Louis County** indicated this initiative petition does not appear as though it would have a direct fiscal impact on St. Louis County Government. However, there is the possibility that the St. Louis County Board of Elections would incur additional operational expenses and would seek additional appropriations from the County General Fund to cover the expenses. The Board of Elections intends to make a separate reply.

Officials from the **City of Kansas City** indicated this will have no fiscal impact on their city.

Officials from the **City of St. Louis/Board of Election Commissioners City of St. Louis** indicated this initiative petition would have a negative fiscal impact.

The Board of Election Commissioners is supportive of this initiative, but believes that the increase in costs would be hard to manage as a result of this amendment. Following are rough estimates for expected increases:

1) Hiring 2 full-time employees at $32,000 each.
2) Hiring 4-6 temporary staff members in the Absentee department for 10 40-hour work weeks at $15.00 an hour.
3) Printing and postal costs for applications and ballots will triple in the Absentee department, increasing expenses by $305,000.
4) Printing and postal costs for missing information letters and ENC notices will triple in the Registration department, increasing expenses by $1,205.
5) Increase in Business Reply Mail Return costs for absentee application and ballots will increase by $75,000.
6) Election day absentee ballot counters will triple in size, increasing costs by $15,000.
7) Ballot order will increase due to the increase in registrations, but the fiscal impact is tough to estimate.
8) Registration overtime costs will increase for data entry of new registrations but fiscal impact is tough to estimate.
9) Cost of supplies, such as paper, pens, etc. would increase by about $5,000.

The Director of Board of Election Commissioners noted that these are merely rough estimates and the actual fiscal impact is hard to determine.

Officials from **Wellsville-Middletown R-1 School District** indicated they do not see any fiscal impact of these petitions that is unique to their district. Any costs related to these may come out of general revenue which will have a negative impact to some degree on all state funded entities.

Officials from **Metropolitan Community College** indicated no direct fiscal impact.

Officials from the **St. Louis County Board of Elections** indicated they predict this amendment would have a fiscal impact of $47,500 per County-wide election, with an additional $9,000 annual cost. Having their office open for an additional 12 hours on the weekend and 16 hours on the weekdays, and at a rate of $5,000 per every 8 hours, this would cost $17,500. The additional absentee costs in the amendment are estimated to be about $30,000. The annual cost of sending voters postage cards to decline automatic registration would be about $9,000. It is important to note that a significant portion of all of these costs could be offset by the reduced need for polling places due to early voting.

Officials from the **Kansas City Election Board** indicated if this initiative petition is passed, election costs definitely increase at least $50,000 per election for additional postage, printing, training, staff overtime, temporary employees, legal notices and location rentals to process these additional services. Additionally, at least 2 to 4 permanent staff would need to be hired at $35,000 each, including benefits.

Officials from the **Platte County Election Board** indicated the additional hours proposed in the petition would add about $5,000 to the cost of an election.

Officials from the **State Auditor's office** indicated the proposed language, if implemented, should have no fiscal impact on their office. Any impact can be absorbed through current appropriations.

Andrew Bergerson and Jared Wight provided the following information:

Re: Fiscal-Cost Estimates for "VOTE 2020" Ballot Initiatives in 16 Variations (20-072 through 83 and 20-088 through 91)

To the Honorable Nicole Galloway, CPA, Missouri State Auditor:

Pursuant to Title IX Section 116.175 of the Missouri Constitution, we hereby submit this statement of fiscal impact to advise you and your office in estimating the fiscal cost of the "VOTE 2020" petition-based ballot initiatives to amend the Missouri Constitution. The information contained in this letter is relevant to all 16 petition variations: 20-072 through 83 and 20-088 through 91.

Drew Bergerson is a Professor of History and Jared Wight is a System Administrator, both at the University of Missouri-Kansas City. Although we submit this opinion purely as private citizens, we used our experience as social and computer scientists to do so.

We surveyed the relevant legislation proposed to the Missouri General Assembly for ten or more years, focusing especially on any associated fiscal notes from the State Auditors. We interviewed local election officials in the Kansas City and St. Louis areas. We reviewed the reports of major think tanks, non-profit organizations, and scholars who specialize in electoral practices. And we considered the reports provided by counties and states like California, Colorado, Michigan and North Carolina who recently implemented similar policies.

Below we summarize our research in seven points, including information particular to one or more variations of the ballot language where relevant.

1. **Automatic voter registration will likely incur one-time infrastructural costs of approximately $50-60,000 but are actually "unknown".**
   In the fiscal note for the recent bill with the most detailed description of one-time costs (HB 1934 McCann Beatty, 2018)[1], the State Auditor anticipated significant one-time expenses for extensive technological improvements to the Missouri Voter Registration Database ($1,000,000)[2], software programming ($27,540-$85,050), administrative costs for impacted departments ($7,228-$8,700), and employee training ($0-unknown). Missouri, however, has no reason to rely solely on its own resources for modernizing its election technologies as it has access to approximately $7.5 million for these purposes from the Federal Government.[3] According to the U. S. Election Assistance Commission, states must match Federal funds at 5%, but they may use those funds to improve elections by adding cybersecurity systems, cybersecurity training, new voting equipment with paper ballots, and post-election risk-limiting audit systems (#2 below).[4] It is therefore reasonable to assume that the fiscal impact *on the state budget* for the infrastructural items listed above would be only 5% of the total expense, or approximately $50-60,000. That said, the range of estimated costs is wide depending on how automatic voter registration is implemented in terms of infrastructural improvements. So, a more accurate assessment of cost would be "unknown".

2. **Risk-limiting audits will incur "unknown" up-front and ongoing costs.**
   For risk-limiting audits, Missouri has access to the same Federal funds at a matching rate of 5% for the purpose of upgrading our technology for cybersecurity etc.,[5] so it is reasonable to assume that infrastructural improvements for risk-limiting audits would be included in the estimates listed in #1 above. Long-term, there may be ongoing costs or even net savings; but as in #1, it is impossible to estimate them

---

[1] See also HB29, Stacy, 2019; HB 731 Manlove 2019; HB994, Price, 2019.

[2] According to Common Cause-Massachusetts, *Automatic Voter Registration Cost Report*, 05.24.2018, similar one-time improvements cost approximately $200,000 in Oregon and $434,117 in Vermont. According to WBUR News, MA State Representative John Mahoney estimated in 2018 that implementation of the Massachusetts automatic voter registration legislation would cost $500,000 up front. In the fiscal cost analysis of the Voter Access and Modernized Elections Act (HB13-1303), Colorado anticipated $644,000 to update SCORE, its Statewide Voter Registration System. The larger figure of $1,000,000 for Missouri is reasonable given the relatively backward state of our election technologies (also as per the Fiscal Note for HB 731 Manlove 2019).

[3] According to the U.S. Election Assistance Commission's Grant Expenditure Report for Fiscal Year 2018, published April 4, 2019, Missouri has spent all of the funds plus interest distributed starting in 2003 by the EAC to states under Section 101 of HAVA 2002: $6,829,277. Section 251 funds, known as Requirements Payments, were distributed to States using a formula found in HAVA based on a percentage equal to the quotient of the voting-age population of each State and the total-voting age population of all States. Missouri has spent $54,177,399, leaving a balance of $472,833 including interest. In March 2018, however, Congress provided an additional $380,000,000 through the Consolidated Appropriations Act of 2018. Missouri has currently spent $224,922, leaving a balance of $7,037,285 including interest.

[4] *Ibid.* States have until September 30, 2023 to request their funds and get the money in their accounts. Missouri spent most of its allocated 2018 HAVA Funds to implement cybersecurity enhancements that protect against attempts to penetrate the Missouri Centralized Voter Registration System. The state also hosted the National Election Security Summit attended by federal, state and local election authorities to discuss practical ways to mitigate threats and vulnerabilities.

[5] *Ibid.*

without knowing which specific kind of risk-limiting audits will be implemented. It makes sense to list them as "unknown".

3. **The first round of "opt-out" mailings for automatic voter registration will incur new costs but they are "unknown".**
   Prior bills with fiscal notes (HB 1934 McCann Beatty, 2018; HB29, Stacy, 2019; HB 731 Manlove 2019; HB994, Price, 2019) offer a wide range of estimates for the initial set of "opt-out" mailings based on the number of non-registered voters in government records.[6] Yet scholars have developed new techniques for producing more accurate lists by winnowing "deadwood" from existing voter rolls, which could reduce costs.[7]

   > **[*Included in some ballot variations*: The pre-registration of 16-17-year-old eligible voters will incur one-time costs of approximately $134,800.**
   > There will be approximately 100,000 potential new pre-registrations in the first year of 2021.[8] Based on a recent fiscal note (HB 731 Manlove 2019), we estimate one-time fiscal costs of $90,000 for postage @ $0.90 each plus printing cost of $44,800 @ $.0448 per person for a total of $134,800.]

   Due to new techniques for more accurately identifying eligible voters, it is impossible to precisely estimate the fiscal impact of this legislation. These one-time expenses are best described as "unknown".

4. **The long-term cost of automatic voter registration is also "unknown."**
   Prior fiscal notes offer a wide range of estimates for long-term costs, mostly for printing and mailing costs. Kansas City was an outlier, anticipating new staff positions at much larger expense ($180-260,000); but most local election authorities anticipated $0 impact.[9] Similarly, no additional staff was required for implementing automatic voter registration in Colorado, Oregon, and Vermont.[10] Oregon, which has a comparable number of non-registered voters (539,532) to Missouri (528,782), has

---

[6] The highest projections anticipate 743,280 individuals who, according to the Department of Motor Vehicles, have driver's licenses but are not registered voters, which makes the total cost for mailing and printing $702,222 + $33,270 = $735,492. Yet data from the United States Election Project suggests that this population estimate is two or more times too high. They estimate only 528,782 non-registered voters in 2018, and after removing ineligible voters, pegs the vote-eligible population at 357,583.

[7] Stephen Ansolabehere and Eitan Hersch, "Voter Registration: the Process and Quality of Lists," and Barry Burden and Charles Stewart, "Introduction to the Measure of American elections," both in *idem*, *The Measure of American Elections* (Cambridge, 2014).

[8] According to the Missouri Census Data Center, there were approximately 77,974 twelve-year olds in 2017 who will be sixteen in 2021 and 77,813 thirteen-year olds who will be seventeen. We assume that these figures will not significantly change in the next two years and that half of the seventeen-year olds or 38,906 could be pre-registered by existing statute which allows pre-registration at 17½ years old. Moreover, 7-8% of these eligible voters may never want to register: of the 4,570,675 Missouri citizens who were legally eligible to vote in 2018, 357,583 or 7.82% were not registered (United States Election Project; Secretary of State's Office).

[9] For prior bills with fiscal notes in Missouri (HB 1934 McCann Beatty, 2018; HB29, Stacy, 2019; HB 731 Manlove 2019; HB994, Price, 2019), local election officials have estimated the additional cost of printing and mailing postcards from $0 to $92,708 per year per election district but most anticipate being able to absorb the cost into their existing budgets.

[10] Common Cause-Massachusetts, *Automatic Voter Registration Cost Report*, 05.24.2018.

reported mailing a consistent number of 21,700 mailings per month for "opt-out" registrations at the cost of $330,217 per biennium.[11] In various states, automatic voter registration has even reduced other costs, for instance, by reducing the number of provisional ballots.[12] Arguably the largest cost savings for Missouri would come from replacing the current system of paper registration cards and manually reentering voter registrations from paper lists with digital voter registration systems.[13] In the most detailed fiscal notes to two of the prior bills (HB 1934 McCann Beatty, 2018; HB 731 Manlove 2019), the Office of the Secretary of State explicitly stated their assumption that voter lists "will be transmitted in an electronic format," no doubt in recognition of this opportunity to economize.

> [***Included in some ballot variations***: **The pre-registration of 16-17-year-old eligible voters will incur $0 ongoing costs.** Regardless whether the voter is pre-registered as a youth or registered as an adult, ongoing costs should either be the same for automatic voter registration or decrease over time through efficiencies in the system.]

Without knowing the precise nature of the new technologies and given the likelihood of opportunities to economize, it is impossible to estimate the long-term costs of automatic voter registration. They are therefore best described as "unknown."

5. **Moving the final registration date to fifteen days before election day will cost $0.**

There are no fiscal notes yet available for the two bills introduced into the Missouri General Assembly on this topic (HB 993 Price, 2019; SB 384, Schupp, 2019). Comparative research in other states who have implemented *same-day* registration either report no increase in long-term cost for new technology and staff, or report a reallocation of existing resources.[14] In 2012, California approved Conditional Voter

---

[11] *Ibid.*

[12] National Conference of State Legislatures, Automatic Voter Registration, 04.22.2019. See also Sawyer, *Early Voting Business Case* for Mecklenburg County, NC, ca. 2015.

[13] In its Election Initiative issues brief "Inaccurate, Costly, and Inefficient Evidence that America's Voter Registration System Needs an Upgrade" from 02.2012, the Pew Center on the States argues that paper registration systems are expensive compared to electronic. Where Oregon spent $4.11 per active voter to process registrations and maintain their voting list or $7.67 per transaction (new or updated registration), Canada spent $0.35 per voter to process registrations and Maricopa County, AZ reduced costs from $0.83 for paper registration to $.03 for online registration. In California, the introduction of Conditional Voter Registration was delayed from 2012 to 2017 until VoteCal, California's statewide voter registration database, was operational (see California Secretary of State and Santa Clara Registrar of Voters).

[14] According to the National Conference of State Legislators, additional technology is not required even for same-day registration. Whereas the additional administrative work can be time consuming, many states report a reallocation of existing costs and resources rather than additional costs. In 2015, Project Vote reported that most states experienced "minimal" incremental costs in the long term. Iowa introduced SDR with only a $40,000 onetime statewide expense. In 2011-12, Demos conducted a survey of counties in Iowa and North Carolina and found that a large majority reported little to no additional costs for same-day registration. Most did not require additional staffing at the polls. Any new expenses were generally associated with additional printing and mailing of registration forms. North Carolina respondents most frequently cited additional staffing at one-stop sites as the most notable cost associated with same-day registration. This need tended to increase among smaller-sized counties. The increased expenses cited

Registration (AB 1436) that allowed unregistered voters to register and vote within fifteen days of and including election day using a provisional ballot, and it became operational in 2017 (see California Secretary of State and Santa Clara Registrar of Voters). Their State Legislature anticipated increases in cost of $5-10,000 per county but only due to the provisions of the law related to same-day registration.[15] The legislation proposed in Missouri sets the registration deadline at fifteen days before election day as well but *without* the option for same-day registration.[16] It is therefore reasonable to assume that no additional technology or staff would be required and therefore this aspect of the legislation would incur $0 new costs.

6. **The cost to allow all eligible voters to vote "without excuse" by absentee ballot[17] is "unknown" if not $0.**

The number of absentee ballots cast in Missouri fluctuated between 5.7% and 9.6% in 2008-2012.[18] According to the fiscal notes associated with past bills in the Missouri General Assembly (HB173, Conway, 2017; HB644, Smith, 2017; HB29, Stacy, 2019; HB202, Shull, 2019) as well as proposed constitutional amendments (HJR 90, Dugger, 2014), most local election officials did not respond with feedback or stated that the impact would be negligible on their expenses. By contrast, the local election officials from Audrain, Kansas City, Platt, and St. Louis Counties estimated increased costs ranging from $1,700 to $32,000 due to increased postage, printing, and staff. In more recent bills (HB368, McGaugh, 2019; HB527, Stevens, 2019; HB992, Price, 2019), however, the local election officials from Platt and St. Louis Counties estimate $0 fiscal impact for similar policies. Given such wildly different cost estimates from rural, suburban, and urban counties, the Committee on Legislative Oversight correctly notes that there could be a potential increase in costs but the actual fiscal impact is "unknown" if not $0. Costs (i.e. for increased staff) may increase in the short term if voters suddenly switch to permanent absentee voting by mail before the necessary infrastructure has been created; but in general, political scientists note that state- and even county-specific voting cultures are often strong predictors of future behavior; which suggests that

---

in North Carolina may not be entirely attributable to same-day registration, however. Most counties that reported adding staff were unable to disaggregate same-day registration costs from overall early voting expenses.

[15] The California Assembly predicted a modest cost increase of "$5,000 to $10,000 per county annually to accommodate voter registration, *principally on election day*, at county elections offices. This includes the costs for staffing, providing sufficient ballot types for a voter residing anywhere in the county, processing the additional voter registrations, and any additional handling associated with processing the ballots" (our *italics*). Yet they admitted that these costs will vary according to county, popularity of option, turnout, and other factors, including the number of existing provisional ballots.

[16] The other factor increasing anticipated costs in the California case was the need to process provisional ballots after election day. The Senate for instance predicted that an increase in last minute voter registration would necessitate additional labor, overtime, computers, ballots, networks, and security *on election day* and also in order to complete the processing of *more provisional ballots* during the 28 day canvas period after an election. In the proposed Missouri legislation, automatic voter registration should decrease the need for provisional ballots.

[17] including both temporarily and permanently options as well as military and overseas voters

[18] Christopher Mann, "Mail Ballots in the United States: Policy Choice and Administrative Challenges," in Burden and Stewart, *Measure*, p. 118.

there will be some inertia when it comes to voting practices and therefore a more gradual adjustment period.[19] With the implementation of the Voter's Choice Act in California, for instance, Madera County saw an increase in voting by mail from 64% to 93% in 2018, but because VCA actually *required* ballots to be mailed in that county.[20] By contrast, Mecklenburg County in North Carolina saw a more gradual increase in early voting but relatively stable percentages of no-excuse absentee ballots since the introduction of both.[21] It thus seems reasonable to assume, given the fact that both in-person and mail-in absentee ballots would be available during the 42 day early voting period, that most local election officials would be able to absorb this work using existing resources of staff and space.[22] For, the data from other states suggest that mail-in balloting significantly *reduces* the cost per vote of elections. Although it requires short-term increases in voter education programs and can incur expenses through trial and error with the number of voting centers, most local election officials who have made the transition to vote-by-mail systems anticipate long-term cost savings as a result of reduced labor costs by replacing many poll workers with fewer voter center workers as well as fewer voting machines.[23] Given the likelihood of short-term cost fluctuations together with long-term savings, both of an indeterminate quantity, it makes sense to describe the fiscal impact as "unknown."

7. Early voting has an uncertain impact on the cost of elections ranging from "unknown" cost increases to "unknown" cost savings.

There are an unpredictably wide range of variables that could impact the cost of early voting, resulting in wildly disparate predictions of fiscal impact.[24] It seems reasonable to presume that local election officials will use the flexibility inherent in this legislation to try to avoid new costs.[25] For both practical and financial reasons,

[19] Burden and Stewart, *Measure.*

[20] Madera County, CA, Election Administration Plan 2018.

[21] As per Hannah Sawyer, an intern who worked at the Mecklenburg County Board of Elections, who authored a Six Sigma study as part of her MPA entitled *Early Voting Business Case* [ca. 2015].

[22] See for instance Sawyer, *Early Voting*.

[23] In California, "the Nevada County Elections Office has determined that costs will exceed savings with the first implementation of the VCA. However, the Nevada County Elections Office predicts that over time conducting elections in accordance with the VCA will encourage savings based on evidence from Colorado who implemented a similar elections model." (Nevada County Election Administration Plan 2018; see also Madera County Election Administration Plan 2018, Napa County Election Administration Plan 2018, Sacramento County Election Administration Plan's Appendix J, 2018). According to the Pew Charitable Trusts' issue brief "Colorado Voting Reforms: Early Results 2013" from March 22, 2016, the statewide average cost per vote in Colorado decreased in the wake of their Voter Access and Modernized Elections Act of May 2013 from $15.96 in 2008 to $9.56 in 2014 due to reduced labor, printing, postage, and miscellaneous costs. On-demand ballot printing at vote centers reduced the total number of ballots that need to be printed. Moving from assigned polling places to fewer vote centers also required less staff.

[24] For HJR 90 (Dugger, 2014), St. Louis County assumed that they would be required to open seven satellite sites at an estimated annual cost for the location, paper and labor of $1,737,892 per election as well as non-recurring start-up costs to be $1,195,678. Yet these estimates do not consider the cost savings of reducing precincts during election day, using less voting equipment, and other factors, which would have considerable impact on an election district with a large population of registered voters. By contrast, most local election officials did not even bother to respond to the request for a fiscal note, suggesting little concern for increased costs.

[25] For instance, Illinois mandates that early voting centers must be provided at public universities (Early Voting report from NYU's Brennan Center for Justice). Local election officials could save money by using the existing local election facility itself as one of their

we anticipate that local election officials would want to provide one voting center for approximately 50,000 registered (35,000 likely) voters.[26] The 102 rural counties in Missouri with fewer than 50,000 voters may incur costs only for the stipulated overtime for its staff on the Saturday and Sunday before election day.

> [***Included in some ballot variations***: **Early voting includes the two hours before and two hours after regularly scheduled business hours during each of the six business days before election day.** This may also result in modest increased costs for less populous counties.]

Yet local election authorities may be able to absorb those costs by adjusting existing work schedules.[27] In the sixteen suburban, exurban, or urban districts in Missouri with 50,000 or more registered voters, including St. Louis with more than 750,000 registered (457,609 likely) voters, local election officials should be able to reallocate resources from their many precincts into consolidated early voting centers to actually incur cost savings.[28] This consolidation would allow the local election officials to rely on their best workers and reduce the number of required voting machines (and associated costs for transportation and rental space), as has happened in other states.[29] It also reduces the number of provisional ballots.[30] Overall, early voting has been proven in other states to drastically reduce costs in the long-term and/or

---

voting centers (such as the County Clerk's office) and using other publicly owned (municipal, county, and state) facilities for the auxiliary centers as needed (such as civic centers, firehouses, high school gymnasiums, or public university buildings). The latter are typically located in central locations, accessible by public transportation, open on a similar schedule as the local election officials office, provide public parking, and can be secured such that the machines do not need to be removed each day. Other popular alternatives in states with early voting include retail stores, bus stations, hotels, and supermarkets. (Robert Stein and Greg Vonnahme, "Polling Place Practices and the Voting Experience," in Burden and Stewart, *Measure*, p. 170-72)

[26] Prior bills submitted to the Missouri General Assembly stipulated a range of formulae: one voting center for every three existing precincts (HB994, Price, 2019) which results in a very large price tag of $9,764,250 in new election costs; one additional voting site for more than 175,000 registered voters (HB848, Neth, 2013) or a staggered scale thereafter for every 75,000 voters (HJR5, Merideth, 2019), which would only impact six local election officials; one voting center for every 50,000 residents (HB501, Newman, 2017; HB1550, Newman, 2018) which would require 49 voting centers statewide; or no formula at all (HJR 90 Dugger, 2014). See also Matt Blunt Early Voting Report, n.d., and Jason Kander, Time for Early Voting, 2013.

[27] If local election officials do require paying overtime for the two weekend days, a reasonable estimate based on Jackson County figures would be $30.60 per hour per employee (at time and a half) for two employees for 16 hours total, or $979.47 per county. (See data from Secretary of State's Office and HB994, Price, 2019)

[28] For instance, the Jackson County Election Board currently has 239 precincts for 254,769 registered and 151,029 likely voters that they currently open only on election day, for which they pay $200.00 per precinct (for a total of $47,800) plus 2 judges per site @ $12.00 per hour for 8 hours per day ($192 per precinct = $45,888). If they chose to participate in early voting, the local election official might instead open 5 voting centers in public buildings including the local election official itself (at $0 cost) which requires 2 judges per site @ $12.00 per hour for 8 hours per day for 42 days as well as 2 weekend days before election day for a total of $42,240 or half the current cost [*alternate ballot language*: with an additional $288 for the additional two hours before and after regular business hours on the six days before election day]. (See data from Secretary of State's Office and HB994, Price, 2019; compare to Sacramento County Election Administration Plan's Appendix J, 2018)

[29] Between 1999 and 2001, North Carolina introduced no excuse absentee ballots and an eighteen-day early voting period. According to Sawyer's *Early Voting*, Mecklenburg County, NC, was able to significantly reduce the number of required machines at a cost savings of $1,261,700 in purchase price and maintenance costs by using the same machines on both election day and during the early voting period. The more people who voted early (62% in 2012, 75% anticipated in 2016), the more they maximized existing infrastructure, halving the annualized cost of each machine from $685.56 to $309 over a ten-year period.

[30] Mecklenburg County NC (*ibid.*) recorded a reduction from 3,156 provisional ballots in 1996 to 1,522 in 2012 due to early voting. The Pew Charitable Trusts reported in "Colorado Voting Reforms: Early Results 2013" on March 22, 2016, that there was a remarkable 98% reduction in provisional ballots cast in Colorado.

allowed for the reallocation of scarce resources.[31] Crucial to estimating the fiscal impact of these ballot initiatives is the fact that they allow local election officials to determine the number of early voting centers and allows them to increase hours of operation beyond the minimum based on local circumstances. Opening a second early voting center may not make fiscal sense for a district with only 2-5,000 registered voters; but additional voting centers or longer hours may enable more populous jurisdictions to make better and more dynamic use of existing resources.[32] Doing so may require some trial and error, as other states have experienced.[33] Given the flexibility in the legislation to adapt to local conditions and the fact additional centers and hours are entirely optional, the fiscal impact cannot be precisely measured.

Individually, the vast majority of these costs are either $0 or "unknown". Taken together, there is a strong likelihood of new short-term expenses along with significant opportunities for long-term cost savings. These variables make it impossible to estimate the net fiscal impact of this multifaceted legislation.[34] We therefore advise the State Auditor to summarize its potential cost to taxpayers as **$0 to "unknown"** since that is the most accurate description of its overall fiscal impact.

Yours sincerely,

Andrew Stuart Bergerson, 5601 Locust Street, Kansas City, MO, 64110, and
Jared Wight, 5711 Holmes Street, Kansas City, MO, 64110

---

[31] Between 2008 and 2016, voter transactions in Mecklenburg County NC (*ibid.*) cost $2.48-$3.57 per early vote in contrast to $7.19-$11.69 for election-day voting. See also Pew Charitable Trusts, "Colorado Voting Reforms: Early Results 2013", March 22, 2016.

[32] For instance, Buchanan County with 52,996 registered (30,117 current) voters in 2018 could process on average 1204 registered voters per 8-hour day or 151 per hour in an early voting period of 44 days (including weekend days before election day) if they restricted themselves to just the existing local election authority's offices as their voting center. Adding a second early voting center would reduce these rates to a more manageable 602 per day and 75 per hour. By contrast, Macon County with 10,805 registered (6,591 current) voters in 2018 could already process on average 246 registered voters per day or 31 per hour in a single voting center without having to open a second center. [*Alternate voting language*: extended business hours in the six days before election day would further reduce the number of voters per hour on average.]

[33] Colorado's General Assembly has passed a new bill HB19-1278 (2019) that would change the formula for determining how many ballot drop boxes and vote centers are required in order to address isolated instances of long lines on election day. In 2018, researchers from USC and UC-Riverside found elections officials faced a number of unexpected hurdles with the Voter's Choice Act. As John Myers of the Los Angeles Times reported on 21 April 2019: "Costs went up in some counties, as workers at vote centers needed additional training and counties replaced the often no-fee locations for polling places with buildings that had to be rented for a week or more. Some local officials said they needed more vote centers than the minimum required by the state law, especially on election day — for whatever reason, a number of voters didn't use the service until the last minute." The researchers concluded: "The culture of in-person voting on one single day will require more than one election cycle to change." In the long-term, however, the four original counties in California who implemented the Voter's Choice Act all anticipate long-term costs savings (Madera County Election Administration Plan 2018; Nevada County Election Administration Plan 2018; Napa County Election Administration Plan 2018; Sacramento County Election Administration Plan's Appendix J, 2018).

[34] The House Fiscal Agency in Michigan drew a similar conclusion regarding the 2018 ballot proposal 3 Promote the Vote, which included many similar features and is the foundation for the Missouri legislation. "The various rights proposed in the amendment would have *separate indeterminate costs*, but they will likely entail *marginal* increased costs for local units of government and o*verall decreased* expenditures from the state, with some marginal cost increases for the Department of State (DOS)." (our *italics*)

The State Auditor's office did not receive a response from the **Department of Higher Education, Adair County, Boone County, Callaway County, Cass County, Clay County, Cole County, Jackson County, Jasper County, St. Charles County, Taney County,** the **City of Cape Girardeau,** the **City of Columbia,** the **City of Jefferson,** the **City of Joplin,** the **City of Kirksville,** the **City of Mexico,** the **City of Raymore,** the **City of St. Joseph,** the **City of Springfield,** the **City of Union,** the **City of Wentzville,** the **City of West Plains, Cape Girardeau 63 School District, Hannibal 60 School District, Malta Bend R-V School District, Mehlville School District, State Technical College of Missouri, University of Missouri, St. Louis Community College,** the **Jackson County Election Board,** and the **Clay County Board of Election Commissioners.**

Fiscal Note Summary

State governmental entities expect one-time costs of at least $1 million and possible ongoing costs. Local governments are expected to have costs of an unknown amount totaling at least $745,000 in one-time costs, $192,000 in annual costs, and $658,000 in costs per election.

RE: Petition approval request from Mary Anne Sedey regarding a proposed constitutional amendment to Article VIII, version 7 (2020-111)

Dear Auditor Galloway:

Enclosed please find an initiative petition sample sheet for a proposal to amend the Missouri Constitution filed by Mary Anne Sedey on August 8, 2019.

We are referring the enclosed petition sample sheet to you for the purposes of preparing a fiscal note and fiscal note summary as required by Section 116.332, RSMo. Section 116.175.2, RSMo requires the state auditor to forward the fiscal note and fiscal note summary to the attorney general within twenty days of receipt of the petition sample sheet.

Thank you for your immediate consideration of this request.

Sincerely,

John R. Ashcroft

cc: Hon. Eric S. Schmitt
Sheri Hoffman
Trish Vincent

NOTICE: You are advised that the proposed constitutional amendment may change, repeal, or modify by implication or may be construed by some persons to change, repeal, or modify by implication, the following Sections of the Missouri Revised Statutes: Sections 115.003 through 115.960. The proposed amendment revises Article VIII of the Constitution by amending Sections 5 and 7, and adopting four new sections to be known as Article VIII, Sections 24, 25, 26, and 27.

Be it resolved by the people of the state of Missouri that the Constitution be amended:

Section A. Article VIII of the Constitution is revised by amending Sections 5 and 7, and adopting four new sections to be known as Article VIII, Sections 24, 25, 26, and 27 to read as follows:

Section 5. Registration of voters [may be provided for by law] shall occur as specified herein. All laws governing registration shall be interpreted liberally to ensure, to the extent possible, that all eligible citizens be allowed to register to vote and to vote.

(1) The secretary of state shall establish a process to conduct automatic voter registration based on driver's license information and state issued nondriver's license information.

(2) The department of revenue shall, on at least a weekly basis, provide the secretary of state with a list of eligible citizens who have applied for, applied to renew, or changed the address related to a driver's license or state issued nondriver's license, are citizens of the United States, residents of Missouri, and meet the legal criteria to be eligible to vote in the State of Missouri. Such list shall contain any information required to register to vote under applicable law, and any available electronic signature information.

(3) The secretary of state shall designate the department of social services and the department of conservation to serve as sources for lists of citizens who are eligible to vote, any available electronic signature information, and any other information required to register to vote under applicable law.

(4) The secretary of state shall designate additional state agencies including:

(a) all agencies that have current data on citizenship, residency, and age of individuals;

(b) any agency that does or could provide applicants with the opportunity to affirm voter eligibility criteria as part of their agency transaction;

(c) any agency that has records of eligible citizens who would not otherwise be registered to vote; and

(d) any agency that is required to offer voter registration services under any other provision of law, including but not limited to Section 7 of the National Voter Registration Act, as amended.

(5) Based on the lists received under this section, the secretary of state shall provide lists of citizens who are presumptively eligible to vote to local election authorities. These lists shall be sent to local election authorities as often as required by law, but at least every thirty days, and fourteen days prior to any election. These lists shall include the names of presumptively eligible voters, the information required to determine whether an individual is eligible to vote, and any available electronic signature information. The local election authorities shall include such presumptively eligible voters on voter registration lists subject to existing verification procedures for determining whether an individual is eligible to vote. Local election authorities shall retain full jurisdiction and power to decline to register individuals not verified to be eligible to vote, and in accordance with applicable state and federal law, may remove the names of individuals who are no longer eligible to vote from voter registration lists.

(6) Regardless of the amount of time it takes to process the registration, an individual shall be deemed registered to vote on the day the local election authority receives the information from the secretary of state provided that such individual is later determined eligible to vote by the local election authority. Within seven business days of the local election authority receiving an individual's information from the secretary of state, the local election authority shall update its list of eligible voters and send notice of automatic registration to newly registered voters and provide the opportunity to decline registration. Such notice may be sent in the same manner and at the same time as voter identification cards or other communication required by law. If, after a period of thirty days, the notice declining registration is not returned to the local election authority, the individual's name shall remain on the voter registration list. Any time an individual declines registration the individual's name shall be removed from the voter registration list. This subsection shall not be construed to prevent removal from voter registration lists by any other method allowed under state and federal law.

(7) The provisions of this section shall not be interpreted to invalidate any other method for voter registration.

(8) No individual who does not meet the legal criteria to be eligible to vote shall be considered to have caused a false or fictitious voter registration, if the record and signature of such individual is transmitted by the secretary of state to a local election authority pursuant to this section without the individual's affirmative consent. If such an individual is added to the voter registration list, the individual shall not be subject to any penalty under law. Upon determining such individual is not eligible to vote, the local election authority shall remove the individual from the voter registration list.

2. In order to vote in any election for which registration is required, the deadline for a person to be registered to vote in the jurisdiction of his or her residence shall be no earlier than 5:00 p.m. on the second Tuesday prior to the election, except with regard to covered voters and intrastate voters as defined by general election law. Intrastate voters may vote in their new jurisdiction if they are registered to vote in the State of Missouri.

3. Nothing in this section shall be interpreted to conflict with the Voting Rights Act of 1965, The National Voter Registration Act of 1993, The Help America Vote Act of 2002, or any other applicable federal law or regulation.

Section 7. All qualified [electors] voters of the state [who are absent, whether within or without the state,] may [be enabled by general law to] vote by absentee ballot without providing a reason at all elections by the people either in person or by mail starting forty-two days before an election. For the purposes of this section, the early voting period shall be the period when eligible voters may cast an absentee ballot in person. Procedures for voting by absentee ballot shall be the same as provided in general election law, except as provided herein.

(1) Voters who choose to vote by absentee ballot shall have the option to receive the absentee ballot in the mail or to vote in person using an absentee ballot during the early voting period. Voters who receive an absentee ballot in the mail shall be allowed to return their completed ballot and envelope by mail, or by dropping it off at any officially designated voting location during the early voting period or on election day. The local election authority may also provide additional options for returning or casting absentee ballots. Nothing in this section shall be construed to prevent a person who has received a ballot in the mail but has not returned a completed ballot from casting a regular or provisional ballot in person during the early voting period or on election day.

(2) Each local election authority shall make one or more locations available to issue absentee ballots and to receive completed absentee ballots during the early voting period. Any such designated location shall be open during the local election authority's regularly scheduled business hours and for at least eight hours on the Saturday and eight hours on the Sunday immediately prior to the election, except that the location shall be open for two hours before and two hours after regularly scheduled business hours during each of the six days before election day.

(3) Local election authorities may make absentee ballots available for voting in person during the early voting period at additional times and places beyond what is designated in subsection (2).

(4) Notwithstanding any other provision of law to the contrary, voters who cast an absentee ballot by mail shall be required to attest to and sign, whether by signature or mark, the following statement:

> I state under penalty of perjury that I am an eligible voter; that my signature and name are as shown on this envelope; that I will not cast more than one vote in this election; and that my ballot is enclosed in accordance with the provisions of the constitution and laws of this state.

However, there shall be no requirement that such signature be notarized or sworn to before the election official receiving the ballot, a notary public, other officer authorized by law to administer oaths, or any other witness.

(5) All qualified voters of the state shall be provided the opportunity to request to permanently receive absentee ballots in the mail for all future elections. An opportunity to sign up to permanently receive absentee ballots shall be provided, at a minimum, on the application for voter registration, via electronic means, and on the application to receive an absentee ballot.

(6) Absentee ballots postmarked or bearing an intelligent mail barcode traceable to a date of entry into the federal mail system on or before the day before election day shall be counted by the local election authority.

(7) Notwithstanding any other provision of law to the contrary, if an absentee ballot envelope is found to have a deficiency, the local election authority shall immediately notify the voter and shall allow the voter an opportunity to cure the deficiency at any time, but no later than seven days after the election. Notification to a voter shall first be attempted by phone or email, if the local election authority has such information, and then by first class mail.

Section 24. An absentee ballot of an overseas or uniformed services voter, as defined by general election law, shall be counted by the local election authority so long as the ballot is dated on or before election day and received by the local election authority within seven days of election day.

Section 25. The secretary of state in conjunction with the state auditor shall provide a recommendation to local election authorities for the best method to conduct a risk-limiting audit of election returns. Each local election authority shall adopt a method of risk-limiting audit for auditing election returns.

Section 26. A citizen who is at least 16 years old and otherwise meets all eligibility requirements of Section 2 shall be provided an opportunity to pre-register to vote as provided herein.

(1) Such individual may pre-register pursuant to the registration process in Section 5 of this Article; or

(2) Such individual may choose to register pursuant to any other registration procedure available under general election law.

(3) Notwithstanding pre-registration, such individual shall not be eligible to vote unless they will be 18 years of age or older on or before the day of the election in which they seek to cast a ballot.

Section 27. All provisions of this Act are severable. If any portion, clause, or phrase of this Act is, for any reason, held to be invalid or unconstitutional by a court of competent jurisdiction, the remaining portions, clauses, and phrases shall not be affected, but shall remain in full force and effect.

MISSOURI STATE AUDITOR'S OFFICE
FISCAL NOTE (20-111)

Subject

Initiative petition from Mary Ann Sedey regarding a proposed constitutional amendment to Article VIII. (Received August 9, 2019)

Date

August 29, 2019

Description

This proposal would amend Article VIII of the Missouri Constitution.

The amendment is to be voted on in November 2020.

Public comments and other input

The State Auditor's office requested input from the **Attorney General's office,** the **Department of Agriculture,** the **Department of Economic Development,** the **Department of Elementary and Secondary Education,** the **Department of Higher Education,** the **Department of Health and Senior Services,** the **Department of Insurance, Financial Institutions and Professional Registration,** the **Department of Mental Health,** the **Department of Natural Resources,** the **Department of Corrections,** the **Department of Labor and Industrial Relations,** the **Department of Revenue,** the **Department of Public Safety,** the **Department of Social Services,** the **Governor's office,** the **Missouri House of Representatives,** the **Department of Conservation,** the **Department of Transportation,** the **Office of Administration,** the **Office of State Courts Administrator,** the **Missouri Senate,** the **Secretary of State's office,** the **Office of the State Public Defender,** the **State Treasurer's office, Adair County, Boone County, Callaway County, Cass County, Clay County, Cole County, Greene County, Jackson County, Jasper County, St. Charles County, St. Louis County, Taney County,** the **City of Cape Girardeau,** the **City of Columbia,** the **City of Jefferson,** the **City of Joplin,** the **City of Kansas City,** the **City of Kirksville,** the **City of Mexico,** the **City of Raymore,** the **City of St. Joseph,** the **City of St. Louis,** the **City of Springfield,** the **City of Union,** the **City of Wentzville,** the **City of West Plains, Cape Girardeau 63 School District, Hannibal 60 School District, Malta Bend R-V School District, Mehlville School District, Wellsville-Middletown R-1 School District, State Technical College of Missouri, Metropolitan Community College, University of Missouri, St. Louis Community College,** the **St. Louis County Board of Elections,** the **Board of Election Commissioners City of St. Louis,** the **Kansas City Board of Election Commissioners,** the **Platte County Board of Elections,** the **Jackson County Election Board,** the **Clay County Board of Election Commissioners,** and the **State Auditor's office.**

Andrew Bergerson and Jared Wight provided information to the State Auditor's office.

Assumptions

Officials from the **Attorney General's office** indicated they expect that, to the extent that the enactment of this proposal would result in increased litigation, their office can absorb the costs associated with that increased litigation using existing resources. However, if the enactment of this proposal were to result in substantial additional litigation, their office may request additional appropriations.

Officials from the **Department of Agriculture** indicated no fiscal impact on their department.

Officials from the **Department of Economic Development** indicated no impact to their department.

Officials from the **Department of Elementary and Secondary Education** indicated this legislation does not impact their department.

Officials from the **Department of Health and Senior Services** indicated this initiative petition has no impact on their department.

Officials from the **Department of Insurance, Financial Institutions and Professional Registration** indicated that this petition, if passed, will have no cost or savings to their department.

Officials from the **Department of Mental Health** indicated this proposal creates no direct obligations or requirements to their department that would result in a fiscal impact.

Officials from the **Department of Natural Resources** indicated they would not anticipate a direct fiscal impact from this proposal.

Officials from the **Department of Corrections** indicated no impact.

Officials from the **Department of Labor and Industrial Relations** indicated this initiative petition does not appear to have a fiscal impact on their department.

Officials from the **Department of Revenue** indicated this initiative petition would cause increased operating costs in the General Revenue Fund of $83,483 for fiscal year (FY) 2021 for salary cots and Office of Administration - Information Technology Services Division (OA)-ITSD costs.

The Department of Social Services, Department of Conservation, Department of Corrections, and other state agencies as described in Section 5 (4) are also affected by this proposal.

IT Consultants	75	885.60	66,420

Section 5 (2)

The proposed constitutional amendment petition language requires the Department to provide, on at least a weekly basis, a list of eligible citizens who have applied for, applied to renew, or changed the address related to a driver license or nondriver license, are citizens of the United States, residents of Missouri, and meet the legal criteria to be eligible to vote in the State of Missouri. Such list shall contain any information required to register to vote and any available electronic signature information.

The Department assumes they will provide a regularly scheduled file of all driver license, nondriver license, and permit applicants who meet the minimum age criteria and who, based on application data entered, have submitted documents verifying United States citizenship. This file would include applicants who responded that they were currently registered to vote, applicants who responded that they were not registered and did not want to register to vote, and applicants who completed the voter registration applications at the time of license or permit application.

The "necessary" information is not defined, however the Department assumes that it will be required to send name, date of birth, address, at a minimum the last 4 digits of the social security number, and a copy of the applicant's signature for final voter registration processing.

The proposed language will require the Department to amend the current data files posted to the Secretary of State or develop a new file specific to automatic voter registration to include the digital image of the signature.

The requirement to submit a copy of the individual's signature will require the Department to amend current programs for on-line requests for change of mailing address since identity verification and signature collection are not currently required in this process.

The Department would be required to:

- Coordinate with the Secretary of State to develop requirements for the data and signature file specifications and file submission schedule.
- Coordinate with OA-ITSD to develop a data pull process for defining records for submission to Secretary of State.
- Coordinate with OA-ITSD to develop a secure process for tying the required signature file to the data file for submission to the Secretary of State.
- Test the file generation and transfer process to ensure all required data elements and signature are sent as required.
- Develop website information to link inquirers to the Secretary of State for information regarding the new automatic voter registration and provisions for declining automatic registration.
- Amend current programs for on-line requests for change of mailing address since identity verification and signature collection are not currently required in this process.

- Implement MEDL changes to the signature collection and certification processes for all transactions to include updates related to automatic voter registration.
- Implement modifications to license verification statement or generated money receipt or temporary driving privilege document to include additional information related to automatic voter registration.

Section 27

An individual who is at least 16 years old and otherwise meets all eligibility requirements to vote shall be pre-registered to vote as provided herein.

(1) Such individuals shall be pre-registered pursuant to the registration process in Section 5 of this Article.
(2) Such individual may choose to register pursuant to any other registration procedure available under general election law.

The Department would be required to:

- Develop file generation edits to ensure driver license, nondriver license, and permit applicants age 16 and over are included in the new weekly file sent to the Secretary of State.
- Implement MEDL changes to enable voter questions and responses to any eligible applicant age 16 and older.

Administrative Impact

To implement provisions of Section 5 (2) the administrative cost may be estimated as:

Personnel Services Bureau FY 2021

Update Webpage - Administrative Analyst III	10 hrs. x $19.80 =	$198.00

Driver License Bureau FY 2021

Requirements development and testing:

Administrative Analyst II –	360 hrs. x $17.13 per hr. =	$6,166.80
Management Analyst Spec. II –	440 hrs. x $20.57 per hr. =	$9,050.80
Revenue Manager -	80 hrs. x $20.59 per hr. =	$1,647.20
		T**otal = $16,864.80**

The department also provided the following comments:

Section 5 (2)
For purpose of this fiscal note the Department assumes that they will apply the same requirements related to automatic voter registration specified for new and renewal applicants to individuals applying for a duplicate, reprint or replica driver license, nondriver license, instruction permit, or commercial learners permit. If it is not the sponsor's intent to include duplicate transactions, the Department recommends the sponsor amend the language to specifically prohibit.

The Department assumes it is not the sponsor's intent to forward record updates derived from other mailing address updates sources such as National Change of Address files, courts or documentation received from sources other than the applicant.

The proposed language will require the Department to amend the current data files posted to the Secretary of State or develop a new file specific to automatic voter registration to include the digital image of the signature when the application or request for update included collection of the individual's signature.

The requirement to submit a copy of the individual's signature will require the Department to amend current programs for on-line requests for change of mailing address since identity verification and signature collection are not required in this process.

Section 27
The Department assumes this minimum age applies to the file transfer to Secretary of State and will not change current voter registration application provisions which limit completion of an application to persons age 17 ½ years of age or older with a certification that they will be 18 years of age on or before election date.

Officials from the **Department of Public Safety - Office of the Director** indicated they see no fiscal impact due to this initiative petition.

Officials from the **Department of Social Services** indicated they do not anticipate a fiscal impact as a result of this initiative petition.

Officials from the **Governor's office** indicated there should be no added costs or savings to their office.

Officials from the **House of Representatives** indicated no fiscal impact to their office.

Officials from **Department of Conservation** indicated no adverse fiscal impact to their department would be expected as a result of this proposal.

Officials from the **Department of Transportation/Missouri Highways and Transportation Commission** indicated this initiative petition will have no fiscal impact, as Article IV, Section 30(b) of the Missouri Constitution limits the use of state revenue

derived from highway users (SRHU). Registering citizens to vote does not relate to the design, construction, maintenance, and operation of the state highway system.

Officials from the **Office of Administration** indicated this proposal amends Article VIII of the Constitution of Missouri by amending Sections 5 and 7 and adopting four new sections.

This proposal requires the Secretary of State to establish a process to conduct automatic voter registration based on driver's license information and state issued nondriver's license information. Applicable state agencies shall provide to the Secretary of State lists of citizens eligible to vote, any available electronic signature information, and any other information required to register to vote. The Secretary of State shall provide lists of citizens who are presumptively eligible to vote to local election authorities. Local election authorities shall include such presumptively eligible voters on voter registration lists subject to existing verification procedures for voter eligibility. Individuals automatically registered to vote shall be provided an opportunity to decline registration. Individuals automatically registered to vote who are not eligible to vote shall not be subject to any penalty, and the local election authority shall remove any such individuals from the voter registration list. The deadline for voter registration shall be no earlier than 5:00 p.m. on the second Tuesday prior to the election, except with regard to covered voters and intrastate voters. Intrastate voters may vote in their new jurisdiction if they are registered to vote in Missouri.

This proposal provides that all qualified voters of the state may vote by absentee ballot without providing a reason either in person or by mail starting 42 days before an election and specifies how local election authorities are to administer absentee ballots. All qualified voters of the state shall be provided the opportunity to request to permanently receive absentee ballots in the mail for all future elections. An absentee ballot of an overseas or uniformed services voter shall be counted by the local election authority so long as the ballot is dated on or before election day and received by the election authority within 7 days of election day.

This proposal requires the Secretary of State in conjunction with the State Auditor to provide a recommendation to local election authorities for the best method to conduct a risk-limiting audit of election returns. Each local election authority shall adopt a method of risk-limiting audit for auditing election returns.

The proposal provides that an individual who is at least 16 years old and otherwise meets all eligibility requirements to vote shall be pre-registered to vote. Such individuals are prohibited from casting a ballot until they meet all voter eligibility requirements.

This proposal should not result in additional costs for their office.

Officials from the **Office of State Courts Administrator** indicated there is no fiscal impact on the courts.

Officials from the **Missouri Senate** indicated they anticipate no fiscal impact.

Officials from the **Secretary of State's office** indicated this petition would implement an automatic voter registration program. The bill would require the Department of Revenue (DOR) and other agencies to transmit to the Secretary of State (SOS) records containing information of eligible voters, based on agency records (such as driver's license applications in the case of DOR). This information is then made available to each local election authority, which will then send notice to each person giving them the opportunity to decline to be registered. For the purposes of this fiscal note, their office assumes that this information will be transmitted in an electronic format.

To implement these requirements, significant programming changes would need to be made to the centralized voter registration database (MCVR) to develop multiple new interfaces, to allow electronic transmission of electronic agency data, to sync agency data with currently existing voter information in MCVR, to allow local election authorities to generate and send notices of opportunity to decline registration, to create a queue of individuals who have been sent notice of opportunity to decline registration, and to allow information to be transferred between counties. Based on the implementation of similar systems in other states, this section would result in an estimated one-time cost of $1,000,000 in fiscal year (FY) 2021.

This bill requires local election authorities to send notice of opportunity to decline registration to each individual that is not currently a registered voter. This is a new responsibility that must be funded by the state under Article X, Section 21 of the Missouri Constitution. Based on a recent comparison of voter records to driver's license records, a total of 743,280 individuals were found to have a driver's license but were not identified as registered voters. Sending notice to each individual would cost $0.90 to mail ($0.55 for outgoing postage as of January 2019, $0.35 for the endorsement on the paid return postcard) plus the costs of printing. Postage would amount to $668,952 and printing is estimated at $33,270, for a total that could reach or exceed $702,222 (depending on the specific number of persons identified by DOR and other agencies) beginning in FY 2021.

Future notice mailings would incur costs to the state of Missouri. The cost of notice mailings in future fiscal years is unknown due to several variable factors including voter registration rates and postage cost increases.

This petition also requires local election authorities to maintain one or more locations for eight hours on the Saturday and Sunday before each election to facilitate absentee voting. While each local election authority already maintains four hours of Saturday operation as required by current law, this increase would require additional staffing costs for the equivalent of 348 judge-days statewide (two judges for 1.5 days in 116 jurisdictions). Assuming an average payment of $125 per judge-day, this would amount to $43,500 per election beginning in FY 2021.

Additionally, this petition requires local election authorities to maintain office hours for two hours earlier and two hours later than their normal business hours for six days prior to an election (while the wording is ambiguous, their assumption is that this refers to normal business days). This increase would require additional staffing costs for the equivalent of

696 judge-days statewide (two judges for the equivalent of 3 days in 116 jurisdictions). Again assuming an average payment of $125 per judge-day, this would amount to $87,000 per election beginning in FY 2021.

Their office is being conservative in assuming all new costs will be subject to Article X though there may be some legal uncertainties on this point.

Officials from the **Office of the State Public Defender** indicated this initiative petition will not have any impact on their office.

Officials from the **State Treasurer's office** indicated no fiscal impact to their office.

Officials from **Greene County** indicated the following estimate is based on U.S. Census Data that estimates current county population at **291,923**. It is estimated that **18.7%** of the population is under **16** years old, which accounts for **54,515** residents. They have on average **190,000** registered voters, of which about **30,000** (**16%)** are inactive, meaning their address is no longer verified but registered nonetheless and so they are included as part of the number below.

R's = Residents
RV's = Registered Voters
yrs = Years
PV's = Potential Voters
MC = Mailing Cost
CPC2P = Cost Per Card to Process
FTH = Fulltime Hire
PTH = Part-time Hire
AP = Annual Pay

291,923 R's – 50,415 R's under **16 yrs** = **241,508 R's 16 yrs** or older

241,508 R's 16 yrs or older – **190,000 RV's = 51,508 PV's**

51,508 PV's x .50 MC = $20,000 + fees **= $25,754**

51,508 PV x 1.06 CPC2P = $54,598.48

If they have approximately **51,508 PV's** not registered based on the number above, and a Voter ID card is mailed to each voter as stated in the petition language at **.50** apiece, it will be a **$25,754 MC**. How will that cost be delineated in subsequent mailings is very hard to predict, but they do anticipate it will be reduced over time from the original estimate as more residents become registered.

The actual time spent to fully process any new Voter ID card is estimated at **$1.06 CPC2P**. This adds an additional **$54,598.48** to the cost when it is multiplied by the estimated **51,508** voters eligible to be registered.

There is also in the petition language additional requirements. This includes allowing new voters to register up to 2 weeks prior to an election, absentee mailing changes and risk-limited auditing requirements post-election. These additional requirements will at a minimum require an additional **2 FTH** and **1 PTH** for the office to ensure the ongoing administrative duties the petition requires will be completed on time for voters. This additional cost per **FTH** will be **$24,689.60** per hire for their annual pay and **$12,026.90** annual pay for the **PTH**. The total annual cost for two fulltime hires will be **$49,379.20.**

51,508 PV's x .50 MC	**= $25,754**
51,508 PV x 1.06 CPC2	**= $54,598.48**
2 FTH x $24,689.60 AP	**= $49,379.20**
1 PTH x $12,026.90 AP	**= $12,026.90**
Total:	**= $141,758.58**

The total estimated initial cost for Greene County for **IP 20-111** proposing to amend Article VIII, version 7, will cost Greene County **$141,758.58** with a minimum ongoing cost of **$61,406.10** for personnel. There will be other ongoing cost to include COLA increases, Step increases for employee pay as well as anticipated ongoing administrative cost that cannot be predicted at this time.

Officials from **St. Louis County** indicated this initiative petition does not appear as though it would have a direct fiscal impact on St. Louis County Government. However, there is the possibility that the St. Louis County Board of Elections would incur additional operational expenses and would seek additional appropriations from the County General Fund to cover the expenses. The Board of Elections intends to make a separate reply.

Officials from the **City of Kansas City** indicated this will have no fiscal impact on their city.

Officials from the **City of St. Louis/Board of Election Commissioners City of St. Louis** indicated this initiative petition would have a negative fiscal impact.

The Board of Election Commissioners is supportive of this initiative, but believes that the increase in costs would be hard to manage as a result of this amendment. Following are rough estimates for expected increases:

1) Hiring 2 full-time employees at $32,000 each.
2) Hiring 4-6 temporary staff members in the Absentee department for 10 40-hour work weeks at $15.00 an hour.
3) Printing and postal costs for applications and ballots will triple in the Absentee department, increasing expenses by $305,000.
4) Printing and postal costs for missing information letters and ENC notices will triple in the Registration department, increasing expenses by $1,205.
5) Increase in Business Reply Mail Return costs for absentee application and ballots will increase by $75,000.

6) Election day absentee ballot counters will triple in size, increasing costs by $15,000.
7) Ballot order will increase due to the increase in registrations, but the fiscal impact is tough to estimate.
8) Registration overtime costs will increase for data entry of new registrations but fiscal impact is tough to estimate.
9) Cost of supplies, such as paper, pens, etc. would increase by about $5,000.

The Director of Board of Election Commissioners noted that these are merely rough estimates and the actual fiscal impact is hard to determine.

Officials from **Wellsville-Middletown R-1 School District** indicated they do not see any fiscal impact of these petitions that is unique to their district. Any costs related to these may come out of general revenue which will have a negative impact to some degree on all state funded entities.

Officials from **Metropolitan Community College** indicated no fiscal impact.

Officials from the **St. Louis County Board of Elections** indicated they predict this amendment would have a fiscal impact of $47,500 per County-wide election, with an additional $9,000 annual cost. Having their office open for an additional 12 hours on the weekend and 16 hours on the weekdays, and at a rate of $5,000 per every 8 hours, this would cost $17,500. The additional absentee costs in the amendment are estimated to be about $30,000. The annual cost of sending voters postage cards to decline automatic registration would be about $9,000. It is important to note that a significant portion of all of these costs could be offset by the reduced need for polling places due to early voting.

Officials from the **Kansas City Election Board** indicated if this initiative petition is passed, election costs definitely increase at least $50,000 per election for additional postage, printing, training, staff overtime, temporary employees, legal notices and location rentals to process these additional services. Additionally, at least 2 to 4 permanent staff would need to be hired at $35,000 each, including benefits.

Officials from the **Platte County Election Board** indicated the additional hours proposed in the petition would add about $5,000 to the cost of an election.

Officials from the **State Auditor's office** indicated the proposed language, if implemented, should have no fiscal impact on their office. Any impact can be absorbed through current appropriations.

Andrew Bergerson and Jared Wight provided the following information:

Re: Fiscal-Cost Estimates for "VOTE 2020" Ballot Initiatives in 16 Variations (20-072 through 83 and 20-088 through 91)

To the Honorable Nicole Galloway, CPA, Missouri State Auditor:

Pursuant to Title IX Section 116.175 of the Missouri Constitution, we hereby submit this statement of fiscal impact to advise you and your office in estimating the fiscal cost of the "VOTE 2020" petition-based ballot initiatives to amend the Missouri Constitution. The information contained in this letter is relevant to all 16 petition variations: 20-072 through 83 and 20-088 through 91.

Drew Bergerson is a Professor of History and Jared Wight is a System Administrator, both at the University of Missouri-Kansas City. Although we submit this opinion purely as private citizens, we used our experience as social and computer scientists to do so.

We surveyed the relevant legislation proposed to the Missouri General Assembly for ten or more years, focusing especially on any associated fiscal notes from the State Auditors. We interviewed local election officials in the Kansas City and St. Louis areas. We reviewed the reports of major think tanks, non-profit organizations, and scholars who specialize in electoral practices. And we considered the reports provided by counties and states like California, Colorado, Michigan and North Carolina who recently implemented similar policies.

Below we summarize our research in seven points, including information particular to one or more variations of the ballot language where relevant.

1. **Automatic voter registration will likely incur one-time infrastructural costs of approximately $50-60,000 but are actually "unknown".**
   In the fiscal note for the recent bill with the most detailed description of one-time costs (HB 1934 McCann Beatty, 2018)[1], the State Auditor anticipated significant one-time expenses for extensive technological improvements to the Missouri Voter Registration Database ($1,000,000)[2], software programming ($27,540-$85,050), administrative costs for impacted departments ($7,228-$8,700), and employee training ($0-unknown). Missouri, however, has no reason to rely solely on its own resources for modernizing its election technologies as it has access to approximately $7.5 million for these purposes from the Federal Government.[3] According to the U. S. Election Assistance Commission, states must match Federal funds at 5%, but they may use those funds to improve elections by adding cybersecurity systems, cybersecurity training, new voting equipment with paper ballots, and post-election risk-limiting audit systems (#2 below).[4] It is therefore reasonable to assume that the fiscal impact *on the state budget* for the infrastructural items listed above would be only 5% of the total expense, or approximately $50-60,000. That said, the range of estimated costs is wide depending on how automatic voter registration is implemented in terms of infrastructural improvements. So, a more accurate assessment of cost would be "unknown".

2. **Risk-limiting audits will incur "unknown" up-front and ongoing costs.**
   For risk-limiting audits, Missouri has access to the same Federal funds at a matching rate of 5% for the purpose of upgrading our technology for cybersecurity etc.,[5] so it is reasonable to assume that infrastructural improvements for risk-limiting audits would be included in the estimates listed in #1 above. Long-term, there may be ongoing costs or even net savings; but as in #1, it is impossible to estimate them

---

[1] See also HB29, Stacy, 2019; HB 731 Manlove 2019; HB994, Price, 2019.

[2] According to Common Cause-Massachusetts, *Automatic Voter Registration Cost Report*, 05.24.2018, similar one-time improvements cost approximately $200,000 in Oregon and $434,117 in Vermont. According to WBUR News, MA State Representative John Mahoney estimated in 2018 that implementation of the Massachusetts automatic voter registration legislation would cost $500,000 up front. In the fiscal cost analysis of the Voter Access and Modernized Elections Act (HB13-1303), Colorado anticipated $644,000 to update SCORE, its Statewide Voter Registration System. The larger figure of $1,000,000 for Missouri is reasonable given the relatively backward state of our election technologies (also as per the Fiscal Note for HB 731 Manlove 2019).

[3] According to the U.S. Election Assistance Commission's Grant Expenditure Report for Fiscal Year 2018, published April 4, 2019, Missouri has spent all of the funds plus interest distributed starting in 2003 by the EAC to states under Section 101 of HAVA 2002: $6,829,277. Section 251 funds, known as Requirements Payments, were distributed to States using a formula found in HAVA based on a percentage equal to the quotient of the voting-age population of each State and the total-voting age population of all States. Missouri has spent $54,177,399, leaving a balance of $472,833 including interest. In March 2018, however, Congress provided an additional $380,000,000 through the Consolidated Appropriations Act of 2018. Missouri has currently spent $224,922, leaving a balance of $7,037,285 including interest.

[4] *Ibid.* States have until September 30, 2023 to request their funds and get the money in their accounts. Missouri spent most of its allocated 2018 HAVA Funds to implement cybersecurity enhancements that protect against attempts to penetrate the Missouri Centralized Voter Registration System. The state also hosted the National Election Security Summit attended by federal, state and local election authorities to discuss practical ways to mitigate threats and vulnerabilities.

[5] *Ibid.*

without knowing which specific kind of risk-limiting audits will be implemented. It makes sense to list them as "unknown".

3. **The first round of "opt-out" mailings for automatic voter registration will incur new costs but they are "unknown".**
   Prior bills with fiscal notes (HB 1934 McCann Beatty, 2018; HB29, Stacy, 2019; HB 731 Manlove 2019; HB994, Price, 2019) offer a wide range of estimates for the initial set of "opt-out" mailings based on the number of non-registered voters in government records.[6] Yet scholars have developed new techniques for producing more accurate lists by winnowing "deadwood" from existing voter rolls, which could reduce costs.[7]

   > **[*Included in some ballot variations*: The pre-registration of 16-17-year-old eligible voters will incur one-time costs of approximately $134,800.**
   > There will be approximately 100,000 potential new pre-registrations in the first year of 2021.[8] Based on a recent fiscal note (HB 731 Manlove 2019), we estimate one-time fiscal costs of $90,000 for postage @ $0.90 each plus printing cost of $44,800 @ $.0448 per person for a total of $134,800.]

   Due to new techniques for more accurately identifying eligible voters, it is impossible to precisely estimate the fiscal impact of this legislation. These one-time expenses are best described as "unknown".

4. **The long-term cost of automatic voter registration is also "unknown."**
   Prior fiscal notes offer a wide range of estimates for long-term costs, mostly for printing and mailing costs. Kansas City was an outlier, anticipating new staff positions at much larger expense ($180-260,000); but most local election authorities anticipated $0 impact.[9] Similarly, no additional staff was required for implementing automatic voter registration in Colorado, Oregon, and Vermont.[10] Oregon, which has a comparable number of non-registered voters (539,532) to Missouri (528,782), has

---

[6] The highest projections anticipate 743,280 individuals who, according to the Department of Motor Vehicles, have driver's licenses but are not registered voters, which makes the total cost for mailing and printing $702,222 + $33,270 = $735,492. Yet data from the United States Election Project suggests that this population estimate is two or more times too high. They estimate only 528,782 non-registered voters in 2018, and after removing ineligible voters, pegs the vote-eligible population at 357,583.

[7] Stephen Ansolabehere and Eitan Hersch, "Voter Registration: the Process and Quality of Lists," and Barry Burden and Charles Stewart, "Introduction to the Measure of American elections," both in *idem*, *The Measure of American Elections* (Cambridge, 2014).

[8] According to the Missouri Census Data Center, there were approximately 77,974 twelve-year olds in 2017 who will be sixteen in 2021 and 77,813 thirteen-year olds who will be seventeen. We assume that these figures will not significantly change in the next two years and that half of the seventeen-year olds or 38,906 could be pre-registered by existing statute which allows pre-registration at 17½ years old. Moreover, 7-8% of these eligible voters may never want to register: of the 4,570,675 Missouri citizens who were legally eligible to vote in 2018, 357,583 or 7.82% were not registered (United States Election Project; Secretary of State's Office).

[9] For prior bills with fiscal notes in Missouri (HB 1934 McCann Beatty, 2018; HB29, Stacy, 2019; HB 731 Manlove 2019; HB994, Price, 2019), local election officials have estimated the additional cost of printing and mailing postcards from $0 to $92,708 per year per election district but most anticipate being able to absorb the cost into their existing budgets.

[10] Common Cause-Massachusetts, *Automatic Voter Registration Cost Report*, 05.24.2018.

reported mailing a consistent number of 21,700 mailings per month for "opt-out" registrations at the cost of $330,217 per biennium.[11] In various states, automatic voter registration has even reduced other costs, for instance, by reducing the number of provisional ballots.[12] Arguably the largest cost savings for Missouri would come from replacing the current system of paper registration cards and manually reentering voter registrations from paper lists with digital voter registration systems.[13] In the most detailed fiscal notes to two of the prior bills (HB 1934 McCann Beatty, 2018; HB 731 Manlove 2019), the Office of the Secretary of State explicitly stated their assumption that voter lists "will be transmitted in an electronic format," no doubt in recognition of this opportunity to economize.

> [***Included in some ballot variations***: **The pre-registration of 16-17-year-old eligible voters will incur $0 ongoing costs.** Regardless whether the voter is pre-registered as a youth or registered as an adult, ongoing costs should either be the same for automatic voter registration or decrease over time through efficiencies in the system.]

Without knowing the precise nature of the new technologies and given the likelihood of opportunities to economize, it is impossible to estimate the long-term costs of automatic voter registration. They are therefore best described as "unknown."

5. **Moving the final registration date to fifteen days before election day will cost $0.**

There are no fiscal notes yet available for the two bills introduced into the Missouri General Assembly on this topic (HB 993 Price, 2019; SB 384, Schupp, 2019). Comparative research in other states who have implemented *same-day* registration either report no increase in long-term cost for new technology and staff, or report a reallocation of existing resources.[14] In 2012, California approved Conditional Voter

---

[11] *Ibid.*

[12] National Conference of State Legislatures, Automatic Voter Registration, 04.22.2019. See also Sawyer, *Early Voting Business Case* for Mecklenburg County, NC, ca. 2015.

[13] In its Election Initiative issues brief "Inaccurate, Costly, and Inefficient Evidence that America's Voter Registration System Needs an Upgrade" from 02.2012, the Pew Center on the States argues that paper registration systems are expensive compared to electronic. Where Oregon spent $4.11 per active voter to process registrations and maintain their voting list or $7.67 per transaction (new or updated registration), Canada spent $0.35 per voter to process registrations and Maricopa County, AZ reduced costs from $0.83 for paper registration to $.03 for online registration. In California, the introduction of Conditional Voter Registration was delayed from 2012 to 2017 until VoteCal, California's statewide voter registration database, was operational (see California Secretary of State and Santa Clara Registrar of Voters).

[14] According to the National Conference of State Legislators, additional technology is not required even for same-day registration. Whereas the additional administrative work can be time consuming, many states report a reallocation of existing costs and resources rather than additional costs. In 2015, Project Vote reported that most states experienced "minimal" incremental costs in the long term. Iowa introduced SDR with only a $40,000 onetime statewide expense. In 2011-12, Demos conducted a survey of counties in Iowa and North Carolina and found that a large majority reported little to no additional costs for same-day registration. Most did not require additional staffing at the polls. Any new expenses were generally associated with additional printing and mailing of registration forms. North Carolina respondents most frequently cited additional staffing at one-stop sites as the most notable cost associated with same-day registration. This need tended to increase among smaller-sized counties. The increased expenses cited

Registration (AB 1436) that allowed unregistered voters to register and vote within fifteen days of and including election day using a provisional ballot, and it became operational in 2017 (see California Secretary of State and Santa Clara Registrar of Voters). Their State Legislature anticipated increases in cost of $5-10,000 per county but only due to the provisions of the law related to same-day registration.[15] The legislation proposed in Missouri sets the registration deadline at fifteen days before election day as well but *without* the option for same-day registration.[16] It is therefore reasonable to assume that no additional technology or staff would be required and therefore this aspect of the legislation would incur $0 new costs.

6. **The cost to allow all eligible voters to vote "without excuse" by absentee ballot[17] is "unknown" if not $0.**

The number of absentee ballots cast in Missouri fluctuated between 5.7% and 9.6% in 2008-2012.[18] According to the fiscal notes associated with past bills in the Missouri General Assembly (HB173, Conway, 2017; HB644, Smith, 2017; HB29, Stacy, 2019; HB202, Shull, 2019) as well as proposed constitutional amendments (HJR 90, Dugger, 2014), most local election officials did not respond with feedback or stated that the impact would be negligible on their expenses. By contrast, the local election officials from Audrain, Kansas City, Platt, and St. Louis Counties estimated increased costs ranging from $1,700 to $32,000 due to increased postage, printing, and staff. In more recent bills (HB368, McGaugh, 2019; HB527, Stevens, 2019; HB992, Price, 2019), however, the local election officials from Platt and St. Louis Counties estimate $0 fiscal impact for similar policies. Given such wildly different cost estimates from rural, suburban, and urban counties, the Committee on Legislative Oversight correctly notes that there could be a potential increase in costs but the actual fiscal impact is "unknown" if not $0. Costs (i.e. for increased staff) may increase in the short term if voters suddenly switch to permanent absentee voting by mail before the necessary infrastructure has been created; but in general, political scientists note that state- and even county-specific voting cultures are often strong predictors of future behavior; which suggests that

---

in North Carolina may not be entirely attributable to same-day registration, however. Most counties that reported adding staff were unable to disaggregate same-day registration costs from overall early voting expenses.

[15] The California Assembly predicted a modest cost increase of "$5,000 to $10,000 per county annually to accommodate voter registration, *principally on election day*, at county elections offices. This includes the costs for staffing, providing sufficient ballot types for a voter residing anywhere in the county, processing the additional voter registrations, and any additional handling associated with processing the ballots" (our *italics*). Yet they admitted that these costs will vary according to county, popularity of option, turnout, and other factors, including the number of existing provisional ballots.

[16] The other factor increasing anticipated costs in the California case was the need to process provisional ballots after election day. The Senate for instance predicted that an increase in last minute voter registration would necessitate additional labor, overtime, computers, ballots, networks, and security *on election day* and also in order to complete the processing of *more provisional ballots* during the 28 day canvas period after an election. In the proposed Missouri legislation, automatic voter registration should decrease the need for provisional ballots.

[17] including both temporarily and permanently options as well as military and overseas voters

[18] Christopher Mann, "Mail Ballots in the United States: Policy Choice and Administrative Challenges," in Burden and Stewart, *Measure*, p. 118.

there will be some inertia when it comes to voting practices and therefore a more gradual adjustment period.[19] With the implementation of the Voter's Choice Act in California, for instance, Madera County saw an increase in voting by mail from 64% to 93% in 2018, but because VCA actually *required* ballots to be mailed in that county.[20] By contrast, Mecklenburg County in North Carolina saw a more gradual increase in early voting but relatively stable percentages of no-excuse absentee ballots since the introduction of both.[21] It thus seems reasonable to assume, given the fact that both in-person and mail-in absentee ballots would be available during the 42 day early voting period, that most local election officials would be able to absorb this work using existing resources of staff and space.[22] For, the data from other states suggest that mail-in balloting significantly *reduces* the cost per vote of elections. Although it requires short-term increases in voter education programs and can incur expenses through trial and error with the number of voting centers, most local election officials who have made the transition to vote-by-mail systems anticipate long-term cost savings as a result of reduced labor costs by replacing many poll workers with fewer voter center workers as well as fewer voting machines.[23] Given the likelihood of short-term cost fluctuations together with long-term savings, both of an indeterminate quantity, it makes sense to describe the fiscal impact as "unknown."

7. Early voting has an uncertain impact on the cost of elections ranging from "unknown" cost increases to "unknown" cost savings.

There are an unpredictably wide range of variables that could impact the cost of early voting, resulting in wildly disparate predictions of fiscal impact.[24] It seems reasonable to presume that local election officials will use the flexibility inherent in this legislation to try to avoid new costs.[25] For both practical and financial reasons,

---

[19] Burden and Stewart, *Measure.*

[20] Madera County, CA, Election Administration Plan 2018.

[21] As per Hannah Sawyer, an intern who worked at the Mecklenburg County Board of Elections, who authored a Six Sigma study as part of her MPA entitled *Early Voting Business Case* [ca. 2015].

[22] See for instance Sawyer, *Early Voting*.

[23] In California, "the Nevada County Elections Office has determined that costs will exceed savings with the first implementation of the VCA. However, the Nevada County Elections Office predicts that over time conducting elections in accordance with the VCA will encourage savings based on evidence from Colorado who implemented a similar elections model." (Nevada County Election Administration Plan 2018; see also Madera County Election Administration Plan 2018, Napa County Election Administration Plan 2018, Sacramento County Election Administration Plan's Appendix J, 2018). According to the Pew Charitable Trusts' issue brief "Colorado Voting Reforms: Early Results 2013" from March 22, 2016, the statewide average cost per vote in Colorado decreased in the wake of their Voter Access and Modernized Elections Act of May 2013 from $15.96 in 2008 to $9.56 in 2014 due to reduced labor, printing, postage, and miscellaneous costs. On-demand ballot printing at vote centers reduced the total number of ballots that need to be printed. Moving from assigned polling places to fewer vote centers also required less staff.

[24] For HJR 90 (Dugger, 2014), St. Louis County assumed that they would be required to open seven satellite sites at an estimated annual cost for the location, paper and labor of $1,737,892 per election as well as non-recurring start-up costs to be $1,195,678. Yet these estimates do not consider the cost savings of reducing precincts during election day, using less voting equipment, and other factors, which would have considerable impact on an election district with a large population of registered voters. By contrast, most local election officials did not even bother to respond to the request for a fiscal note, suggesting little concern for increased costs.

[25] For instance, Illinois mandates that early voting centers must be provided at public universities (Early Voting report from NYU's Brennan Center for Justice). Local election officials could save money by using the existing local election facility itself as one of their

we anticipate that local election officials would want to provide one voting center for approximately 50,000 registered (35,000 likely) voters.[26] The 102 rural counties in Missouri with fewer than 50,000 voters may incur costs only for the stipulated overtime for its staff on the Saturday and Sunday before election day.

> [***Included in some ballot variations***: **Early voting includes the two hours before and two hours after regularly scheduled business hours during each of the six business days before election day.** This may also result in modest increased costs for less populous counties.]

Yet local election authorities may be able to absorb those costs by adjusting existing work schedules.[27] In the sixteen suburban, exurban, or urban districts in Missouri with 50,000 or more registered voters, including St. Louis with more than 750,000 registered (457,609 likely) voters, local election officials should be able to reallocate resources from their many precincts into consolidated early voting centers to actually incur cost savings.[28] This consolidation would allow the local election officials to rely on their best workers and reduce the number of required voting machines (and associated costs for transportation and rental space), as has happened in other states.[29] It also reduces the number of provisional ballots.[30] Overall, early voting has been proven in other states to drastically reduce costs in the long-term and/or

---

voting centers (such as the County Clerk's office) and using other publicly owned (municipal, county, and state) facilities for the auxiliary centers as needed (such as civic centers, firehouses, high school gymnasiums, or public university buildings). The latter are typically located in central locations, accessible by public transportation, open on a similar schedule as the local election officials office, provide public parking, and can be secured such that the machines do not need to be removed each day. Other popular alternatives in states with early voting include retail stores, bus stations, hotels, and supermarkets. (Robert Stein and Greg Vonnahme, "Polling Place Practices and the Voting Experience," in Burden and Stewart, *Measure*, p. 170-72)

[26] Prior bills submitted to the Missouri General Assembly stipulated a range of formulae: one voting center for every three existing precincts (HB994, Price, 2019) which results in a very large price tag of $9,764,250 in new election costs; one additional voting site for more than 175,000 registered voters (HB848, Neth, 2013) or a staggered scale thereafter for every 75,000 voters (HJR5, Merideth, 2019), which would only impact six local election officials; one voting center for every 50,000 residents (HB501, Newman, 2017; HB1550, Newman, 2018) which would require 49 voting centers statewide; or no formula at all (HJR 90 Dugger, 2014). See also Matt Blunt Early Voting Report, n.d., and Jason Kander, Time for Early Voting, 2013.

[27] If local election officials do require paying overtime for the two weekend days, a reasonable estimate based on Jackson County figures would be $30.60 per hour per employee (at time and a half) for two employees for 16 hours total, or $979.47 per county. (See data from Secretary of State's Office and HB994, Price, 2019)

[28] For instance, the Jackson County Election Board currently has 239 precincts for 254,769 registered and 151,029 likely voters that they currently open only on election day, for which they pay $200.00 per precinct (for a total of $47,800) plus 2 judges per site @ $12.00 per hour for 8 hours per day ($192 per precinct = $45,888). If they chose to participate in early voting, the local election official might instead open 5 voting centers in public buildings including the local election official itself (at $0 cost) which requires 2 judges per site @ $12.00 per hour for 8 hours per day for 42 days as well as 2 weekend days before election day for a total of $42,240 or half the current cost [*alternate ballot language*: with an additional $288 for the additional two hours before and after regular business hours on the six days before election day]. (See data from Secretary of State's Office and HB994, Price, 2019; compare to Sacramento County Election Administration Plan's Appendix J, 2018)

[29] Between 1999 and 2001, North Carolina introduced no excuse absentee ballots and an eighteen-day early voting period. According to Sawyer's *Early Voting*, Mecklenburg County, NC, was able to significantly reduce the number of required machines at a cost savings of $1,261,700 in purchase price and maintenance costs by using the same machines on both election day and during the early voting period. The more people who voted early (62% in 2012, 75% anticipated in 2016), the more they maximized existing infrastructure, halving the annualized cost of each machine from $685.56 to $309 over a ten-year period.

[30] Mecklenburg County NC (*ibid.*) recorded a reduction from 3,156 provisional ballots in 1996 to 1,522 in 2012 due to early voting. The Pew Charitable Trusts reported in "Colorado Voting Reforms: Early Results 2013" on March 22, 2016, that there was a remarkable 98% reduction in provisional ballots cast in Colorado.

allowed for the reallocation of scarce resources.[31] Crucial to estimating the fiscal impact of these ballot initiatives is the fact that they allow local election officials to determine the number of early voting centers and allows them to increase hours of operation beyond the minimum based on local circumstances. Opening a second early voting center may not make fiscal sense for a district with only 2-5,000 registered voters; but additional voting centers or longer hours may enable more populous jurisdictions to make better and more dynamic use of existing resources.[32] Doing so may require some trial and error, as other states have experienced.[33] Given the flexibility in the legislation to adapt to local conditions and the fact additional centers and hours are entirely optional, the fiscal impact cannot be precisely measured.

Individually, the vast majority of these costs are either $0 or "unknown". Taken together, there is a strong likelihood of new short-term expenses along with significant opportunities for long-term cost savings. These variables make it impossible to estimate the net fiscal impact of this multifaceted legislation.[34] We therefore advise the State Auditor to summarize its potential cost to taxpayers as **$0 to "unknown"** since that is the most accurate description of its overall fiscal impact.

Yours sincerely,

Andrew Stuart Bergerson, 5601 Locust Street, Kansas City, MO, 64110, and
Jared Wight, 5711 Holmes Street, Kansas City, MO, 64110

---

[31] Between 2008 and 2016, voter transactions in Mecklenburg County NC (*ibid.*) cost $2.48-$3.57 per early vote in contrast to $7.19-$11.69 for election-day voting. See also Pew Charitable Trusts, "Colorado Voting Reforms: Early Results 2013", March 22, 2016.

[32] For instance, Buchanan County with 52,996 registered (30,117 current) voters in 2018 could process on average 1204 registered voters per 8-hour day or 151 per hour in an early voting period of 44 days (including weekend days before election day) if they restricted themselves to just the existing local election authority's offices as their voting center. Adding a second early voting center would reduce these rates to a more manageable 602 per day and 75 per hour. By contrast, Macon County with 10,805 registered (6,591 current) voters in 2018 could already process on average 246 registered voters per day or 31 per hour in a single voting center without having to open a second center. [*Alternate voting language*: extended business hours in the six days before election day would further reduce the number of voters per hour on average.]

[33] Colorado's General Assembly has passed a new bill HB19-1278 (2019) that would change the formula for determining how many ballot drop boxes and vote centers are required in order to address isolated instances of long lines on election day. In 2018, researchers from USC and UC-Riverside found elections officials faced a number of unexpected hurdles with the Voter's Choice Act. As John Myers of the Los Angeles Times reported on 21 April 2019: "Costs went up in some counties, as workers at vote centers needed additional training and counties replaced the often no-fee locations for polling places with buildings that had to be rented for a week or more. Some local officials said they needed more vote centers than the minimum required by the state law, especially on election day — for whatever reason, a number of voters didn't use the service until the last minute." The researchers concluded: "The culture of in-person voting on one single day will require more than one election cycle to change." In the long-term, however, the four original counties in California who implemented the Voter's Choice Act all anticipate long-term costs savings (Madera County Election Administration Plan 2018; Nevada County Election Administration Plan 2018; Napa County Election Administration Plan 2018; Sacramento County Election Administration Plan's Appendix J, 2018).

[34] The House Fiscal Agency in Michigan drew a similar conclusion regarding the 2018 ballot proposal 3 Promote the Vote, which included many similar features and is the foundation for the Missouri legislation. "The various rights proposed in the amendment would have *separate indeterminate costs*, but they will likely entail *marginal* increased costs for local units of government and o*verall decreased* expenditures from the state, with some marginal cost increases for the Department of State (DOS)." (our *italics*)

The State Auditor's office did not receive a response from the **Department of Higher Education, Adair County, Boone County, Callaway County, Cass County, Clay County, Cole County, Jackson County, Jasper County, St. Charles County, Taney County,** the **City of Cape Girardeau,** the **City of Columbia,** the **City of Jefferson,** the **City of Joplin,** the **City of Kirksville,** the **City of Mexico,** the **City of Raymore,** the **City of St. Joseph,** the **City of Springfield,** the **City of Union,** the **City of Wentzville,** the **City of West Plains, Cape Girardeau 63 School District, Hannibal 60 School District, Malta Bend R-V School District, Mehlville School District, State Technical College of Missouri, University of Missouri, St. Louis Community College,** the **Jackson County Election Board,** and the **Clay County Board of Election Commissioners.**

Fiscal Note Summary

State governmental entities expect one-time costs of at least $1 million and possible ongoing costs. Local governments are expected to have costs of an unknown amount totaling at least $756,000 in one-time costs, $204,000 in annual costs, and $658,000 in costs per election.

The Honorable Nicole Galloway
State Auditor
State Capitol Building
Jefferson City, MO 65101

RE: Petition approval request from Mary Anne Sedey regarding a proposed constitutional amendment to Article VIII, version 6 (2020-110)

Dear Auditor Galloway:

Enclosed please find an initiative petition sample sheet for a proposal to amend the Missouri Constitution filed by Mary Anne Sedey on August 8, 2019.

We are referring the enclosed petition sample sheet to you for the purposes of preparing a fiscal note and fiscal note summary as required by Section 116.332, RSMo. Section 116.175.2, RSMo requires the state auditor to forward the fiscal note and fiscal note summary to the attorney general within twenty days of receipt of the petition sample sheet.

Thank you for your immediate consideration of this request.

Sincerely,

John R. Ashcroft

cc: Hon. Eric S. Schmitt
Sheri Hoffman

INITIATIVE PETITION

Page No: _____

To the Honorable John R. Ashcroft, Secretary of State for the state of Missouri:
We, the undersigned, registered voters of the state of Missouri and _____ County (or City of St. Louis), respectfully order that the following proposed amendment to the constitution shall be submitted to the voters of the state of Missouri, for their approval or rejection, at the general election to be held on the 3rd day of November, 2020, and each for himself or herself says: I have personally signed this petition; I am a registered voter of the state of Missouri and _____ County (or City of St. Louis); my registered voting address and the name of the city, town or village in which I live are correctly written after my name.

[OFFICIAL BALLOT TITLE]

Address of Notary _____

(Seal)

NOTICE: You are advised that the proposed constitutional amendment may change, repeal, or modify by implication or may be construed by some persons to change, repeal, or modify by implication, the following Sections of the Missouri Revised Statutes: Sections 115.003 through 115.960. The proposed amendment revises Article VIII of the Constitution by amending Sections 5 and 7, and adopting three new sections to be known as Article VIII, Sections 24, 25, and 26.

Be it resolved by the people of the state of Missouri that the Constitution be amended:

Section A. Article VIII of the Constitution is revised by amending Sections 5 and 7, and adopting three new sections to be known as Article VIII, Sections 24, 25, and 26 to read as follows:

Section 5. Registration of voters [may be provided for by law] shall occur as specified herein. All laws governing registration shall be interpreted liberally to ensure, to the extent possible, that all eligible citizens be allowed to register to vote and to vote.

(1) The secretary of state shall establish a process to conduct automatic voter registration based on driver's license information and state issued nondriver's license information.

(2) The department of revenue shall, on at least a weekly basis, provide the secretary of state with a list of eligible citizens who have applied for, applied to renew, or changed the address related to a driver's license or state issued nondriver's license, are citizens of the United States, residents of Missouri, and meet the legal criteria to be eligible to vote in the State of Missouri. Such list shall contain any information required to register to vote under applicable law, and any available electronic signature information.

(3) The secretary of state shall designate the department of social services and the department of conservation to serve as sources for lists of citizens who are eligible to vote, any available electronic signature information, and any other information required to register to vote under applicable law.

(4) The secretary of state shall designate additional state agencies including:

(a) all agencies that have current data on citizenship, residency, and age of individuals;

(b) any agency that does or could provide applicants with the opportunity to affirm voter eligibility criteria as part of their agency transaction;

(c) any agency that has records of eligible citizens who would not otherwise be registered to vote; and

(d) any agency that is required to offer voter registration services under any other provision of law, including but not limited to Section 7 of the National Voter Registration Act, as amended.

(5) Based on the lists received under this section, the secretary of state shall provide lists of citizens who are presumptively eligible to vote to local election authorities. These lists shall be sent to local election authorities as often as required by law, but at least every thirty days, and fourteen days prior to any election. These lists shall include the names of presumptively eligible voters, the information required to determine whether an individual is eligible to vote, and any available electronic signature information. The local election authorities shall include such presumptively eligible voters on voter registration lists subject to existing verification procedures for determining whether an individual is eligible to vote. Local election authorities shall retain full jurisdiction and power to decline to register individuals not verified to be eligible to vote, and in accordance with applicable state and federal law, may remove the names of individuals who are no longer eligible to vote from voter registration lists.

(6) Regardless of the amount of time it takes to process the registration, an individual shall be deemed registered to vote on the day the local election authority receives the information from the secretary of state provided that such individual is later determined eligible to vote by the local election authority. Within seven business days of the local election authority receiving an individual's information from the secretary of state, the local election authority shall update its list of eligible voters and send notice of automatic registration to newly registered voters and provide the opportunity to decline registration. Such notice may be sent in the same manner and at the same time as voter identification cards or other communication required by law. If, after a period of thirty days, the notice declining registration is not returned to the local election authority, the individual's name shall remain on the voter registration list. Any time an individual declines registration the individual's name shall be removed from the voter registration list. This subsection shall not be construed to prevent removal from voter registration lists by any other method allowed under state and federal law.

(7) The provisions of this section shall not be interpreted to invalidate any other method for voter registration.

(8) No individual who does not meet the legal criteria to be eligible to vote shall be considered to have caused a false or fictitious voter registration, if the record and signature of such individual is transmitted by the secretary of state to a local election authority pursuant to this section without the individual's affirmative consent. If such an individual is added to the voter registration list, the individual shall not be subject to any penalty under law. Upon determining such individual is not eligible to vote, the local election authority shall remove the individual from the voter registration list.

2. In order to vote in any election for which registration is required, the deadline for a person to be registered to vote in the jurisdiction of his or her residence shall be no earlier than 5:00 p.m. on the second Tuesday prior to the election, except with regard to covered voters and intrastate voters as defined by general election law. Intrastate voters may vote in their new jurisdiction if they are registered to vote in the State of Missouri.

3. Nothing in this section shall be interpreted to conflict with the Voting Rights Act of 1965, The National Voter Registration Act of 1993, The Help America Vote Act of 2002, or any other applicable federal law or regulation.

Section 7. All qualified [electors] voters of the state [who are absent, whether within or without the state,] may [be enabled by general law to] vote by absentee ballot without providing a reason at all elections by the people either in person or by mail starting forty-two days before an election. For the purposes of this section, the early voting period shall be the period when eligible voters may cast an absentee ballot in person. Procedures for voting by absentee ballot shall be the same as provided in general election law, except as provided herein.

(1) Voters who choose to vote by absentee ballot shall have the option to receive the absentee ballot in the mail or to vote in person using an absentee ballot during the early voting period. Voters who receive an absentee ballot in the mail shall be allowed to return their completed ballot and envelope by mail, or by dropping it off at any officially designated voting location during the early voting period or on election day. The local election authority may also provide additional options for returning or casting absentee ballots. Nothing in this section shall be construed to prevent a person who has received a ballot in the mail but has not returned a completed ballot from casting a regular or provisional ballot in person during the early voting period or on election day.

(2) Each local election authority shall make one or more locations available to issue absentee ballots and to receive completed absentee ballots during the early voting period. Any such designated location shall be open during the local election authority's regularly scheduled business hours and for at least eight hours on the Saturday and eight hours on the Sunday immediately prior to the election, except that the location shall be open for two hours before and two hours after regularly scheduled business hours during each of the six days before election day.

(3) Local election authorities may make absentee ballots available for voting in person during the early voting period at additional times and places beyond what is designated in subsection (2).

(4) Notwithstanding any other provision of law to the contrary, voters who cast an absentee ballot by mail shall be required to attest to and sign, whether by signature or mark, the following statement:

> I state under penalty of perjury that I am an eligible voter; that my signature and name are as shown on this envelope; that I will not cast more than one vote in this election; and that my ballot is enclosed in accordance with the provisions of the constitution and laws of this state.

However, there shall be no requirement that such signature be notarized or sworn to before the election official receiving the ballot, a notary public, other officer authorized by law to administer oaths, or any other witness.

(5) All qualified voters of the state shall be provided the opportunity to request to permanently receive absentee ballots in the mail for all future elections. An opportunity to sign up to permanently receive absentee ballots shall be provided, at a minimum, on the application for voter registration, via electronic means, and on the application to receive an absentee ballot.

(6) Absentee ballots postmarked or bearing an intelligent mail barcode traceable to a date of entry into the federal mail system on or before the day before election day shall be counted by the local election authority.

(7) Notwithstanding any other provision of law to the contrary, if an absentee ballot envelope is found to have a deficiency, the local election authority shall immediately notify the voter and shall allow the voter an opportunity to cure the deficiency at any time, but no later than seven days after the election. Notification to a voter shall first be attempted by phone or email, if the local election authority has such information, and then by first class mail.

Section 24. An absentee ballot of an overseas or uniformed services voter, as defined by general election law, shall be counted by the local election authority so long as the ballot is dated on or before election day and received by the local election authority within seven days of election day.

Section 25. The secretary of state in conjunction with the state auditor shall provide a recommendation to local election authorities for the best method to conduct a risk-limiting audit of election returns. Each local election authority shall adopt a method of risk-limiting audit for auditing election returns.

Section 26. All provisions of this Act are severable. If any portion, clause, or phrase of this Act is, for any reason, held to be invalid or unconstitutional by a court of competent jurisdiction, the remaining portions, clauses, and phrases shall not be affected, but shall remain in full force and effect.

MISSOURI STATE AUDITOR'S OFFICE
FISCAL NOTE (20-110)

Subject

Initiative petition from Mary Ann Sedey regarding a proposed constitutional amendment to Article VIII. (Received August 9, 2019)

Date

August 29, 2019

Description

This proposal would amend Article VIII of the Missouri Constitution.

The amendment is to be voted on in November 2020.

Public comments and other input

The State Auditor's office requested input from the **Attorney General's office,** the **Department of Agriculture,** the **Department of Economic Development,** the **Department of Elementary and Secondary Education,** the **Department of Higher Education,** the **Department of Health and Senior Services,** the **Department of Insurance, Financial Institutions and Professional Registration,** the **Department of Mental Health,** the **Department of Natural Resources,** the **Department of Corrections,** the **Department of Labor and Industrial Relations,** the **Department of Revenue,** the **Department of Public Safety,** the **Department of Social Services,** the **Governor's office,** the **Missouri House of Representatives,** the **Department of Conservation,** the **Department of Transportation,** the **Office of Administration,** the **Office of State Courts Administrator,** the **Missouri Senate,** the **Secretary of State's office,** the **Office of the State Public Defender,** the **State Treasurer's office, Adair County, Boone County, Callaway County, Cass County, Clay County, Cole County, Greene County, Jackson County, Jasper County, St. Charles County, St. Louis County, Taney County,** the **City of Cape Girardeau,** the **City of Columbia,** the **City of Jefferson,** the **City of Joplin,** the **City of Kansas City,** the **City of Kirksville,** the **City of Mexico,** the **City of Raymore,** the **City of St. Joseph,** the **City of St. Louis,** the **City of Springfield,** the **City of Union,** the **City of Wentzville,** the **City of West Plains, Cape Girardeau 63 School District, Hannibal 60 School District, Malta Bend R-V School District, Mehlville School District, Wellsville-Middletown R-1 School District, State Technical College of Missouri, Metropolitan Community College, University of Missouri, St. Louis Community College,** the **St. Louis County Board of Elections,** the **Board of Election Commissioners City of St. Louis,** the **Kansas City Board of Election Commissioners,** the **Platte County Board of Elections,** the **Jackson County Election Board,** the **Clay County Board of Election Commissioners,** and the **State Auditor's office.**

Andrew Bergerson and Jared Wight provided information to the State Auditor's office.

Assumptions

Officials from the **Attorney General's office** indicated they expect that, to the extent that the enactment of this proposal would result in increased litigation, their office can absorb the costs associated with that increased litigation using existing resources. However, if the enactment of this proposal were to result in substantial additional litigation, their office may request additional appropriations.

Officials from the **Department of Agriculture** indicated no fiscal impact on their department.

Officials from the **Department of Economic Development** indicated no impact to their department.

Officials from the **Department of Elementary and Secondary Education** indicated this legislation does not impact their department.

Officials from the **Department of Health and Senior Services** indicated this initiative petition has no impact on their department.

Officials from the **Department of Insurance, Financial Institutions and Professional Registration** indicated that this petition, if passed, will have no cost or savings to their department.

Officials from the **Department of Mental Health** indicated this proposal creates no direct obligations or requirements to their department that would result in a fiscal impact.

Officials from the **Department of Natural Resources** indicated they would not anticipate a direct fiscal impact from this proposal.

Officials from the **Department of Corrections** indicated no impact.

Officials from the **Department of Labor and Industrial Relations** indicated this initiative petition does not appear to have a fiscal impact on their department.

Officials from the **Department of Revenue** indicated this initiative petition would cause increased operating costs in the General Revenue Fund of $64,852 for fiscal year (FY) 2021 for salary cots and Office of Administration - Information Technology Services Division (OA)-ITSD costs.

The Department of Social Services, Department of Conservation, Department of Corrections, and other state agencies as described in Section 5 (4) are also affected by this proposal.

IT Consultants	75	708.48	53,136

Section 5 (2)

The proposed language requires the Department to provide, on at least a weekly basis, a list of eligible citizens who have applied for, applied to renew, or changed the address related to a driver license or nondriver license, are citizens of the United States, residents of Missouri, and meet the legal criteria to be eligible to vote in the State of Missouri. Such list shall contain any information required to register to vote and any available electronic signature information.

The Department assumes they will provide a regularly scheduled file of all driver license, nondriver license, and permit applicants who meet the minimum age criteria and who, based on application data entered, have submitted documents verifying United States citizenship. This file would include applicants who responded that they were currently registered to vote, applicants who responded that they were not registered and did not want to register to vote, and applicants who completed the voter registration applications at the time of license or permit application.

The "necessary" information is not defined, however the Department assumes that it will be required to send name, date of birth, address, at a minimum the last 4 digits of the social security number, and a copy of the applicant's signature for final voter registration processing.

The proposed language will require the Department to amend the current data files posted to the Secretary of State or develop a new file specific to automatic voter registration to include the digital image of the signature.

The requirement to submit a copy of the individual's signature will require the Department to amend current programs for on-line requests for change of mailing address since identity verification and signature collection are not currently required in this process.

The Department would be required to:

- Coordinate with the Secretary of State to develop requirements for the data and signature file specifications and file submission schedule.
- OA-ITSD must develop a data pull process for defining records for submission to Secretary of State.
- OA-ITSD must develop a secure process for tying the required signature file to the data file for submission to the Secretary of State.
- Test the file generation and transfer process to ensure all required data elements and signature are sent as required.
- Develop website information to link inquirers to the Secretary of State for information regarding the new automatic voter registration and provisions for declining automatic registration.
- Amend current programs for on-line requests for change of mailing address since identity verification and signature collection are not currently required in this process.

Administrative Impact

To implement provisions of Section 5 (2) the administrative cost may be estimated as:

Personnel Services Bureau FY 2021

Update Webpage - Administrative Analyst III	10 hrs. x $19.80 =	$198.00

Driver License Bureau FY 2021

Requirements development and testing:

Administrative Analyst II –	240 hrs. x $17.13 per hr. =	$4,111.20
Management Analyst Spec. II –	320 hrs. x $20.57 per hr. =	$6,582.40
Revenue Manager -	40 hrs. x $20.59 per hr. =	$ 824.00

Total = $11,716

OA-ITSD

The department also provided the following comments:

Section 5 (2)
For purpose of this fiscal note the Department assumes that they will apply the same requirements related to automatic voter registration specified for new and renewal applicants to individuals applying for a duplicate, reprint or replica driver license, nondriver license, instruction permit, or commercial learners permit. If it is not the sponsor's intent to include duplicate transactions, the Department recommends the sponsor amend the language to specifically prohibit.

The Department assumes it is not the sponsor's intent to forward record updates derived from other mailing address updates sources such as National Change of Address files, courts or documentation received from sources other than the applicant.

The proposed language will require the Department to amend the current data files posted to the Secretary of State or develop a new file specific to automatic voter registration to include the digital image of the signature when the application or request for update included collection of the individual's signature.

The requirement to submit a copy of the individual's signature will require the Department to amend current programs for on-line requests for change of mailing address since identity verification and signature collection are not required in this process.

Officials from the **Department of Public Safety - Office of the Director** indicated they see no fiscal impact due to this initiative petition.

Officials from the **Department of Social Services** indicated they do not anticipate a fiscal impact as a result of this initiative petition.

Officials from the **Governor's office** indicated there should be no added costs or savings to their office.

Officials from the **House of Representatives** indicated no fiscal impact to their office.

Officials from **Department of Conservation** indicated no adverse fiscal impact to their department would be expected as a result of this proposal.

Officials from the **Department of Transportation/Missouri Highways and Transportation Commission** indicated this initiative petition will have no fiscal impact, as Article IV, Section 30(b) of the Missouri Constitution limits the use of state revenue derived from highway users (SRHU). Registering citizens to vote does not relate to the design, construction, maintenance, and operation of the state highway system.

Officials from the **Office of Administration** indicated this proposal amends Article VIII of the Constitution of Missouri by amending Sections 5 and 7 and adopting three new sections.

This proposal requires the Secretary of State to establish a process to conduct automatic voter registration based on driver's license information and state issued nondriver's license information. Applicable state agencies shall provide to the Secretary of State lists of citizens eligible to vote, any available electronic signature information, and any other information required to register to vote. The Secretary of State shall provide lists of citizens who are presumptively eligible to vote to local election authorities. Local election authorities shall include such presumptively eligible voters on voter registration lists subject to existing verification procedures for voter eligibility. Individuals automatically registered to vote shall be provided an opportunity to decline registration. Individuals automatically registered to vote who are not eligible to vote shall not be subject to any penalty, and the local election authority shall remove any such individuals from the voter registration list. The deadline for voter registration shall be no earlier than 5:00 p.m. on the second Tuesday prior to the election, except with regard to covered voters and intrastate voters. Intrastate voters may vote in their new jurisdiction if they are registered to vote in Missouri.

This proposal provides that all qualified voters of the state may vote by absentee ballot without providing a reason either in person or by mail starting 42 days before an election and specifies how local election authorities are to administer absentee ballots. All qualified voters of the state shall be provided the opportunity to request to permanently receive absentee ballots in the mail for all future elections. An absentee ballot of an overseas or uniformed services voter shall be counted by the local election authority so long as the ballot is dated on or before election day and received by the election authority within 7 days of election day.

This proposal requires the Secretary of State in conjunction with the State Auditor to provide a recommendation to local election authorities for the best method to conduct a risk-limiting audit of election returns. Each local election authority shall adopt a method of risk-limiting audit for auditing election returns.

This proposal should not result in additional costs for their office.

Officials from the **Office of State Courts Administrator** indicated there is no fiscal impact on the courts.

Officials from the **Missouri Senate** indicated they anticipate no fiscal impact.

Officials from the **Secretary of State's office** indicated this petition would implement an automatic voter registration program. The bill would require the Department of Revenue (DOR) and other agencies to transmit to the Secretary of State (SOS) records containing information of eligible voters, based on agency records (such as driver's license applications in the case of DOR). This information is then made available to each local election authority, which will then send notice to each person giving them the opportunity to decline to be registered. For the purposes of this fiscal note, their office assumes that this information will be transmitted in an electronic format.

To implement these requirements, significant programming changes would need to be made to the centralized voter registration database (MCVR) to develop multiple new interfaces, to allow electronic transmission of electronic agency data, to sync agency data with currently existing voter information in MCVR, to allow local election authorities to generate and send notices of opportunity to decline registration, to create a queue of individuals who have been sent notice of opportunity to decline registration, and to allow information to be transferred between counties. Based on the implementation of similar systems in other states, this section would result in an estimated one-time cost of $1,000,000 in fiscal year (FY) 2021.

This bill requires local election authorities to send notice of opportunity to decline registration to each individual that is not currently a registered voter. This is a new responsibility that must be funded by the state under Article X, Section 21 of the Missouri Constitution. Based on a recent comparison of voter records to driver's license records, a total of 743,280 individuals were found to have a driver's license but were not identified as registered voters. Sending notice to each individual would cost $0.90 to mail ($0.55 for outgoing postage as of January 2019, $0.35 for the endorsement on the paid return postcard) plus the costs of printing. Postage would amount to $668,952 and printing is estimated at $33,270, for a total that could reach or exceed $702,222 (depending on the specific number of persons identified by DOR and other agencies) beginning in FY 2021.

Future notice mailings would incur costs to the state of Missouri. The cost of notice mailings in future fiscal years is unknown due to several variable factors including voter registration rates and postage cost increases.

This petition also requires local election authorities to maintain one or more locations for eight hours on the Saturday and Sunday before each election to facilitate absentee voting. While each local election authority already maintains four hours of Saturday operation as required by current law, this increase would require additional staffing costs for the equivalent of 348 judge-days statewide (two judges for 1.5 days in 116 jurisdictions). Assuming an average payment of $125 per judge-day, this would amount to $43,500 per election beginning in FY 2021.

Additionally, this petition requires local election authorities to maintain office hours for two hours earlier and two hours later than their normal business hours for six days prior to an election (while the wording is ambiguous, their assumption is that this refers to normal business days). This increase would require additional staffing costs for the equivalent of 696 judge-days statewide (two judges for the equivalent of 3 days in 116 jurisdictions). Again assuming an average payment of $125 per judge-day, this would amount to $87,000 per election beginning in FY 2021.

Their office is being conservative in assuming all new costs will be subject to Article X though there may be some legal uncertainties on this point.

Officials from the **Office of the State Public Defender** indicated this initiative petition will not have any impact on their office.

Officials from the **State Treasurer's office** indicated no fiscal impact to their office.

Officials from **Greene County** indicated the following estimate is based on U.S. Census Data that estimates current county population at **291,923**. It is estimated that **20.9%** of the population is under **18** years old, which accounts for **60,957** residents. They have on average **190,000** registered voters, of which about **30,000** (**16%)** are inactive, meaning their address is no longer verified but registered nonetheless and so they are included as part of the number below.

R's = Residents
RV's = Registered Voters
yrs = Years
PV's = Potential Voters
MC = Mailing Cost
CPC2P = Cost Per Card to Process
FTH = Fulltime Hire
AP = Annual Pay

291,923 R's – 60,957 R's under **18 yrs** = **230,966 R's 18 yrs** or older

230,966 R's 18 yrs or older – **190,000 RV's = 40,966 PV's**

40,966 PV's x .50 MC = $20,483

40,966 PV x 1.06 CPC2P = $43,423.96

If they have approximately **40,966 PV's** not registered based on the number above, and a Voter ID card is mailed to each voter as stated in the petition language at **.50** apiece, it will be a **$20,483 MC**. How will that cost be delineated in subsequent mailings is very hard to predict, but they do anticipate it will be reduced over time from the original estimate as more residents become registered.

The actual time spent to fully process any new Voter ID card is estimated at **$1.06 CPC2P**. This adds an additional **$43,423.96** to the cost when it is multiplied by the estimated **40,966** voters eligible to be registered.

There is also in the petition language additional requirements. This includes allowing new voters to register up to 2 weeks prior to an election, absentee mailing changes and risk-limited auditing requirements post-election. These additional requirements will at a minimum require an additional **2 FTH** for the office to ensure the ongoing administrative duties the petition requires will be completed on time for voters. This additional cost will be **$24,689.60** per hire for their annual pay. The total annual cost for two fulltime hires will be **$49,379.20.**

40,966 PV's x .50 MC	**= $20,483**
40,966 PV's x 1.06 CPC2P	**= $43,423.96**
2 FTH x $24,689.60 AP	**= $49,379.20**
Total:	**= $113,286.16**

The total estimated initial cost for Greene County for **IP 20-110** proposing to amend Article VIII, version 6, will cost Greene County **$113,286.16** with a minimum ongoing cost of **$49,379.20** for personnel. There will be other ongoing cost to include COLA increases, Step increases for employee pay as well as anticipated ongoing administrative cost that cannot be predicted at this time.

Officials from **St. Louis County** indicated this initiative petition does not appear as though it would have a direct fiscal impact on St. Louis County Government. However, there is the possibility that the St. Louis County Board of Elections would incur additional operational expenses and would seek additional appropriations from the County General Fund to cover the expenses. The Board of Elections intends to make a separate reply.

Officials from the **City of Kansas City** indicated this will have no fiscal impact on their city.

Officials from the **City of St. Louis/Board of Election Commissioners City of St. Louis** indicated this initiative petition would have a negative fiscal impact.

The Board of Election Commissioners is supportive of this initiative, but believes that the increase in costs would be hard to manage as a result of this amendment. Following are rough estimates for expected increases:

1) Hiring 2 full-time employees at $32,000 each.
2) Hiring 4-6 temporary staff members in the Absentee department for 10 40-hour work weeks at $15.00 an hour.
3) Printing and postal costs for applications and ballots will triple in the Absentee department, increasing expenses by $305,000.
4) Printing and postal costs for missing information letters and ENC notices will triple in the Registration department, increasing expenses by $1,205.
5) Increase in Business Reply Mail Return costs for absentee application and ballots will increase by $75,000.
6) Election day absentee ballot counters will triple in size, increasing costs by $15,000.
7) Ballot order will increase due to the increase in registrations, but the fiscal impact is tough to estimate.
8) Registration overtime costs will increase for data entry of new registrations but fiscal impact is tough to estimate.
9) Cost of supplies, such as paper, pens, etc. would increase by about $5,000.

The Director of Board of Election Commissioners noted that these are merely rough estimates and the actual fiscal impact is hard to determine.

Officials from **Wellsville-Middletown R-1 School District** indicated they do not see any fiscal impact of these petitions that is unique to their district. Any costs related to these may come out of general revenue which will have a negative impact to some degree on all state funded entities.

Officials from **Metropolitan Community College** indicated no fiscal impact.

Officials from the **St. Louis County Board of Elections** indicated they predict this amendment would have a fiscal impact of $47,500 per County-wide election, with an additional $9,000 annual cost. Having their office open for an additional 12 hours on the weekend and 16 hours on the weekdays, and at a rate of $5,000 per every 8 hours, this would cost $17,500. The additional absentee costs in the amendment are estimated to be about $30,000. The annual cost of sending voters postage cards to decline automatic registration would be about $9,000. It is important to note that a significant portion of all of these costs could be offset by the reduced need for polling places due to early voting.

Officials from the **Kansas City Election Board** indicated if this initiative petition is passed, election costs definitely increase at least $50,000 per election for additional postage, printing, training, staff overtime, temporary employees, legal notices and location rentals to process these additional services. Additionally, at least 2 to 4 permanent staff would need to be hired at $35,000 each, including benefits.

Officials from the **Platte County Election Board** indicated the additional hours proposed in the petition would add about $5,000 to the cost of an election.

Officials from the **State Auditor's office** indicated the proposed language, if implemented, should have no fiscal impact on their office. Any impact can be absorbed through current appropriations.

Andrew Bergerson and Jared Wight provided the following information:

Re: Fiscal-Cost Estimates for "VOTE 2020" Ballot Initiatives in 16 Variations (20-072 through 83 and 20-088 through 91)

To the Honorable Nicole Galloway, CPA, Missouri State Auditor:

Pursuant to Title IX Section 116.175 of the Missouri Constitution, we hereby submit this statement of fiscal impact to advise you and your office in estimating the fiscal cost of the "VOTE 2020" petition-based ballot initiatives to amend the Missouri Constitution. The information contained in this letter is relevant to all 16 petition variations: 20-072 through 83 and 20-088 through 91.

Drew Bergerson is a Professor of History and Jared Wight is a System Administrator, both at the University of Missouri-Kansas City. Although we submit this opinion purely as private citizens, we used our experience as social and computer scientists to do so.

We surveyed the relevant legislation proposed to the Missouri General Assembly for ten or more years, focusing especially on any associated fiscal notes from the State Auditors. We interviewed local election officials in the Kansas City and St. Louis areas. We reviewed the reports of major think tanks, non-profit organizations, and scholars who specialize in electoral practices. And we considered the reports provided by counties and states like California, Colorado, Michigan and North Carolina who recently implemented similar policies.

Below we summarize our research in seven points, including information particular to one or more variations of the ballot language where relevant.

1. **Automatic voter registration will likely incur one-time infrastructural costs of approximately $50-60,000 but are actually "unknown".**
   In the fiscal note for the recent bill with the most detailed description of one-time costs (HB 1934 McCann Beatty, 2018)[1], the State Auditor anticipated significant one-time expenses for extensive technological improvements to the Missouri Voter Registration Database ($1,000,000)[2], software programming ($27,540-$85,050), administrative costs for impacted departments ($7,228-$8,700), and employee training ($0-unknown). Missouri, however, has no reason to rely solely on its own resources for modernizing its election technologies as it has access to approximately $7.5 million for these purposes from the Federal Government.[3] According to the U. S. Election Assistance Commission, states must match Federal funds at 5%, but they may use those funds to improve elections by adding cybersecurity systems, cybersecurity training, new voting equipment with paper ballots, and post-election risk-limiting audit systems (#2 below).[4] It is therefore reasonable to assume that the fiscal impact *on the state budget* for the infrastructural items listed above would be only 5% of the total expense, or approximately $50-60,000. That said, the range of estimated costs is wide depending on how automatic voter registration is implemented in terms of infrastructural improvements. So, a more accurate assessment of cost would be "unknown".

2. **Risk-limiting audits will incur "unknown" up-front and ongoing costs.**
   For risk-limiting audits, Missouri has access to the same Federal funds at a matching rate of 5% for the purpose of upgrading our technology for cybersecurity etc.,[5] so it is reasonable to assume that infrastructural improvements for risk-limiting audits would be included in the estimates listed in #1 above. Long-term, there may be ongoing costs or even net savings; but as in #1, it is impossible to estimate them

---

[1] See also HB29, Stacy, 2019; HB 731 Manlove 2019; HB994, Price, 2019.

[2] According to Common Cause-Massachusetts, *Automatic Voter Registration Cost Report*, 05.24.2018, similar one-time improvements cost approximately $200,000 in Oregon and $434,117 in Vermont. According to WBUR News, MA State Representative John Mahoney estimated in 2018 that implementation of the Massachusetts automatic voter registration legislation would cost $500,000 up front. In the fiscal cost analysis of the Voter Access and Modernized Elections Act (HB13-1303), Colorado anticipated $644,000 to update SCORE, its Statewide Voter Registration System. The larger figure of $1,000,000 for Missouri is reasonable given the relatively backward state of our election technologies (also as per the Fiscal Note for HB 731 Manlove 2019).

[3] According to the U.S. Election Assistance Commission's Grant Expenditure Report for Fiscal Year 2018, published April 4, 2019, Missouri has spent all of the funds plus interest distributed starting in 2003 by the EAC to states under Section 101 of HAVA 2002: $6,829,277. Section 251 funds, known as Requirements Payments, were distributed to States using a formula found in HAVA based on a percentage equal to the quotient of the voting-age population of each State and the total-voting age population of all States. Missouri has spent $54,177,399, leaving a balance of $472,833 including interest. In March 2018, however, Congress provided an additional $380,000,000 through the Consolidated Appropriations Act of 2018. Missouri has currently spent $224,922, leaving a balance of $7,037,285 including interest.

[4] *Ibid.* States have until September 30, 2023 to request their funds and get the money in their accounts. Missouri spent most of its allocated 2018 HAVA Funds to implement cybersecurity enhancements that protect against attempts to penetrate the Missouri Centralized Voter Registration System. The state also hosted the National Election Security Summit attended by federal, state and local election authorities to discuss practical ways to mitigate threats and vulnerabilities.

[5] *Ibid.*

without knowing which specific kind of risk-limiting audits will be implemented. It makes sense to list them as "unknown".

3. **The first round of "opt-out" mailings for automatic voter registration will incur new costs but they are "unknown".**
   Prior bills with fiscal notes (HB 1934 McCann Beatty, 2018; HB29, Stacy, 2019; HB 731 Manlove 2019; HB994, Price, 2019) offer a wide range of estimates for the initial set of "opt-out" mailings based on the number of non-registered voters in government records.[6] Yet scholars have developed new techniques for producing more accurate lists by winnowing "deadwood" from existing voter rolls, which could reduce costs.[7]

   > **[*Included in some ballot variations*: The pre-registration of 16-17-year-old eligible voters will incur one-time costs of approximately $134,800.**
   > There will be approximately 100,000 potential new pre-registrations in the first year of 2021.[8] Based on a recent fiscal note (HB 731 Manlove 2019), we estimate one-time fiscal costs of $90,000 for postage @ $0.90 each plus printing cost of $44,800 @ $.0448 per person for a total of $134,800.]

   Due to new techniques for more accurately identifying eligible voters, it is impossible to precisely estimate the fiscal impact of this legislation. These one-time expenses are best described as "unknown".

4. **The long-term cost of automatic voter registration is also "unknown."**
   Prior fiscal notes offer a wide range of estimates for long-term costs, mostly for printing and mailing costs. Kansas City was an outlier, anticipating new staff positions at much larger expense ($180-260,000); but most local election authorities anticipated $0 impact.[9] Similarly, no additional staff was required for implementing automatic voter registration in Colorado, Oregon, and Vermont.[10] Oregon, which has a comparable number of non-registered voters (539,532) to Missouri (528,782), has

---

[6] The highest projections anticipate 743,280 individuals who, according to the Department of Motor Vehicles, have driver's licenses but are not registered voters, which makes the total cost for mailing and printing $702,222 + $33,270 = $735,492. Yet data from the United States Election Project suggests that this population estimate is two or more times too high. They estimate only 528,782 non-registered voters in 2018, and after removing ineligible voters, pegs the vote-eligible population at 357,583.

[7] Stephen Ansolabehere and Eitan Hersch, "Voter Registration: the Process and Quality of Lists," and Barry Burden and Charles Stewart, "Introduction to the Measure of American elections," both in *idem*, *The Measure of American Elections* (Cambridge, 2014).

[8] According to the Missouri Census Data Center, there were approximately 77,974 twelve-year olds in 2017 who will be sixteen in 2021 and 77,813 thirteen-year olds who will be seventeen. We assume that these figures will not significantly change in the next two years and that half of the seventeen-year olds or 38,906 could be pre-registered by existing statute which allows pre-registration at 17½ years old. Moreover, 7-8% of these eligible voters may never want to register: of the 4,570,675 Missouri citizens who were legally eligible to vote in 2018, 357,583 or 7.82% were not registered (United States Election Project; Secretary of State's Office).

[9] For prior bills with fiscal notes in Missouri (HB 1934 McCann Beatty, 2018; HB29, Stacy, 2019; HB 731 Manlove 2019; HB994, Price, 2019), local election officials have estimated the additional cost of printing and mailing postcards from $0 to $92,708 per year per election district but most anticipate being able to absorb the cost into their existing budgets.

[10] Common Cause-Massachusetts, *Automatic Voter Registration Cost Report*, 05.24.2018.

reported mailing a consistent number of 21,700 mailings per month for "opt-out" registrations at the cost of $330,217 per biennium.[11] In various states, automatic voter registration has even reduced other costs, for instance, by reducing the number of provisional ballots.[12] Arguably the largest cost savings for Missouri would come from replacing the current system of paper registration cards and manually reentering voter registrations from paper lists with digital voter registration systems.[13] In the most detailed fiscal notes to two of the prior bills (HB 1934 McCann Beatty, 2018; HB 731 Manlove 2019), the Office of the Secretary of State explicitly stated their assumption that voter lists "will be transmitted in an electronic format," no doubt in recognition of this opportunity to economize.

> [***Included in some ballot variations***: **The pre-registration of 16-17-year-old eligible voters will incur $0 ongoing costs.** Regardless whether the voter is pre-registered as a youth or registered as an adult, ongoing costs should either be the same for automatic voter registration or decrease over time through efficiencies in the system.]

Without knowing the precise nature of the new technologies and given the likelihood of opportunities to economize, it is impossible to estimate the long-term costs of automatic voter registration. They are therefore best described as "unknown."

5. **Moving the final registration date to fifteen days before election day will cost $0.**

There are no fiscal notes yet available for the two bills introduced into the Missouri General Assembly on this topic (HB 993 Price, 2019; SB 384, Schupp, 2019). Comparative research in other states who have implemented *same-day* registration either report no increase in long-term cost for new technology and staff, or report a reallocation of existing resources.[14] In 2012, California approved Conditional Voter

---

[11] *Ibid.*

[12] National Conference of State Legislatures, Automatic Voter Registration, 04.22.2019. See also Sawyer, *Early Voting Business Case* for Mecklenburg County, NC, ca. 2015.

[13] In its Election Initiative issues brief "Inaccurate, Costly, and Inefficient Evidence that America's Voter Registration System Needs an Upgrade" from 02.2012, the Pew Center on the States argues that paper registration systems are expensive compared to electronic. Where Oregon spent $4.11 per active voter to process registrations and maintain their voting list or $7.67 per transaction (new or updated registration), Canada spent $0.35 per voter to process registrations and Maricopa County, AZ reduced costs from $0.83 for paper registration to $.03 for online registration. In California, the introduction of Conditional Voter Registration was delayed from 2012 to 2017 until VoteCal, California's statewide voter registration database, was operational (see California Secretary of State and Santa Clara Registrar of Voters).

[14] According to the National Conference of State Legislators, additional technology is not required even for same-day registration. Whereas the additional administrative work can be time consuming, many states report a reallocation of existing costs and resources rather than additional costs. In 2015, Project Vote reported that most states experienced "minimal" incremental costs in the long term. Iowa introduced SDR with only a $40,000 onetime statewide expense. In 2011-12, Demos conducted a survey of counties in Iowa and North Carolina and found that a large majority reported little to no additional costs for same-day registration. Most did not require additional staffing at the polls. Any new expenses were generally associated with additional printing and mailing of registration forms. North Carolina respondents most frequently cited additional staffing at one-stop sites as the most notable cost associated with same-day registration. This need tended to increase among smaller-sized counties. The increased expenses cited

Registration (AB 1436) that allowed unregistered voters to register and vote within fifteen days of and including election day using a provisional ballot, and it became operational in 2017 (see California Secretary of State and Santa Clara Registrar of Voters). Their State Legislature anticipated increases in cost of $5-10,000 per county but only due to the provisions of the law related to same-day registration.[15] The legislation proposed in Missouri sets the registration deadline at fifteen days before election day as well but *without* the option for same-day registration.[16] It is therefore reasonable to assume that no additional technology or staff would be required and therefore this aspect of the legislation would incur $0 new costs.

6. **The cost to allow all eligible voters to vote "without excuse" by absentee ballot[17] is "unknown" if not $0.**

The number of absentee ballots cast in Missouri fluctuated between 5.7% and 9.6% in 2008-2012.[18] According to the fiscal notes associated with past bills in the Missouri General Assembly (HB173, Conway, 2017; HB644, Smith, 2017; HB29, Stacy, 2019; HB202, Shull, 2019) as well as proposed constitutional amendments (HJR 90, Dugger, 2014), most local election officials did not respond with feedback or stated that the impact would be negligible on their expenses. By contrast, the local election officials from Audrain, Kansas City, Platt, and St. Louis Counties estimated increased costs ranging from $1,700 to $32,000 due to increased postage, printing, and staff. In more recent bills (HB368, McGaugh, 2019; HB527, Stevens, 2019; HB992, Price, 2019), however, the local election officials from Platt and St. Louis Counties estimate $0 fiscal impact for similar policies. Given such wildly different cost estimates from rural, suburban, and urban counties, the Committee on Legislative Oversight correctly notes that there could be a potential increase in costs but the actual fiscal impact is "unknown" if not $0. Costs (i.e. for increased staff) may increase in the short term if voters suddenly switch to permanent absentee voting by mail before the necessary infrastructure has been created; but in general, political scientists note that state- and even county-specific voting cultures are often strong predictors of future behavior; which suggests that

---

in North Carolina may not be entirely attributable to same-day registration, however. Most counties that reported adding staff were unable to disaggregate same-day registration costs from overall early voting expenses.

[15] The California Assembly predicted a modest cost increase of "$5,000 to $10,000 per county annually to accommodate voter registration, *principally on election day*, at county elections offices. This includes the costs for staffing, providing sufficient ballot types for a voter residing anywhere in the county, processing the additional voter registrations, and any additional handling associated with processing the ballots" (our *italics*). Yet they admitted that these costs will vary according to county, popularity of option, turnout, and other factors, including the number of existing provisional ballots.

[16] The other factor increasing anticipated costs in the California case was the need to process provisional ballots after election day. The Senate for instance predicted that an increase in last minute voter registration would necessitate additional labor, overtime, computers, ballots, networks, and security *on election day* and also in order to complete the processing of *more provisional ballots* during the 28 day canvas period after an election. In the proposed Missouri legislation, automatic voter registration should decrease the need for provisional ballots.

[17] including both temporarily and permanently options as well as military and overseas voters

[18] Christopher Mann, "Mail Ballots in the United States: Policy Choice and Administrative Challenges," in Burden and Stewart, *Measure*, p. 118.

there will be some inertia when it comes to voting practices and therefore a more gradual adjustment period.[19] With the implementation of the Voter's Choice Act in California, for instance, Madera County saw an increase in voting by mail from 64% to 93% in 2018, but because VCA actually *required* ballots to be mailed in that county.[20] By contrast, Mecklenburg County in North Carolina saw a more gradual increase in early voting but relatively stable percentages of no-excuse absentee ballots since the introduction of both.[21] It thus seems reasonable to assume, given the fact that both in-person and mail-in absentee ballots would be available during the 42 day early voting period, that most local election officials would be able to absorb this work using existing resources of staff and space.[22] For, the data from other states suggest that mail-in balloting significantly *reduces* the cost per vote of elections. Although it requires short-term increases in voter education programs and can incur expenses through trial and error with the number of voting centers, most local election officials who have made the transition to vote-by-mail systems anticipate long-term cost savings as a result of reduced labor costs by replacing many poll workers with fewer voter center workers as well as fewer voting machines.[23] Given the likelihood of short-term cost fluctuations together with long-term savings, both of an indeterminate quantity, it makes sense to describe the fiscal impact as "unknown."

7. Early voting has an uncertain impact on the cost of elections ranging from "unknown" cost increases to "unknown" cost savings.

There are an unpredictably wide range of variables that could impact the cost of early voting, resulting in wildly disparate predictions of fiscal impact.[24] It seems reasonable to presume that local election officials will use the flexibility inherent in this legislation to try to avoid new costs.[25] For both practical and financial reasons,

---

[19] Burden and Stewart, *Measure.*

[20] Madera County, CA, Election Administration Plan 2018.

[21] As per Hannah Sawyer, an intern who worked at the Mecklenburg County Board of Elections, who authored a Six Sigma study as part of her MPA entitled *Early Voting Business Case* [ca. 2015].

[22] See for instance Sawyer, *Early Voting*.

[23] In California, "the Nevada County Elections Office has determined that costs will exceed savings with the first implementation of the VCA. However, the Nevada County Elections Office predicts that over time conducting elections in accordance with the VCA will encourage savings based on evidence from Colorado who implemented a similar elections model." (Nevada County Election Administration Plan 2018; see also Madera County Election Administration Plan 2018, Napa County Election Administration Plan 2018, Sacramento County Election Administration Plan's Appendix J, 2018). According to the Pew Charitable Trusts' issue brief "Colorado Voting Reforms: Early Results 2013" from March 22, 2016, the statewide average cost per vote in Colorado decreased in the wake of their Voter Access and Modernized Elections Act of May 2013 from $15.96 in 2008 to $9.56 in 2014 due to reduced labor, printing, postage, and miscellaneous costs. On-demand ballot printing at vote centers reduced the total number of ballots that need to be printed. Moving from assigned polling places to fewer vote centers also required less staff.

[24] For HJR 90 (Dugger, 2014), St. Louis County assumed that they would be required to open seven satellite sites at an estimated annual cost for the location, paper and labor of $1,737,892 per election as well as non-recurring start-up costs to be $1,195,678. Yet these estimates do not consider the cost savings of reducing precincts during election day, using less voting equipment, and other factors, which would have considerable impact on an election district with a large population of registered voters. By contrast, most local election officials did not even bother to respond to the request for a fiscal note, suggesting little concern for increased costs.

[25] For instance, Illinois mandates that early voting centers must be provided at public universities (Early Voting report from NYU's Brennan Center for Justice). Local election officials could save money by using the existing local election facility itself as one of their

we anticipate that local election officials would want to provide one voting center for approximately 50,000 registered (35,000 likely) voters.[26] The 102 rural counties in Missouri with fewer than 50,000 voters may incur costs only for the stipulated overtime for its staff on the Saturday and Sunday before election day.

> [***Included in some ballot variations***: **Early voting includes the two hours before and two hours after regularly scheduled business hours during each of the six business days before election day.** This may also result in modest increased costs for less populous counties.]

Yet local election authorities may be able to absorb those costs by adjusting existing work schedules.[27] In the sixteen suburban, exurban, or urban districts in Missouri with 50,000 or more registered voters, including St. Louis with more than 750,000 registered (457,609 likely) voters, local election officials should be able to reallocate resources from their many precincts into consolidated early voting centers to actually incur cost savings.[28] This consolidation would allow the local election officials to rely on their best workers and reduce the number of required voting machines (and associated costs for transportation and rental space), as has happened in other states.[29] It also reduces the number of provisional ballots.[30] Overall, early voting has been proven in other states to drastically reduce costs in the long-term and/or

---

voting centers (such as the County Clerk's office) and using other publicly owned (municipal, county, and state) facilities for the auxiliary centers as needed (such as civic centers, firehouses, high school gymnasiums, or public university buildings). The latter are typically located in central locations, accessible by public transportation, open on a similar schedule as the local election officials office, provide public parking, and can be secured such that the machines do not need to be removed each day. Other popular alternatives in states with early voting include retail stores, bus stations, hotels, and supermarkets. (Robert Stein and Greg Vonnahme, "Polling Place Practices and the Voting Experience," in Burden and Stewart, *Measure*, p. 170-72)

[26] Prior bills submitted to the Missouri General Assembly stipulated a range of formulae: one voting center for every three existing precincts (HB994, Price, 2019) which results in a very large price tag of $9,764,250 in new election costs; one additional voting site for more than 175,000 registered voters (HB848, Neth, 2013) or a staggered scale thereafter for every 75,000 voters (HJR5, Merideth, 2019), which would only impact six local election officials; one voting center for every 50,000 residents (HB501, Newman, 2017; HB1550, Newman, 2018) which would require 49 voting centers statewide; or no formula at all (HJR 90 Dugger, 2014). See also Matt Blunt Early Voting Report, n.d., and Jason Kander, Time for Early Voting, 2013.

[27] If local election officials do require paying overtime for the two weekend days, a reasonable estimate based on Jackson County figures would be $30.60 per hour per employee (at time and a half) for two employees for 16 hours total, or $979.47 per county. (See data from Secretary of State's Office and HB994, Price, 2019)

[28] For instance, the Jackson County Election Board currently has 239 precincts for 254,769 registered and 151,029 likely voters that they currently open only on election day, for which they pay $200.00 per precinct (for a total of $47,800) plus 2 judges per site @ $12.00 per hour for 8 hours per day ($192 per precinct = $45,888). If they chose to participate in early voting, the local election official might instead open 5 voting centers in public buildings including the local election official itself (at $0 cost) which requires 2 judges per site @ $12.00 per hour for 8 hours per day for 42 days as well as 2 weekend days before election day for a total of $42,240 or half the current cost [*alternate ballot language*: with an additional $288 for the additional two hours before and after regular business hours on the six days before election day]. (See data from Secretary of State's Office and HB994, Price, 2019; compare to Sacramento County Election Administration Plan's Appendix J, 2018)

[29] Between 1999 and 2001, North Carolina introduced no excuse absentee ballots and an eighteen-day early voting period. According to Sawyer's *Early Voting*, Mecklenburg County, NC, was able to significantly reduce the number of required machines at a cost savings of $1,261,700 in purchase price and maintenance costs by using the same machines on both election day and during the early voting period. The more people who voted early (62% in 2012, 75% anticipated in 2016), the more they maximized existing infrastructure, halving the annualized cost of each machine from $685.56 to $309 over a ten-year period.

[30] Mecklenburg County NC (*ibid.*) recorded a reduction from 3,156 provisional ballots in 1996 to 1,522 in 2012 due to early voting. The Pew Charitable Trusts reported in "Colorado Voting Reforms: Early Results 2013" on March 22, 2016, that there was a remarkable 98% reduction in provisional ballots cast in Colorado.

allowed for the reallocation of scarce resources.[31] Crucial to estimating the fiscal impact of these ballot initiatives is the fact that they allow local election officials to determine the number of early voting centers and allows them to increase hours of operation beyond the minimum based on local circumstances. Opening a second early voting center may not make fiscal sense for a district with only 2-5,000 registered voters; but additional voting centers or longer hours may enable more populous jurisdictions to make better and more dynamic use of existing resources.[32] Doing so may require some trial and error, as other states have experienced.[33] Given the flexibility in the legislation to adapt to local conditions and the fact additional centers and hours are entirely optional, the fiscal impact cannot be precisely measured.

Individually, the vast majority of these costs are either $0 or "unknown". Taken together, there is a strong likelihood of new short-term expenses along with significant opportunities for long-term cost savings. These variables make it impossible to estimate the net fiscal impact of this multifaceted legislation.[34] We therefore advise the State Auditor to summarize its potential cost to taxpayers as **$0 to "unknown"** since that is the most accurate description of its overall fiscal impact.

Yours sincerely,

Andrew Stuart Bergerson, 5601 Locust Street, Kansas City, MO, 64110, and
Jared Wight, 5711 Holmes Street, Kansas City, MO, 64110

---

[31] Between 2008 and 2016, voter transactions in Mecklenburg County NC (*ibid.*) cost $2.48-$3.57 per early vote in contrast to $7.19-$11.69 for election-day voting. See also Pew Charitable Trusts, "Colorado Voting Reforms: Early Results 2013", March 22, 2016.

[32] For instance, Buchanan County with 52,996 registered (30,117 current) voters in 2018 could process on average 1204 registered voters per 8-hour day or 151 per hour in an early voting period of 44 days (including weekend days before election day) if they restricted themselves to just the existing local election authority's offices as their voting center. Adding a second early voting center would reduce these rates to a more manageable 602 per day and 75 per hour. By contrast, Macon County with 10,805 registered (6,591 current) voters in 2018 could already process on average 246 registered voters per day or 31 per hour in a single voting center without having to open a second center. [*Alternate voting language*: extended business hours in the six days before election day would further reduce the number of voters per hour on average.]

[33] Colorado's General Assembly has passed a new bill HB19-1278 (2019) that would change the formula for determining how many ballot drop boxes and vote centers are required in order to address isolated instances of long lines on election day. In 2018, researchers from USC and UC-Riverside found elections officials faced a number of unexpected hurdles with the Voter's Choice Act. As John Myers of the Los Angeles Times reported on 21 April 2019: "Costs went up in some counties, as workers at vote centers needed additional training and counties replaced the often no-fee locations for polling places with buildings that had to be rented for a week or more. Some local officials said they needed more vote centers than the minimum required by the state law, especially on election day — for whatever reason, a number of voters didn't use the service until the last minute." The researchers concluded: "The culture of in-person voting on one single day will require more than one election cycle to change." In the long-term, however, the four original counties in California who implemented the Voter's Choice Act all anticipate long-term costs savings (Madera County Election Administration Plan 2018; Nevada County Election Administration Plan 2018; Napa County Election Administration Plan 2018; Sacramento County Election Administration Plan's Appendix J, 2018).

[34] The House Fiscal Agency in Michigan drew a similar conclusion regarding the 2018 ballot proposal 3 Promote the Vote, which included many similar features and is the foundation for the Missouri legislation. "The various rights proposed in the amendment would have *separate indeterminate costs*, but they will likely entail *marginal* increased costs for local units of government and o*verall decreased* expenditures from the state, with some marginal cost increases for the Department of State (DOS)." (our *italics*)

The State Auditor's office did not receive a response from the **Department of Higher Education, Adair County, Boone County, Callaway County, Cass County, Clay County, Cole County, Jackson County, Jasper County, St. Charles County, Taney County,** the **City of Cape Girardeau,** the **City of Columbia,** the **City of Jefferson,** the **City of Joplin,** the **City of Kirksville,** the **City of Mexico,** the **City of Raymore,** the **City of St. Joseph,** the **City of Springfield,** the **City of Union,** the **City of Wentzville,** the **City of West Plains, Cape Girardeau 63 School District, Hannibal 60 School District, Malta Bend R-V School District, Mehlville School District, State Technical College of Missouri, University of Missouri, St. Louis Community College,** the **Jackson County Election Board,** and the **Clay County Board of Election Commissioners.**

Fiscal Note Summary

State governmental entities expect one-time costs of at least $1 million and possible ongoing costs. Local governments are expected to have costs of an unknown amount totaling at least $745,000 in one-time costs, $192,000 in annual costs, and $658,000 in costs per election.

RECEIVED
AUG 09 2019
STATE AUDITORS OFFICE

The Honorable Nicole Galloway
State Auditor
State Capitol Building
Jefferson City, MO 65101

RE: Petition approval request from Mary Anne Sedey regarding a proposed constitutional amendment to Article VIII, version 5 (2020-109)

Dear Auditor Galloway:

Enclosed please find an initiative petition sample sheet for a proposal to amend the Missouri Constitution filed by Mary Anne Sedey on August 8, 2019.

We are referring the enclosed petition sample sheet to you for the purposes of preparing a fiscal note and fiscal note summary as required by Section 116.332, RSMo. Section 116.175.2, RSMo requires the state auditor to forward the fiscal note and fiscal note summary to the attorney general within twenty days of receipt of the petition sample sheet.

Thank you for your immediate consideration of this request.

Sincerely,

John R. Ashcroft

cc: Hon. Eric S. Schmitt

NOTICE: You are advised that the proposed constitutional amendment may change, repeal, or modify by implication or may be construed by some persons to change, repeal, or modify by implication, the following Sections of the Missouri Revised Statutes: Sections 115.003 through 115.960. The proposed amendment revises Article VIII of the Constitution by amending Sections 5 and 7, and adopting four new sections to be known as Article VIII, Sections 24, 25, 26, and 27.

Be it resolved by the people of the state of Missouri that the Constitution be amended:

Section A. Article VIII of the Constitution is revised by amending Sections 5 and 7, and adopting four new sections to be known as Article VIII, Sections 24, 25, 26, and 27 to read as follows:

Section 5. Registration of voters [may be provided for by law] shall occur as specified herein. All laws governing registration shall be interpreted liberally to ensure, to the extent possible, that all eligible citizens be allowed to register to vote and to vote.

(1) The secretary of state shall establish a process to conduct automatic voter registration based on driver's license information and state issued nondriver's license information.

(2) The department of revenue shall, on at least a weekly basis, provide the secretary of state with a list of eligible citizens who have applied for, applied to renew, or changed the address related to a driver's license or state issued nondriver's license, are citizens of the United States, residents of Missouri, and meet the legal criteria to be eligible to vote in the State of Missouri. Such list shall contain any information required to register to vote under applicable law, and any available electronic signature information.

(3) The secretary of state shall designate the department of social services and the department of conservation to serve as sources for lists of citizens who are eligible to vote, any available electronic signature information, and any other information required to register to vote under applicable law.

(4) The secretary of state shall designate additional state agencies including:

(a) all agencies that have current data on citizenship, residency, and age of individuals;

(b) any agency that does or could provide applicants with the opportunity to affirm voter eligibility criteria as part of their agency transaction;

(c) any agency that has records of eligible citizens who would not otherwise be registered to vote; and

(d) any agency that is required to offer voter registration services under any other provision of law, including but not limited to Section 7 of the National Voter Registration Act, as amended.

(5) Based on the lists received under this section, the secretary of state shall provide lists of citizens who are presumptively eligible to vote to local election authorities. These lists shall be sent to local election authorities as often as required by law, but at least every thirty days, and fourteen days prior to any election. These lists shall include the names of presumptively eligible voters, the information required to determine whether an individual is eligible to vote, and any available electronic signature information. The local election authorities shall include such presumptively eligible voters on voter registration lists subject to existing verification procedures for determining whether an individual is eligible to vote. Local election authorities shall retain full jurisdiction and power to decline to register individuals not verified to be eligible to vote, and in accordance with applicable state and federal law, may remove the names of individuals who are no longer eligible to vote from voter registration lists.

(6) Regardless of the amount of time it takes to process the registration, an individual shall be deemed registered to vote on the day the local election authority receives the information from the secretary of state provided that such individual is later determined eligible to vote by the local election authority. Within seven business days of the local election authority receiving an individual's information from the secretary of state, the local election authority shall update its list of eligible voters and send notice of automatic registration to newly registered voters and provide the opportunity to decline registration. Such notice may be sent in the same manner and at the same time as voter identification cards or other communication required by law. If, after a period of thirty days, the notice declining registration is not returned to the local election authority, the individual's name shall remain on the voter registration list. Any time an individual declines registration the individual's name shall be removed from the voter registration list. This subsection shall not be construed to prevent removal from voter registration lists by any other method allowed under state and federal law.

(7) The provisions of this section shall not be interpreted to invalidate any other method for voter registration.

(8) No individual who does not meet the legal criteria to be eligible to vote shall be considered to have caused a false or fictitious voter registration, if the record and signature of such individual is transmitted by the secretary of state to a local election authority pursuant to this section without the individual's affirmative consent. If such an individual is added to the voter registration list, the individual shall not be subject to any penalty under law. Upon determining such individual is not eligible to vote, the local election authority shall remove the individual from the voter registration list.

2. In order to vote in any election for which registration is required, the deadline for a person to be registered to vote in the jurisdiction of his or her residence shall be no earlier than 5:00 p.m. on the second Tuesday prior to the election, except with regard to covered voters and intrastate voters as defined by general election law. Intrastate voters may vote in their new jurisdiction if they are registered to vote in the State of Missouri.

3. Nothing in this section shall be interpreted to conflict with the Voting Rights Act of 1965, The National Voter Registration Act of 1993, The Help America Vote Act of 2002, or any other applicable federal law or regulation.

Section 7. All qualified [electors] voters of the state [who are absent, whether within or without the state,] may [be enabled by general law to] vote by absentee ballot without providing a reason at all elections by the people either in person or by mail starting forty-two days before an election. For the purposes of this section, the early voting period shall be the period when eligible voters may cast an absentee ballot in person. Procedures for voting by absentee ballot shall be the same as provided in general election law, except as provided herein.

(1) Voters who choose to vote by absentee ballot shall have the option to receive the absentee ballot in the mail or to vote in person using an absentee ballot during the early voting period. Voters who receive an absentee ballot in the mail shall be allowed to return their completed ballot and envelope by mail, or by dropping it off at any officially designated voting location during the early voting period or on election day. The local election authority may also provide additional options for returning or casting absentee ballots. Nothing in this section shall be construed to prevent a person who has received a ballot in the mail but has not returned a completed ballot from casting a regular or provisional ballot in person during the early voting period or on election day.

(2) Each local election authority shall make one or more locations available to issue absentee ballots and to receive completed absentee ballots during the early voting period. Any such designated location shall be open during the local election authority's regularly scheduled business hours and for at least eight hours on the Saturday and eight hours on the Sunday immediately prior to the election, except that the location shall be open for two hours before and two hours after regularly scheduled business hours during each of the six days before election day.

(3) Local election authorities may make absentee ballots available for voting in person during the early voting period at additional times and places beyond what is designated in subsection (2).

(4) Notwithstanding any other provision of law to the contrary, voters who cast an absentee ballot by mail shall be required to attest to and sign, whether by signature or mark, the following statement:

> I state under penalty of perjury that I am an eligible voter; that my signature and name are as shown on this envelope; that I will not cast more than one vote in this election; and that my ballot is enclosed in accordance with the provisions of the constitution and laws of this state.

However, there shall be no requirement that such signature be notarized or sworn to before the election official receiving the ballot, a notary public, other officer authorized by law to administer oaths, or any other witness.

(5) All qualified voters of the state shall be provided the opportunity to request to permanently receive absentee ballots in the mail for all future elections. An opportunity to sign up to permanently receive absentee ballots shall be provided, at a minimum, on the application for voter registration, via electronic means, and on the application to receive an absentee ballot.

(6) Absentee ballots postmarked or bearing an intelligent mail barcode traceable to a date of entry into the federal mail system on or before the day before election day shall be counted by the local election authority.

(7) Notwithstanding any other provision of law to the contrary, if an absentee ballot envelope is found to have a deficiency, the local election authority shall immediately notify the voter and shall allow the voter an opportunity to cure the deficiency at any time, but no later than seven days after the election. Notification to a voter shall first be attempted by phone or email, if the local election authority has such information, and then by first class mail.

(8) The secretary of state and all local election authorities shall make available a list of all voters who cast ballots under this section or Article VIII, section 24 of this Constitution. Such list shall include voter information that is a matter of public record. This list shall be provided in the same manner required by general election law.

Section 24. An absentee ballot of an overseas or uniformed services voter, as defined by general election law, shall be counted by the local election authority so long as the ballot is dated on or before election day and received by the local election authority within seven days of election day.

Section 25. The secretary of state in conjunction with the state auditor shall provide a recommendation to local election authorities for the best method to conduct a risk-limiting audit of election returns. Each local election authority shall adopt a method of risk-limiting audit for auditing election returns.

Section 26. A citizen who is at least 16 years old and otherwise meets all eligibility requirements of Section 2 shall be provided an opportunity to pre-register to vote as provided herein.

(1) Such individual may pre-register pursuant to the registration process in Section 5 of this Article; or

(2) Such individual may choose to register pursuant to any other registration procedure available under general election law.

(3) Notwithstanding pre-registration, such individual shall not be eligible to vote unless they will be 18 years of age or older on or before the day of the election in which they seek to cast a ballot.

Section 27. All provisions of this Act are severable. If any portion, clause, or phrase of this Act is, for any reason, held to be invalid or unconstitutional by a court of competent jurisdiction, the remaining portions, clauses, and phrases shall not be affected, but shall remain in full force and effect.

MISSOURI STATE AUDITOR'S OFFICE
FISCAL NOTE (20-109)

Subject

Initiative petition from Mary Ann Sedey regarding a proposed constitutional amendment to Article VIII. (Received August 9, 2019)

Date

August 29, 2019

Description

This proposal would amend Article VIII of the Missouri Constitution.

The amendment is to be voted on in November 2020.

Public comments and other input

The State Auditor's office requested input from the **Attorney General's office,** the **Department of Agriculture,** the **Department of Economic Development,** the **Department of Elementary and Secondary Education,** the **Department of Higher Education,** the **Department of Health and Senior Services,** the **Department of Insurance, Financial Institutions and Professional Registration,** the **Department of Mental Health,** the **Department of Natural Resources,** the **Department of Corrections,** the **Department of Labor and Industrial Relations,** the **Department of Revenue,** the **Department of Public Safety,** the **Department of Social Services,** the **Governor's office,** the **Missouri House of Representatives,** the **Department of Conservation,** the **Department of Transportation,** the **Office of Administration,** the **Office of State Courts Administrator,** the **Missouri Senate,** the **Secretary of State's office,** the **Office of the State Public Defender,** the **State Treasurer's office, Adair County, Boone County, Callaway County, Cass County, Clay County, Cole County, Greene County, Jackson County, Jasper County, St. Charles County, St. Louis County, Taney County,** the **City of Cape Girardeau,** the **City of Columbia,** the **City of Jefferson,** the **City of Joplin,** the **City of Kansas City,** the **City of Kirksville,** the **City of Mexico,** the **City of Raymore,** the **City of St. Joseph,** the **City of St. Louis,** the **City of Springfield,** the **City of Union,** the **City of Wentzville,** the **City of West Plains, Cape Girardeau 63 School District, Hannibal 60 School District, Malta Bend R-V School District, Mehlville School District, Wellsville-Middletown R-1 School District, State Technical College of Missouri, Metropolitan Community College, University of Missouri, St. Louis Community College,** the **St. Louis County Board of Elections,** the **Board of Election Commissioners City of St. Louis,** the **Kansas City Board of Election Commissioners,** the **Platte County Board of Elections,** the **Jackson County Election Board,** the **Clay County Board of Election Commissioners,** and the **State Auditor's office.**

Andrew Bergerson and Jared Wight provided information to the State Auditor's office.

Assumptions

Officials from the **Attorney General's office** indicated they expect that, to the extent that the enactment of this proposal would result in increased litigation, their office can absorb the costs associated with that increased litigation using existing resources. However, if the enactment of this proposal were to result in substantial additional litigation, their office may request additional appropriations.

Officials from the **Department of Agriculture** indicated no fiscal impact on their department.

Officials from the **Department of Economic Development** indicated no impact to their department.

Officials from the **Department of Elementary and Secondary Education** indicated this legislation does not impact their department.

Officials from the **Department of Health and Senior Services** indicated this initiative petition has no impact on their department.

Officials from the **Department of Insurance, Financial Institutions and Professional Registration** indicated that this petition, if passed, will have no cost or savings to their department.

Officials from the **Department of Mental Health** indicated this proposal creates no direct obligations or requirements to their department that would result in a fiscal impact.

Officials from the **Department of Natural Resources** indicated they would not anticipate a direct fiscal impact from this proposal.

Officials from the **Department of Corrections** indicated no impact.

Officials from the **Department of Labor and Industrial Relations** indicated this initiative petition does not appear to have a fiscal impact on their department.

Officials from the **Department of Revenue** indicated this initiative petition would cause increased operating costs in the General Revenue Fund of $83,483 for fiscal year (FY) 2021 for salary cots and Office of Administration - Information Technology Services Division (OA)-ITSD costs.

The Department of Social Services, Department of Conservation, Department of Corrections, and other state agencies as described in Section 5 (4) are also affected by this proposal.

IT Consultants	75	885.60	66,420

Section 5 (2)

The proposed constitutional amendment petition language requires the Department to provide, on at least a weekly basis, a list of eligible citizens who have applied for, applied to renew, or changed the address related to a driver license or nondriver license, are citizens of the United States, residents of Missouri, and meet the legal criteria to be eligible to vote in the State of Missouri. Such list shall contain any information required to register to vote and any available electronic signature information.

The Department assumes they will provide a regularly scheduled file of all driver license, nondriver license, and permit applicants who meet the minimum age criteria and who, based on application data entered, have submitted documents verifying United States citizenship. This file would include applicants who responded that they were currently registered to vote, applicants who responded that they were not registered and did not want to register to vote, and applicants who completed the voter registration applications at the time of license or permit application.

The "necessary" information is not defined, however the Department assumes that it will be required to send name, date of birth, address, at a minimum the last 4 digits of the social security number, and a copy of the applicant's signature for final voter registration processing.

The proposed language will require the Department to amend the current data files posted to the Secretary of State or develop a new file specific to automatic voter registration to include the digital image of the signature.

The requirement to submit a copy of the individual's signature will require the Department to amend current programs for on-line requests for change of mailing address since identity verification and signature collection are not currently required in this process.

The Department would be required to:

- Coordinate with the Secretary of State to develop requirements for the data and signature file specifications and file submission schedule.
- Coordinate with OA-ITSD to develop a data pull process for defining records for submission to Secretary of State.
- Coordinate with OA-ITSD to develop a secure process for tying the required signature file to the data file for submission to the Secretary of State.
- Test the file generation and transfer process to ensure all required data elements and signature are sent as required.
- Develop website information to link inquirers to the Secretary of State for information regarding the new automatic voter registration and provisions for declining automatic registration.
- Amend current programs for on-line requests for change of mailing address since identity verification and signature collection are not currently required in this process.

- Implement MEDL changes to the signature collection and certification processes for all transactions to include updates related to automatic voter registration.
- Implement modifications to license verification statement or generated money receipt or temporary driving privilege document to include additional information related to automatic voter registration.

Section 27

An individual who is at least 16 years old and otherwise meets all eligibility requirements to vote shall be pre-registered to vote as provided herein.

(1) Such individuals shall be pre-registered pursuant to the registration process in Section 5 of this Article.
(2) Such individual may choose to register pursuant to any other registration procedure available under general election law.

The Department would be required to:

- Develop file generation edits to ensure driver license, nondriver license, and permit applicants age 16 and over are included in the new weekly file sent to the Secretary of State.
- Implement MEDL changes to enable voter questions and responses to any eligible applicant age 16 and older.

Administrative Impact

To implement provisions of Section 5 (2) the administrative cost may be estimated as:

Personnel Services Bureau FY 2021

Update Webpage - Administrative Analyst III	10 hrs. x $19.80 =	$198.00

Driver License Bureau FY 2021

Requirements development and testing:

Administrative Analyst II –	360 hrs. x $17.13 per hr. =	$6,166.80
Management Analyst Spec. II –	440 hrs. x $20.57 per hr. =	$9,050.80
Revenue Manager -	80 hrs. x $20.59 per hr. =	$1,647.20
		T**otal = $16,864.80**

The department also provided the following comments:

Section 5 (2)
For purpose of this fiscal note the Department assumes that they will apply the same requirements related to automatic voter registration specified for new and renewal applicants to individuals applying for a duplicate, reprint or replica driver license, nondriver license, instruction permit, or commercial learners permit. If it is not the sponsor's intent to include duplicate transactions, the Department recommends the sponsor amend the language to specifically prohibit.

The Department assumes it is not the sponsor's intent to forward record updates derived from other mailing address updates sources such as National Change of Address files, courts or documentation received from sources other than the applicant.

The proposed language will require the Department to amend the current data files posted to the Secretary of State or develop a new file specific to automatic voter registration to include the digital image of the signature when the application or request for update included collection of the individual's signature.

The requirement to submit a copy of the individual's signature will require the Department to amend current programs for on-line requests for change of mailing address since identity verification and signature collection are not required in this process.

Section 27
The Department assumes this minimum age applies to the file transfer to Secretary of State and will not change current voter registration application provisions which limit completion of an application to persons age 17 ½ years of age or older with a certification that they will be 18 years of age on or before election date.

Officials from the **Department of Public Safety - Office of the Director** indicated they see no fiscal impact due to this initiative petition.

Officials from the **Department of Social Services** indicated they do not anticipate a fiscal impact as a result of this initiative petition.

Officials from the **Governor's office** indicated there should be no added costs or savings to their office.

Officials from the **House of Representatives** indicated no fiscal impact to their office.

Officials from **Department of Conservation** indicated no adverse fiscal impact to their department would be expected as a result of this proposal.

Officials from the **Department of Transportation/Missouri Highways and Transportation Commission** indicated this initiative petition will have no fiscal impact, as Article IV, Section 30(b) of the Missouri Constitution limits the use of state revenue

derived from highway users (SRHU). Registering citizens to vote does not relate to the design, construction, maintenance, and operation of the state highway system.

Officials from the **Office of Administration** indicated this proposal amends Article VIII of the Constitution of Missouri by amending Sections 5 and 7 and adopting four new sections.

This proposal requires the Secretary of State to establish a process to conduct automatic voter registration based on driver's license information and state issued nondriver's license information. Applicable state agencies shall provide to the Secretary of State lists of citizens eligible to vote, any available electronic signature information, and any other information required to register to vote. The Secretary of State shall provide lists of citizens who are presumptively eligible to vote to local election authorities. Local election authorities shall include such presumptively eligible voters on voter registration lists subject to existing verification procedures for voter eligibility. Individuals automatically registered to vote shall be provided an opportunity to decline registration. Individuals automatically registered to vote who are not eligible to vote shall not be subject to any penalty, and the local election authority shall remove any such individuals from the voter registration list. The deadline for voter registration shall be no earlier than 5:00 p.m. on the second Tuesday prior to the election, except with regard to covered voters and intrastate voters. Intrastate voters may vote in their new jurisdiction if they are registered to vote in Missouri.

This proposal provides that all qualified voters of the state may vote by absentee ballot without providing a reason either in person or by mail starting 42 days before an election and specifies how local election authorities are to administer absentee ballots. All qualified voters of the state shall be provided the opportunity to request to permanently receive absentee ballots in the mail for all future elections. An absentee ballot of an overseas or uniformed services voter shall be counted by the local election authority so long as the ballot is dated on or before election day and received by the election authority within 7 days of election day. The Secretary of State and all local election authorities shall make available a list of all voters who cast absentee ballots.

This proposal requires the Secretary of State in conjunction with the State Auditor to provide a recommendation to local election authorities for the best method to conduct a risk-limiting audit of election returns. Each local election authority shall adopt a method of risk-limiting audit for auditing election returns.

The proposal provides that an individual who is at least 16 years old and otherwise meets all eligibility requirements to vote shall be pre-registered to vote. Such individuals are prohibited from casting a ballot until they meet all voter eligibility requirements.

This proposal should not result in additional costs for their office.

Officials from the **Office of State Courts Administrator** indicated there is no fiscal impact on the courts.

Officials from the **Missouri Senate** indicated they anticipate no fiscal impact.

Officials from the **Secretary of State's office** indicated this petition would implement an automatic voter registration program. The bill would require the Department of Revenue (DOR) and other agencies to transmit to the Secretary of State (SOS) records containing information of eligible voters, based on agency records (such as driver's license applications in the case of DOR). This information is then made available to each local election authority, which will then send notice to each person giving them the opportunity to decline to be registered. For the purposes of this fiscal note, their office assumes that this information will be transmitted in an electronic format.

To implement these requirements, significant programming changes would need to be made to the centralized voter registration database (MCVR) to develop multiple new interfaces, to allow electronic transmission of electronic agency data, to sync agency data with currently existing voter information in MCVR, to allow local election authorities to generate and send notices of opportunity to decline registration, to create a queue of individuals who have been sent notice of opportunity to decline registration, and to allow information to be transferred between counties. Based on the implementation of similar systems in other states, this section would result in an estimated one-time cost of $1,000,000 in fiscal year (FY) 2021.

This bill requires local election authorities to send notice of opportunity to decline registration to each individual that is not currently a registered voter. This is a new responsibility that must be funded by the state under Article X, Section 21 of the Missouri Constitution. Based on a recent comparison of voter records to driver's license records, a total of 743,280 individuals were found to have a driver's license but were not identified as registered voters. Sending notice to each individual would cost $0.90 to mail ($0.55 for outgoing postage as of January 2019, $0.35 for the endorsement on the paid return postcard) plus the costs of printing. Postage would amount to $668,952 and printing is estimated at $33,270, for a total that could reach or exceed $702,222 (depending on the specific number of persons identified by DOR and other agencies) beginning in FY 2021.

Future notice mailings would incur costs to the state of Missouri. The cost of notice mailings in future fiscal years is unknown due to several variable factors including voter registration rates and postage cost increases.

This petition also requires local election authorities to maintain one or more locations for eight hours on the Saturday and Sunday before each election to facilitate absentee voting. While each local election authority already maintains four hours of Saturday operation as required by current law, this increase would require additional staffing costs for the equivalent of 348 judge-days statewide (two judges for 1.5 days in 116 jurisdictions). Assuming an average payment of $125 per judge-day, this would amount to $43,500 per election beginning in FY 2021.

Additionally, this petition requires local election authorities to maintain office hours for two hours earlier and two hours later than their normal business hours for six days prior to

an election (while the wording is ambiguous, their assumption is that this refers to normal business days). This increase would require additional staffing costs for the equivalent of 696 judge-days statewide (two judges for the equivalent of 3 days in 116 jurisdictions). Again assuming an average payment of $125 per judge-day, this would amount to $87,000 per election beginning in FY 2021.

Their office is being conservative in assuming all new costs will be subject to Article X though there may be some legal uncertainties on this point.

Officials from the **Office of the State Public Defender** indicated this initiative petition will not have any impact on their office.

Officials from the **State Treasurer's office** indicated no fiscal impact to their office.

Officials from **Greene County** indicated the following estimate is based on U.S. Census Data that estimates current county population at **291,923**. It is estimated that **18.7%** of the population is under **16** years old, which accounts for **54,515** residents. They have on average **190,000** registered voters, of which about **30,000** (**16%)** are inactive, meaning their address is no longer verified but registered nonetheless and so they are included as part of the number below.

R's = Residents
RV's = Registered Voters
yrs = Years
PV's = Potential Voters
MC = Mailing Cost
CPC2P = Cost Per Card to Process
FTH = Fulltime Hire
PTH = Part-time Hire
AP = Annual Pay

291,923 R's – **50,415 R's** under **16 yrs** = **241,508 R's 16 yrs** or older

241,508 R's 16 yrs or older – **190,000 RV's = 51,508 PV's**

51,508 PV's x .50 MC = $20,000 + fees **= $25,754**

51,508 PV x 1.06 CPC2P = $54,598.48

If they have approximately **51,508 PV's** not registered based on the number above, and a Voter ID card is mailed to each voter as stated in the petition language at **.50** apiece, it will be a **$25,754 MC**. How will that cost be delineated in subsequent mailings is very hard to predict, but they do anticipate it will be reduced over time from the original estimate as more residents become registered.

The actual time spent to fully process any new Voter ID card is estimated at **$1.06 CPC2P**. This adds an additional **$54,598.48** to the cost when it is multiplied by the estimated **51,508** voters eligible to be registered.

There is also in the petition language additional requirements. This includes allowing new voters to register up to 2 weeks prior to an election, absentee mailing changes and risk-limited auditing requirements post-election. These additional requirements will at a minimum require an additional **2 FTH** and **1 PTH** for the office to ensure the ongoing administrative duties the petition requires will be completed on time for voters. This additional cost per **FTH** will be **$24,689.60** per hire for their annual pay and **$12,026.90** annual pay for the **PTH**. The total annual cost for two fulltime hires will be **$49,379.20.**

51,508 PV's x .50 MC	**= $25,754**
51,508 PV x 1.06 CPC2	**= $54,598.48**
2 FTH x $24,689.60 AP	= **$49,379.20**
1 PTH x $12,026.90 AP	**= $12,026.90**
Total:	= **$141,758.58**

The total estimated initial cost for Greene County for **IP 20-109** proposing to amend Article VIII, version 5, will cost Greene County **$141,758.58** with a minimum ongoing cost of **$61,406.10** for personnel. There will be other ongoing cost to include COLA increases, Step increases for employee pay as well as anticipated ongoing administrative cost that cannot be predicted at this time.

Officials from **St. Louis County** indicated this initiative petition does not appear as though it would have a direct fiscal impact on St. Louis County Government. However, there is the possibility that the St. Louis County Board of Elections would incur additional operational expenses and would seek additional appropriations from the County General Fund to cover the expenses. The Board of Elections intends to make a separate reply.

Officials from the **City of Kansas City** indicated this will have no fiscal impact on their city.

Officials from the **City of St. Louis/Board of Election Commissioners City of St. Louis** indicated this initiative petition would have a negative fiscal impact.

The Board of Election Commissioners is supportive of this initiative, but believes that the increase in costs would be hard to manage as a result of this amendment. Following are rough estimates for expected increases:

1) Hiring 2 full-time employees at $32,000 each.
2) Hiring 4-6 temporary staff members in the Absentee department for 10 40-hour work weeks at $15.00 an hour.
3) Printing and postal costs for applications and ballots will triple in the Absentee department, increasing expenses by $305,000.

4) Printing and postal costs for missing information letters and ENC notices will triple in the Registration department, increasing expenses by $1,205.
5) Increase in Business Reply Mail Return costs for absentee application and ballots will increase by $75,000.
6) Election day absentee ballot counters will triple in size, increasing costs by $15,000.
7) Ballot order will increase due to the increase in registrations, but the fiscal impact is tough to estimate.
8) Registration overtime costs will increase for data entry of new registrations but fiscal impact is tough to estimate.
9) Cost of supplies, such as paper, pens, etc. would increase by about $5,000.

The Director of Board of Election Commissioners noted that these are merely rough estimates and the actual fiscal impact is hard to determine.

Officials from **Wellsville-Middletown R-1 School District** indicated they do not see any fiscal impact of these petitions that is unique to their district. Any costs related to these may come out of general revenue which will have a negative impact to some degree on all state funded entities.

Officials from **Metropolitan Community College** indicated no fiscal impact.

Officials from the **St. Louis County Board of Elections** indicated they predict this amendment would have a fiscal impact of $47,500 per County-wide election, with an additional $9,000 annual cost. Having their office open for an additional 12 hours on the weekend and 16 hours on the weekdays, and at a rate of $5,000 per every 8 hours, this would cost $17,500. The additional absentee costs in the amendment are estimated to be about $30,000. The annual cost of sending voters postage cards to decline automatic registration would be about $9,000. It is important to note that a significant portion of all of these costs could be offset by the reduced need for polling places due to early voting.

Officials from the **Kansas City Election Board** indicated if this initiative petition is passed, election costs definitely increase at least $50,000 per election for additional postage, printing, training, staff overtime, temporary employees, legal notices and location rentals to process these additional services. Additionally, at least 2 to 4 permanent staff would need to be hired at $35,000 each, including benefits.

Officials from the **Platte County Election Board** indicated the additional hours proposed in the petition would add about $5,000 to the cost of an election.

Officials from the **State Auditor's office** indicated the proposed language, if implemented, should have no fiscal impact on their office. Any impact can be absorbed through current appropriations.

Re: Fiscal-Cost Estimates for "VOTE 2020" Ballot Initiatives in 16 Variations (20-072 through 83 and 20-088 through 91)

To the Honorable Nicole Galloway, CPA, Missouri State Auditor:

Pursuant to Title IX Section 116.175 of the Missouri Constitution, we hereby submit this statement of fiscal impact to advise you and your office in estimating the fiscal cost of the "VOTE 2020" petition-based ballot initiatives to amend the Missouri Constitution. The information contained in this letter is relevant to all 16 petition variations: 20-072 through 83 and 20-088 through 91.

Drew Bergerson is a Professor of History and Jared Wight is a System Administrator, both at the University of Missouri-Kansas City. Although we submit this opinion purely as private citizens, we used our experience as social and computer scientists to do so.

We surveyed the relevant legislation proposed to the Missouri General Assembly for ten or more years, focusing especially on any associated fiscal notes from the State Auditors. We interviewed local election officials in the Kansas City and St. Louis areas. We reviewed the reports of major think tanks, non-profit organizations, and scholars who specialize in electoral practices. And we considered the reports provided by counties and states like California, Colorado, Michigan and North Carolina who recently implemented similar policies.

Below we summarize our research in seven points, including information particular to one or more variations of the ballot language where relevant.

1. **Automatic voter registration will likely incur one-time infrastructural costs of approximately $50-60,000 but are actually "unknown".**
   In the fiscal note for the recent bill with the most detailed description of one-time costs (HB 1934 McCann Beatty, 2018)[1], the State Auditor anticipated significant one-time expenses for extensive technological improvements to the Missouri Voter Registration Database ($1,000,000)[2], software programming ($27,540-$85,050), administrative costs for impacted departments ($7,228-$8,700), and employee training ($0-unknown). Missouri, however, has no reason to rely solely on its own resources for modernizing its election technologies as it has access to approximately $7.5 million for these purposes from the Federal Government.[3] According to the U. S. Election Assistance Commission, states must match Federal funds at 5%, but they may use those funds to improve elections by adding cybersecurity systems, cybersecurity training, new voting equipment with paper ballots, and post-election risk-limiting audit systems (#2 below).[4] It is therefore reasonable to assume that the fiscal impact *on the state budget* for the infrastructural items listed above would be only 5% of the total expense, or approximately $50-60,000. That said, the range of estimated costs is wide depending on how automatic voter registration is implemented in terms of infrastructural improvements. So, a more accurate assessment of cost would be "unknown".

2. **Risk-limiting audits will incur "unknown" up-front and ongoing costs.**
   For risk-limiting audits, Missouri has access to the same Federal funds at a matching rate of 5% for the purpose of upgrading our technology for cybersecurity etc.,[5] so it is reasonable to assume that infrastructural improvements for risk-limiting audits would be included in the estimates listed in #1 above. Long-term, there may be ongoing costs or even net savings; but as in #1, it is impossible to estimate them

---

[1] See also HB29, Stacy, 2019; HB 731 Manlove 2019; HB994, Price, 2019.

[2] According to Common Cause-Massachusetts, *Automatic Voter Registration Cost Report*, 05.24.2018, similar one-time improvements cost approximately $200,000 in Oregon and $434,117 in Vermont. According to WBUR News, MA State Representative John Mahoney estimated in 2018 that implementation of the Massachusetts automatic voter registration legislation would cost $500,000 up front. In the fiscal cost analysis of the Voter Access and Modernized Elections Act (HB13-1303), Colorado anticipated $644,000 to update SCORE, its Statewide Voter Registration System. The larger figure of $1,000,000 for Missouri is reasonable given the relatively backward state of our election technologies (also as per the Fiscal Note for HB 731 Manlove 2019).

[3] According to the U.S. Election Assistance Commission's Grant Expenditure Report for Fiscal Year 2018, published April 4, 2019, Missouri has spent all of the funds plus interest distributed starting in 2003 by the EAC to states under Section 101 of HAVA 2002: $6,829,277. Section 251 funds, known as Requirements Payments, were distributed to States using a formula found in HAVA based on a percentage equal to the quotient of the voting-age population of each State and the total-voting age population of all States. Missouri has spent $54,177,399, leaving a balance of $472,833 including interest. In March 2018, however, Congress provided an additional $380,000,000 through the Consolidated Appropriations Act of 2018. Missouri has currently spent $224,922, leaving a balance of $7,037,285 including interest.

[4] *Ibid.* States have until September 30, 2023 to request their funds and get the money in their accounts. Missouri spent most of its allocated 2018 HAVA Funds to implement cybersecurity enhancements that protect against attempts to penetrate the Missouri Centralized Voter Registration System. The state also hosted the National Election Security Summit attended by federal, state and local election authorities to discuss practical ways to mitigate threats and vulnerabilities.

[5] *Ibid.*

without knowing which specific kind of risk-limiting audits will be implemented. It makes sense to list them as "unknown".

3. **The first round of "opt-out" mailings for automatic voter registration will incur new costs but they are "unknown".**
   Prior bills with fiscal notes (HB 1934 McCann Beatty, 2018; HB29, Stacy, 2019; HB 731 Manlove 2019; HB994, Price, 2019) offer a wide range of estimates for the initial set of "opt-out" mailings based on the number of non-registered voters in government records.[6] Yet scholars have developed new techniques for producing more accurate lists by winnowing "deadwood" from existing voter rolls, which could reduce costs.[7]

   > **[*Included in some ballot variations*: The pre-registration of 16-17-year-old eligible voters will incur one-time costs of approximately $134,800.**
   > There will be approximately 100,000 potential new pre-registrations in the first year of 2021.[8] Based on a recent fiscal note (HB 731 Manlove 2019), we estimate one-time fiscal costs of $90,000 for postage @ $0.90 each plus printing cost of $44,800 @ $.0448 per person for a total of $134,800.]

   Due to new techniques for more accurately identifying eligible voters, it is impossible to precisely estimate the fiscal impact of this legislation. These one-time expenses are best described as "unknown".

4. **The long-term cost of automatic voter registration is also "unknown."**
   Prior fiscal notes offer a wide range of estimates for long-term costs, mostly for printing and mailing costs. Kansas City was an outlier, anticipating new staff positions at much larger expense ($180-260,000); but most local election authorities anticipated $0 impact.[9] Similarly, no additional staff was required for implementing automatic voter registration in Colorado, Oregon, and Vermont.[10] Oregon, which has a comparable number of non-registered voters (539,532) to Missouri (528,782), has

---

[6] The highest projections anticipate 743,280 individuals who, according to the Department of Motor Vehicles, have driver's licenses but are not registered voters, which makes the total cost for mailing and printing $702,222 + $33,270 = $735,492. Yet data from the United States Election Project suggests that this population estimate is two or more times too high. They estimate only 528,782 non-registered voters in 2018, and after removing ineligible voters, pegs the vote-eligible population at 357,583.

[7] Stephen Ansolabehere and Eitan Hersch, "Voter Registration: the Process and Quality of Lists," and Barry Burden and Charles Stewart, "Introduction to the Measure of American elections," both in *idem*, *The Measure of American Elections* (Cambridge, 2014).

[8] According to the Missouri Census Data Center, there were approximately 77,974 twelve-year olds in 2017 who will be sixteen in 2021 and 77,813 thirteen-year olds who will be seventeen. We assume that these figures will not significantly change in the next two years and that half of the seventeen-year olds or 38,906 could be pre-registered by existing statute which allows pre-registration at 17½ years old. Moreover, 7-8% of these eligible voters may never want to register: of the 4,570,675 Missouri citizens who were legally eligible to vote in 2018, 357,583 or 7.82% were not registered (United States Election Project; Secretary of State's Office).

[9] For prior bills with fiscal notes in Missouri (HB 1934 McCann Beatty, 2018; HB29, Stacy, 2019; HB 731 Manlove 2019; HB994, Price, 2019), local election officials have estimated the additional cost of printing and mailing postcards from $0 to $92,708 per year per election district but most anticipate being able to absorb the cost into their existing budgets.

[10] Common Cause-Massachusetts, *Automatic Voter Registration Cost Report*, 05.24.2018.

reported mailing a consistent number of 21,700 mailings per month for "opt-out" registrations at the cost of $330,217 per biennium.[11] In various states, automatic voter registration has even reduced other costs, for instance, by reducing the number of provisional ballots.[12] Arguably the largest cost savings for Missouri would come from replacing the current system of paper registration cards and manually reentering voter registrations from paper lists with digital voter registration systems.[13] In the most detailed fiscal notes to two of the prior bills (HB 1934 McCann Beatty, 2018; HB 731 Manlove 2019), the Office of the Secretary of State explicitly stated their assumption that voter lists "will be transmitted in an electronic format," no doubt in recognition of this opportunity to economize.

> [***Included in some ballot variations***: **The pre-registration of 16-17-year-old eligible voters will incur $0 ongoing costs.** Regardless whether the voter is pre-registered as a youth or registered as an adult, ongoing costs should either be the same for automatic voter registration or decrease over time through efficiencies in the system.]

Without knowing the precise nature of the new technologies and given the likelihood of opportunities to economize, it is impossible to estimate the long-term costs of automatic voter registration. They are therefore best described as "unknown."

5. **Moving the final registration date to fifteen days before election day will cost $0.**

There are no fiscal notes yet available for the two bills introduced into the Missouri General Assembly on this topic (HB 993 Price, 2019; SB 384, Schupp, 2019). Comparative research in other states who have implemented *same-day* registration either report no increase in long-term cost for new technology and staff, or report a reallocation of existing resources.[14] In 2012, California approved Conditional Voter

---

[11] *Ibid.*

[12] National Conference of State Legislatures, Automatic Voter Registration, 04.22.2019. See also Sawyer, *Early Voting Business Case* for Mecklenburg County, NC, ca. 2015.

[13] In its Election Initiative issues brief "Inaccurate, Costly, and Inefficient Evidence that America's Voter Registration System Needs an Upgrade" from 02.2012, the Pew Center on the States argues that paper registration systems are expensive compared to electronic. Where Oregon spent $4.11 per active voter to process registrations and maintain their voting list or $7.67 per transaction (new or updated registration), Canada spent $0.35 per voter to process registrations and Maricopa County, AZ reduced costs from $0.83 for paper registration to $.03 for online registration. In California, the introduction of Conditional Voter Registration was delayed from 2012 to 2017 until VoteCal, California's statewide voter registration database, was operational (see California Secretary of State and Santa Clara Registrar of Voters).

[14] According to the National Conference of State Legislators, additional technology is not required even for same-day registration. Whereas the additional administrative work can be time consuming, many states report a reallocation of existing costs and resources rather than additional costs. In 2015, Project Vote reported that most states experienced "minimal" incremental costs in the long term. Iowa introduced SDR with only a $40,000 onetime statewide expense. In 2011-12, Demos conducted a survey of counties in Iowa and North Carolina and found that a large majority reported little to no additional costs for same-day registration. Most did not require additional staffing at the polls. Any new expenses were generally associated with additional printing and mailing of registration forms. North Carolina respondents most frequently cited additional staffing at one-stop sites as the most notable cost associated with same-day registration. This need tended to increase among smaller-sized counties. The increased expenses cited

Registration (AB 1436) that allowed unregistered voters to register and vote within fifteen days of and including election day using a provisional ballot, and it became operational in 2017 (see California Secretary of State and Santa Clara Registrar of Voters). Their State Legislature anticipated increases in cost of $5-10,000 per county but only due to the provisions of the law related to same-day registration.[15] The legislation proposed in Missouri sets the registration deadline at fifteen days before election day as well but *without* the option for same-day registration.[16] It is therefore reasonable to assume that no additional technology or staff would be required and therefore this aspect of the legislation would incur $0 new costs.

6. **The cost to allow all eligible voters to vote "without excuse" by absentee ballot[17] is "unknown" if not $0.**

The number of absentee ballots cast in Missouri fluctuated between 5.7% and 9.6% in 2008-2012.[18] According to the fiscal notes associated with past bills in the Missouri General Assembly (HB173, Conway, 2017; HB644, Smith, 2017; HB29, Stacy, 2019; HB202, Shull, 2019) as well as proposed constitutional amendments (HJR 90, Dugger, 2014), most local election officials did not respond with feedback or stated that the impact would be negligible on their expenses. By contrast, the local election officials from Audrain, Kansas City, Platt, and St. Louis Counties estimated increased costs ranging from $1,700 to $32,000 due to increased postage, printing, and staff. In more recent bills (HB368, McGaugh, 2019; HB527, Stevens, 2019; HB992, Price, 2019), however, the local election officials from Platt and St. Louis Counties estimate $0 fiscal impact for similar policies. Given such wildly different cost estimates from rural, suburban, and urban counties, the Committee on Legislative Oversight correctly notes that there could be a potential increase in costs but the actual fiscal impact is "unknown" if not $0. Costs (i.e. for increased staff) may increase in the short term if voters suddenly switch to permanent absentee voting by mail before the necessary infrastructure has been created; but in general, political scientists note that state- and even county-specific voting cultures are often strong predictors of future behavior; which suggests that

---

in North Carolina may not be entirely attributable to same-day registration, however. Most counties that reported adding staff were unable to disaggregate same-day registration costs from overall early voting expenses.

[15] The California Assembly predicted a modest cost increase of "$5,000 to $10,000 per county annually to accommodate voter registration, *principally on election day*, at county elections offices. This includes the costs for staffing, providing sufficient ballot types for a voter residing anywhere in the county, processing the additional voter registrations, and any additional handling associated with processing the ballots" (our *italics*). Yet they admitted that these costs will vary according to county, popularity of option, turnout, and other factors, including the number of existing provisional ballots.

[16] The other factor increasing anticipated costs in the California case was the need to process provisional ballots after election day. The Senate for instance predicted that an increase in last minute voter registration would necessitate additional labor, overtime, computers, ballots, networks, and security *on election day* and also in order to complete the processing of *more provisional ballots* during the 28 day canvas period after an election. In the proposed Missouri legislation, automatic voter registration should decrease the need for provisional ballots.

[17] including both temporarily and permanently options as well as military and overseas voters

[18] Christopher Mann, "Mail Ballots in the United States: Policy Choice and Administrative Challenges," in Burden and Stewart, *Measure*, p. 118.

there will be some inertia when it comes to voting practices and therefore a more gradual adjustment period.[19] With the implementation of the Voter's Choice Act in California, for instance, Madera County saw an increase in voting by mail from 64% to 93% in 2018, but because VCA actually *required* ballots to be mailed in that county.[20] By contrast, Mecklenburg County in North Carolina saw a more gradual increase in early voting but relatively stable percentages of no-excuse absentee ballots since the introduction of both.[21] It thus seems reasonable to assume, given the fact that both in-person and mail-in absentee ballots would be available during the 42 day early voting period, that most local election officials would be able to absorb this work using existing resources of staff and space.[22] For, the data from other states suggest that mail-in balloting significantly *reduces* the cost per vote of elections. Although it requires short-term increases in voter education programs and can incur expenses through trial and error with the number of voting centers, most local election officials who have made the transition to vote-by-mail systems anticipate long-term cost savings as a result of reduced labor costs by replacing many poll workers with fewer voter center workers as well as fewer voting machines.[23] Given the likelihood of short-term cost fluctuations together with long-term savings, both of an indeterminate quantity, it makes sense to describe the fiscal impact as "unknown."

7. Early voting has an uncertain impact on the cost of elections ranging from "unknown" cost increases to "unknown" cost savings.

There are an unpredictably wide range of variables that could impact the cost of early voting, resulting in wildly disparate predictions of fiscal impact.[24] It seems reasonable to presume that local election officials will use the flexibility inherent in this legislation to try to avoid new costs.[25] For both practical and financial reasons,

---

[19] Burden and Stewart, *Measure.*

[20] Madera County, CA, Election Administration Plan 2018.

[21] As per Hannah Sawyer, an intern who worked at the Mecklenburg County Board of Elections, who authored a Six Sigma study as part of her MPA entitled *Early Voting Business Case* [ca. 2015].

[22] See for instance Sawyer, *Early Voting*.

[23] In California, "the Nevada County Elections Office has determined that costs will exceed savings with the first implementation of the VCA. However, the Nevada County Elections Office predicts that over time conducting elections in accordance with the VCA will encourage savings based on evidence from Colorado who implemented a similar elections model." (Nevada County Election Administration Plan 2018; see also Madera County Election Administration Plan 2018, Napa County Election Administration Plan 2018, Sacramento County Election Administration Plan's Appendix J, 2018). According to the Pew Charitable Trusts' issue brief "Colorado Voting Reforms: Early Results 2013" from March 22, 2016, the statewide average cost per vote in Colorado decreased in the wake of their Voter Access and Modernized Elections Act of May 2013 from $15.96 in 2008 to $9.56 in 2014 due to reduced labor, printing, postage, and miscellaneous costs. On-demand ballot printing at vote centers reduced the total number of ballots that need to be printed. Moving from assigned polling places to fewer vote centers also required less staff.

[24] For HJR 90 (Dugger, 2014), St. Louis County assumed that they would be required to open seven satellite sites at an estimated annual cost for the location, paper and labor of $1,737,892 per election as well as non-recurring start-up costs to be $1,195,678. Yet these estimates do not consider the cost savings of reducing precincts during election day, using less voting equipment, and other factors, which would have considerable impact on an election district with a large population of registered voters. By contrast, most local election officials did not even bother to respond to the request for a fiscal note, suggesting little concern for increased costs.

[25] For instance, Illinois mandates that early voting centers must be provided at public universities (Early Voting report from NYU's Brennan Center for Justice). Local election officials could save money by using the existing local election facility itself as one of their

we anticipate that local election officials would want to provide one voting center for approximately 50,000 registered (35,000 likely) voters.[26] The 102 rural counties in Missouri with fewer than 50,000 voters may incur costs only for the stipulated overtime for its staff on the Saturday and Sunday before election day.

> [***Included in some ballot variations***: **Early voting includes the two hours before and two hours after regularly scheduled business hours during each of the six business days before election day.** This may also result in modest increased costs for less populous counties.]

Yet local election authorities may be able to absorb those costs by adjusting existing work schedules.[27] In the sixteen suburban, exurban, or urban districts in Missouri with 50,000 or more registered voters, including St. Louis with more than 750,000 registered (457,609 likely) voters, local election officials should be able to reallocate resources from their many precincts into consolidated early voting centers to actually incur cost savings.[28] This consolidation would allow the local election officials to rely on their best workers and reduce the number of required voting machines (and associated costs for transportation and rental space), as has happened in other states.[29] It also reduces the number of provisional ballots.[30] Overall, early voting has been proven in other states to drastically reduce costs in the long-term and/or

---

voting centers (such as the County Clerk's office) and using other publicly owned (municipal, county, and state) facilities for the auxiliary centers as needed (such as civic centers, firehouses, high school gymnasiums, or public university buildings). The latter are typically located in central locations, accessible by public transportation, open on a similar schedule as the local election officials office, provide public parking, and can be secured such that the machines do not need to be removed each day. Other popular alternatives in states with early voting include retail stores, bus stations, hotels, and supermarkets. (Robert Stein and Greg Vonnahme, "Polling Place Practices and the Voting Experience," in Burden and Stewart, *Measure*, p. 170-72)

[26] Prior bills submitted to the Missouri General Assembly stipulated a range of formulae: one voting center for every three existing precincts (HB994, Price, 2019) which results in a very large price tag of $9,764,250 in new election costs; one additional voting site for more than 175,000 registered voters (HB848, Neth, 2013) or a staggered scale thereafter for every 75,000 voters (HJR5, Merideth, 2019), which would only impact six local election officials; one voting center for every 50,000 residents (HB501, Newman, 2017; HB1550, Newman, 2018) which would require 49 voting centers statewide; or no formula at all (HJR 90 Dugger, 2014). See also Matt Blunt Early Voting Report, n.d., and Jason Kander, Time for Early Voting, 2013.

[27] If local election officials do require paying overtime for the two weekend days, a reasonable estimate based on Jackson County figures would be $30.60 per hour per employee (at time and a half) for two employees for 16 hours total, or $979.47 per county. (See data from Secretary of State's Office and HB994, Price, 2019)

[28] For instance, the Jackson County Election Board currently has 239 precincts for 254,769 registered and 151,029 likely voters that they currently open only on election day, for which they pay $200.00 per precinct (for a total of $47,800) plus 2 judges per site @ $12.00 per hour for 8 hours per day ($192 per precinct = $45,888). If they chose to participate in early voting, the local election official might instead open 5 voting centers in public buildings including the local election official itself (at $0 cost) which requires 2 judges per site @ $12.00 per hour for 8 hours per day for 42 days as well as 2 weekend days before election day for a total of $42,240 or half the current cost [*alternate ballot language*: with an additional $288 for the additional two hours before and after regular business hours on the six days before election day]. (See data from Secretary of State's Office and HB994, Price, 2019; compare to Sacramento County Election Administration Plan's Appendix J, 2018)

[29] Between 1999 and 2001, North Carolina introduced no excuse absentee ballots and an eighteen-day early voting period. According to Sawyer's *Early Voting*, Mecklenburg County, NC, was able to significantly reduce the number of required machines at a cost savings of $1,261,700 in purchase price and maintenance costs by using the same machines on both election day and during the early voting period. The more people who voted early (62% in 2012, 75% anticipated in 2016), the more they maximized existing infrastructure, halving the annualized cost of each machine from $685.56 to $309 over a ten-year period.

[30] Mecklenburg County NC (*ibid.*) recorded a reduction from 3,156 provisional ballots in 1996 to 1,522 in 2012 due to early voting. The Pew Charitable Trusts reported in "Colorado Voting Reforms: Early Results 2013" on March 22, 2016, that there was a remarkable 98% reduction in provisional ballots cast in Colorado.

allowed for the reallocation of scarce resources.[31] Crucial to estimating the fiscal impact of these ballot initiatives is the fact that they allow local election officials to determine the number of early voting centers and allows them to increase hours of operation beyond the minimum based on local circumstances. Opening a second early voting center may not make fiscal sense for a district with only 2-5,000 registered voters; but additional voting centers or longer hours may enable more populous jurisdictions to make better and more dynamic use of existing resources.[32] Doing so may require some trial and error, as other states have experienced.[33] Given the flexibility in the legislation to adapt to local conditions and the fact additional centers and hours are entirely optional, the fiscal impact cannot be precisely measured.

Individually, the vast majority of these costs are either $0 or "unknown". Taken together, there is a strong likelihood of new short-term expenses along with significant opportunities for long-term cost savings. These variables make it impossible to estimate the net fiscal impact of this multifaceted legislation.[34] We therefore advise the State Auditor to summarize its potential cost to taxpayers as **$0 to "unknown"** since that is the most accurate description of its overall fiscal impact.

Yours sincerely,

Andrew Stuart Bergerson, 5601 Locust Street, Kansas City, MO, 64110, and
Jared Wight, 5711 Holmes Street, Kansas City, MO, 64110

---

[31] Between 2008 and 2016, voter transactions in Mecklenburg County NC (*ibid.*) cost $2.48-$3.57 per early vote in contrast to $7.19-$11.69 for election-day voting. See also Pew Charitable Trusts, "Colorado Voting Reforms: Early Results 2013", March 22, 2016.

[32] For instance, Buchanan County with 52,996 registered (30,117 current) voters in 2018 could process on average 1204 registered voters per 8-hour day or 151 per hour in an early voting period of 44 days (including weekend days before election day) if they restricted themselves to just the existing local election authority's offices as their voting center. Adding a second early voting center would reduce these rates to a more manageable 602 per day and 75 per hour. By contrast, Macon County with 10,805 registered (6,591 current) voters in 2018 could already process on average 246 registered voters per day or 31 per hour in a single voting center without having to open a second center. [*Alternate voting language*: extended business hours in the six days before election day would further reduce the number of voters per hour on average.]

[33] Colorado's General Assembly has passed a new bill HB19-1278 (2019) that would change the formula for determining how many ballot drop boxes and vote centers are required in order to address isolated instances of long lines on election day. In 2018, researchers from USC and UC-Riverside found elections officials faced a number of unexpected hurdles with the Voter's Choice Act. As John Myers of the Los Angeles Times reported on 21 April 2019: "Costs went up in some counties, as workers at vote centers needed additional training and counties replaced the often no-fee locations for polling places with buildings that had to be rented for a week or more. Some local officials said they needed more vote centers than the minimum required by the state law, especially on election day — for whatever reason, a number of voters didn't use the service until the last minute." The researchers concluded: "The culture of in-person voting on one single day will require more than one election cycle to change." In the long-term, however, the four original counties in California who implemented the Voter's Choice Act all anticipate long-term costs savings (Madera County Election Administration Plan 2018; Nevada County Election Administration Plan 2018; Napa County Election Administration Plan 2018; Sacramento County Election Administration Plan's Appendix J, 2018).

[34] The House Fiscal Agency in Michigan drew a similar conclusion regarding the 2018 ballot proposal 3 Promote the Vote, which included many similar features and is the foundation for the Missouri legislation. "The various rights proposed in the amendment would have *separate indeterminate costs*, but they will likely entail *marginal* increased costs for local units of government and o*verall decreased* expenditures from the state, with some marginal cost increases for the Department of State (DOS)." (our *italics*)

The State Auditor's office did not receive a response from the **Department of Higher Education, Adair County, Boone County, Callaway County, Cass County, Clay County, Cole County, Jackson County, Jasper County, St. Charles County, Taney County,** the **City of Cape Girardeau,** the **City of Columbia,** the **City of Jefferson,** the **City of Joplin,** the **City of Kirksville,** the **City of Mexico,** the **City of Raymore,** the **City of St. Joseph,** the **City of Springfield,** the **City of Union,** the **City of Wentzville,** the **City of West Plains, Cape Girardeau 63 School District, Hannibal 60 School District, Malta Bend R-V School District, Mehlville School District, State Technical College of Missouri, University of Missouri, St. Louis Community College,** the **Jackson County Election Board,** and the **Clay County Board of Election Commissioners.**

Fiscal Note Summary

State governmental entities expect one-time costs of at least $1 million and possible ongoing costs. Local governments are expected to have costs of an unknown amount totaling at least $756,000 in one-time costs, $204,000 in annual costs, and $658,000 in costs per election.

RE: Petition approval request from Mary Anne Sedey regarding a proposed constitutional amendment to Article VIII, version 4 (2020-108)

Dear Auditor Galloway:

Enclosed please find an initiative petition sample sheet for a proposal to amend the Missouri Constitution filed by Mary Anne Sedey on August 8, 2019.

We are referring the enclosed petition sample sheet to you for the purposes of preparing a fiscal note and fiscal note summary as required by Section 116.332, RSMo. Section 116.175.2, RSMo requires the state auditor to forward the fiscal note and fiscal note summary to the attorney general within twenty days of receipt of the petition sample sheet.

Thank you for your immediate consideration of this request.

Sincerely,

John R. Ashcroft

NOTICE: You are advised that the proposed constitutional amendment may change, repeal, or modify by implication or may be construed by some persons to change, repeal, or modify by implication, the following Sections of the Missouri Revised Statutes: Sections 115.003 through 115.960. The proposed amendment revises Article VIII of the Constitution by amending Sections 5 and 7, and adopting three new sections to be known as Article VIII, Sections 24, 25, and 26.

Be it resolved by the people of the state of Missouri that the Constitution be amended:

Section A. Article VIII of the Constitution is revised by amending Sections 5 and 7, and adopting three new sections to be known as Article VIII, Sections 24, 25, and 26 to read as follows:

Section 5. Registration of voters [may be provided for by law] shall occur as specified herein. All laws governing registration shall be interpreted liberally to ensure, to the extent possible, that all eligible citizens be allowed to register to vote and to vote.

(1) The secretary of state shall establish a process to conduct automatic voter registration based on driver's license information and state issued nondriver's license information.

(2) The department of revenue shall, on at least a weekly basis, provide the secretary of state with a list of eligible citizens who have applied for, applied to renew, or changed the address related to a driver's license or state issued nondriver's license, are citizens of the United States, residents of Missouri, and meet the legal criteria to be eligible to vote in the State of Missouri. Such list shall contain any information required to register to vote under applicable law, and any available electronic signature information.

(3) The secretary of state shall designate the department of social services, the department of conservation, and the department of corrections to serve as sources for lists of citizens who are eligible to vote, any available electronic signature information, and any other information required to register to vote under applicable law.

(4) The secretary of state shall designate additional state agencies including:

(a) all agencies that have current data on citizenship, residency, and age of individuals;

(b) any agency that does or could provide applicants with the opportunity to affirm voter eligibility criteria as part of their agency transaction;

(c) any agency that has records of eligible citizens who would not otherwise be registered to vote; and

(d) any agency that is required to offer voter registration services under any other provision of law, including but not limited to Section 7 of the National Voter Registration Act, as amended.

(5) Based on the lists received under this section, the secretary of state shall provide lists of citizens who are presumptively eligible to vote to local election authorities. These lists shall be sent to local election authorities as often as required by law, but at least every thirty days, and fourteen days prior to any election. These lists shall include the names of presumptively eligible voters, the information required to determine whether an individual is eligible to vote, and any available electronic signature information. The local election authorities shall include such presumptively eligible voters on voter registration lists subject to existing verification procedures for determining whether an individual is eligible to vote. Local election authorities shall retain full jurisdiction and power to decline to register individuals not verified to be eligible to vote, and in accordance with applicable state and federal law, may remove the names of individuals who are no longer eligible to vote from voter registration lists.

(6) Regardless of the amount of time it takes to process the registration, an individual shall be deemed registered to vote on the day the local election authority receives the information from the secretary of state provided that such individual is later determined eligible to vote by the local election authority. Within seven business days of the local election authority receiving an individual's information from the secretary of state, the local election authority shall update its list of eligible voters and send notice of automatic registration to newly registered voters and provide the opportunity to decline registration. Such notice may be sent in the same manner and at the same time as voter identification cards or other communication required by law. If, after a period of thirty days, the notice declining registration is not returned to the local election authority, the individual's name shall remain on the voter registration list. Any time an individual declines registration the individual's name shall be

removed from the voter registration list. This subsection shall not be construed to prevent removal from voter registration lists by any other method allowed under state and federal law.

(7) The provisions of this section shall not be interpreted to invalidate any other method for voter registration.

(8) No individual who does not meet the legal criteria to be eligible to vote shall be considered to have caused a false or fictitious voter registration, if the record and signature of such individual is transmitted by the secretary of state to a local election authority pursuant to this section without the individual's affirmative consent. If such an individual is added to the voter registration list, the individual shall not be subject to any penalty under law. Upon determining such individual is not eligible to vote, the local election authority shall remove the individual from the voter registration list.

2. In order to vote in any election for which registration is required, the deadline for a person to be registered to vote in the jurisdiction of his or her residence shall be no earlier than 5:00 p.m. on the second Tuesday prior to the election, except with regard to covered voters and intrastate voters as defined by general election law. Intrastate voters may vote in their new jurisdiction if they are registered to vote in the State of Missouri.

3. Nothing in this section shall be interpreted to conflict with the Voting Rights Act of 1965, The National Voter Registration Act of 1993, The Help America Vote Act of 2002, or any other applicable federal law or regulation.

Section 7. All qualified [electors] voters of the state [who are absent, whether within or without the state,] may [be enabled by general law to] vote by absentee ballot without providing a reason at all elections by the people either in person or by mail starting forty-two days before an election. For the purposes of this section, the early voting period shall be the period when eligible voters may cast an absentee ballot in person. Procedures for voting by absentee ballot shall be the same as provided in general election law, except as provided herein.

(1) Voters who choose to vote by absentee ballot shall have the option to receive the absentee ballot in the mail or to vote in person using an absentee ballot during the early voting period. Voters who receive an absentee ballot in the mail shall be allowed to return their completed ballot and envelope by mail, or by dropping it off at any officially designated voting location during the early voting period or on election day. The local election authority may also provide additional options for returning or casting absentee ballots. Nothing in this section shall be construed to prevent a person who has received a ballot in the mail but has not returned a completed ballot from casting a regular or provisional ballot in person during the early voting period or on election day.

(2) Each local election authority shall make one or more locations available to issue absentee ballots and to receive completed absentee ballots during the early voting period. Any such designated location shall be open during the local election authority's regularly scheduled business hours and for at least eight hours on the Saturday and eight hours on the Sunday immediately prior to the election, except that the location shall be open for two hours before and two hours after regularly scheduled business hours during each of the six days before election day.

(3) Local election authorities may make absentee ballots available for voting in person during the early voting period at additional times and places beyond what is designated in subsection (2).

(4) Notwithstanding any other provision of law to the contrary, voters who cast an absentee ballot by mail shall be required to attest to and sign, whether by signature or mark, the following statement:

> I state under penalty of perjury that I am an eligible voter; that my signature and name are as shown on this envelope; that I will not cast more than one vote in this election; and that my ballot is enclosed in accordance with the provisions of the constitution and laws of this state.

However, there shall be no requirement that such signature be notarized or sworn to before the election official receiving the ballot, a notary public, other officer authorized by law to administer oaths, or any other witness.

(5) All qualified voters of the state shall be provided the opportunity to request to permanently receive absentee ballots in the mail for all future elections. An opportunity to sign up to permanently receive absentee ballots shall be provided, at a minimum, on the application for voter registration, via electronic means, and on the application to receive an absentee ballot.

(6) Absentee ballots postmarked or bearing an intelligent mail barcode traceable to a date of entry into the federal mail system on or before the day before election day shall be counted by the local election authority.

(7) Notwithstanding any other provision of law to the contrary, if an absentee ballot envelope is found to have a deficiency, the local election authority shall immediately notify the voter and shall allow the voter an opportunity to cure the deficiency at any time, but no later than seven days after the election. Notification to a voter shall first be attempted by phone or email, if the local election authority has such information, and then by first class mail.

Section 24. An absentee ballot of an overseas or uniformed services voter, as defined by general election law, shall be counted by the local election authority so long as the ballot is dated on or before election day and received by the local election authority within seven days of election day.

Section 25. The secretary of state in conjunction with the state auditor shall provide a recommendation to local election authorities for the best method to conduct a risk-limiting audit of election returns. Each local election authority shall adopt a method of risk-limiting audit for auditing election returns.

Section 26. All provisions of this Act are severable. If any portion, clause, or phrase of this Act is, for any reason, held to be invalid or unconstitutional by a court of competent jurisdiction, the remaining portions, clauses, and phrases shall not be affected, but shall remain in full force and effect.

MISSOURI STATE AUDITOR'S OFFICE
FISCAL NOTE (20-108)

Subject

Initiative petition from Mary Ann Sedey regarding a proposed constitutional amendment to Article VIII. (Received August 9, 2019)

Date

August 29, 2019

Description

This proposal would amend Article VIII of the Missouri Constitution.

The amendment is to be voted on in November 2020.

Public comments and other input

The State Auditor's office requested input from the **Attorney General's office,** the **Department of Agriculture,** the **Department of Economic Development,** the **Department of Elementary and Secondary Education,** the **Department of Higher Education,** the **Department of Health and Senior Services,** the **Department of Insurance, Financial Institutions and Professional Registration,** the **Department of Mental Health,** the **Department of Natural Resources,** the **Department of Corrections,** the **Department of Labor and Industrial Relations,** the **Department of Revenue,** the **Department of Public Safety,** the **Department of Social Services,** the **Governor's office,** the **Missouri House of Representatives,** the **Department of Conservation,** the **Department of Transportation,** the **Office of Administration,** the **Office of State Courts Administrator,** the **Missouri Senate,** the **Secretary of State's office,** the **Office of the State Public Defender,** the **State Treasurer's office, Adair County, Boone County, Callaway County, Cass County, Clay County, Cole County, Greene County, Jackson County, Jasper County, St. Charles County, St. Louis County, Taney County,** the **City of Cape Girardeau,** the **City of Columbia,** the **City of Jefferson,** the **City of Joplin,** the **City of Kansas City,** the **City of Kirksville,** the **City of Mexico,** the **City of Raymore,** the **City of St. Joseph,** the **City of St. Louis,** the **City of Springfield,** the **City of Union,** the **City of Wentzville,** the **City of West Plains, Cape Girardeau 63 School District, Hannibal 60 School District, Malta Bend R-V School District, Mehlville School District, Wellsville-Middletown R-1 School District, State Technical College of Missouri, Metropolitan Community College, University of Missouri, St. Louis Community College,** the **St. Louis County Board of Elections,** the **Board of Election Commissioners City of St. Louis,** the **Kansas City Board of Election Commissioners,** the **Platte County Board of Elections,** the **Jackson County Election Board,** the **Clay County Board of Election Commissioners,** and the **State Auditor's office.**

Andrew Bergerson and Jared Wight provided information to the State Auditor's office.

Assumptions

Officials from the **Attorney General's office** indicated they expect that, to the extent that the enactment of this proposal would result in increased litigation, their office can absorb the costs associated with that increased litigation using existing resources. However, if the enactment of this proposal were to result in substantial additional litigation, their office may request additional appropriations.

Officials from the **Department of Agriculture** indicated no fiscal impact on their department.

Officials from the **Department of Economic Development** indicated no impact to their department.

Officials from the **Department of Elementary and Secondary Education** indicated this legislation does not impact their department.

Officials from the **Department of Health and Senior Services** indicated this initiative petition has no impact on their department.

Officials from the **Department of Insurance, Financial Institutions and Professional Registration** indicated that this petition, if passed, will have no cost or savings to their department.

Officials from the **Department of Mental Health** indicated this proposal creates no direct obligations or requirements to their department that would result in a fiscal impact.

Officials from the **Department of Natural Resources** indicated they would not anticipate a direct fiscal impact from this proposal.

Officials from the **Department of Corrections** indicated no impact. Based on their interpretation of this legislation, they would be required to provide a list of citizens who are eligible to vote to the Secretary of State upon request. Their response of "no impact" is based on this assumption. Should their interpretation be incorrect and the legislation would require them to actively track, manage, or report information, a fiscal impact to the department is possible.

Officials from the **Department of Labor and Industrial Relations** indicated this initiative petition does not appear to have a fiscal impact on their department.

Officials from the **Department of Revenue** indicated this initiative petition would cause increased operating costs in the General Revenue Fund of $64,852 for fiscal year (FY) 2021 for salary cots and Office of Administration - Information Technology Services Division (OA)-ITSD costs.

The Department of Social Services, Department of Conservation, Department of Corrections, and other state agencies as described in Section 5 (4) are also affected by this proposal.

IT Consultants	75	708.48	53,136

Section 5 (2)

The proposed language requires the Department to provide, on at least a weekly basis, a list of eligible citizens who have applied for, applied to renew, or changed the address related to a driver license or nondriver license, are citizens of the United States, residents of Missouri, and meet the legal criteria to be eligible to vote in the State of Missouri. Such list shall contain any information required to register to vote and any available electronic signature information.

The Department assumes they will provide a regularly scheduled file of all driver license, nondriver license, and permit applicants who meet the minimum age criteria and who, based on application data entered, have submitted documents verifying United States citizenship. This file would include applicants who responded that they were currently registered to vote, applicants who responded that they were not registered and did not want to register to vote, and applicants who completed the voter registration applications at the time of license or permit application.

The "necessary" information is not defined, however the Department assumes that it will be required to send name, date of birth, address, at a minimum the last 4 digits of the social security number, and a copy of the applicant's signature for final voter registration processing.

The proposed language will require the Department to amend the current data files posted to the Secretary of State or develop a new file specific to automatic voter registration to include the digital image of the signature.

The requirement to submit a copy of the individual's signature will require the Department to amend current programs for on-line requests for change of mailing address since identity verification and signature collection are not currently required in this process.

The Department would be required to:

- Coordinate with the Secretary of State to develop requirements for the data and signature file specifications and file submission schedule.
- OA-ITSD must develop a data pull process for defining records for submission to Secretary of State.
- OA-ITSD must develop a secure process for tying the required signature file to the data file for submission to the Secretary of State.
- Test the file generation and transfer process to ensure all required data elements and signature are sent as required.

- Develop website information to link inquirers to the Secretary of State for information regarding the new automatic voter registration and provisions for declining automatic registration.
- Amend current programs for on-line requests for change of mailing address since identity verification and signature collection are not currently required in this process.

Administrative Impact

To implement provisions of Section 5 (2) the administrative cost may be estimated as:

Personnel Services Bureau FY 2021
Update Webpage - Administrative Analyst III 10 hrs. x $19.80 = $198.00

Driver License Bureau FY 2021
Requirements development and testing:

Administrative Analyst II –	240 hrs. x $17.13 per hr. =	$4,111.20
Management Analyst Spec. II –	320 hrs. x $20.57 per hr. =	$6,582.40
Revenue Manager -	40 hrs. x $20.59 per hr. =	$ 824.00

Total = $11,716

OA-ITSD

The department also provided the following comments:

Section 5 (2)
For purpose of this fiscal note the Department assumes that they will apply the same requirements related to automatic voter registration specified for new and renewal applicants to individuals applying for a duplicate, reprint or replica driver license, nondriver license, instruction permit, or commercial learners permit. If it is not the sponsor's intent to include duplicate transactions, the Department recommends the sponsor amend the language to specifically prohibit.

The Department assumes it is not the sponsor's intent to forward record updates derived from other mailing address updates sources such as National Change of Address files, courts or documentation received from sources other than the applicant.

The proposed language will require the Department to amend the current data files posted to the Secretary of State or develop a new file specific to automatic voter registration to include the digital image of the signature when the application or request for update included collection of the individual's signature.

The requirement to submit a copy of the individual's signature will require the Department to amend current programs for on-line requests for change of mailing address since identity verification and signature collection are not required in this process.

Officials from the **Department of Public Safety - Office of the Director** indicated they see no fiscal impact due to this initiative petition.

Officials from the **Department of Social Services** indicated they do not anticipate a fiscal impact as a result of this initiative petition.

Officials from the **Governor's office** indicated there should be no added costs or savings to their office.

Officials from the **House of Representatives** indicated no fiscal impact to their office.

Officials from **Department of Conservation** indicated no adverse fiscal impact to their department would be expected as a result of this proposal.

Officials from the **Department of Transportation/Missouri Highways and Transportation Commission** indicated this initiative petition will have no fiscal impact, as Article IV, Section 30(b) of the Missouri Constitution limits the use of state revenue derived from highway users (SRHU). Registering citizens to vote does not relate to the design, construction, maintenance, and operation of the state highway system.

Officials from the **Office of Administration** indicated this proposal amends Article VIII of the Constitution of Missouri by amending Sections 5 and 7 and adopting three new sections.

This proposal requires the Secretary of State to establish a process to conduct automatic voter registration based on driver's license information and state issued nondriver's license information. Applicable state agencies shall provide to the Secretary of State lists of citizens eligible to vote, any available electronic signature information, and any other information required to register to vote. The Secretary of State shall provide lists of citizens who are presumptively eligible to vote to local election authorities. Local election authorities shall include such presumptively eligible voters on voter registration lists subject to existing verification procedures for voter eligibility. Individuals automatically registered to vote shall be provided an opportunity to decline registration. Individuals automatically registered to vote who are not eligible to vote shall not be subject to any penalty, and the local election authority shall remove any such individuals from the voter registration list. The deadline for voter registration shall be no earlier than 5:00 p.m. on the second Tuesday prior to the election, except with regard to covered voters and intrastate voters. Intrastate voters may vote in their new jurisdiction if they are registered to vote in Missouri.

This proposal provides that all qualified voters of the state may vote by absentee ballot without providing a reason either in person or by mail starting 42 days before an election and specifies how local election authorities are to administer absentee ballots. All qualified voters of the state shall be provided the opportunity to request to permanently receive absentee ballots in the mail for all future elections. An absentee ballot of an overseas or uniformed services voter shall be counted by the local election authority so long as the ballot is dated on or before election day and received by the election authority within 7 days of election day.

This proposal requires the Secretary of State in conjunction with the State Auditor to provide a recommendation to local election authorities for the best method to conduct a risk-limiting audit of election returns. Each local election authority shall adopt a method of risk-limiting audit for auditing election returns.

This proposal should not result in additional costs for their office.

Officials from the **Office of State Courts Administrator** indicated there is no fiscal impact on the courts.

Officials from the **Missouri Senate** indicated they anticipate no fiscal impact.

Officials from the **Secretary of State's office** indicated this petition would implement an automatic voter registration program. The bill would require the Department of Revenue (DOR) and other agencies to transmit to the Secretary of State (SOS) records containing information of eligible voters, based on agency records (such as driver's license applications in the case of DOR). This information is then made available to each local election authority, which will then send notice to each person giving them the opportunity to decline to be registered. For the purposes of this fiscal note, their office assumes that this information will be transmitted in an electronic format.

To implement these requirements, significant programming changes would need to be made to the centralized voter registration database (MCVR) to develop multiple new interfaces, to allow electronic transmission of electronic agency data, to sync agency data with currently existing voter information in MCVR, to allow local election authorities to generate and send notices of opportunity to decline registration, to create a queue of individuals who have been sent notice of opportunity to decline registration, and to allow information to be transferred between counties. Based on the implementation of similar systems in other states, this section would result in an estimated one-time cost of $1,000,000 in fiscal year (FY) 2021.

This bill requires local election authorities to send notice of opportunity to decline registration to each individual that is not currently a registered voter. This is a new responsibility that must be funded by the state under Article X, Section 21 of the Missouri Constitution. Based on a recent comparison of voter records to driver's license records, a total of 743,280 individuals were found to have a driver's license but were not identified as registered voters. Sending notice to each individual would cost $0.90 to mail ($0.55 for outgoing postage as of January 2019, $0.35 for the endorsement on the paid return postcard) plus the costs of printing. Postage would amount to $668,952 and printing is estimated at $33,270, for a total that could reach or exceed $702,222 (depending on the specific number of persons identified by DOR and other agencies) beginning in FY 2021.

Future notice mailings would incur costs to the state of Missouri. The cost of notice mailings in future fiscal years is unknown due to several variable factors including voter registration rates and postage cost increases.

This petition also requires local election authorities to maintain one or more locations for eight hours on the Saturday and Sunday before each election to facilitate absentee voting. While each local election authority already maintains four hours of Saturday operation as required by current law, this increase would require additional staffing costs for the equivalent of 348 judge-days statewide (two judges for 1.5 days in 116 jurisdictions). Assuming an average payment of $125 per judge-day, this would amount to $43,500 per election beginning in FY 2021.

Additionally, this petition requires local election authorities to maintain office hours for two hours earlier and two hours later than their normal business hours for six days prior to an election (while the wording is ambiguous, their assumption is that this refers to normal business days). This increase would require additional staffing costs for the equivalent of 696 judge-days statewide (two judges for the equivalent of 3 days in 116 jurisdictions). Again assuming an average payment of $125 per judge-day, this would amount to $87,000 per election beginning in FY 2021.

Their office is being conservative in assuming all new costs will be subject to Article X though there may be some legal uncertainties on this point.

Officials from the **Office of the State Public Defender** indicated this initiative petition will not have any impact on their office.

Officials from the **State Treasurer's office** indicated no fiscal impact to their office.

Officials from **Greene County** indicated the following estimate is based on U.S. Census Data that estimates current county population at **291,923**. It is estimated that **20.9%** of the population is under **18** years old, which accounts for **60,957** residents. They have on average **190,000** registered voters, of which about **30,000** (**16%)** are inactive, meaning their address is no longer verified but registered nonetheless and so they are included as part of the number below.

R's = Residents
RV's = Registered Voters
yrs = Years
PV's = Potential Voters
MC = Mailing Cost
CPC2P = Cost Per Card to Process
FTH = Fulltime Hire
AP = Annual Pay

291,923 R's – 60,957 R's under **18 yrs** = **230,966 R's 18 yrs** or older

230,966 R's 18 yrs or older – **190,000 RV's = 40,966 PV's**

40,966 PV's x .50 MC = $20,483

40,966 PV x 1.06 CPC2P = $43,423.96

If they have approximately **40,966 PV's** not registered based on the number above, and a Voter ID card is mailed to each voter as stated in the petition language at **.50** apiece, it will be a **$20,483 MC**. How will that cost be delineated in subsequent mailings is very hard to predict, but they do anticipate it will be reduced over time from the original estimate as more residents become registered.

The actual time spent to fully process any new Voter ID card is estimated at **$1.06 CPC2P**. This adds an additional **$43,423.96** to the cost when it is multiplied by the estimated **40,966** voters eligible to be registered.

There is also in the petition language additional requirements. This includes allowing new voters to register up to 2 weeks prior to an election, absentee mailing changes and risk-limited auditing requirements post-election. These additional requirements will at a minimum require an additional **2 FTH** for the office to ensure the ongoing administrative duties the petition requires will be completed on time for voters. This additional cost will be **$24,689.60** per hire for their annual pay. The total annual cost for two fulltime hires will be **$49,379.20.**

40,966 PV's x .50 MC = $20,483
40,966 PV's x 1.06 CPC2P = $43,423.96
2 FTH x $24,689.60 AP = $49,379.20
Total: = **$113,286.16**

The total estimated initial cost for Greene County for **IP 20-108** proposing to amend Article VIII, version 4, will cost Greene County **$113,286.16** with a minimum ongoing cost of **$49,379.20** for personnel. There will be other ongoing cost to include COLA increases, Step increases for employee pay as well as anticipated ongoing administrative cost that cannot be predicted at this time.

Officials from **St. Louis County** indicated this initiative petition does not appear as though it would have a direct fiscal impact on St. Louis County Government. However, there is the possibility that the St. Louis County Board of Elections would incur additional operational expenses and would seek additional appropriations from the County General Fund to cover the expenses. The Board of Elections intends to make a separate reply.

Officials from the **City of Kansas City** indicated this will have no fiscal impact on their city.

Officials from the **City of St. Louis/Board of Election Commissioners City of St. Louis** indicated this initiative petition would have a negative fiscal impact.

The Board of Election Commissioners is supportive of this initiative, but believes that the increase in costs would be hard to manage as a result of this amendment. Following are rough estimates for expected increases:

1) Hiring 2 full-time employees at $32,000 each.
2) Hiring 4-6 temporary staff members in the Absentee department for 10 40-hour work weeks at $15.00 an hour.
3) Printing and postal costs for applications and ballots will triple in the Absentee department, increasing expenses by $305,000.
4) Printing and postal costs for missing information letters and ENC notices will triple in the Registration department, increasing expenses by $1,205.
5) Increase in Business Reply Mail Return costs for absentee application and ballots will increase by $75,000.
6) Election day absentee ballot counters will triple in size, increasing costs by $15,000.
7) Ballot order will increase due to the increase in registrations, but the fiscal impact is tough to estimate.
8) Registration overtime costs will increase for data entry of new registrations but fiscal impact is tough to estimate.
9) Cost of supplies, such as paper, pens, etc. would increase by about $5,000.

The Director of Board of Election Commissioners noted that these are merely rough estimates and the actual fiscal impact is hard to determine.

Officials from **Wellsville-Middletown R-1 School District** indicated they do not see any fiscal impact of these petitions that is unique to their district. Any costs related to these may come out of general revenue which will have a negative impact to some degree on all state funded entities.

Officials from **Metropolitan Community College** indicated no fiscal impact.

Officials from the **St. Louis County Board of Elections** indicated they predict this amendment would have a fiscal impact of $47,500 per County-wide election, with an additional $9,000 annual cost. Having their office open for an additional 12 hours on the weekend and 16 hours on the weekdays, and at a rate of $5,000 per every 8 hours, this would cost $17,500. The additional absentee costs in the amendment are estimated to be about $30,000. The annual cost of sending voters postage cards to decline automatic registration would be about $9,000. It is important to note that a significant portion of all of these costs could be offset by the reduced need for polling places due to early voting.

Officials from the **Kansas City Election Board** indicated if this initiative petition is passed, election costs definitely increase at least $50,000 per election for additional postage, printing, training, staff overtime, temporary employees, legal notices and location rentals to process these additional services. Additionally, at least 2 to 4 permanent staff would need to be hired at $35,000 each, including benefits.

Officials from the **Platte County Election Board** indicated the additional hours proposed in the petition would add about $5,000 to the cost of an election.

Officials from the **State Auditor's office** indicated the proposed language, if implemented, should have no fiscal impact on their office. Any impact can be absorbed through current appropriations.

Re: Fiscal-Cost Estimates for "VOTE 2020" Ballot Initiatives in 16 Variations (20-072 through 83 and 20-088 through 91)

To the Honorable Nicole Galloway, CPA, Missouri State Auditor:

Pursuant to Title IX Section 116.175 of the Missouri Constitution, we hereby submit this statement of fiscal impact to advise you and your office in estimating the fiscal cost of the "VOTE 2020" petition-based ballot initiatives to amend the Missouri Constitution. The information contained in this letter is relevant to all 16 petition variations: 20-072 through 83 and 20-088 through 91.

Drew Bergerson is a Professor of History and Jared Wight is a System Administrator, both at the University of Missouri-Kansas City. Although we submit this opinion purely as private citizens, we used our experience as social and computer scientists to do so.

We surveyed the relevant legislation proposed to the Missouri General Assembly for ten or more years, focusing especially on any associated fiscal notes from the State Auditors. We interviewed local election officials in the Kansas City and St. Louis areas. We reviewed the reports of major think tanks, non-profit organizations, and scholars who specialize in electoral practices. And we considered the reports provided by counties and states like California, Colorado, Michigan and North Carolina who recently implemented similar policies.

Below we summarize our research in seven points, including information particular to one or more variations of the ballot language where relevant.

1. **Automatic voter registration will likely incur one-time infrastructural costs of approximately $50-60,000 but are actually "unknown".**
   In the fiscal note for the recent bill with the most detailed description of one-time costs (HB 1934 McCann Beatty, 2018)[1], the State Auditor anticipated significant one-time expenses for extensive technological improvements to the Missouri Voter Registration Database ($1,000,000)[2], software programming ($27,540-$85,050), administrative costs for impacted departments ($7,228-$8,700), and employee training ($0-unknown). Missouri, however, has no reason to rely solely on its own resources for modernizing its election technologies as it has access to approximately $7.5 million for these purposes from the Federal Government.[3] According to the U. S. Election Assistance Commission, states must match Federal funds at 5%, but they may use those funds to improve elections by adding cybersecurity systems, cybersecurity training, new voting equipment with paper ballots, and post-election risk-limiting audit systems (#2 below).[4] It is therefore reasonable to assume that the fiscal impact *on the state budget* for the infrastructural items listed above would be only 5% of the total expense, or approximately $50-60,000. That said, the range of estimated costs is wide depending on how automatic voter registration is implemented in terms of infrastructural improvements. So, a more accurate assessment of cost would be "unknown".

2. **Risk-limiting audits will incur "unknown" up-front and ongoing costs.**
   For risk-limiting audits, Missouri has access to the same Federal funds at a matching rate of 5% for the purpose of upgrading our technology for cybersecurity etc.,[5] so it is reasonable to assume that infrastructural improvements for risk-limiting audits would be included in the estimates listed in #1 above. Long-term, there may be ongoing costs or even net savings; but as in #1, it is impossible to estimate them

---

[1] See also HB29, Stacy, 2019; HB 731 Manlove 2019; HB994, Price, 2019.

[2] According to Common Cause-Massachusetts, *Automatic Voter Registration Cost Report*, 05.24.2018, similar one-time improvements cost approximately $200,000 in Oregon and $434,117 in Vermont. According to WBUR News, MA State Representative John Mahoney estimated in 2018 that implementation of the Massachusetts automatic voter registration legislation would cost $500,000 up front. In the fiscal cost analysis of the Voter Access and Modernized Elections Act (HB13-1303), Colorado anticipated $644,000 to update SCORE, its Statewide Voter Registration System. The larger figure of $1,000,000 for Missouri is reasonable given the relatively backward state of our election technologies (also as per the Fiscal Note for HB 731 Manlove 2019).

[3] According to the U.S. Election Assistance Commission's Grant Expenditure Report for Fiscal Year 2018, published April 4, 2019, Missouri has spent all of the funds plus interest distributed starting in 2003 by the EAC to states under Section 101 of HAVA 2002: $6,829,277. Section 251 funds, known as Requirements Payments, were distributed to States using a formula found in HAVA based on a percentage equal to the quotient of the voting-age population of each State and the total-voting age population of all States. Missouri has spent $54,177,399, leaving a balance of $472,833 including interest. In March 2018, however, Congress provided an additional $380,000,000 through the Consolidated Appropriations Act of 2018. Missouri has currently spent $224,922, leaving a balance of $7,037,285 including interest.

[4] *Ibid.* States have until September 30, 2023 to request their funds and get the money in their accounts. Missouri spent most of its allocated 2018 HAVA Funds to implement cybersecurity enhancements that protect against attempts to penetrate the Missouri Centralized Voter Registration System. The state also hosted the National Election Security Summit attended by federal, state and local election authorities to discuss practical ways to mitigate threats and vulnerabilities.

[5] *Ibid.*

without knowing which specific kind of risk-limiting audits will be implemented. It makes sense to list them as "unknown".

3. **The first round of "opt-out" mailings for automatic voter registration will incur new costs but they are "unknown".**
   Prior bills with fiscal notes (HB 1934 McCann Beatty, 2018; HB29, Stacy, 2019; HB 731 Manlove 2019; HB994, Price, 2019) offer a wide range of estimates for the initial set of "opt-out" mailings based on the number of non-registered voters in government records.[6] Yet scholars have developed new techniques for producing more accurate lists by winnowing "deadwood" from existing voter rolls, which could reduce costs.[7]

   > **[*Included in some ballot variations*: The pre-registration of 16-17-year-old eligible voters will incur one-time costs of approximately $134,800.**
   > There will be approximately 100,000 potential new pre-registrations in the first year of 2021.[8] Based on a recent fiscal note (HB 731 Manlove 2019), we estimate one-time fiscal costs of $90,000 for postage @ $0.90 each plus printing cost of $44,800 @ $.0448 per person for a total of $134,800.]

   Due to new techniques for more accurately identifying eligible voters, it is impossible to precisely estimate the fiscal impact of this legislation. These one-time expenses are best described as "unknown".

4. **The long-term cost of automatic voter registration is also "unknown."**
   Prior fiscal notes offer a wide range of estimates for long-term costs, mostly for printing and mailing costs. Kansas City was an outlier, anticipating new staff positions at much larger expense ($180-260,000); but most local election authorities anticipated $0 impact.[9] Similarly, no additional staff was required for implementing automatic voter registration in Colorado, Oregon, and Vermont.[10] Oregon, which has a comparable number of non-registered voters (539,532) to Missouri (528,782), has

---

[6] The highest projections anticipate 743,280 individuals who, according to the Department of Motor Vehicles, have driver's licenses but are not registered voters, which makes the total cost for mailing and printing $702,222 + $33,270 = $735,492. Yet data from the United States Election Project suggests that this population estimate is two or more times too high. They estimate only 528,782 non-registered voters in 2018, and after removing ineligible voters, pegs the vote-eligible population at 357,583.

[7] Stephen Ansolabehere and Eitan Hersch, "Voter Registration: the Process and Quality of Lists," and Barry Burden and Charles Stewart, "Introduction to the Measure of American elections," both in *idem*, *The Measure of American Elections* (Cambridge, 2014).

[8] According to the Missouri Census Data Center, there were approximately 77,974 twelve-year olds in 2017 who will be sixteen in 2021 and 77,813 thirteen-year olds who will be seventeen. We assume that these figures will not significantly change in the next two years and that half of the seventeen-year olds or 38,906 could be pre-registered by existing statute which allows pre-registration at 17½ years old. Moreover, 7-8% of these eligible voters may never want to register: of the 4,570,675 Missouri citizens who were legally eligible to vote in 2018, 357,583 or 7.82% were not registered (United States Election Project; Secretary of State's Office).

[9] For prior bills with fiscal notes in Missouri (HB 1934 McCann Beatty, 2018; HB29, Stacy, 2019; HB 731 Manlove 2019; HB994, Price, 2019), local election officials have estimated the additional cost of printing and mailing postcards from $0 to $92,708 per year per election district but most anticipate being able to absorb the cost into their existing budgets.

[10] Common Cause-Massachusetts, *Automatic Voter Registration Cost Report*, 05.24.2018.

reported mailing a consistent number of 21,700 mailings per month for "opt-out" registrations at the cost of $330,217 per biennium.[11] In various states, automatic voter registration has even reduced other costs, for instance, by reducing the number of provisional ballots.[12] Arguably the largest cost savings for Missouri would come from replacing the current system of paper registration cards and manually reentering voter registrations from paper lists with digital voter registration systems.[13] In the most detailed fiscal notes to two of the prior bills (HB 1934 McCann Beatty, 2018; HB 731 Manlove 2019), the Office of the Secretary of State explicitly stated their assumption that voter lists "will be transmitted in an electronic format," no doubt in recognition of this opportunity to economize.

> [***Included in some ballot variations***: **The pre-registration of 16-17-year-old eligible voters will incur $0 ongoing costs.** Regardless whether the voter is pre-registered as a youth or registered as an adult, ongoing costs should either be the same for automatic voter registration or decrease over time through efficiencies in the system.]

Without knowing the precise nature of the new technologies and given the likelihood of opportunities to economize, it is impossible to estimate the long-term costs of automatic voter registration. They are therefore best described as "unknown."

5. **Moving the final registration date to fifteen days before election day will cost $0.**

There are no fiscal notes yet available for the two bills introduced into the Missouri General Assembly on this topic (HB 993 Price, 2019; SB 384, Schupp, 2019). Comparative research in other states who have implemented *same-day* registration either report no increase in long-term cost for new technology and staff, or report a reallocation of existing resources.[14] In 2012, California approved Conditional Voter

---

[11] *Ibid.*

[12] National Conference of State Legislatures, Automatic Voter Registration, 04.22.2019. See also Sawyer, *Early Voting Business Case* for Mecklenburg County, NC, ca. 2015.

[13] In its Election Initiative issues brief "Inaccurate, Costly, and Inefficient Evidence that America's Voter Registration System Needs an Upgrade" from 02.2012, the Pew Center on the States argues that paper registration systems are expensive compared to electronic. Where Oregon spent $4.11 per active voter to process registrations and maintain their voting list or $7.67 per transaction (new or updated registration), Canada spent $0.35 per voter to process registrations and Maricopa County, AZ reduced costs from $0.83 for paper registration to $.03 for online registration. In California, the introduction of Conditional Voter Registration was delayed from 2012 to 2017 until VoteCal, California's statewide voter registration database, was operational (see California Secretary of State and Santa Clara Registrar of Voters).

[14] According to the National Conference of State Legislators, additional technology is not required even for same-day registration. Whereas the additional administrative work can be time consuming, many states report a reallocation of existing costs and resources rather than additional costs. In 2015, Project Vote reported that most states experienced "minimal" incremental costs in the long term. Iowa introduced SDR with only a $40,000 onetime statewide expense. In 2011-12, Demos conducted a survey of counties in Iowa and North Carolina and found that a large majority reported little to no additional costs for same-day registration. Most did not require additional staffing at the polls. Any new expenses were generally associated with additional printing and mailing of registration forms. North Carolina respondents most frequently cited additional staffing at one-stop sites as the most notable cost associated with same-day registration. This need tended to increase among smaller-sized counties. The increased expenses cited

Registration (AB 1436) that allowed unregistered voters to register and vote within fifteen days of and including election day using a provisional ballot, and it became operational in 2017 (see California Secretary of State and Santa Clara Registrar of Voters). Their State Legislature anticipated increases in cost of $5-10,000 per county but only due to the provisions of the law related to same-day registration.[15] The legislation proposed in Missouri sets the registration deadline at fifteen days before election day as well but *without* the option for same-day registration.[16] It is therefore reasonable to assume that no additional technology or staff would be required and therefore this aspect of the legislation would incur $0 new costs.

6. **The cost to allow all eligible voters to vote "without excuse" by absentee ballot[17] is "unknown" if not $0.**

The number of absentee ballots cast in Missouri fluctuated between 5.7% and 9.6% in 2008-2012.[18] According to the fiscal notes associated with past bills in the Missouri General Assembly (HB173, Conway, 2017; HB644, Smith, 2017; HB29, Stacy, 2019; HB202, Shull, 2019) as well as proposed constitutional amendments (HJR 90, Dugger, 2014), most local election officials did not respond with feedback or stated that the impact would be negligible on their expenses. By contrast, the local election officials from Audrain, Kansas City, Platt, and St. Louis Counties estimated increased costs ranging from $1,700 to $32,000 due to increased postage, printing, and staff. In more recent bills (HB368, McGaugh, 2019; HB527, Stevens, 2019; HB992, Price, 2019), however, the local election officials from Platt and St. Louis Counties estimate $0 fiscal impact for similar policies. Given such wildly different cost estimates from rural, suburban, and urban counties, the Committee on Legislative Oversight correctly notes that there could be a potential increase in costs but the actual fiscal impact is "unknown" if not $0. Costs (i.e. for increased staff) may increase in the short term if voters suddenly switch to permanent absentee voting by mail before the necessary infrastructure has been created; but in general, political scientists note that state- and even county-specific voting cultures are often strong predictors of future behavior; which suggests that

---

in North Carolina may not be entirely attributable to same-day registration, however. Most counties that reported adding staff were unable to disaggregate same-day registration costs from overall early voting expenses.

[15] The California Assembly predicted a modest cost increase of "$5,000 to $10,000 per county annually to accommodate voter registration, *principally on election day*, at county elections offices. This includes the costs for staffing, providing sufficient ballot types for a voter residing anywhere in the county, processing the additional voter registrations, and any additional handling associated with processing the ballots" (our *italics*). Yet they admitted that these costs will vary according to county, popularity of option, turnout, and other factors, including the number of existing provisional ballots.

[16] The other factor increasing anticipated costs in the California case was the need to process provisional ballots after election day. The Senate for instance predicted that an increase in last minute voter registration would necessitate additional labor, overtime, computers, ballots, networks, and security *on election day* and also in order to complete the processing of *more provisional ballots* during the 28 day canvas period after an election. In the proposed Missouri legislation, automatic voter registration should decrease the need for provisional ballots.

[17] including both temporarily and permanently options as well as military and overseas voters

[18] Christopher Mann, "Mail Ballots in the United States: Policy Choice and Administrative Challenges," in Burden and Stewart, *Measure*, p. 118.

there will be some inertia when it comes to voting practices and therefore a more gradual adjustment period.[19] With the implementation of the Voter's Choice Act in California, for instance, Madera County saw an increase in voting by mail from 64% to 93% in 2018, but because VCA actually *required* ballots to be mailed in that county.[20] By contrast, Mecklenburg County in North Carolina saw a more gradual increase in early voting but relatively stable percentages of no-excuse absentee ballots since the introduction of both.[21] It thus seems reasonable to assume, given the fact that both in-person and mail-in absentee ballots would be available during the 42 day early voting period, that most local election officials would be able to absorb this work using existing resources of staff and space.[22] For, the data from other states suggest that mail-in balloting significantly *reduces* the cost per vote of elections. Although it requires short-term increases in voter education programs and can incur expenses through trial and error with the number of voting centers, most local election officials who have made the transition to vote-by-mail systems anticipate long-term cost savings as a result of reduced labor costs by replacing many poll workers with fewer voter center workers as well as fewer voting machines.[23] Given the likelihood of short-term cost fluctuations together with long-term savings, both of an indeterminate quantity, it makes sense to describe the fiscal impact as "unknown."

7. Early voting has an uncertain impact on the cost of elections ranging from "unknown" cost increases to "unknown" cost savings.

There are an unpredictably wide range of variables that could impact the cost of early voting, resulting in wildly disparate predictions of fiscal impact.[24] It seems reasonable to presume that local election officials will use the flexibility inherent in this legislation to try to avoid new costs.[25] For both practical and financial reasons,

---

[19] Burden and Stewart, *Measure.*

[20] Madera County, CA, Election Administration Plan 2018.

[21] As per Hannah Sawyer, an intern who worked at the Mecklenburg County Board of Elections, who authored a Six Sigma study as part of her MPA entitled *Early Voting Business Case* [ca. 2015].

[22] See for instance Sawyer, *Early Voting*.

[23] In California, "the Nevada County Elections Office has determined that costs will exceed savings with the first implementation of the VCA. However, the Nevada County Elections Office predicts that over time conducting elections in accordance with the VCA will encourage savings based on evidence from Colorado who implemented a similar elections model." (Nevada County Election Administration Plan 2018; see also Madera County Election Administration Plan 2018, Napa County Election Administration Plan 2018, Sacramento County Election Administration Plan's Appendix J, 2018). According to the Pew Charitable Trusts' issue brief "Colorado Voting Reforms: Early Results 2013" from March 22, 2016, the statewide average cost per vote in Colorado decreased in the wake of their Voter Access and Modernized Elections Act of May 2013 from $15.96 in 2008 to $9.56 in 2014 due to reduced labor, printing, postage, and miscellaneous costs. On-demand ballot printing at vote centers reduced the total number of ballots that need to be printed. Moving from assigned polling places to fewer vote centers also required less staff.

[24] For HJR 90 (Dugger, 2014), St. Louis County assumed that they would be required to open seven satellite sites at an estimated annual cost for the location, paper and labor of $1,737,892 per election as well as non-recurring start-up costs to be $1,195,678. Yet these estimates do not consider the cost savings of reducing precincts during election day, using less voting equipment, and other factors, which would have considerable impact on an election district with a large population of registered voters. By contrast, most local election officials did not even bother to respond to the request for a fiscal note, suggesting little concern for increased costs.

[25] For instance, Illinois mandates that early voting centers must be provided at public universities (Early Voting report from NYU's Brennan Center for Justice). Local election officials could save money by using the existing local election facility itself as one of their

we anticipate that local election officials would want to provide one voting center for approximately 50,000 registered (35,000 likely) voters.[26] The 102 rural counties in Missouri with fewer than 50,000 voters may incur costs only for the stipulated overtime for its staff on the Saturday and Sunday before election day.

> [***Included in some ballot variations***: **Early voting includes the two hours before and two hours after regularly scheduled business hours during each of the six business days before election day.** This may also result in modest increased costs for less populous counties.]

Yet local election authorities may be able to absorb those costs by adjusting existing work schedules.[27] In the sixteen suburban, exurban, or urban districts in Missouri with 50,000 or more registered voters, including St. Louis with more than 750,000 registered (457,609 likely) voters, local election officials should be able to reallocate resources from their many precincts into consolidated early voting centers to actually incur cost savings.[28] This consolidation would allow the local election officials to rely on their best workers and reduce the number of required voting machines (and associated costs for transportation and rental space), as has happened in other states.[29] It also reduces the number of provisional ballots.[30] Overall, early voting has been proven in other states to drastically reduce costs in the long-term and/or

---

voting centers (such as the County Clerk's office) and using other publicly owned (municipal, county, and state) facilities for the auxiliary centers as needed (such as civic centers, firehouses, high school gymnasiums, or public university buildings). The latter are typically located in central locations, accessible by public transportation, open on a similar schedule as the local election officials office, provide public parking, and can be secured such that the machines do not need to be removed each day. Other popular alternatives in states with early voting include retail stores, bus stations, hotels, and supermarkets. (Robert Stein and Greg Vonnahme, "Polling Place Practices and the Voting Experience," in Burden and Stewart, *Measure*, p. 170-72)

[26] Prior bills submitted to the Missouri General Assembly stipulated a range of formulae: one voting center for every three existing precincts (HB994, Price, 2019) which results in a very large price tag of $9,764,250 in new election costs; one additional voting site for more than 175,000 registered voters (HB848, Neth, 2013) or a staggered scale thereafter for every 75,000 voters (HJR5, Merideth, 2019), which would only impact six local election officials; one voting center for every 50,000 residents (HB501, Newman, 2017; HB1550, Newman, 2018) which would require 49 voting centers statewide; or no formula at all (HJR 90 Dugger, 2014). See also Matt Blunt Early Voting Report, n.d., and Jason Kander, Time for Early Voting, 2013.

[27] If local election officials do require paying overtime for the two weekend days, a reasonable estimate based on Jackson County figures would be $30.60 per hour per employee (at time and a half) for two employees for 16 hours total, or $979.47 per county. (See data from Secretary of State's Office and HB994, Price, 2019)

[28] For instance, the Jackson County Election Board currently has 239 precincts for 254,769 registered and 151,029 likely voters that they currently open only on election day, for which they pay $200.00 per precinct (for a total of $47,800) plus 2 judges per site @ $12.00 per hour for 8 hours per day ($192 per precinct = $45,888). If they chose to participate in early voting, the local election official might instead open 5 voting centers in public buildings including the local election official itself (at $0 cost) which requires 2 judges per site @ $12.00 per hour for 8 hours per day for 42 days as well as 2 weekend days before election day for a total of $42,240 or half the current cost [*alternate ballot language*: with an additional $288 for the additional two hours before and after regular business hours on the six days before election day]. (See data from Secretary of State's Office and HB994, Price, 2019; compare to Sacramento County Election Administration Plan's Appendix J, 2018)

[29] Between 1999 and 2001, North Carolina introduced no excuse absentee ballots and an eighteen-day early voting period. According to Sawyer's *Early Voting*, Mecklenburg County, NC, was able to significantly reduce the number of required machines at a cost savings of $1,261,700 in purchase price and maintenance costs by using the same machines on both election day and during the early voting period. The more people who voted early (62% in 2012, 75% anticipated in 2016), the more they maximized existing infrastructure, halving the annualized cost of each machine from $685.56 to $309 over a ten-year period.

[30] Mecklenburg County NC (*ibid.*) recorded a reduction from 3,156 provisional ballots in 1996 to 1,522 in 2012 due to early voting. The Pew Charitable Trusts reported in "Colorado Voting Reforms: Early Results 2013" on March 22, 2016, that there was a remarkable 98% reduction in provisional ballots cast in Colorado.

allowed for the reallocation of scarce resources.[31] Crucial to estimating the fiscal impact of these ballot initiatives is the fact that they allow local election officials to determine the number of early voting centers and allows them to increase hours of operation beyond the minimum based on local circumstances. Opening a second early voting center may not make fiscal sense for a district with only 2-5,000 registered voters; but additional voting centers or longer hours may enable more populous jurisdictions to make better and more dynamic use of existing resources.[32] Doing so may require some trial and error, as other states have experienced.[33] Given the flexibility in the legislation to adapt to local conditions and the fact additional centers and hours are entirely optional, the fiscal impact cannot be precisely measured.

Individually, the vast majority of these costs are either $0 or "unknown". Taken together, there is a strong likelihood of new short-term expenses along with significant opportunities for long-term cost savings. These variables make it impossible to estimate the net fiscal impact of this multifaceted legislation.[34] We therefore advise the State Auditor to summarize its potential cost to taxpayers as **$0 to "unknown"** since that is the most accurate description of its overall fiscal impact.

Yours sincerely,

Andrew Stuart Bergerson, 5601 Locust Street, Kansas City, MO, 64110, and
Jared Wight, 5711 Holmes Street, Kansas City, MO, 64110

---

[31] Between 2008 and 2016, voter transactions in Mecklenburg County NC (*ibid.*) cost $2.48-$3.57 per early vote in contrast to $7.19-$11.69 for election-day voting. See also Pew Charitable Trusts, "Colorado Voting Reforms: Early Results 2013", March 22, 2016.

[32] For instance, Buchanan County with 52,996 registered (30,117 current) voters in 2018 could process on average 1204 registered voters per 8-hour day or 151 per hour in an early voting period of 44 days (including weekend days before election day) if they restricted themselves to just the existing local election authority's offices as their voting center. Adding a second early voting center would reduce these rates to a more manageable 602 per day and 75 per hour. By contrast, Macon County with 10,805 registered (6,591 current) voters in 2018 could already process on average 246 registered voters per day or 31 per hour in a single voting center without having to open a second center. [*Alternate voting language*: extended business hours in the six days before election day would further reduce the number of voters per hour on average.]

[33] Colorado's General Assembly has passed a new bill HB19-1278 (2019) that would change the formula for determining how many ballot drop boxes and vote centers are required in order to address isolated instances of long lines on election day. In 2018, researchers from USC and UC-Riverside found elections officials faced a number of unexpected hurdles with the Voter's Choice Act. As John Myers of the Los Angeles Times reported on 21 April 2019: "Costs went up in some counties, as workers at vote centers needed additional training and counties replaced the often no-fee locations for polling places with buildings that had to be rented for a week or more. Some local officials said they needed more vote centers than the minimum required by the state law, especially on election day — for whatever reason, a number of voters didn't use the service until the last minute." The researchers concluded: "The culture of in-person voting on one single day will require more than one election cycle to change." In the long-term, however, the four original counties in California who implemented the Voter's Choice Act all anticipate long-term costs savings (Madera County Election Administration Plan 2018; Nevada County Election Administration Plan 2018; Napa County Election Administration Plan 2018; Sacramento County Election Administration Plan's Appendix J, 2018).

[34] The House Fiscal Agency in Michigan drew a similar conclusion regarding the 2018 ballot proposal 3 Promote the Vote, which included many similar features and is the foundation for the Missouri legislation. "The various rights proposed in the amendment would have *separate indeterminate costs*, but they will likely entail *marginal* increased costs for local units of government and o*verall decreased* expenditures from the state, with some marginal cost increases for the Department of State (DOS)." (our *italics*)

The State Auditor's office did not receive a response from the **Department of Higher Education, Adair County, Boone County, Callaway County, Cass County, Clay County, Cole County, Jackson County, Jasper County, St. Charles County, Taney County,** the **City of Cape Girardeau,** the **City of Columbia,** the **City of Jefferson,** the **City of Joplin,** the **City of Kirksville,** the **City of Mexico,** the **City of Raymore,** the **City of St. Joseph,** the **City of Springfield,** the **City of Union,** the **City of Wentzville,** the **City of West Plains, Cape Girardeau 63 School District, Hannibal 60 School District, Malta Bend R-V School District, Mehlville School District, State Technical College of Missouri, University of Missouri, St. Louis Community College,** the **Jackson County Election Board,** and the **Clay County Board of Election Commissioners.**

Fiscal Note Summary

State governmental entities expect one-time costs of at least $1 million and possible ongoing costs. Local governments are expected to have costs of an unknown amount totaling at least $745,000 in one-time costs, $192,000 in annual costs, and $658,000 in costs per election.

RE: Petition approval request from Mary Anne Sedey regarding a proposed constitutional amendment to Article VIII, version 3 (2020-107)

Dear Auditor Galloway:

Enclosed please find an initiative petition sample sheet for a proposal to amend the Missouri Constitution filed by Mary Anne Sedey on August 8, 2019.

We are referring the enclosed petition sample sheet to you for the purposes of preparing a fiscal note and fiscal note summary as required by Section 116.332, RSMo. Section 116.175.2, RSMo requires the state auditor to forward the fiscal note and fiscal note summary to the attorney general within twenty days of receipt of the petition sample sheet.

Thank you for your immediate consideration of this request.

Sincerely,

John R. Ashcroft

cc: Hon. Eric S. Schmitt
Sheri Hoffman
Trish Vincent

It is a class A misdemeanor punishable, notwithstanding the provisions of section 560.021, RSMo, to the contrary, for a term of imprisonment not to exceed one year in the county jail or a fine not to exceed ten thousand dollars or both, for anyone to sign any initiative petition with any name other than his or her own, or knowingly to sign his or her name more than once for the same measure for the same election, or to sign a petition when such person knows he or she is not a registered voter.

NOTICE: You are advised that the proposed constitutional amendment may change, repeal, or modify by implication or may be construed by some persons to change, repeal, or modify by implication, the following Sections of the Missouri Revised Statutes: Sections 115.003 through 115.960. The proposed amendment revises Article VIII of the Constitution by amending Sections 5 and 7, and adopting four new sections to be known as Article VIII, Sections 24, 25, 26, and 27.

Be it resolved by the people of the state of Missouri that the Constitution be amended:

Section A. Article VIII of the Constitution is revised by amending Sections 5 and 7, and adopting four new sections to be known as Article VIII, Sections 24, 25, 26, and 27 to read as follows:

Section 5. Registration of voters [may be provided for by law] shall occur as specified herein. All laws governing registration shall be interpreted liberally to ensure, to the extent possible, that all eligible citizens be allowed to register to vote and to vote.

(1) The secretary of state shall establish a process to conduct automatic voter registration based on driver's license information and state issued nondriver's license information.

(2) The department of revenue shall, on at least a weekly basis, provide the secretary of state with a list of eligible citizens who have applied for, applied to renew, or changed the address related to a driver's license or state issued nondriver's license, are citizens of the United States, residents of Missouri, and meet the legal criteria to be eligible to vote in the State of Missouri. Such list shall contain any information required to register to vote under applicable law, and any available electronic signature information.

(3) The secretary of state shall designate the department of social services, the department of conservation, and the department of corrections to serve as sources for lists of citizens who are eligible to vote, any available electronic signature information, and any other information required to register to vote under applicable law.

(4) The secretary of state shall designate additional state agencies including:

(a) all agencies that have current data on citizenship, residency, and age of individuals;

(b) any agency that does or could provide applicants with the opportunity to affirm voter eligibility criteria as part of their agency transaction;

(c) any agency that has records of eligible citizens who would not otherwise be registered to vote; and

(d) any agency that is required to offer voter registration services under any other provision of law, including but not limited to Section 7 of the National Voter Registration Act, as amended.

(5) Based on the lists received under this section, the secretary of state shall provide lists of citizens who are presumptively eligible to vote to local election authorities. These lists shall be sent to local election authorities as often as required by law, but at least every thirty days, and fourteen days prior to any election. These lists shall include the names of presumptively eligible voters, the information required to determine whether an individual is eligible to vote, and any available electronic signature information. The local election authorities shall include such presumptively eligible voters on voter registration lists subject to existing verification procedures for determining whether an individual is eligible to vote. Local election authorities shall retain full jurisdiction and power to decline to register individuals not verified to be eligible to vote, and in accordance with applicable state and federal law, may remove the names of individuals who are no longer eligible to vote from voter registration lists.

(6) Regardless of the amount of time it takes to process the registration, an individual shall be deemed registered to vote on the day the local election authority receives the information from the secretary of state provided that such individual is later determined eligible to vote by the local election authority. Within seven business days of the local election authority receiving an individual's information from the secretary of state, the local election authority shall update its list of eligible voters and send notice of automatic registration to newly registered voters and provide the opportunity to decline registration. Such notice may be sent in the same manner and at the same time as voter identification cards or other communication required by law. If, after a period of thirty days, the notice declining registration is not returned to the local election authority, the individual's name shall remain on the voter registration list. Any time an individual declines registration the individual's name shall be

removed from the voter registration list. This subsection shall not be construed to prevent removal from voter registration lists by any other method allowed under state and federal law.

(7) The provisions of this section shall not be interpreted to invalidate any other method for voter registration.

(8) No individual who does not meet the legal criteria to be eligible to vote shall be considered to have caused a false or fictitious voter registration, if the record and signature of such individual is transmitted by the secretary of state to a local election authority pursuant to this section without the individual's affirmative consent. If such an individual is added to the voter registration list, the individual shall not be subject to any penalty under law. Upon determining such individual is not eligible to vote, the local election authority shall remove the individual from the voter registration list.

2. In order to vote in any election for which registration is required, the deadline for a person to be registered to vote in the jurisdiction of his or her residence shall be no earlier than 5:00 p.m. on the second Tuesday prior to the election, except with regard to covered voters and intrastate voters as defined by general election law. Intrastate voters may vote in their new jurisdiction if they are registered to vote in the State of Missouri.

3. Nothing in this section shall be interpreted to conflict with the Voting Rights Act of 1965, The National Voter Registration Act of 1993, The Help America Vote Act of 2002, or any other applicable federal law or regulation.

Section 7. All qualified [electors] voters of the state [who are absent, whether within or without the state,] may [be enabled by general law to] vote by absentee ballot without providing a reason at all elections by the people either in person or by mail starting forty-two days before an election. For the purposes of this section, the early voting period shall be the period when eligible voters may cast an absentee ballot in person. Procedures for voting by absentee ballot shall be the same as provided in general election law, except as provided herein.

(1) Voters who choose to vote by absentee ballot shall have the option to receive the absentee ballot in the mail or to vote in person using an absentee ballot during the early voting period. Voters who receive an absentee ballot in the mail shall be allowed to return their completed ballot and envelope by mail, or by dropping it off at any officially designated voting location during the early voting period or on election day. The local election authority may also provide additional options for returning or casting absentee ballots. Nothing in this section shall be construed to prevent a person who has received a ballot in the mail but has not returned a completed ballot from casting a regular or provisional ballot in person during the early voting period or on election day.

(2) Each local election authority shall make one or more locations available to issue absentee ballots and to receive completed absentee ballots during the early voting period. Any such designated location shall be open during the local election authority's regularly scheduled business hours and for at least eight hours on the Saturday and eight hours on the Sunday immediately prior to the election, except that the location shall be open for two hours before and two hours after regularly scheduled business hours during each of the six days before election day.

(3) Local election authorities may make absentee ballots available for voting in person during the early voting period at additional times and places beyond what is designated in subsection (2).

(4) Notwithstanding any other provision of law to the contrary, voters who cast an absentee ballot by mail shall be required to attest to and sign, whether by signature or mark, the following statement:

> I state under penalty of perjury that I am an eligible voter; that my signature and name are as shown on this envelope; that I will not cast more than one vote in this election; and that my ballot is enclosed in accordance with the provisions of the constitution and laws of this state.

However, there shall be no requirement that such signature be notarized or sworn to before the election official receiving the ballot, a notary public, other officer authorized by law to administer oaths, or any other witness.

(5) All qualified voters of the state shall be provided the opportunity to request to permanently receive absentee ballots in the mail for all future elections. An opportunity to sign up to permanently receive absentee ballots shall be provided, at a minimum, on the application for voter registration, via electronic means, and on the application to receive an absentee ballot.

(6) Absentee ballots postmarked or bearing an intelligent mail barcode traceable to a date of entry into the federal mail system on or before the day before election day shall be counted by the local election authority.

(7) Notwithstanding any other provision of law to the contrary, if an absentee ballot envelope is found to have a deficiency, the local election authority shall immediately notify the voter and shall allow the voter an opportunity to cure the deficiency at any time, but no later than seven days after the election. Notification to a voter shall first be attempted by phone or email, if the local election authority has such information, and then by first class mail.

(8) The secretary of state and all local election authorities shall make available a list of all voters who cast ballots under this section or Article VIII, section 24 of this Constitution. Such list shall include voter information that is a matter of public record. This list shall be provided in the same manner required by general election law.

Section 24. An absentee ballot of an overseas or uniformed services voter, as defined by general election law, shall be counted by the local election authority so long as the ballot is dated on or before election day and received by the local election authority within seven days of election day.

Section 25. The secretary of state in conjunction with the state auditor shall provide a recommendation to local election authorities for the best method to conduct a risk-limiting audit of election returns. Each local election authority shall adopt a method of risk-limiting audit for auditing election returns.

Section 26. A citizen who is at least 16 years old and otherwise meets all eligibility requirements of Section 2 shall be provided an opportunity to pre-register to vote as provided herein.

(1) Such individual may pre-register pursuant to the registration process in Section 5 of this Article; or

(2) Such individual may choose to register pursuant to any other registration procedure available under general election law.

(3) Notwithstanding pre-registration, such individual shall not be eligible to vote unless they will be 18 years of age or older on or before the day of the election in which they seek to cast a ballot.

Section 27. All provisions of this Act are severable. If any portion, clause, or phrase of this Act is, for any reason, held to be invalid or unconstitutional by a court of competent jurisdiction, the remaining portions, clauses, and phrases shall not be affected, but shall remain in full force and effect.

MISSOURI STATE AUDITOR'S OFFICE
FISCAL NOTE (20-107)

Subject

Initiative petition from Mary Ann Sedey regarding a proposed constitutional amendment to Article VIII. (Received August 9, 2019)

Date

August 29, 2019

Description

This proposal would amend Article VIII of the Missouri Constitution.

The amendment is to be voted on in November 2020.

Public comments and other input

The State Auditor's office requested input from the **Attorney General's office,** the **Department of Agriculture,** the **Department of Economic Development,** the **Department of Elementary and Secondary Education,** the **Department of Higher Education,** the **Department of Health and Senior Services,** the **Department of Insurance, Financial Institutions and Professional Registration,** the **Department of Mental Health,** the **Department of Natural Resources,** the **Department of Corrections,** the **Department of Labor and Industrial Relations,** the **Department of Revenue,** the **Department of Public Safety,** the **Department of Social Services,** the **Governor's office,** the **Missouri House of Representatives,** the **Department of Conservation,** the **Department of Transportation,** the **Office of Administration,** the **Office of State Courts Administrator,** the **Missouri Senate,** the **Secretary of State's office,** the **Office of the State Public Defender,** the **State Treasurer's office, Adair County, Boone County, Callaway County, Cass County, Clay County, Cole County, Greene County, Jackson County, Jasper County, St. Charles County, St. Louis County, Taney County,** the **City of Cape Girardeau,** the **City of Columbia,** the **City of Jefferson,** the **City of Joplin,** the **City of Kansas City,** the **City of Kirksville,** the **City of Mexico,** the **City of Raymore,** the **City of St. Joseph,** the **City of St. Louis,** the **City of Springfield,** the **City of Union,** the **City of Wentzville,** the **City of West Plains, Cape Girardeau 63 School District, Hannibal 60 School District, Malta Bend R-V School District, Mehlville School District, Wellsville-Middletown R-1 School District, State Technical College of Missouri, Metropolitan Community College, University of Missouri, St. Louis Community College,** the **St. Louis County Board of Elections,** the **Board of Election Commissioners City of St. Louis,** the **Kansas City Board of Election Commissioners,** the **Platte County Board of Elections,** the **Jackson County Election Board,** the **Clay County Board of Election Commissioners,** and the **State Auditor's office.**

Andrew Bergerson and Jared Wight provided information to the State Auditor's office.

Assumptions

Officials from the **Attorney General's office** indicated they expect that, to the extent that the enactment of this proposal would result in increased litigation, their office can absorb the costs associated with that increased litigation using existing resources. However, if the enactment of this proposal were to result in substantial additional litigation, their office may request additional appropriations.

Officials from the **Department of Agriculture** indicated no fiscal impact on their department.

Officials from the **Department of Economic Development** indicated no impact to their department.

Officials from the **Department of Elementary and Secondary Education** indicated this legislation does not impact their department.

Officials from the **Department of Health and Senior Services** indicated this initiative petition has no impact on their department.

Officials from the **Department of Insurance, Financial Institutions and Professional Registration** indicated that this petition, if passed, will have no cost or savings to their department.

Officials from the **Department of Mental Health** indicated this proposal creates no direct obligations or requirements to their department that would result in a fiscal impact.

Officials from the **Department of Natural Resources** indicated they would not anticipate a direct fiscal impact from this proposal.

Officials from the **Department of Corrections** indicated no impact. Based on their interpretation of this legislation, they would be required to provide a list of citizens who are eligible to vote to the Secretary of State upon request. Their response of "no impact" is based on this assumption. Should their interpretation be incorrect and the legislation would require them to actively track, manage, or report information, a fiscal impact to the department is possible.

Officials from the **Department of Labor and Industrial Relations** indicated this initiative petition does not appear to have a fiscal impact on their department.

Officials from the **Department of Revenue** indicated this initiative petition would cause increased operating costs in the General Revenue Fund of $83,483 for fiscal year (FY) 2021 for salary cots and Office of Administration - Information Technology Services Division (OA)-ITSD costs.

The Department of Social Services, Department of Conservation, Department of Corrections, and other state agencies as described in Section 5 (4) are also affected by this proposal.

IT Consultants	75	885.60	66,420

Section 5 (2)

The proposed constitutional amendment petition language requires the Department to provide, on at least a weekly basis, a list of eligible citizens who have applied for, applied to renew, or changed the address related to a driver license or nondriver license, are citizens of the United States, residents of Missouri, and meet the legal criteria to be eligible to vote in the State of Missouri. Such list shall contain any information required to register to vote and any available electronic signature information.

The Department assumes they will provide a regularly scheduled file of all driver license, nondriver license, and permit applicants who meet the minimum age criteria and who, based on application data entered, have submitted documents verifying United States citizenship. This file would include applicants who responded that they were currently registered to vote, applicants who responded that they were not registered and did not want to register to vote, and applicants who completed the voter registration applications at the time of license or permit application.

The "necessary" information is not defined, however the Department assumes that it will be required to send name, date of birth, address, at a minimum the last 4 digits of the social security number, and a copy of the applicant's signature for final voter registration processing.

The proposed language will require the Department to amend the current data files posted to the Secretary of State or develop a new file specific to automatic voter registration to include the digital image of the signature.

The requirement to submit a copy of the individual's signature will require the Department to amend current programs for on-line requests for change of mailing address since identity verification and signature collection are not currently required in this process.

The Department would be required to:

- Coordinate with the Secretary of State to develop requirements for the data and signature file specifications and file submission schedule.
- Coordinate with OA-ITSD to develop a data pull process for defining records for submission to Secretary of State.
- Coordinate with OA-ITSD to develop a secure process for tying the required signature file to the data file for submission to the Secretary of State.
- Test the file generation and transfer process to ensure all required data elements and signature are sent as required.

- Develop website information to link inquirers to the Secretary of State for information regarding the new automatic voter registration and provisions for declining automatic registration.
- Amend current programs for on-line requests for change of mailing address since identity verification and signature collection are not currently required in this process.
- Implement MEDL changes to the signature collection and certification processes for all transactions to include updates related to automatic voter registration.
- Implement modifications to license verification statement or generated money receipt or temporary driving privilege document to include additional information related to automatic voter registration.

Section 27

An individual who is at least 16 years old and otherwise meets all eligibility requirements to vote shall be pre-registered to vote as provided herein.

(1) Such individuals shall be pre-registered pursuant to the registration process in Section 5 of this Article.

(2) Such individual may choose to register pursuant to any other registration procedure available under general election law.

The Department would be required to:

- Develop file generation edits to ensure driver license, nondriver license, and permit applicants age 16 and over are included in the new weekly file sent to the Secretary of State.
- Implement MEDL changes to enable voter questions and responses to any eligible applicant age 16 and older.

Administrative Impact

To implement provisions of Section 5 (2) the administrative cost may be estimated as:

Personnel Services Bureau FY 2021

Update Webpage - Administrative Analyst III	10 hrs. x $19.80 =	$198.00

Driver License Bureau FY 2021

Requirements development and testing:

Administrative Analyst II –	360 hrs. x $17.13 per hr. =	$6,166.80
Management Analyst Spec. II –	440 hrs. x $20.57 per hr. =	$9,050.80
Revenue Manager -	80 hrs. x $20.59 per hr. =	$1,647.20
		Total = $16,864.80

Total	66,420	-	-

The department also provided the following comments:

Section 5 (2)
For purpose of this fiscal note the Department assumes that they will apply the same requirements related to automatic voter registration specified for new and renewal applicants to individuals applying for a duplicate, reprint or replica driver license, nondriver license, instruction permit, or commercial learners permit. If it is not the sponsor's intent to include duplicate transactions, the Department recommends the sponsor amend the language to specifically prohibit.

The Department assumes it is not the sponsor's intent to forward record updates derived from other mailing address updates sources such as National Change of Address files, courts or documentation received from sources other than the applicant.

The proposed language will require the Department to amend the current data files posted to the Secretary of State or develop a new file specific to automatic voter registration to include the digital image of the signature when the application or request for update included collection of the individual's signature.

The requirement to submit a copy of the individual's signature will require the Department to amend current programs for on-line requests for change of mailing address since identity verification and signature collection are not required in this process.

Section 27
The Department assumes this minimum age applies to the file transfer to Secretary of State and will not change current voter registration application provisions which limit completion of an application to persons age 17 ½ years of age or older with a certification that they will be 18 years of age on or before election date.

Officials from the **Department of Public Safety - Office of the Director** indicated they see no fiscal impact due to this initiative petition.

Officials from the **Department of Social Services** indicated they do not anticipate a fiscal impact as a result of this initiative petition.

Officials from the **Governor's office** indicated there should be no added costs or savings to their office.

Officials from the **House of Representatives** indicated no fiscal impact to their office.

Officials from **Department of Conservation** indicated no adverse fiscal impact to their department would be expected as a result of this proposal.

Officials from the **Department of Transportation/Missouri Highways and Transportation Commission** indicated this initiative petition will have no fiscal impact, as Article IV, Section 30(b) of the Missouri Constitution limits the use of state revenue

derived from highway users (SRHU). Registering citizens to vote does not relate to the design, construction, maintenance, and operation of the state highway system.

Officials from the **Office of Administration** indicated this proposal amends Article VIII of the Constitution of Missouri by amending Sections 5 and 7 and adopting four new sections.

This proposal requires the Secretary of State to establish a process to conduct automatic voter registration based on driver's license information and state issued nondriver's license information. Applicable state agencies shall provide to the Secretary of State lists of citizens eligible to vote, any available electronic signature information, and any other information required to register to vote. The Secretary of State shall provide lists of citizens who are presumptively eligible to vote to local election authorities. Local election authorities shall include such presumptively eligible voters on voter registration lists subject to existing verification procedures for voter eligibility. Individuals automatically registered to vote shall be provided an opportunity to decline registration. Individuals automatically registered to vote who are not eligible to vote shall not be subject to any penalty, and the local election authority shall remove any such individuals from the voter registration list. The deadline for voter registration shall be no earlier than 5:00 p.m. on the second Tuesday prior to the election, except with regard to covered voters and intrastate voters. Intrastate voters may vote in their new jurisdiction if they are registered to vote in Missouri.

This proposal provides that all qualified voters of the state may vote by absentee ballot without providing a reason either in person or by mail starting 42 days before an election and specifies how local election authorities are to administer absentee ballots. All qualified voters of the state shall be provided the opportunity to request to permanently receive absentee ballots in the mail for all future elections. An absentee ballot of an overseas or uniformed services voter shall be counted by the local election authority so long as the ballot is dated on or before election day and received by the election authority within 7 days of election day. The Secretary of State and all local election authorities shall make available a list of all voters who cast absentee ballots.

This proposal requires the Secretary of State in conjunction with the State Auditor to provide a recommendation to local election authorities for the best method to conduct a risk-limiting audit of election returns. Each local election authority shall adopt a method of risk-limiting audit for auditing election returns.

The proposal provides that an individual who is at least 16 years old and otherwise meets all eligibility requirements to vote shall be pre-registered to vote. Such individuals are prohibited from casting a ballot until they meet all voter eligibility requirements.

This proposal should not result in additional costs for their office.

Officials from the **Office of State Courts Administrator** indicated there is no fiscal impact on the courts.

Officials from the **Missouri Senate** indicated they anticipate no fiscal impact.

Officials from the **Secretary of State's office** indicated this petition would implement an automatic voter registration program. The bill would require the Department of Revenue (DOR) and other agencies to transmit to the Secretary of State (SOS) records containing information of eligible voters, based on agency records (such as driver's license applications in the case of DOR). This information is then made available to each local election authority, which will then send notice to each person giving them the opportunity to decline to be registered. For the purposes of this fiscal note, their office assumes that this information will be transmitted in an electronic format.

To implement these requirements, significant programming changes would need to be made to the centralized voter registration database (MCVR) to develop multiple new interfaces, to allow electronic transmission of electronic agency data, to sync agency data with currently existing voter information in MCVR, to allow local election authorities to generate and send notices of opportunity to decline registration, to create a queue of individuals who have been sent notice of opportunity to decline registration, and to allow information to be transferred between counties. Based on the implementation of similar systems in other states, this section would result in an estimated one-time cost of $1,000,000 in fiscal year (FY) 2021.

This bill requires local election authorities to send notice of opportunity to decline registration to each individual that is not currently a registered voter. This is a new responsibility that must be funded by the state under Article X, Section 21 of the Missouri Constitution. Based on a recent comparison of voter records to driver's license records, a total of 743,280 individuals were found to have a driver's license but were not identified as registered voters. Sending notice to each individual would cost $0.90 to mail ($0.55 for outgoing postage as of January 2019, $0.35 for the endorsement on the paid return postcard) plus the costs of printing. Postage would amount to $668,952 and printing is estimated at $33,270, for a total that could reach or exceed $702,222 (depending on the specific number of persons identified by DOR and other agencies) beginning in FY 2021.

Future notice mailings would incur costs to the state of Missouri. The cost of notice mailings in future fiscal years is unknown due to several variable factors including voter registration rates and postage cost increases.

This petition also requires local election authorities to maintain one or more locations for eight hours on the Saturday and Sunday before each election to facilitate absentee voting. While each local election authority already maintains four hours of Saturday operation as required by current law, this increase would require additional staffing costs for the equivalent of 348 judge-days statewide (two judges for 1.5 days in 116 jurisdictions). Assuming an average payment of $125 per judge-day, this would amount to $43,500 per election beginning in FY 2021.

Additionally, this petition requires local election authorities to maintain office hours for two hours earlier and two hours later than their normal business hours for six days prior to

an election (while the wording is ambiguous, their assumption is that this refers to normal business days). This increase would require additional staffing costs for the equivalent of 696 judge-days statewide (two judges for the equivalent of 3 days in 116 jurisdictions). Again assuming an average payment of $125 per judge-day, this would amount to $87,000 per election beginning in FY 2021.

Their office is being conservative in assuming all new costs will be subject to Article X though there may be some legal uncertainties on this point.

Officials from the **Office of the State Public Defender** indicated this initiative petition will not have any impact on their office.

Officials from the **State Treasurer's office** indicated no fiscal impact to their office.

Officials from **Greene County** indicated the following estimate is based on U.S. Census Data that estimates current county population at **291,923**. It is estimated that **18.7%** of the population is under **16** years old, which accounts for **54,515** residents. They have on average **190,000** registered voters, of which about **30,000** (**16%)** are inactive, meaning their address is no longer verified but registered nonetheless and so they are included as part of the number below.

R's = Residents
RV's = Registered Voters
yrs = Years
PV's = Potential Voters
MC = Mailing Cost
CPC2P = Cost Per Card to Process
FTH = Fulltime Hire
PTH = Part-time Hire
AP = Annual Pay

291,923 R's – **50,415 R's** under **16 yrs** = **241,508 R's 16 yrs** or older

241,508 R's 16 yrs or older – **190,000 RV's = 51,508 PV's**

51,508 PV's x .50 MC = $20,000 + fees **= $25,754**

51,508 PV x 1.06 CPC2P = $54,598.48

If they have approximately **51,508 PV's** not registered based on the number above, and a Voter ID card is mailed to each voter as stated in the petition language at **.50** apiece, it will be a **$25,754 MC**. How will that cost be delineated in subsequent mailings is very hard to predict, but they do anticipate it will be reduced over time from the original estimate as more residents become registered.

The actual time spent to fully process any new Voter ID card is estimated at **$1.06 CPC2P**. This adds an additional **$54,598.48** to the cost when it is multiplied by the estimated **51,508** voters eligible to be registered.

There is also in the petition language additional requirements. This includes allowing new voters to register up to 2 weeks prior to an election, absentee mailing changes and risk-limited auditing requirements post-election. These additional requirements will at a minimum require an additional **2 FTH** and **1 PTH** for the office to ensure the ongoing administrative duties the petition requires will be completed on time for voters. This additional cost per **FTH** will be **$24,689.60** per hire for their annual pay and **$12,026.90** annual pay for the **PTH**. The total annual cost for two fulltime hires will be **$49,379.20.**

51,508 PV's x .50 MC	**= $25,754**
51,508 PV x 1.06 CPC2	**= $54,598.48**
2 FTH x $24,689.60 AP	= **$49,379.20**
1 PTH x $12,026.90 AP	**= $12,026.90**
Total:	= **$141,758.58**

The total estimated initial cost for Greene County for **IP 20-107** proposing to amend Article VIII, version 3, will cost Greene County **$141,758.58** with a minimum ongoing cost of **$61,406.10** for personnel. There will be other ongoing cost to include COLA increases, Step increases for employee pay as well as anticipated ongoing administrative cost that cannot be predicted at this time.

Officials from **St. Louis County** indicated this initiative petition does not appear as though it would have a direct fiscal impact on St. Louis County Government. However, there is the possibility that the St. Louis County Board of Elections would incur additional operational expenses and would seek additional appropriations from the County General Fund to cover the expenses. The Board of Elections intends to make a separate reply.

Officials from the **City of Kansas City** indicated this will have no fiscal impact on their city.

Officials from the **City of St. Louis/Board of Election Commissioners City of St. Louis** indicated this initiative petition would have a negative fiscal impact.

The Board of Election Commissioners is supportive of this initiative, but believes that the increase in costs would be hard to manage as a result of this amendment. Following are rough estimates for expected increases:

1) Hiring 2 full-time employees at $32,000 each.
2) Hiring 4-6 temporary staff members in the Absentee department for 10 40-hour work weeks at $15.00 an hour.
3) Printing and postal costs for applications and ballots will triple in the Absentee department, increasing expenses by $305,000.

4) Printing and postal costs for missing information letters and ENC notices will triple in the Registration department, increasing expenses by $1,205.
5) Increase in Business Reply Mail Return costs for absentee application and ballots will increase by $75,000.
6) Election day absentee ballot counters will triple in size, increasing costs by $15,000.
7) Ballot order will increase due to the increase in registrations, but the fiscal impact is tough to estimate.
8) Registration overtime costs will increase for data entry of new registrations but fiscal impact is tough to estimate.
9) Cost of supplies, such as paper, pens, etc. would increase by about $5,000.

The Director of Board of Election Commissioners noted that these are merely rough estimates and the actual fiscal impact is hard to determine.

Officials from **Wellsville-Middletown R-1 School District** indicated they do not see any fiscal impact of these petitions that is unique to their district. Any costs related to these may come out of general revenue which will have a negative impact to some degree on all state funded entities.

Officials from **Metropolitan Community College** indicated no fiscal impact.

Officials from the **St. Louis County Board of Elections** indicated they predict this amendment would have a fiscal impact of $47,500 per County-wide election, with an additional $9,000 annual cost. Having their office open for an additional 12 hours on the weekend and 16 hours on the weekdays, and at a rate of $5,000 per every 8 hours, this would cost $17,500. The additional absentee costs in the amendment are estimated to be about $30,000. The annual cost of sending voters postage cards to decline automatic registration would be about $9,000. It is important to note that a significant portion of all of these costs could be offset by the reduced need for polling places due to early voting.

Officials from the **Kansas City Election Board** indicated if this initiative petition is passed, election costs definitely increase at least $50,000 per election for additional postage, printing, training, staff overtime, temporary employees, legal notices and location rentals to process these additional services. Additionally, at least 2 to 4 permanent staff would need to be hired at $35,000 each, including benefits.

Officials from the **Platte County Election Board** indicated the additional hours proposed in the petition would add about $5,000 to the cost of an election.

Officials from the **State Auditor's office** indicated the proposed language, if implemented, should have no fiscal impact on their office. Any impact can be absorbed through current appropriations.

Re: Fiscal-Cost Estimates for "VOTE 2020" Ballot Initiatives in 16 Variations (20-072 through 83 and 20-088 through 91)

To the Honorable Nicole Galloway, CPA, Missouri State Auditor:

Pursuant to Title IX Section 116.175 of the Missouri Constitution, we hereby submit this statement of fiscal impact to advise you and your office in estimating the fiscal cost of the "VOTE 2020" petition-based ballot initiatives to amend the Missouri Constitution. The information contained in this letter is relevant to all 16 petition variations: 20-072 through 83 and 20-088 through 91.

Drew Bergerson is a Professor of History and Jared Wight is a System Administrator, both at the University of Missouri-Kansas City. Although we submit this opinion purely as private citizens, we used our experience as social and computer scientists to do so.

We surveyed the relevant legislation proposed to the Missouri General Assembly for ten or more years, focusing especially on any associated fiscal notes from the State Auditors. We interviewed local election officials in the Kansas City and St. Louis areas. We reviewed the reports of major think tanks, non-profit organizations, and scholars who specialize in electoral practices. And we considered the reports provided by counties and states like California, Colorado, Michigan and North Carolina who recently implemented similar policies.

Below we summarize our research in seven points, including information particular to one or more variations of the ballot language where relevant.

1. **Automatic voter registration will likely incur one-time infrastructural costs of approximately $50-60,000 but are actually "unknown".**
   In the fiscal note for the recent bill with the most detailed description of one-time costs (HB 1934 McCann Beatty, 2018)[1], the State Auditor anticipated significant one-time expenses for extensive technological improvements to the Missouri Voter Registration Database ($1,000,000)[2], software programming ($27,540-$85,050), administrative costs for impacted departments ($7,228-$8,700), and employee training ($0-unknown). Missouri, however, has no reason to rely solely on its own resources for modernizing its election technologies as it has access to approximately $7.5 million for these purposes from the Federal Government.[3] According to the U. S. Election Assistance Commission, states must match Federal funds at 5%, but they may use those funds to improve elections by adding cybersecurity systems, cybersecurity training, new voting equipment with paper ballots, and post-election risk-limiting audit systems (#2 below).[4] It is therefore reasonable to assume that the fiscal impact *on the state budget* for the infrastructural items listed above would be only 5% of the total expense, or approximately $50-60,000. That said, the range of estimated costs is wide depending on how automatic voter registration is implemented in terms of infrastructural improvements. So, a more accurate assessment of cost would be "unknown".

2. **Risk-limiting audits will incur "unknown" up-front and ongoing costs.**
   For risk-limiting audits, Missouri has access to the same Federal funds at a matching rate of 5% for the purpose of upgrading our technology for cybersecurity etc.,[5] so it is reasonable to assume that infrastructural improvements for risk-limiting audits would be included in the estimates listed in #1 above. Long-term, there may be ongoing costs or even net savings; but as in #1, it is impossible to estimate them

---

[1] See also HB29, Stacy, 2019; HB 731 Manlove 2019; HB994, Price, 2019.

[2] According to Common Cause-Massachusetts, *Automatic Voter Registration Cost Report*, 05.24.2018, similar one-time improvements cost approximately $200,000 in Oregon and $434,117 in Vermont. According to WBUR News, MA State Representative John Mahoney estimated in 2018 that implementation of the Massachusetts automatic voter registration legislation would cost $500,000 up front. In the fiscal cost analysis of the Voter Access and Modernized Elections Act (HB13-1303), Colorado anticipated $644,000 to update SCORE, its Statewide Voter Registration System. The larger figure of $1,000,000 for Missouri is reasonable given the relatively backward state of our election technologies (also as per the Fiscal Note for HB 731 Manlove 2019).

[3] According to the U.S. Election Assistance Commission's Grant Expenditure Report for Fiscal Year 2018, published April 4, 2019, Missouri has spent all of the funds plus interest distributed starting in 2003 by the EAC to states under Section 101 of HAVA 2002: $6,829,277. Section 251 funds, known as Requirements Payments, were distributed to States using a formula found in HAVA based on a percentage equal to the quotient of the voting-age population of each State and the total-voting age population of all States. Missouri has spent $54,177,399, leaving a balance of $472,833 including interest. In March 2018, however, Congress provided an additional $380,000,000 through the Consolidated Appropriations Act of 2018. Missouri has currently spent $224,922, leaving a balance of $7,037,285 including interest.

[4] *Ibid.* States have until September 30, 2023 to request their funds and get the money in their accounts. Missouri spent most of its allocated 2018 HAVA Funds to implement cybersecurity enhancements that protect against attempts to penetrate the Missouri Centralized Voter Registration System. The state also hosted the National Election Security Summit attended by federal, state and local election authorities to discuss practical ways to mitigate threats and vulnerabilities.

[5] *Ibid.*

without knowing which specific kind of risk-limiting audits will be implemented. It makes sense to list them as "unknown".

3. **The first round of "opt-out" mailings for automatic voter registration will incur new costs but they are "unknown".**
   Prior bills with fiscal notes (HB 1934 McCann Beatty, 2018; HB29, Stacy, 2019; HB 731 Manlove 2019; HB994, Price, 2019) offer a wide range of estimates for the initial set of "opt-out" mailings based on the number of non-registered voters in government records.[6] Yet scholars have developed new techniques for producing more accurate lists by winnowing "deadwood" from existing voter rolls, which could reduce costs.[7]

   > **[*Included in some ballot variations*: The pre-registration of 16-17-year-old eligible voters will incur one-time costs of approximately $134,800.**
   > There will be approximately 100,000 potential new pre-registrations in the first year of 2021.[8] Based on a recent fiscal note (HB 731 Manlove 2019), we estimate one-time fiscal costs of $90,000 for postage @ $0.90 each plus printing cost of $44,800 @ $.0448 per person for a total of $134,800.]

   Due to new techniques for more accurately identifying eligible voters, it is impossible to precisely estimate the fiscal impact of this legislation. These one-time expenses are best described as "unknown".

4. **The long-term cost of automatic voter registration is also "unknown."**
   Prior fiscal notes offer a wide range of estimates for long-term costs, mostly for printing and mailing costs. Kansas City was an outlier, anticipating new staff positions at much larger expense ($180-260,000); but most local election authorities anticipated $0 impact.[9] Similarly, no additional staff was required for implementing automatic voter registration in Colorado, Oregon, and Vermont.[10] Oregon, which has a comparable number of non-registered voters (539,532) to Missouri (528,782), has

---
